Intelliflo VF

The intelligent pool pump that changed all the rules

IntelliFlo® VF High Performance Pump is the first pump to deliver the exact amount of water needed to perform different tasks. It is adaptable to any pool, spa or water feature application. With its onboard computer, your pool professional simply programs the rate of flow to suit the application. It can be programmed to manage multiple functions. And, it automatically sets itself and adjusts as needed since it is constantly monitoring water flow and electrical current.

An Eco Select™ Choice: Standard pool pumps can consume as much energy as all other home appliances combined? Often costing more than \$1,000 per year! IntelliFlo® VF High Performance Pump pumps can typically cut energy use by 30% to 90%, generally saving \$621 to \$1,356 in utility costs annually? More where rates are higher than average. *

*Savings based on comparison pump running between 6 and 12 hours per day at the national average of 15¢/kilowatt hour in a 20,000 gallon pool.

Features

- Dramatically reduces energy consumption by up to 90%, typically saving hundreds each year
- Reduced operating noise
- Automatically monitors and adjusts to pool conditions to provide the longest service life of any pump in its class
- Links to additional water features and equipment to offer expanded control capabilities

Intelliflo VS + SVRS Variable Speed with Safety Vacuum Release System

The world's most intelligent pumps are a "no brainer"

A breakthrough in energy-efficiency and service life, the IntelliFlo® pump allows programming for 4 different speeds for different pool, spa or water features applications. By dialing in the minimum speed required for a task, the pump works less and uses less energy. Pump speeds are easily adjusted with the push of an up or down arrow button.

The IntelliFlo® VS+SVRS is the revolutionary way to reduce energy costs and meet the desire for the safest pool possible. This "intelligent" pump's 8 speeds can help cut the pool portion of utility bills 30% to 90% and save you hundreds of dollars per year and thousands of dollars over its life. On the safety front, you install a Safety Vacuum Release System (SVRS) that senses drain blockage and automatically shuts the pump off in seconds to provide an important layer of entrapment protection.

An Eco Select™ Choice: Standard pool pumps can consume as much energy as all other home appliances combined? often costing more than \$1,000 per year! IntelliFlo pumps can typically cut energy use by 30% to 90%, generally saving \$621 to \$1,356 in utility costs annually...more where rates are higher than average.*

*Savings based on comparison pump running between 6 and 12 hours per day at the national average of 15 cents/kilowatt hour in a 20,000 gallon pool.

Features

- Typically slashes energy costs up to 30% or more
- Easy to program and operate
- Offers ultra-quiet operation ... just 7 - 10 decibels or half a human whisper
- Operates at the minimum speed required for unmatched longevity
- Compatible with other pool systems, including EasyTouch®, IntelliTouch® and SunTouch®

Pentair

Superflo

Efficient, quiet, rugged and versatile

The SuperFlo® Pumps are a product of nearly 50 years of innovative hydraulic engineering. The result is an ability to move more water more efficiently for lower operating cost and super-quiet operation. Plus, by performing with less effort, there's simply less wear and tear – and that means longer life for a higher return on your pump investment.

Features

- SuperFlo by Pentair Pool Products® is a direct replacement for the Hayward® Super Pump®*
- Extremely quiet operation
- Unionized fittings (1.5 in. internal slip and 2 in. external slip)
- Cam and Ramp™ Lid
- Heavy-duty, high service factor 56 square flange motor
- Integral volute and pot reduce hydraulic noise

Pumps

Pentair Commercial

EQ Series Commercial Pumps

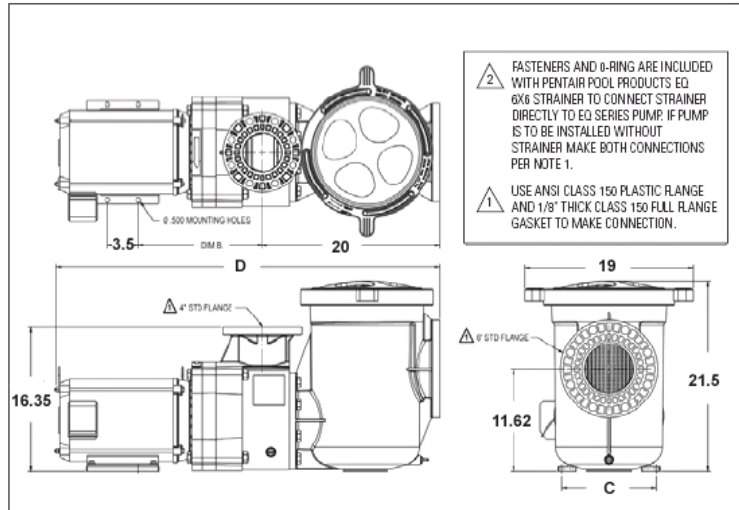

EQ Series pumps are the high-performance plastic injection-molded pumps suited for a wide range of commercial applications.

Features:

- Exclusive impeller design that provides true breakthrough performance and longer motor life.
- Clear Cam and Ramp™ lid for added service convenience.
- Designed in every detail for maximum efficiency.
- The only non-corrosive, all-plastic pump designed exclusively for commercial applications.

Pumps

Sta-Rite

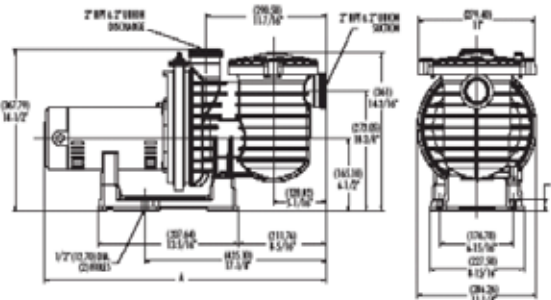

Max-E-Pro Pump

Max-E-Pro Pumps

Over 30 years ago, Sta-Rite introduced the first thermoplastic swimming pool pump. Those innovations continue today from the industry's top builder of high-quality pumps. The Max-E-Pro™ is Sta-Rite's premier pump and is featured in many showcase pool installations. It didn't get there by chance. Pool professionals prefer the Max-E-Pro for its powerful, efficient performance and extremely quiet operation.

- Plumbing Flexibility - 2" ports with internal and external threads facilitate fast, easy installation.
- Fast Cleaning - New Quick-Lock trap ring, with a permanently lubricated O-ring, permits fast access to strainer basket. "See-thru" lid lets you check for debris without lifting a finger.
- Top Efficiency - Performs more work than pumps of equal or greater horsepower. Models available from 1/2 to 3HP.
- Extremely Quiet - Specially designed base dampens sound and vibration.

Heavy Duty - Viton® shaft seal stands up to all chemicals.

Sta-Rite

Dyna-Glas

The Sta-Rite Dyna-Glas is a rapid, self priming, medium head pump in 0.5hp through 1.5hp with an extra large, integral hair and lint strainer. The ideal pump where high flow and quiet operation are required. Precision molded from a proprietary blend of glass-reinforced thermoplastic that is highly corrosion resistant. The Sta-Rite Dyna-Glas pump comes packed complete with imperial unions.

- Large-Capacity Trap - With it's "see through" lid, it provides superior convenience in keeping debris out of your pool.
- Finger Opening Drain Plug - Makes for tool free winterizing and service.
- Energy Efficient Motor - and impeller/diffuser design enables the dyna glas
- to quietly move a lot of water while consuming very little energy.
- Extremely Quiet - Specially designed base dampens sound and vibration.

Pumps

Sta-Rite

Above Ground Pool Pump

ABG Series Pumps are engineered for peak performance and year-after-year reliability. They are constructed from our rugged Dura-Glas[®], an exclusive thermoplastic composite resin specially formulated to endure weather extremes and ultraviolet rays. Pool professionals highly recommend them for their performance, durability, and extremely quiet operation. Specially-designed wear ring prevents large debris from impeding water flow or locking up impeller.

- Typical Installation – Ideal for aboveground pool
- Years of Service – Stands tough against temperature and weather extremes
- High-Flow – Designed to move large amounts of water at lower restrictions
- One-piece Integral Trap/Volute – Designed for easy cleaning of hair, lint, etc., and quick servicing
- External Threads – Discharge port features external threads for quick-connect unions

Hayward

Northstar

Designed for today's most demanding installations, the **NorthStar** sets a new standard of performance for swimming pool pumps. Performance-designed to maximize flow and minimize noise, simplify service and installation, the NorthStar will be the pump for the new millennium. Exclusive features such as a high efficiency motor, CPVC unions, and Hayward's new patent pending Quad-Lock[™] seal design will make NorthStar the leading pump choice of all pool professionals.

- Save electricity and money through high-flow characteristics combined with low-watt usage
- 1 1/2-hp NorthStar offers the same performance as a 2-hp competitive models
- Quiet operation from the lowest-decibel pump on the market
- 220-cubic inch straining basket extends time between cleanings
- Quad Lock[™] connections make installation and service fast and easy.
- No tools required
- Exclusive motor design allows the motor to run 20% cooler
- High profile base elevates pump for heavy rain environments

Jandy

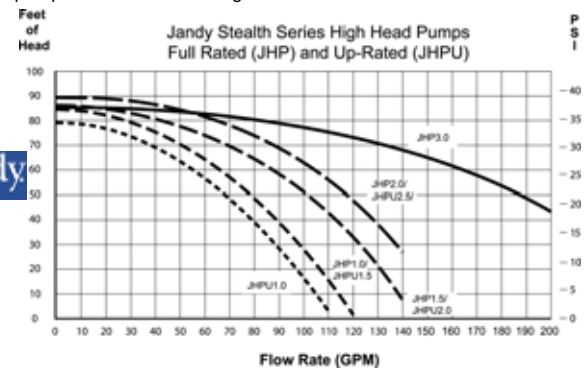

Stealth Pump

Providing superior performance and efficiency while incorporating "Quiet Technology," Jandy's re-designed Stealth takes pool and spa pumps to the next level. The new Stealth pump is the most powerful and most efficient pump in its class. It is designed for trouble-free installation and maintenance and will easily meet all

Product Features

- "Quiet Technology" is incorporated into every pump. This proprietary design controls the flow dynamics within the pump, resulting in less noise.
- Our basket is the largest trap basket in the industry. It fully maximizes the hydraulic flow by holding more debris and is easy to maintain.
- The Stealth pump is powered with an energy efficient motor that saves up to 20% on energy costs.
- The Stealth comes standard with several great features including 2 by 2 1/2 (2 1/2 by 3 on 3.0HP) quick-connect unions, a flared base for easy anchoring.

Plus HP Pump

The new Jandy Plus Series of pumps adds many PLUS features to pool and spa pumps. The new Plus HHP features an enlarged strainer basket to optimize hydraulic flow and increase debris-holding capacity. Our clear lid with cross-rib handles makes opening and cleaning easy, without the need for tools. Quick connect unions and double drain plugs make service and winterizing a snap.

Product Features

- The compact body of the PlusHP takes up less space making it the perfect pump for small equipment pads. They are great for replacement pumps or pool and spa renovations.
- "Quiet Technology" is incorporated into every pump. This proprietary design controls the flow dynamics within the pump, resulting in less noise and a quiet operation.
- The PlusHP offers many great features including 2 by 2½" quick-connect unions, a flared pump base for easy anchoring, and an ergonomic cam-lock lid with easy to read aligning indicators.

Pumps

Little Giant

Submersible Pumps 577301

This versatile pump includes a stabilizing plate and automatic switch, both of which are removable, allowing the pump to be used in a variety of other applications. Automatic switch activates in approximately 2-1/4" of water; "off" level is approximately 1-1/2". Also has manual operating mode allowing it to pump down to 1/8". Includes garden hose adaptor. 25 ft. power cord on pump and switch.

Features

- _ Automatic pool cover drainage
- _ 1700 gallon per hour capacity
- _ Activates in approximately 2" of water
- _ 25' power cord
- _ Wide base for stability
- _ Mechanical float for dependability
- _ 1" FNPT discharge w/garden hose adaptor
- _ 23' maximum lift

Construction

- _ Motor — 1/3 HP permanent split capacitor
- _ Maximum Flow Rate — 1700 GPH @ 1'
- _ Maximum Head — 23'
- _ Intermittent Liquid Temp. up to 120° F
- _ Intake — Screened
- _ Discharge — 1" FNPT
- _ Housing — Glass-filled polypropylene
- _ Electrical — 115V, 25' power cord

Quad DE Filter

Quad DE™ Filter

The Quad DE™ gives provides the most efficient filtration possible, with the added convenience of cartridge media. This filter features four easily accessible and removable D.E. cartridges that simplify maintenance and save your time.

- Large-capacity cartridges provide maximum filter surface area
- for greater dirt-trapping capacity and longer intervals between cleaning
- Three simple cleaning options to choose from—backwash and recharge like traditional DE filters, remove and rinse off the DE cartridges, or remove the lid, leave the DE cartridges in place, open the drain plug, and rinse
- Super-slick cartridge surfaces allow dirt to easily rinse off

Cartridges are designed with slick surfaces so dirt easily rinses off. Remove and rinse, or rinse in place. Or, backwash and re-charge like a traditional D.E. filter.

Note: Must use a HIFlow™ Valve (Part # 261050) or Slide Valve (Part # 263034 or Part # 261165) when plumbing filter with a backwash valve.

Tagelus Sand Filter

Tagelus Sand Filter-Setting the standard for water quality and long life

A fiberglass tank for strength and durability, easy-to-operate six-position valve, and proven sand filtration technology make the **Tagelus** an excellent choice for efficient cleaning. The TAGELUS also features a large, easy-to-access drain for fast, easy winterizing. For long life, minimal maintenance, and trouble-free performance, the TAGELUS sand filter has no equal. **Not NSF** approved.

- Special lateral design provides superior flow characteristics long filter cycles for economical operation
- Maximum Operating Pressure 50 psi
- Combination water and sand drain makes servicing and winterizing fast and easy
- 40, 50, and 60D models standard with plastic clamp

Sta-Rite Cartridge

PLM Cartridge Filter

Sta-Rite's modular media filtration is the perfect match for the small in-ground and above-ground pool markets. Advances in media technology and balanced flow design provide dirt-loading capabilities up to 15 times greater than sand filters of equivalent size. Virtually maintenance-free operation for today's pool owner.

- Withstands Weather Conditions - Made of thermoplastic, corrosion resistant materials that stand up in hot or cold weather.
- Easy to Open - Posi-lok® ring allows fast and easy access to filter media.
- Fast Maintenance - One piece filter makes seasonal cleaning a snap.
- Modular Media available in five sizes - 100, 125, 150, 175 and 200 sq. ft. filter areas.

Posi-Flo II Cartridge Filter

The **Posi Flo II** tank body is composed of Dura-Glas[®], a fiberglass reinforced thermal plastic which provides totally non-corrosive performance. Single element design has the patented balanced flow design for pressure equalization and lower tank height.

- Needs Cleaning Less Often - Holds more dirt per square foot than similar filters of most other manufacturers.
- Thermoplastic Tank Construction - Makes the Posi-Flo II corrosion proof, weather resistant, lightweight, yet exceptionally strong.
- Easy to Clean - A quick twist of the wrist gives you easy access to the filter media.
- Landscape Friendly - The Posi-Flo II has a sleek black profile that blends well with any architectural or landscaping design.
- Available in Four Sizes - 50, 70, 100, and 135 sq. ft. filter areas.

System 3 Cartridge Filter

Sta-Rite expanded Posi-Flo[®] cartridge design to make **System 3** technology possible and Ultra Capacity Filtration[®] a reality. System 3 Modular Media brings a whole new class of filtration to the pool and spa industry. By incorporating the latest in media science, perfectly balanced flow and an integral manifold design, System 3 filtration puts totally carefree operation within reach of today's pool owner.

- Holds 50 times more dirt than a sand filter.
- Less Cleaning Needed - Gathers and holds more dirt so you clean less often.
- Opens Easily - The split tank design allows for convenient access for cleaning or changing filter media.
- Designed for Safety - the use of Posi-lok[®] clamps enables safe, easy access to filter.
- Durable, Lightweight and Corrosion Resistant - Dura-Glas[®] exterior.

Jandy Cartridge

Cardridge Filter CL- Series

Jandy's large cartridge filters set the benchmark in cartridge filtration. They are technologically advanced and filled with many user-friendly features. The large cartridge filter design takes advantage of the filter's total surface area, providing the clearest possible water and extended cleaning cycles. The new **CV** filter is designed to work more efficiently with other Jandy products by incorporating the Versa Plumb system. This filter is equipped for high flow rates and optimum hydraulic performance. Both **CV** and **CL** large cartridge filters are constructed of durable, corrosion-resistant, heavy duty high-tech polymeric materials for long-lasting performance. These filters are both available in 340, 460 and 580 square foot models.

Heaters

Sizing Chart

Heater Size Chart

All pool heaters, from the small 100 (100,000 btu) unit to the largest 405's (405,000 btu's of gas usage per hour) will heat your pool. The smaller heaters are slower to heat, and will operate more often to keep up with the output of larger heaters. Larger heaters are a small bit more efficient than the smaller pool heater units. Use of a pool cover to retain heat and installing fences or other wind* obstructions can reduce demands on the pool heater.

If you are trying to heat a pool/spa combo, a 400 btu pool heater is usually used for fast (15 - 30 minutes) heat up of the spa.

Ask yourself a question about your anticipated usage patterns. If you will be heating intermittently, for example, turning on the heater on Friday, and turning it off on Monday, then a quick heat up is required. Heaters only add 1 - 3 degrees of heat per hour to the average pool. A larger heater is best for this usage pattern. If you expect to be maintaining a temperature by setting the thermostat, and maybe adding a few degrees in the evening or on weekends, then smaller sizes of pool heaters can be used.

Use the chart below as a guideline in **sizing a heater to your pool size**. Factor in the usage patterns and other considerations above and then consider going one size larger for good measure

Size Heater	Gallons in Pool	Sq. Ft. Surface Area of Pool
100 - 200 BTU heaters	1,000 gals to 10,000 gals	up to 300 sq ft
200 - 300 BTU heaters	10,000 gals to 20,000 gals	up to 500 sq ft
300 - 400 BTU heaters	20,000 gals to 40,000 gals	up to 800 sq ft
400 BTU heaters	40,000 gals to 80,000 gals	up to 1200 sq ft

*wind is the largest heat thief around your pool

This chart shows the **total degree** rise expected

Size	12' x 24'	14' x 28'	16'x32'	18' x 36'	20' x 40'
200,000	40	35	30	25	15

MasterTemp

Ultra-high performance in a compact, quiet and eco-friendly design
Featured Highlights

- Controls rotate to 3 positions so there's no need to reverse the header, simplifying installation.
 - Quick-change orifice allows easy conversion of gas sources
 - Compact design (21 L x 21W x 28 H) is easy to retrofit, no matter what the space challenges.
 - Certified for low NOx emissions
 - Superior "best-in-class" energy-efficiency
 - Built-in carrying handles for easy transport
 - Top-mounted, large format digital display for easy viewing
- 21" Length x 21" Width x 28" Height (21x21 footprint)**

Minimax 100

MiniMax® 100 is designed to heat your spa or small pool efficiently and economically.

Check out the big heater features you get with this small heater:

- Ceramic tile insulation prevents wasteful heat loss.
- Flow valve senses water flow and assures water passes by heating element at right rate for efficient operation.
- Built-in vent top for efficient combustion.
- Attractive, low profile design with rounded corners and durable weather-proof powder-coated housing for lasting beauty.
- High 82% thermal efficiency keeps operating costs low while directing more produced heat to your pool instead of into thin air.
- One-year limited warranty. See warranty for details.

Pentair Commercial MegaTherm

High Performance Electronic Ignition Heaters

Powerful, efficient, and reliable, MegaTherm® pool heaters are designed for commercial, institutional and large residential pools where economical performance and rapid heat-up are required. Available in indoor and outdoor models in both natural and propane. MegaTherm is design certified to the ANSI® Z21.56 Standard for Gas-Fired Pool Heaters.

Features

- Electronic ignition
- Built-in draft diverter (indoor models) simplifies installation
- Integral pump assures proper water flow (Models 500-1825)
- Stainless steel burners, with slide-out burner tray for easy maintenance and long life (Models 500-1825)
- High temperature refractory firebox liner to 2000° F for greater efficiency
- Easy-to-service header flanges
- CSD-1 and other options available. Contact factory for part numbers

Pentair Commercial PowerMax

High Performance Electronic Ignition Heaters

When performance is critical, the new PowerMax® heater provides peak efficiency and easy maintenance in both indoor and outdoor applications. Seven sizes delivering up to 85% efficiency ratings and meeting all Low NOx requirements.

Features

- Fan-assisted and filtered combustion air
- Dual ignition systems for models greater than 750,000 BTU
- Built-in mixing system reduces condensation possibilities
- Fits through standard doorways
- 200/208 and 575 volt models available
- Gas Supply right or left side

Jandy

Jandy LJ & LG

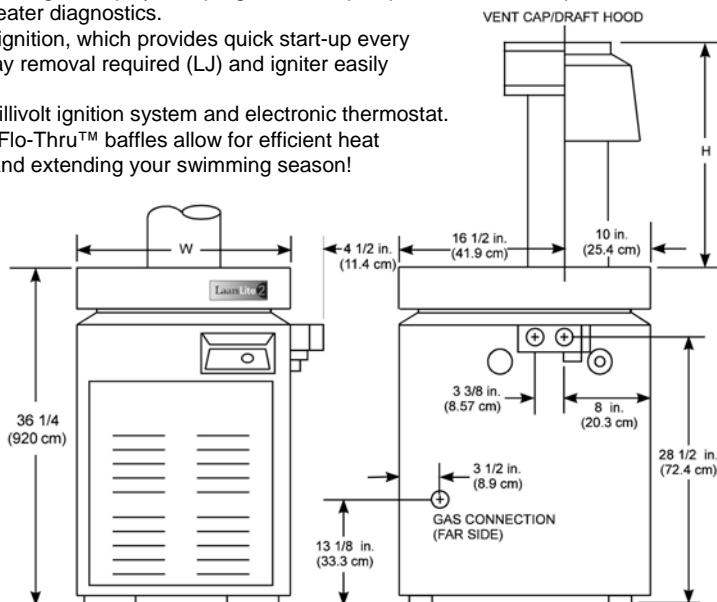

Lite2 Heaters – Reliability Means Comfort

Laars and Jandy combined their expertise to design the new technologically advanced Lite2 heater. Its easy, programmable features make life around the pool more enjoyable. Built for dependability and efficiency, the Lite2 is one of the most reliable heaters on the market. High-performance insulation and efficient operation make this heater an excellent value.

- The new LJ model features a liquid crystal digital display with programmable pump control, dual temperature controls, built-in freeze protection and heater diagnostics.
- LJ model has self-cleaning, hot surface ignition, which provides quick start-up every time and prevents sooting. No burner tray removal required (LJ) and igniter easily replaced with one screw.
- The LG model features a field-proven millivolt ignition system and electronic thermostat.
- The Lite2's copper heat exchanger and Flo-Thru™ baffles allow for efficient heat transfer, lowering your operating costs and extending your swimming season!
- Ceramic fiber combustion chamber contributes to a lighter weight and more compact design.

RP 2100 Electronic Ign Power Vent

Compatible for indoor or outdoor installation For use with all Raypak Digital models.

Certified

The D-2 Power Vent assembly is tested and certified to the latest edition of the American National Standard ANSI Z21.56 for pool heaters.

Through the Wall Capable

The D-2 Power Vent assembly is a Category III mechanical draft venting system that operates with a positive vent static pressure and with a vent gas temperature that avoids excessive condensate production in the vent. All sizes are capable of relieving flue gases up to a maximum of 100 equivalent feet of vent length. All models have a 4" diameter exhaust connection.

Multi-Position

Using the supplied adjustable 90° elbow, the flue gases may be discharged in any direction (see D-2 Power Vent manual for details). Or simply remove the elbow for vertical venting.

Dual Voltage Induced Draft Blower (120/240 VOLT)

Factory set for 240 volts. Can be rewired in the field for 120v operation.

Raypak Versa

Raypak Versa 55

- **Wind-Resistant Design**

No need for fans to combat drafting problems. This heater is designed to draft naturally in outdoor installations with its exclusive low-profile design.

- **Brass Headers**

Brass headers prevent rust stains from harming your pool or spa's surface, giving you years of trouble-free swimming pleasure.

- **All-Copper-Fin-Tube Heat Exchanger**

The fin tubes of the heat exchanger are each made from a single piece of extruded copper.

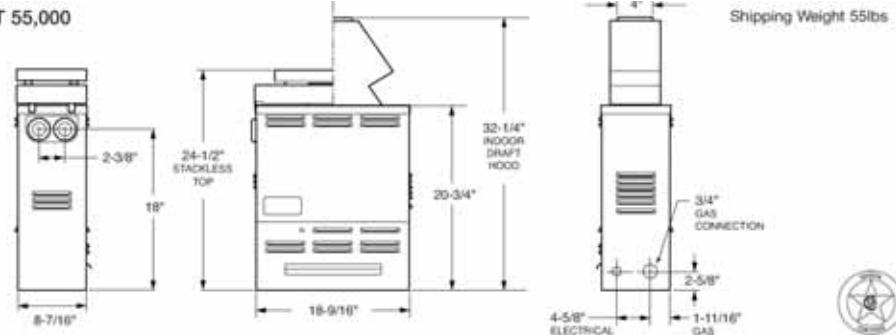

This integral-fin design allows maximum heat transfer to be attained and maintained.

- **1-1/2" Water Connections**

Supplied with every Raypak 055 heater is a set of 1-1/2" flange connections to make your installation secure and effortless.

BTU INPUT 55,000

Raypak Versa 130

- **Wind-Resistant Design**

No need for fans to combat drafting problems. This heater is designed to draft naturally in outdoor installations with its exclusive low-profile design. It is so thoughtfully and carefully designed it actually protects itself from the things that tend to stifle ordinary pool and spa heaters. It delivers uninterrupted heating performance regardless of falling leaves, wind, airborne debris, rain, downdrafts, updrafts, sleet, snow, etc.

- **Polymer Headers**

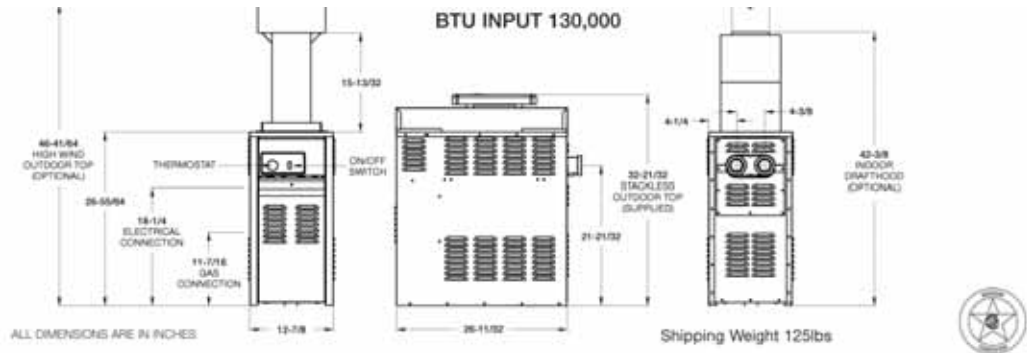

Polymer headers prevent rust stains from harming your pool or spa's surface, giving you years of trouble-free swimming pleasure.

- **All-Copper-Fin-Tube Heat Exchanger**

The fin tubes of the heat exchanger are each made from a single piece of extruded copper. This integral-fin design allows maximum heat transfer to be attained and maintained. Cupro-nickel is also available as an optional upgrade.

- **2" and 1-1/2" Water Connections**

Supplied with every Raypak heater is a set of 1-1/2" PVC hose connections to make your installation secure and effortless. Easily accommodates 2" plumbing with optional adapters.

Heaters

Raypak

Raypak Commercial

Commercial Pool Heaters

Rugged, efficient heaters for large pools

• Clubs. Universities. Municipalities. Watersport Centers. Large residential pools.

• 23 model sizes — 511,500 to 4,000,000 BTUH inputs.

• Indoor and outdoor styles.

• 82% thermal efficiency.

• Natural or propane gas.

• Fuel-saving electronic ignition.

• Precision water temperature control to $\pm 1^\circ\text{F}$.

• Low operating cost. Low maintenance cost. Easy service.

Only Raypak offers a pool heater that is not only the most efficient (up to 82% thermal efficiency) but also includes engineering and manufacturing innovations not found in other makes. And they are fired up and fully tested at the factory to assure their on-site performance.

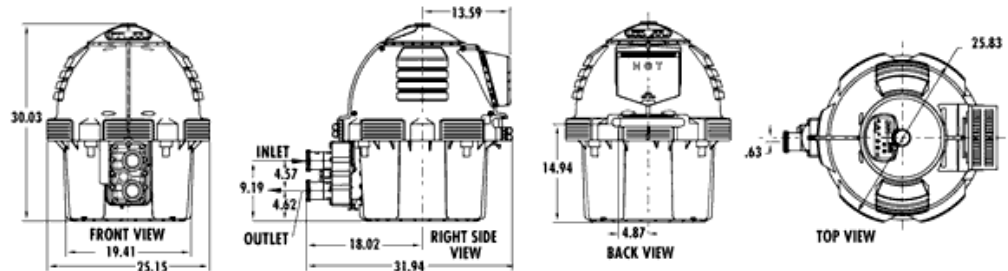

Item #	Description	Price

Sta-Rite

Max-E-Therm

- Rust-Proof Enclosure - Constructed of Dura-Glas® - a sleek, lightweight and rustproof material that withstands heat and the elements.
 - Exact Temperature Controls - Accommodates temperatures for both a pool and a spa running off of the same heater, in fahrenheit ($^\circ\text{F}$) or celsius ($^\circ\text{C}$).
 - Energy Efficient - PMG combustion technology improves efficiency and reduces operating costs.
 - Safety - Internal safety feature sets maximum temperature levels.
 - Environment Friendly - Exceeds all air pollution standards.
- Full diagnostic lights for troubleshooting problems.

Heaters

Heat Exchanger

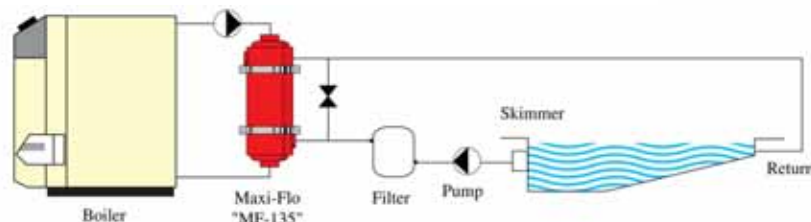

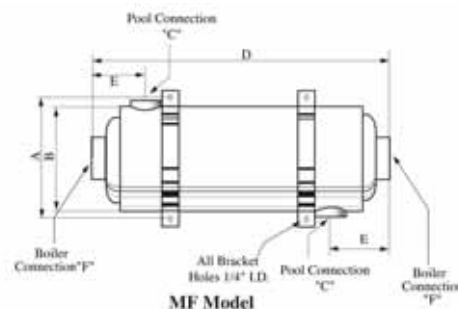

Radiant Heating System Exchangers

Standard Features

- Constructed of high quality corrosion resistant stainless steel (AISI316)
- Rolled formed to shape and then precision welded
- Specially designed built in flow restrictor to assure maximum heat exchange
- Designed to minimize pressure loss in the heating system
- Leak tested to assure that they are totally functional
- Compact in size and require a minimum installation space - light weight
- Significant energy savings
- Available for all types of swimming pools, spas and hot tubs
- Equipped with stainless steel holding brackets

Titanium is chosen for the high resistance to corrosion and is suitable for pools and spas with aggressive water, salt water and when a salt chlorinator is used.

Solar Heater

Smart Solar Heater

Sunheater™ solar pool heating system will raise the temperature of your pool water by up to 10° F (6° C). or more. It is lightweight, durable and easy to install. Water simply flows through the SunHeater's many tubes via your existing pool pump where it is heated by the sun and returned to your pool (see accompanying illustration). The system can be installed on the roof of your house, shed or cabana, mounted to a rack (optional mounting kit SK43 available), or simply placed on

#420A 4' x 20' SOLAR HEATING SYSTEM

- Raises Pool Water Temperature 10° F (6° C) or More
- Simple Do-It-Yourself Installation
- 4' x 20' of Solar - 80,000 BTUs Daily!
- Uses Existing Pool Pump
- Tube on Web Design for Maximum Exposure to Sun's Rays
- No Fuel or Electricity Bills or Expensive Installation of Equipment
- Small Panel Height Easy to Merchandise and Ship
- Easy to Drain for Winterizing

Controls

Pentair IntelliTouch

Step 1 Intellitouch Load Center

IntelliTouch is the smart system that makes pool and spa ownership even more relaxing and fun. With its intelligent electronic circuitry and simple programmability, IntelliTouch make operating and maintaining your pool and spa incredibly easy and absolutely worry-free. With IntelliTouch in control, your pool and spa will operate with peak efficiency and economy - automatically. That's convenience with an intelligent touch.

Use the 3 step process to complete the system.

Step 1 – Order a Load Center

Load Center (P/N 520136) – Includes built-in sub panel (125 AMPS) capable of holding up to eight 1 inch breakers. Also includes five 25 AMP 3 HP relays, 110V/240V transformer with secondary side circuit protection. Multiple knockouts for ½ inch to 1-inch conduit are supplied as well a GFCI side knock out. The Load Center provides ample space for all high and low voltage wiring needs.

Item #	Description	Price
520136	INTELLITOUCH LOADCENTER W/BREA	847.76
520137	INTELLITOUCH ENCLOSURE NO SUB	710.68

Step 2 Intellitouch Personality Kit

There are six Personality Kit models available for various pool and spa combinations. Each Personality Kit provides complete pool and spa controls that are fully programmable with temperature control and display. Every circuit has a countdown timer, ability to do one-time-use programs, salt generation interface for popular salt chlorinators, spectacular colored pool/spa lighting effects, along with solar control capabilities. In addition, there are various options available including light dimming, smart home interface, spa-side remote switches, valve actuators for water flow control, additional indoor wired or wireless user interface control panels, and even telephone remote control.

Step 2 Choose a Personality Kit – The “Brain”

- Three types of Personality Kits are available
- Shared Equipment Pool and spa combinations with shared filtration system – Pool owners can enjoy the convenience of motorized valves for water flow separation between pool and spa. There are three Personality Kit models to choose from i5 (P/N 520505), i7+3 (P/N 520507), and i9+3 (P/N 520509).
- Dual Equipment Pool and Spa Dual Sets of Equipment – The IntelliTouch i10+3D system provides advanced automation for a pool and spa using two separate sets of equipment. The IntelliTouch Personality Kit controls ten pump and/or lighting circuits and two heaters. The Personality Kit model to choose is the i10+3D (P/N 520510).
- Single Equipment Pool Only or Spa Only Applications – The IntelliTouch i5S and i9+3S provide advanced automation for a single body of water. There are two Personality Kit models to choose from i5S (P/N 520506) and i9+3S (P/N 520508).

Pentair EasyTouch

EasyTouch Dual Body of Water/Shared Equipment - Includes Salt Cell

EasyTouch® Control Systems

The new EasyTouch® family offers a new level of control for homeowner's looking for an affordable, easy to use pool/spa control system. EasyTouch® allows full control of all pool/spa features including advanced features such as colored lighting and IntelliChlor™ chlorine generator support. Every EasyTouch® system includes an easy to use control panel that is built into the outdoor enclosure. This control panel allows for full system setup, programmability, and everyday operation. The EasyTouch® systems come in a variety of configurations: Pool only or Spa only, Pool/Spa with shared equipment, and also integrated with Pentair's unique IntelliChlor salt chlorine generator.

Features

- All functions controlled with easy, one-button access from the self-contained load center or optional controllers
- No need to memorize operating sequences, open and close valves, or reset time clocks and thermostats
- Allows full programmability of every day pool and spa equipment operation for optimum efficiency and variable pool/spa usage patterns
- Built-in diagnostics include automatic verification of the display, microprocessor, switches, indicators, relay outputs, valve outputs, sensor inputs, and communication ports as well as a diagnostic screen that reports failures for troubleshooting and repair purposes
- Interfaces with the new IntelliChlor™ automatic chlorine generator
- Optional controllers for added convenience
- Indoor control panel (for 4 or 8 circuit systems), Wireless controller (for 4 or 8 circuit systems), QuickTouch 4-function wireless remote, Four-function spa-side remote

Pentair Commercial

LX802 Commercial Spa Control System

LX802 Commercial Pool/Spa Control System

Designed for a commercial pool and spa application. Provides Remote Spa Jets switch (suitable for outdoor locations) with electronic countdown timer (15/30 minutes).

Features

- Emergency Shut-off Switch (disables all pumps)
- Audio Alarm
- Power Center, available (with or without circuit breaker sub-panel), at the equipment site features mechanical time clocks for the Pool and Spa Filter Pumps; power relays (3) for Pool and Spa Filter Pumps and Spa Jet Pump; electronic cool-down cycle for pool and spa heaters; also equipment service switches.

Heater Compatibility :

Gas/Elec/Solar/Heat Pump

Voltage : 115V/230V

Relay Amp. Inductive : 20

Circuits : Pool Filter, Spa Filter, Jet1, Jet2

Relays Std / Max : 3 / 8

Circuit Breaker Capacity : N/A

Item #	Description	Price
LX802	COMM POOL SPA CONTROL SYSTEM	1406.71

LX820 Commercial Shut-Off System

LX8202 Emergency Shut-off System

Designed for retrofitting commercial spas where an emergency shut-off switch is required.

Features

- Emergency Shut-off Switch
- Audio Alarm
- Power Center at the equipment site, with equipment status. lights and power relays (2) for Spa Filter Pump and Jet Booster Pump.

Circuits : Spa Filter, Jet1, Jet2

Relays Std / Max : 2 / 3

Circuit Breaker Capacity : N/A

AquaLink Step 1 - Select a Model

Step 1 of a 5 part order process

Pool and Spa Combination Control Systems

For use with Pool and Spa Combinations sharing one set of equipment (i.e. one filter pump, one heater, one filter, and two 3-port valves that switch between pool and spa).

AquaLink RS4 Sub Assemblies

7955 OneTouch Pool and Spa Combination

PDA-PS4 Wireless PDA Pool and Spa Combination

Systems Include: Control Panel, 1 Power Center PCB w/bezel, 2 JVA 24V, 2 Temperature Sensors. Controls Filter Pump, Spa switch-over, Pool and Spa Heater, Solar and up to 3 auxiliary circuits. Requires: 1 Power Center

AquaLink RS6 Sub Assemblies

7956RLY OneTouch Pool and Spa Combination

PDA-PS6 Wireless PDA Pool and Spa Combination

Systems Include: Control Panel, 1 Power Center PCB w/bezel, 2 JVA 24V, 2 Temperature Sensors and includes 2 additional 3HP relays. Controls Filter Pump, Spa switch-over, Pool and Spa Heater, Solar and up to 5 auxiliary circuits. Requires: 1 Power Center

AquaLink RS8 Sub Assemblies

PDA-PS8 Wireless PDA Pool and Spa Combination

Systems Include: Control Panel, 1 Power Center PCB w/bezel, 2 JVA 24V, 2 Temperature Sensors and includes 4 additional 3HP relays. Controls Filter Pump, Spa switch-over, Pool and Spa Heater, Solar and up to 7 auxiliary circuits. Requires: 1 Power Center

Dual Equipment Pool and Spa Controls

For use with two separate sets of equipment (i.e. two filter pumps, two heaters and two filters for two separate bodies of water).

NOTE: All systems can be configured to share one heater. When sharing one heater, additional JVA's must be installed.

AquaLink RS2/6 Sub Assemblies

7969RLY OneTouch Dual Equipment

Systems Include: Control Panel, 1 Power Center PCB w/bezel, 3 Temperature Sensors, Dual Equipment Heater Interface Board (part# 6586) and 4 additional 3HP relays. Controls Pool Pump, Spa Pump, Pool Heater, Spa Heater, Solar and up to 6 auxiliary circuits. Requires: 1 Power Center

Pool Only/Spa Only Control Systems

For use with Pool or Spa Only (one body of water) utilizing one set of equipment (i.e. one filter pump, one heater, and one filter).

AquaLink RS4 Sub Assemblies

PDA-P4 Wireless PDA Pool Only/Spa Only

Systems Include: Control Panel, 1 Power Center PCB w/bezel and 2 Temperature Sensors. Controls Filter Pump, Pool or Spa Heater, Solar and up to 3 auxiliary circuits. Requires: 1 Power Center

Systems Include: Indoor Control Panel, up to 4 Power Center Bezels with Printed Circuit Boards, 2 Jandy Valve Actuators 24V (pool and spa combo models only), 1 Water Temperature Sensor, and 1 Air/Solar Temperature Sensor and all necessary 3HP relays required to operate system. Systems require one or more power centers, cable or wireless kit.

OneTouch Control

Simplified operation to control filter pump, spa switch-over, pool and spa heater, solar and up to 31 auxiliary circuits with the push of just one button

- Indoor control of thermostats and display of water and air temperatures
- Activate multiple pieces of equipment with OneTouch buttons

PDA Control

Total Control, in the Palm of Your Hand

The Jandy PDA Pool Digital Assistant, brings the power and flexibility of a wireless control system to the palm of your hand. Imagine never getting out of the pool or spa to adjust the temperature, turn on a jet or waterfall.

2. Options Salt Chlorination

Compatible with all Pro Logic and Aqua Logic systems. Pro Logic and Aqua Logic controllers have electronic (salt) chlorinator capability built into the main control unit. Simply install the chlorinator option kit consisting of a cell, flow switch with 15' cable, and unions. Next, enable the chlorinator function in the "configuration menu" and set the desired chlorinator output level in the "settings menu" and the Aqua Logic will be generating 100% of the chlorine requirements for pools up to 40,000 gallons.

Item #	Description	Price
AQL-CL	AQUA LOGIC CHLORINATOR	1013.16
TCELL15	40,000 gallon Turbo Cell, 15' cable, 3 year warranty	992.91

2. Options Wireless Base (required for all AQL2 wireless remotes)

All **Aqua Logic** wireless accessories use radio communication technology to ensure reliable and secure operation over distances up to 400 ft. (up to 200 ft. through walls) Only one base is required per system for unlimited wireless devices.

- Installs onto the side of the Aqua Logic control unit at the equip pad-communicates with gen 2 Aqua Logic Wireless Accessories
- Compatible with Aqua Logic systems with software version 2.6 or higher(P-4, PS-4/8/16)
- Only 1 Wireless Base required per system

Item #	Description	Price
AQL2-BASE-RF	RF BASE STATION (required for all AQL2 wireless remotes)	259.05

2. Options Wireless Controls, Table Top

Wireless Table Top Display

This portable display/keypad with rechargeable batteries allows the homeowner to control and program Pro Logic or Aqua Plus from anywhere around the pool area or inside the house (for distances up to 500 ft., up to 200 ft. through walls). Designed for indoor or outdoor use but must be protected from direct rain contact.

AQL2-WW-RF-PS-8	WIRELESS WALL MOUNT WHITE PS-8	563.15

2. Options Wireless Control, Aqua Pod Waterproof

Totally programmable and fully rechargeable, **Aqua Pod** isn't just water resistant, it's completely waterproof. Aqua Pod can be used indoors, outdoors – right into the pool! When teamed with Aqua Logic® pool and spa automation controls, it offers unique control over from custom lightshows to all pool and spa functions. The large LCD display for easy viewing of pool/spa status & settings and temperatures.

- 100% Waterproof
- Built in Rechargeable Batteries, Charging Station Included
- Back-lit Display for Convenient Night-time Viewing
- Full Functional Control of Pool, Spa and Outdoor Features
- 3 Programmable Soft Keys
- Multiple Heater and Chlorination Controls
- Light Dimming Control
- Upgradeable Software
- Dual Equipment Capable
- Similar User Interface to Current Aqua Logic Controls

Item #	Description	Price
AQL2-POD	AQUA POD WIRELESS HANDHELD REMOTE	647.63

2. Options Wireless Control, Spa Side, 6-Function, Floating

The Aqua Logic is designed with your ease in mind. Now you can have full control of all the functions of your pool and spa with the new Aqua Logic you can control your filtering times, pool lights, heater and all the other equipment around your pool. The best part is you can do all these things from inside your house. Now you can heat up your spa and turn on the jets before you even step outside. The ultimate convenience! Control your Pro Logic or Aqua Logic system operation while sitting in the spa.

- Use with any Aqua Logic system (P-4, PS-4/8/16)
- Wireless Base required
- Waterproof, floats
- Factory installed battery provides years of use
- 6 functions: filter pump, pool/spa valves, heater (on/off), lights, 2 auxiliary outputs
- Allows override of heater setting
- LED to confirm communication

Item #	Description	Price
AQL2-SS-RF	REMOTE WIRELESS SPA/POOL SIDE	405.47

2. Options Wired Controls, Wall Mount

Wired Remote Display/Keypad When it comes to building a new pool often it is easy to run a line to your home and install a hard wired remote inside you house on the wall. The Pro-Logic wall mount remote will mount inside your hose but as mentioned above needs to be wired to the control panel outside. This remote does not include any wire. Wire can be purchased separately.

- Allows control of all Pro Logic or Aqua Plus system functions from inside the house. Up to 3 wired remotes can be installed on any Pro Logic or Aqua Plus system.
- Use with Aqua Logic P-4, PS-4/8/16
- Complete programming of automatic functions
- System Off buttons turns all equipment off with a single button
- Install up to 500 ft. away from Aqua Logic main control unit
- Uses industry standard 4 conductor cable

Intermatic

Intermatic Timer

T101P3 One Circuit Time Clock 110V

Intermatic's heavy duty Mechanical Time Switches are designed for industrial, commercial and residential applications and have the highest motorload ratings in the industry. This model provides up to 12 ON-OFF operations each day with minimum ON-OFF time of 1 hour. This model is also equipped with "ON" and "OFF" trippers and is available in a plastic indoor-outdoor enclosure.

Specs

125 Volt SPST Switch
NEMA 3R Case - 9-3/8" (23.8 cm) high x 5-1/2" (14.0 cm) wide x 3-5/8" (9.2 cm) tall.
Knockouts - Combination 1/2" - 3/4" nominal knockouts, one on the back and each side of case, two on bottom
Switch Rating - 40 Amp resistive Shipping Weight - 3.75 lbs. (1.7 kg)
Agency Approval - CSA/C-US

T104P3 One Circuit Time Clock 220V

This Time Switch provides coordinated control for heater and filter pump operations. This two circuit switch is designed to turn off a gas fired swimming pool heater approximately 20 minutes before the filter pump shuts down. Eliminates the problem of pounding and knocking due to overheated water, reduces scale and lime deposits and extends the service life of the heater. The 24 hour dial allows up to 12 ON-OFF operations each day. One set of "ON" and "OFF" trippers supplied with each switch. Minimum ON-OFF time is one hour.

Specs

X10 Pool and Spa Controls

Wireless Remote Control System - PHK05

These prepackaged RF remote and transceiver kits are the perfect solution to wireless control of your X10 lighting and appliance control system.

Operates 16 modules via RF & powerline transmission. The handheld remote (PHR03) sends an RF signal to the base transceiver (PAT01), which in turn converts the command to an X10 powerline carrier signal.

XPS Series Wall Switch model XPS2

- Double Pole (240VAC) 20A Wall Switch
- Designed for controlling pumps and 2Hp motors (not shown).
- The XPS series offer ON/OFF only control of single or 3 & 4-way master control of non-dimming incandescent or fluorescent lighting as well as appliances.

XPS Series 20Amp Wall Switch Model model XPS3

- 20A Wall Switch Model model XPS3
- The XPS series offer ON/OFF only control of single or 3&4 way master control of non-dimming incandescent or fluorescent lighting as well as small appliances.
- XPS3 120V/20A rocker style switch for single or 3 & 4-way applications, will require neutral wire. For single pole, the XPS3 does not require a neutral wire at the wall box.

Water Level Control

Levelor Electronic Leveler

LEV110SD-2046C 110/220V	Levelor is the alternative choice over mechanical floats because it is trouble free, easy to install and there are no moving parts. Levelor is a computer-controlled device that detects a low water condition and automatically replaces the water to a pre-set level. Levelor works on new and existing pools and spas. It can be used in any situation where a consistent liquid level is desired.
K2000C-CK-110V	Levelor II Model K-2000 electronic water level controller is a computer-controlled device that detects low and high water conditions. This Levelor model can be used in any situation where a consistent liquid level is desired and a high level situation can be detected and acted upon. (Vanishing Edge pools)
K2300-CK-110-C	Levelor II Model K-2300 electronic water level controller is a Dual Fill Device which can maintain water level in two separate environments such as pool/spa combo. This Levelor model can be used in any situation where a consistent liquid level is desired.

Water Level Control

Pool Sentry Float Leveler

The **Pool Sentry™** is used to maintain the water level of a pool, spa or pond automatically and unattended. When The Pool Sentry™ is removed from the box, it is easily assembled by snapping together two parts and threading in the valve assembly. This requires no tools. It comes with a heavy plastic, zip-lock bag that is filled with rocks or pea gravel and used as a weight to hold the unit on the deck. The bag is placed inside the cavity by removing the top cover. It is then attached to a garden hose and the water is turned on.

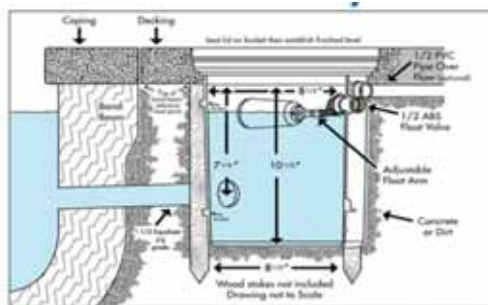

The water stays on at all times when The Pool Sentry™ is in the pool. As the float drops, the water turns on. When the float reaches its highest point, the water shuts off. It works very similarly to the float valve in a toilet tank. The customer can adjust the float to any desired level [usually a point halfway on the tile line or skimmer]

Because the hose is under constant water pressure, it is recommended that the customer uses a heavy-duty, reinforced hose. With a flyer in each box, we offer an aftermarket hose to the customers. It is guaranteed to 200 psi working pressure and 750 psi burst strength.

Above Ground Accessories

Ladders

A-Frame & In-Pool (Deck) Ladders

Model #36A

A-Frame Replacement Ladder for 36" Splasher Pools
Suitable for children and most adults up to about **225 lbs** 13" wide step; 9" high handrail; 4-1/2 handrail span
Easy assembly

Model #6100B

Inpool Ladder
Economical Ladder.
Fits decks up to 54" high
Features an anti-entrapment barrier
Weight guideline: **300 lbs.**

Model #7100B Eliminator >>

One SKU fits 48" to 54" aboveground pools: Adjustability is made by simply moving side braces up or down depending on pool height. **Features an anti-entrapment barrier**
Heavy duty construction: Unique one piece handrail/leg design will hold **300lbs.**
Outer steps swing up and lock into upright position:
Some building inspectors now require this instead of a lift-off ladder section.
Features an anti-entrapment barrier

Silencer

The New Silencer By Air Supply has taken a quantum leap in quiet performance. The unique motor mount is the secret to our success. A thick rubber cup encases the fan while allowing the motor to vibrate freely on a flexible rubber base. This combination eliminates noise so well that virtually no foam is required. Many competitive blowers use filter foam to reduce noise, but foam may clog over time causing starvation and overheating.

Cleaners/Misc

Clean & Perfect is a unique blend of powerful natural enzymes and citrus-based surfactants. It cleans even the toughest grease, dirt and grime with ease...yet won't harm any surface.

Directions:

Apply directly to surface, let stand a few minutes, rub with coarse sponge, wipe clean, dry. On old stain, work into surface with warm water, wait 5 minutes, wipe clean, dry.

Item #	Description	Price
00177	POOL COVER CLEANER 1L	17.37
01176	CLEAN & PERFECT 22OZ TRIGGER	11.60

Clear & Perfect

Clear & Perfect is the most technologically advanced and scientifically superior pool water clarifier on the market today. The Ultimate 6-in-1 Clarifier! The six features are agglomeration, coagulation, flocculation, adhesion, compaction and neutralization...no other clarifier performs all of these necessary functions.

Spray Clear & Perfect at recommended dosage rate per gallons of pool water over entire pool water surface, concentrating on deep water areas. Spray Clear & Perfect onto water surface until you reach suggested amounts of ounces per gallons of water for your pool. See bottle for amount. Do not overdose pool. Clear & perfect may be oxidized by high levels of sanitizer. Do not use Clear & Perfect within 24 hours of using MetalFree or any other metal or stain remover.

Item #	Description	Price
03500	CLEAR & PERFECT 32OZ SPR APPLI	22.91
04135	SPA CLEAR & PERFECT 1L	20.30

Filter Perfect

Filter Perfect is a highly concentrated deep cleaning solution that removes deep set oils, grease and scum build-up on pool & spa filters. It is very effective on cartridge elements, D.E filter grids and sand filters. Filter Perfect improves filter efficiency and lengthens cycles between filter cleaning. Filter Perfect is compatible with Chlorine, Bromine and other alternative sanitizing systems.

For Cartridge elements or Diatomaceous Earth filter grids:

Remove cartridge or D.E grids from the filter tank and hose off loose material. In a pail, bucket or trash container with 5 to 10 gallons of water, add 1 liter bottle of Filter perfect. Place cartridge elements or D.e grids in solution and soak for a minimum of 6 hours, preferably overnight. Remove from solution and rinse thoroughly/ Clean cartridge elements should be allowed too dry before reinstalling.

For Sand Filters

Have pump running and filter in backwash mode. Suction should come primarily from skimmer, not main drain. Add 1 bottle of Filter Perfect to skimmer. Once contents of bottle has entered filter, turn pump off and put valve on either close or filter setting, turn pump off and put valve in either close or filter position for a minimum of 6 hours. Turn pump on with filter setting to backwash, run until water flows clear. Do not allow pump to run dry. Return filter to normal operation.

Item #	Description	Price
03215	FILTER PERFECT 1L	20.30

Metal Free

Deactivate Metals: Quickly and easily chelates metals (iron, copper, and other trace metals) without adding any phosphates that contribute to algae growth. It is not affected by pH or temperature. Prevents stains and water discoloration.

Directions:

Add one 32oz(1L) bottle of Metalfree per 20,000 gallons (75,000L) of pool water to chelate .5ppm of metals. If your metal reading is higher than .5ppm, adjust dosage as necessary.

Application: Sprinkle in water around pool perimeter. Do not add thru skimmer.

Item #	Description	Price
07001	METAL FREE POOL 1L	26.77

Chemical Alternatives

Natural Chemistry

Phos Free

PHOSfree reduces phosphate levels in your pool. Phosphates are the limiting nutrient for algae growth. Reduce phosphates to near zero and enjoy an algae free pool! Natural Chemistry unconditionally guarantees it.

Directions:

If pool has algae, follow dealer instructions to treat.
Follow dealer instructions to balance water chemically.
Clean or backwash filter, if necessary.
Refer to PHOSfree product back chart for dosage.
With filter running, shake bottle well, and add required dose directly to skimmer.
Run filter 8 hours a day for one week or 48 hours continuously without backwashing or cleaning.

Item #	Description	Price
05120	PHOSFREE 3L	38.37
05220	PHOSFREE 2 LTR (6/CS) 05221	28.77

Pool First Aid

Pool First Aid will quickly free clogged filters of oils and organic build-up. No other product will remove dead algae more quickly and efficiently...in most cases no back washing is required.

Directions:

Add two ounces per/thousand gallons (60ml per 3750L), one capful treats 2000 gallons (7500L).
Broadcast Pool First Aid over the surface of the pool. Can be used every two days until the pool is crystal clear. Apply directly to water line to quickly remove any existing water line build-up.

Item #	Description	Price
03122	POOL FIRST AID 2L	28.59

Pool Magic

Clear, Perfect Water with HALF the work!

We are not exaggerating when we say your spring opening will be hassle-free and take less time. For years, homeowners and commercial service companies have reported dramatic results -- especially with mesh covers. This powerful formula prevents winter waterline ring, preserves pool liners and finishes, and reduces staining and the need for acid washing.

Directions:

Use entire bottle for pools up to 25,000 gallons (95,000L). In the fall Follow dealer instructions for closing. Add Pool Magic as the last step before covering the pool.
In the spring- bring water level to normal and add anytime after shocking and balancing chemicals. As water warms to 75°F, any residual winter waterline ring will disappear.

Item #	Description	Price
03722	POOL MAGIC S & F	20.30
05141	POOL MAG SPRNG/FALL+PHOSFRE 1L	27.72

Pool Perfect

Pool Perfect is an all natural enzyme product that biodegrades organic contaminants to reduce maintenance and produce clear, perfect water.

Why Use Pool Perfect?

- eliminates skin & eye irritation
- eliminates strong chemical odors
- no scum line
- clean pool filters

Directions:

The concentrated formula requires only 1 oz per 2,000 gallons (30ml per 7500L) of pool water per week.
Each week, add one capful per 8,000 (30,000L) of pool water.
A 16,000gallon (60,000L) pool only requires only 2 capfuls each week. This bottle treats more than 66,000 gallons (250,000L)

Item #	Description	Price
03111	POOL PERFECT 3L CONCENTRATED	46.40
03220	POOL PERFECT 2L CONCENTRATED	35.44

Pool Perfect+Phos Free

Product Benefits:

- no phosphate build-up = no algae guaranteed*
- greatly reduced pool maintenance
- less filter cleaning cycles
- no waterline rings or strong chemical odors
- no skin or eye irritation
- makes water feel soft & silky
- enhances any sanitizer program

Directions:

Shake well before using - contents settle.
Each week, with filter running, simply add to your skimmer 1 capful per 8000 gallons (30,000L) of pool water. For example, two capfuls per week will treat a 16,000 gallon(60,000L) pool. This bottle treats 64,000 gallons (240,000L)

Item #	Description	Price
05134	POOL PERFECT+PHOSFREE 2L	50.78

Natural Chemistry

Salt Water Conditioner

Natural Chemistry's Instant Pool Water Conditioner is not an acid (it's a salt) and has a pool friendly pH of about 8.0. Add it to the pool and an instant later it is in solution and ready to protect your chlorine.

Directions:
Shake Well!

- With circulation pump running pour Instant pool water Conditioner into pool skimmer slowly OR pour directly into pool water, while walking around perimeter of pool/Brush to speed absorption.
- Rinse container with pool water and shake.
- Pour remaining rinse solution into skimmer or pool.
- 1 gallon will increase CYA reading 35ppm in 10,000 gallons of water.

Item #	Description	Price
07401	STABILIZER LIQUID 1GALLON	35.29

Salt Water Magic Start-Up

Salt Water Magic products contain revolutionary technology, specifically engineered for pools using chlorine generators. This easy to use multi-mineral system simplifies start-up and allows your generator to work as designed. By providing the perfect pool water environment continually, your generator works less and also more efficiently. The result is longer generator life and the highest water quality possible. Natural Chemistry takes the guesswork out of pool maintenance. Nothing better, nothing easier - guaranteed. Remember, the only function a salt/chlorine generator provides is to create or generate chlorine. The Salt Water Magic Program addresses the other important needs to maintain proper water chemistry and support the efficient operation of your generator.

New Pool Start-up:

Follow pool builder's start-up directions.

Following directions on the salt water magic start-up bags, add the required amount of salt/mineral mix to the pool. With circulation pump running, add entire contents of salt water magic (1 liter) to pool skimmer. Do not backwash or clean filter for at least 48 hours. Test water and adjust according to manufactures recommendations.

Item #	Description	Price
07403	SALT WATER MAGIC START-UP	57.59

Salt Water Magic Liquid

Liquid Salt Water Magic Benefits:

Removes phosphates & organic contaminants
Reduces organic & phosphate build-up on generator cell
Generator run time reduced by up to 50% less
Greatly reduces amount of acid added to pool

Directions:

Shake bottle well before use:
Use entire bottle for pools up to 20,000 gallons (75,000L). With circulation pump running, add contents of bottle to pool skimmer. Do not backwash or clean filter for at least 48 hours. Test water and adjust according to manufacturer's recommendations.

- 1 x 1L bottle of Salt Water Magic for Organic and
- Phosphate Removal

Item #	Description	Price
07404	SALT WATER MAGIC MONTHLY KIT	48.02

Chemical Alternatives

Natural Chemistry

Spa Perfect

Your spa/hot tub water is constantly absorbing organic material from its environment. Spas/hot tubs make this problem worse due to the smaller body of water and much higher water temperatures. These organic contaminants build-up in your spa/hot tub water. This is where **Spa Perfect** enzymes shine. Natural enzymes, like those found in your own body, are designed by nature to break down or biodegrade organics. The enzymes in Spa Perfect literally break down organic waste to basic elements like carbon dioxide and water, that are then easily absorbed by the spa/hot tub environment.

Directions:

Use 1 oz. per week (80ml per 1,000 liters). One capful per week treats a 400-gallon (1,500-liter) spa. Use twice per week during periods of heavy use. Do not use with or immediately after shocking.

Chemical Automation/Salt Systems

Stenner

Chemical Feed Pumps by Stenner

One of the many benefits of **Stenner's** modular design is easy configuration to meet specific output requirements for a wide variety of applications. Interchangeable components provide our users with the flexibility that's required to handle jobs from small residential installations to large commercial projects. Our modular design allows easy field upgrades by adding a second head or larger feed tube to increase outputs. And of course our customer support is always available to help select the right model for your specific application.

- Completely self-priming, can operate dry
- Six interchangeable tube sizes for control of feeder output
- Precision pumping up to 170 gpd (514.8 [liters @ 50 Hz](#))
- Will not clog from dirt and minor debris
- Can pump against pressure of up to 100 PSI (maximum GPD 40) up to 6.9 bar

- Check valves not required under 25 PSI (1.72 bar)
- Reproducible within 2% of outputs
- Tube lubrication is not required
- Vertical or horizontal mount

Goldline Chlorine Generators

AQUARITE Inground Chlorine Generation System

The **AquaRite** is the easiest way for to sanitize a pool, and keep water crystal clear and silky smooth! The AquaRite uses common salt (the same salt used in water conditioners) and converts it into "free" chlorine. The chlorine sanitizes the pool and then reverts back into salt. That's right, the salt is recycled and never wears out. With only a teaspoon of salt per gallon, the AquaRite produces enough fresh chlorine daily to keep a 40,000-gallon pool sparkling clean without the chlorine smell. You'll never again have to worry about red irritated eyes, dry itchy skin, bleached bathing suits or green hair!

- Soft, Crystal Clear, Luxurious Water
- For Pools up to 40,000 gallons
- Generates "Free Chlorine" from a Small Amount of Salt
- NSF Tested for Performance and Commercial Applications

AQUATROL Above Ground Chlorine Generation System

The **Aqua Trol** is the only chlorine generator designed specifically for the above ground pool. Your pool's water quality will be unmatched with the Aqua Trol system. Now you can have crystal clear, silky smooth water at an affordable price.

- Specifically Designed for Above Ground Pools
- Soft, Crystal Clear, Luxurious Water
- Timer Controls Filter Pump Operation
- For Above Ground Pools up to 18,000 gallons
- Creates "Free Chlorine" from a Small Amount of Salt

Pentair

IntelliChlor Chlorine Generation System

IntelliChlor takes electrolytic chlorine generation to a higher level of convenience, reliability and safety. Electrolytic Chlorine Generation is the easiest, most effective and convenient way to keep pool water sparkling clean. The IntelliChlor chlorine generator uses common table salt to produce all the chlorine your pool needs, right in your pool – safely, effectively, and automatically. Same sanitation performance as manual chlorine addition without the drawbacks. No need to buy, transport and store expensive chlorine compounds. No more odor, stinging eyes, irritated skin and bleached out swimsuits.

Polaris

C-660 Controller

Features:

- Desired ORP/pH settings
- Manual operation
- pH and PPM calibration
- ORP and pH timed or continuous feed
- Adjustable alerts on ORP and pH
- Maximum feed time option
- Safety interlock between pH and ORP
- Front face lockouts
- Acid/Base feed

Input Power: 120 VAC 60 Hz,
3-wire grounded power cord.
GFCI source required

pH Control Range : 7.0 to 8.0

ORP Control Range: 400 mV to 900 mV **Controller Power:** Less than .5 amp internally fused **Display:** Digital readouts

Sensors: pH: glass combination with 10' cable

ORP: platinum combination with 10' cable

Operating Temperature: 40 -120 °F

Polaris Watermatic Pro System D-1

The Polaris Watermatic Pro System D-1 is a Dichlor Chlorine Feeder with an ORP controller that provides a pH readout that assures ideal sanitizing levels using granular dichlor. The system will adjust chlorination levels automatically in response to a variety of changing conditions that can make pool and spa care challenging. Exact dosing insures bather protection and reduces costs.

Benefits

- The most affordable truly automated feeder system on the market
- Clean, clear, safe swimming pool water seven days a week
- Ideal for commercial spas, keeps up with demand
- Efficient use of chemicals
- Easy to install, operate and maintain
- Feeder NSF listed, controller UL listed, Health Dept. approved for commercial applications
- Available with ORP and pH controllers
- Toll-free technical assistance and nationwide field support from Polaris 1-800-822-7933

Polaris

Polaris Watermatic Pro System D-6

The **Polaris Watermatic Pro System D-6** is a Dichlor Chlorine Feeder with an ORP pH controller that assures ideal sanitizing levels using granular dichlor. If desired, pH control can be easily added. The system will adjust chlorination levels automatically in response to a variety of changing conditions that can make pool and spa care challenging. Exact dosing insures bather protection and reduces costs.

Benefits

- Clean, clear, safe swimming pool water seven days a week
- Ideal for commercial spas, keeps up with demand
- Efficient use of chemicals
- Easy to install, operate and maintain
- Feeder NSF listed, Health Dept. approved for commercial applications
- ORP and pH control
- Toll-free technical assistance and nationwide field support from Polaris 1-800-822-7933
- Five-year limited warranty on controller

Polaris Watermatic G-1000

The **Polaris Watermatic G-1000** feeder is designed to maintain the sanitizer level in swimming pools and spas. It is designed to feed a measured amount of granular dichlor chlorine into a pool or spa upon demand during the filtration cycle. Automated with Polaris Watermatic ORP Controllers the feeder will adjust chlorine levels automatically in response to bather load, temperature, organic contamination and a variety of changing conditions that make pool and spa care challenging. Originally developed to sanitize commercial pools, this superior technology is now available for residential use.

Item #	Description	Price
G-1000	DICHLOR GRANULAR FEEDER ONLY	920.84
G-1000A	DRY ACID FEEDER 120V	808.40

Polaris Watermatic Pro System L-1

The **Polaris Watermatic Pro System L-1** is a complete system for feeding sodium hypochlorite (liquid) and muriatic acid (liquid). This system has been developed to be easy to install, operate and maintain. The controller is designed to simply plug into a 110V outlet and provides built-in receptacles for the peristaltic pumps.

Benefits

- Complete liquid system
- Easy to install and maintain
- Clean, clear water 24 hours a day, seven days a week
- Toll-free technical assistance and nationwide field support from Polaris
- One-year limited warranty on controller

Included In System

- C660 ORP /pH controller with sensors and flow cell with flow switch
- 3-310 Peristaltic pump (2)
- 9-960 Mounting board

Chemical Feeders

Floating

Feeders

171086 Pentair Pool Feeder

Floating chemical feeder for use in pools. Great for above-ground pools. Can be used in any pool. Accommodates the 3" chlorine puck, although it can be loaded with 1" tabs as well. Tethered.

171090 Pentair Spa Feeder

Floating spa chemical feeder from Pentair. Very durable plastic design ensures long life. Uses 1" tablets. Available in tan/whitecolor.

1973-E MP Spa Feeder

Popular floating feeder for spas with easy access for filling at bottom. Opening filler cap will not affect feed setting. Available in blue or gray.

1929 MP Pool Feeder

Uses 3" chlorine tablets and is fully adjustable. It is made of high impact, chemically resistant plastic and sports a built-in hooking device on the side that can be anchored with a 6' rope which is supplied.

Chemicals

Advantis Aqua Silk

Aqua Silk

The Aqua Silk system by Advantis is a chlorine-free way to sanitize your pool and achieve soft, clear, more comfortable water. When used properly, Aqua Silk will prevent algae growth, sanitize the water and keep it sparkling clear.

- Chlorine-free, bromine-free
- Perfect for swimmers with sensitive skin
- Gentle on hair, eyes, skin, swimsuits and pool liners
- **No harsh odors**
- Dependable, consistent and long-lasting bacteria control
- Not affected by sunlight, temperature or pH fluctuations
- Spend less time maintaining chemical levels:
- no daily testing or dosing required

Applied Bio

Pool Chemicals

Swimtrine 7.4

Specially formulated to destroy and prevent regrowth of green and mustard algae in all types of swimming pools. Super-concentrated formula clears 10,000 gallons of pool water with only 1.5 ounces.

Staintrine

Remove or lighten stains and scale on pool walls with Staintrine. Easy-to-use formula can be applied without draining pool water and swimming can resume immediately after treatment. Now 20% stronger for longer lasting protection.

Gold-N-Clear

is a super-concentrated clarifier that clears cloudy water. Its unique color-changing formula changes from gold to blue as it removes small particles that dull the water's appearance.

Accessories

Crystal Clarifier

Works with filtration to collect organic waste particles and other contaminants for clear, sparkling water. pH neutral, non-staining, non-foaming and not affected by shock treatments. Compatible with all water treatment systems. Returns that new water luster to your pool's water.

Filter AID

Effectively removes oil, scale, organics and grime from sand, cartridge and diatomaceous earth filters. Increases water flow and helps keep pool water cleaner with maximum efficiency.

Mineral Magnet

Removes metals from pool water and metal stains, scale from surfaces. Will lower excessive calcium hardness levels. Compatible with all water treatment systems.

Algaecide

Poly Power 60

Highly concentrated preventative for treating hard to kill mustard, black, and blue-green algae in chlorine or bromine treated pools. Will not staining pool surfaces. Non-foaming, non-metallic.

Also available as Poly Power 30.

Item #	Description	Price
CVLPP30QT12	ALGAECIDE 30 POLY POWER	226.49
CVLPPQT12	ALGAECIDE 60 POLY POWER	330.72

Balancers

Calcium Increaser

100% calcium chloride. Increases calcium hardness. Maintaining a proper range of calcium hardness will prevent damage to pool surface and equipment. Water will dissolve anything it comes in contact with until an adequate water hardness level is reached.

pH UP

99.58% sodium carbonate. Recommended pH for pool water is a range of 7.2 to 7.6. pH up raises the pH to maximize bather comfort and effectiveness of your chlorine granular or tablet treatment system.

pH DOWN

92.1% sodium bisulfate. Recommended pH for pool water is a range of 7.2 to 7.6. pH down reduces the pH to maximize bather comfort and effectiveness of your chlorine granular or tablet treatment system.

Total Alkalinity

100% sodium bicarbonate. Increases total alkalinity. Maintaining a proper range of total alkalinity stabilizes pH for better control over damage causing shifts in pH.

Chlorine Tabs/Sticks

1" Tabs

100% trichlor chlorine tablet. Slow dissolving and stabilized. For use in erosion-type chlorine tablet feeders. Water flows over the tablets slowly, providing a constant chlorine feed rate. With proper chlorine residual fourteen (14) tablets treats 8,000 gallons every 7-14 days.

3" Jumbo tabs (regular)

Individually wrapped 8 oz. 100% trichlor chlorine tablet. Slow dissolving and stabilized. For use in erosion-type chlorine tablet feeders. Water flows over the tablets slowly, providing a constant chlorine feed rate. With proper chlorine residual one tablet treats 8,000 gallons every 7-14 days.

Pool Sticks

Individually wrapped 8 oz. 100% trichlor chlorine stick. Slow dissolving and stabilized. For use in erosion-type chlorine tablet feeders. Water flows over the tablets slowly, providing a constant chlorine feed rate. With proper chlorine residual, one (1) tablet treats 8,000 gallons every 7-14 days

Earthtec

Earthtec

When algae/bacteria problems become an upstream battle, **EarthTec®** is a proven and reliable solution with a large variety of applications. **EarthTec®** is an innovative, low pH algacide/bactericide designed for use in lakes, ponds, reservoirs, irrigation canals, treatment lagoons, and other water systems.

EarthTec®'s active ingredient is a biologically active form of cupric ion (Cu⁺⁺). **EarthTec®** contains a unique hydrotrope resulting in a greater concentration of these ions under varying water conditions. **EarthTec®** is registered by the United States Environmental Protection Agency (EPA) as an algacide/bactericide. Additionally, **EarthTec®** is Certified to ANSI/NSF Standard 60, Drinking Water Treatment Chemicals.

Shocks, Oxy-Brite

Oxy-Brite®

A non-chlorine shock oxidizer that creates sparkling water and oxidizes contaminants all in one step. The powerful formula rids pool water of contaminants that cause odor and irritation, and brightens and clears the water with unique blue water brightening crystals.

Features:

Swim immediately after treatment!
Restores sparkle to cloudy water
Reduces sanitizer demand
Made with 100% monopersulfate compound
Will not increase CYA levels
Compatible With:
Chlorine, bromine, ozone sanitizers and salt water pools.

Applications:

1. Add 1 lb. per 10,000 gallons **Oxy-Brite®** to destroy contaminants that have accumulated in the water.
 2. Reapply **Oxy-Brite®** weekly to maintain water clarity.
- Used weekly, **Oxy-Brite®** will continually oxidize contaminants thus requiring less sanitizer throughout the week to maintain clean water.

Oxy-Brite®, made with DuPont Oxone®, is a potassium monopersulfate-based shock oxidizer. It oxidizes like chlorine, but actually reactivates a small amount of spent chlorine and won't deplete the chlorine residual.

Shocks, Shoxidizer

GLB Shoxidizer is a 4-in-1 proprietary blend of DuPont Oxone, a powerful oxygen-based oxidizer, and a dry clarifier. This unique formulation provides the benefits of oxygen-based oxidation while boosting free chlorine concentrations. This one-two punch keeps water sparkling clear and clear by eliminating organic contaminants.

Features:

Boosts free chlorine concentrations
Oxidizes to eliminate organic contaminants
Dissolves quickly
Contains no calcium
Buffered; will not affect water balance
Only 1 lb. treats 10,000 gallons

Part of the GLB No Algae. Guaranteed. Program

Compatible With: Chlorine, bromine, ozone and salt water sanitizing systems. Shoxidizer is a quick-dissolving shock, oxidizer, buffer and clarifier in one. **Contains 15% dichlor, 72% Oxone and 13% buffers and clarifying agents.**

Applications:

Use weekly to maintain sparkling clear water. Since GLB Shoxidizer is buffered, it will not affect water balance. Therefore, pH and total alkalinity will remain unchanged. Shoxidizer is specially formulated to prevent dull, hazy water. Add Shoxidizer to pool water every week to oxidize contaminants introduced by bathers and to maintain sparkling clean water.

Item #	Description	Price
GL71675	SHOXIDZR 1LBX40 CHLOR+NON-CHLO	340.48

Algaecides, Algimycin® 1000

A copper/quat algaecide formulated to eliminate the toughest **black algae**. Uses a special triple-chelation process to hold copper ingredients in solution for longer algae control.

The outer layers of black algae produce a waxy coat that prevents chlorine and other algaecides from killing it. **Algimycin® 1000** is specially formulated to penetrate this waxy coat and treat even the most deeply rooted black algae.

To treat an existing condition, use **Algimycin® 1000** according to the label instructions and brush algae daily. Also, check the pool's circulation as black algae usually grows in areas with poor water circulation.

Features:

Wipes out black algae

Penetrates even deeply rooted black algae colonies
Concentrated formula

Compatible With:

Chlorine, bromine, mineral purification systems, salt water pools and ozone sanitizers

Applications:

To Treat Existing Black Algae:

1. Brush algae spots prior to application. If pool is very dirty with heavy algae growth, first vacuum, clean and scrub walls.
2. Add 12 oz. per 10,000 gallons to a pail of water and distribute along perimeter of the pool.

Maintenance Dosage (weekly):

Add 6-8 oz. per 10,000 gallons weekly.

Item #	Description	Price
GL71102	ALGIMYCIN 1000 12XQT	398.50

Chemicals

GLB Pool Chemicals

Algaecides, Algimycin® 2000

A blend of several components that work together to control all types of swimming pool algae including black, green, mustard and yellow. If used weekly, it prevents algae outbreaks in the pool.

In addition to being a powerful all-purpose algaecide, **Algimycin® 2000** stands out above the rest with a special wetting agent that penetrates and kills even deeply rooted algae and a unique clarifier and filter aid that removes dead and living algae fast with concentrated coagulents.

Compatible With:

Chlorine, bromine, ozone, salt water pools and biguanide sanitizers.

It is easier to prevent algae growth than to destroy established algae. To be most effective against existing algae, add on a warm, sunny day in the morning. Remove dead settled algae by vacuuming.

Features:

Effective against ALL algae types
Contains no stain or water-coloring metals
Fast & effective
Non-foaming
Does not irritate skin
Will not harm liners
Eliminates the need to use more than one algaecide

Algimycin® 2000 is also part of our **No Algae. Guaranteed. Program** which guarantees an algae-free pool all season long if a GLB sanitizer, Algimycin® 2000 and GLB Oxy-Brite are used as part of the regular pool maintenance program.

Applications:

Initial Dosage to Prevent Algae:
Add 8-12 oz. per 10,000 gallons.

Maintenance Dosage (weekly):
Add 4-8 oz. per 10,000 gallons.

To Treat Existing Yellow or Green Algae:
Add 16-24 oz. per 10,000 gallons to a pail of water and distribute.

Initial Dosage to Treat Black Algae:
Add 16 oz. per 10,000 gallons to a pail of water and distribute. Brush spots daily.

Item #	Description	Price

Algaecides, Algimycin® 600

A non-metallic, non-foaming polymer-based algaecide that kills and controls green algae. Provides treatment of common green algae without foaming or requiring pool closing.

Features:

Fast and effective treatment for green algae
Contains no metals
Non-foaming
Does not irritate swimmers
Will not harm liners

Compatible With:

Chlorine, bromine, ozone, salt water pools and biguanide sanitizers.

Wipes out green algae. Clears water with a filter aid that removes dead and living algae fast.

It is easier to prevent algae growth than to destroy established algae. To be most effective against existing algae, add on a warm, sunny day in the morning. Remove dead settled algae by vacuuming. Please also refer to actual product label for complete directions and precautionary statements.

Applications:

Initial Dosage to Prevent Algae:

Add 9 oz. per 10,000 gallons. Dilute Algimycin® 600 with at least nine parts water before applying. Pour required amount into a plastic water can and fill with water. Maintaining constant pool circulation, sprinkle solution around edge of pool.

Maintenance Dosage (weekly):

Add 3 oz. per 10,000 gallons. Dilute Algimycin® 600 with at least nine parts water before applying. Pour required amount into a plastic water can and fill with water. Maintaining constant pool circulation, sprinkle solution around edge of pool.

To Treat Existing Green Algae:

Add 16 oz. per 10,000 gallons. Pools containing heavy algae growth should be cleaned prior to using Algimycin® 600. 24 hours after treating visible algae growth, visible algae debris should be removed by standard cleaning procedures. Dilute Algimycin® 600 with at least nine parts water before applying. Pour required amount into a plastic water can and fill with water. Maintaining constant pool circulation, sprinkle solution around edge of pool.

Item #	Description	Price

Algaecides, Algimycin® Yellow

Treats and controls yellow/mustard deposits in pool water. This granular formula works with chlorine to effectively control yellow or mustard deposits.

This product is safe for all types of swimming pools including concrete, tile, vinyl and gunite. It provides fast relief from yellow deposits without leaving chemical residue.

Algimycin® Yellow is specially formulated for tackling slow-growing established algae deposits.

Because yellow deposits can grow for weeks before becoming noticeable, they're often difficult to treat.

Features:

Specially formulated for yellow algae's slow growth
Granular formulation clears cloudy water quickly
Even works in pipes and filters
Will not affect water quality
Allows for swimming in just a few hours

Compatible With:

Chlorine, bromine, salt water pools, and ozone sanitizers. Do not use with pools sanitized with biguanide products.

Applications:

To Treat Existing Yellow Algae Deposits:

1. Thoroughly brush areas that have yellow or mustard deposits.
2. Using cap, measure 2 capfuls or 4 ounces per 10,000 gallons and disperse throughout affected area.
3. Wait 5 minutes and add 1 gallon of liquid chlorine or 1 lb. of dry chlorine around entire pool.
4. Wait at least 3 hours before swimming.

Item #	Description	Price
GL71112	ALGIMYCIN YELLOW 12X2LB	319.87

Chemicals

GLB Pool Chemicals

Algaecides, Stirke Out

Triple, chelated 7.4% copper algaecide is designed to control green and mustard algae. It won't cause staining if used according to directions.

No waiting to swim - treated water can be used immediately.

Apply under sunny conditions for most effective results. Apply initial treatment to a freshly filled pool or at first visible signs of algae growth. Use Algimycin 2000 weekly to prevent future algae outbreaks.

Features:

Economical, concentrated algaecide eliminates green and mustard algae
No waiting to swim
Long-lasting
Safe for all types of pools

Applications:

1. Dilute with at least nine parts of water. (See dilution chart on back of bottle.)
2. Sprinkle solution around edge of pool.

Compatible With:

Chlorine, bromine and ozone sanitizers, as well as salt water pools.

Item #	Description	Price
GL71114	STRIKE-OUT ALGAECIDE 12QT CASE	250.99

Balancers, Alkalinity

Alkalinity Up

Increases Total Alkalinity in swimming pool water. Maintaining proper alkalinity in swimming pool water aids in preventing the pH level from changing.

Helps maintain proper water balance.

When the pH value of the pool water fluctuates from low to high and back again in a short time, it is usually the result of a low total alkalinity condition of the pool water.

Features:

Aids in preventing pH level from changing
Easily maintain the proper alkalinity level of 80-120

Compatible With:

Chlorine, bromine, ozone, salt water pools, and biguanide sanitizers.

Applications:

To Increase Total Alkalinity:

1. Determine the total alkalinity level.
 2. If the value is below 75 ppm, add a sufficient amount of ALKALINITY UP - by pouring it directly into the pool - to increase the total alkalinity to at least 75 ppm.
- ALKALINITY UP will provide approximately 10 ppm increase in total alkalinity for each 10,000 gallons of water. Wait at least 8 hours for the material to distribute uniformly before rechecking the alkalinity level.

Item #	Description	Price
ALK	ALKALINITY INCREASER 12X2LB	127.01
GL1202	ALKALINITY UP 4X7.5#	46.90
GL71200	ALKALINITY UP 4LB X 9	70.56

GL71204	ALKALINITY UP 15LB X 2	57.12
GL71210	CALCIUM HARDNESS UP 6LB X 4	50.96
GL71212	CALCIUM HARDNESS UP 15LB X 2	63.78

Balancers, PH Down

Increases water hardness to prevent foaming, equipment corrosion and scaling.

Properly balanced water will prevent the formation of scale deposits and eliminate the corrosion of metal pipes and fixtures.

Compatible With:

Chlorine, bromine, ozone, salt water pools, and biguanide sanitizers.

Features:

Helps maintain proper calcium hardness level of 150-250 ppm
One pound of GLB Calcium Hardness Increaser will increase the calcium hardness 10 ppm in 10,000 gallons of water

Applications:

1. Determine calcium hardness level. It should be between 150-250 ppm.
2. If the level is below 150 ppm, add CALCIUM HARDNESS UP by distributing the product over the water surface. 1 lb. of CALCIUM HARDNESS UP will increase the calcium hardness 10 ppm in 10,000 gallons of water.

Item #	Description	Price
GL71238	PH DOWN 2LBX12	54.77
GL71240	PH DOWN 4LB X 9	78.88
GL71242	PH DOWN 10LB X 4	76.05

Balancers, PH Up

Increases the pH level in swimming pool water.

Keeping proper pH levels will help ensure pool sanitizers are working at maximum efficiency and aids in preventing staining, scaling and clouding of pool water.

Features:

Allows raising of pH level as needed
Aids in preventing staining, scaling and clouding of pool water

Compatible With:

Chlorine, bromine, ozone and biguanide sanitizers, as well as salt water pools.

Applications:

When pH Falls Below 7.2:

While the pump is in operation distribute pH UP into the deep end of the pool.

For every 10,000 gallons of water add the following amounts:

- 1 pound when pH is below 6.6
- 3/4 pound when pH is between 6.6 and 7.0
- 1/2 pound when pH is between 7.0 and 7.2

Bug-Out

Prevents unwanted floating and diving insects from gathering on the pool water surface. Its unique formula reduces the tension of the water's surface to allow bugs and other debris to drop to pool bottom where they can be easily vacuumed away.

1. Pour 4-8 oz. of **Bug Out** for each 10,000 gallons of water directly on the water surface as close to the insect infestation as possible. **Bug Out** will begin to reduce water surface tension immediately.
2. If infestation is heavy, repeat treatment may be needed.

Cell Saver

Cell Saver is a unique formula containing enzymes and clarifying and sequestering agents that work together to extend the life of salt water generators by preventing scale and oily buildup on the cells. Cell Saver stops metal staining, clears cloudy water, increases efficiency and reduces phosphates to prolong the life of the salt water generator cell.

This "4-in-1" product contains a sequestering agent, enzymes, clarifier and phosphate reducers to keep water sparkling clean and clear. Cell Saver prolongs the life of salt water chlorine generator

Features:

Prevents calcium deposits. Contains a sequestering agent, enzymes, clarifier and phosphate reducer. Comes in GLB Salt Water Pool Care Kit. Prolongs the life of salt water chlorine generator cells.

Compatible With:

Salt water pools

Cell Saver should be used as part of your maintenance program.

Applications:

Start Up Dosage:

1. Use 32 oz. per 20,000 gallons of pool water. If the water contains more than 400 ppm calcium or 0.1 ppm copper or iron, add 32 oz. per 10,000 gallons of pool water.
2. Add required amount to a pail filled with water.
3. Distribute mixture around the perimeter of the pool.

Maintenance Dosage:

1. Use 8 oz. per 20,000 gallons of pool water weekly for best results.
2. Add required amount to pail filled with water.
3. Distribute mixture around perimeter of pool.

Item #	Description	Price
71680	CELL SAVER 12X1QT BOTTLES	311.47

Clarifiers, Clear Blue

Clear Blue™ A highly concentrated water clarifier that clears cloudy water fast by helping the filter remove suspended particles that dull the water's appearance. A one-ounce dose treats up to 5,000 gallons.

To get more sparkle from your pool water, use Clear Blue™ 4 to 12 hours after each shock treatment, superchlorination, or algacidal treatment to remove dead algae and other organic debris.

Compatible With:

Chlorine, bromine, ozone, salt water pools and biguanide sanitizers.

Features:

Restores sparkle to cloudy water. Helps filter work at peak efficiency. Highly concentrated. Won't affect pH. Adds sparkle to the water by removing small particles that can dull the water.

Applications:

Initial Dosage:

1. Dilute in bucket of water.
2. Add 4 oz. per 10,000 gallons when first filling pool.
3. Fill pool to the middle of the skimmer or the proper level recommended by the manufacturer.
4. Once filled, run pool filter overnight or 24 hours if possible.

Maintenance Dosage (weekly):

1. Dilute in bucket of water.
2. Add 2 oz. per 10,000 gallons around edge of pool.
3. Run filter for 8 hours, then vacuum.

GL0582-1	CLEAR BLUE QUART EA	19.02

Clarifiers, Drop 'N Vac

This **new & improved** non-alum flocculent settles floating debris and unfilterable material including microparticles and dead algae to the pool bottom. It works overnight and allows for easy debris removal by vacuum. **The new formula contains a clarifier and works over a wider pH range.**

Non-alum flocculent will not affect water balance. Safe for all pools including peroxide-based sanitizers.

Features:

Works overnight. Allows for easy vacuum removal. Works with any sanitizer. Works over a wider pH range. Includes a clarifier. Use for bugs and debris - then vacuum away!

Compatible With:

Chlorine, bromine, salt water pools, ozone and biguanide sanitizers.

Applications:

1. Shake bottle well before applying.
2. Pour the appropriate amount of Drop 'N Vac (10 oz. per 10,000 gallons) into a bucket of water.
3. Empty contents evenly over entire pool.
4. Run pump for 2 hours and then shut the pump off. Allow unfilterable material to settle overnight.
5. Set the filter in WASTE or DRAIN cycle and vacuum to waste all settled debris. Clean the filter and begin normal operation.

Chemicals

GLB Pool Chemicals

Cleaners

TLC Removes oil, grime and mineral scale from common pool surfaces such as tile, vinyl and concrete. This extra-strength, concentrated thick formula clings to upright surfaces longer for more effective cleaning power.

TLC is a powerful cleaner for removal of most pool stains. Do not allow **TLC** to drip on surfaces not intended for cleaning - may cause discoloration or etching. Do not use **TLC** on marble, porcelain, terrazzo, enamel surfaces or bronze and metallic glazed tiles. See actual **TLC** label for all precautions.

Features:

Removes oil grim, and mineral scale from common pool surfaces works on tile, vinyl, and concrete Extra-strength, concentrated formula clings to surface

Compatible With:

Chlorine, bromine, ozone and biguanide sanitizers, as well as salt water pools

Applications:

1. Apply **TLC** with a sponge, cloth, or soft brush. (DO NOT USE AN ABRASIVE APPLICATOR.)
2. Swab surface to be cleaned and let stand no more than 3 minutes. A bubbling action denotes that **TLC** is loosening the scale and dirt. (DO NOT LET DRY.)
3. Scrub briskly, if necessary, on areas where excessive scale and grime have built up.
4. Wipe surface that was cleaned promptly with a damp cloth; then splash water copiously on the cleaned area to remove any excess material.

Item #	Description	Price

GL0700-1	TLC 1 QT BOTTLE	15.39

Cover Care

Cover Care

Cleans, deodorizes and protects pool and solar covers from grime, grease, oils and dirt.

May also be used to clean solar blankets, winter cover, plastic or canvas outdoor furniture, boat covers, umbrellas and other vinyl and canvas pool side accessories.

When cleaning clear vinyl, such as pool domes, be certain to rinse completely and allow to dry before storing.

Features:

Protects surface from mold and mildew
Fresh lemon scent
Provides protection during storage

Compatible With:

Chlorine, bromine and biguanide sanitizers.

Applications:

1. Remove cover (or solar blanket) and spread out on a smooth, flat surface.
2. Dilute 12 oz. with 2.5 gallons of water and spread over entire cover.
3. Brush cover using a nylon brush.
4. Rinse cover and repeat process for other side.
5. Lightly sprinkle diluted **COVER CARE** on cover as it is being folded for storage.

Item #	Description	Price
GL71004	COVER CARE 12 X QT	139.44

Filter Cleaners, Filter Cleanse

A multi-purpose granular formulation that cleans and unclogs filters from grease, oils and scale. Great for use on all types of swimming pool filters. Use routinely once every month or two during season to maintain efficient operation. Clean filter early in the spring to remove winter debris and after a period of intense use. It's also important to clean the filter when preparing pool for winter. A unique combination of acids and detergents, that removes all contaminants with one product.

Features:

Special solution changes color from red to yellow when filter is clean
Multi-purpose, granular formulation cleans any type of filter (sand, cartridge or D.E. filters)
Compatible With:
Chlorine, bromine, mineral purification systems, salt water pools, ozone and biguanide sanitizers.

Applications:

For Cartridge Filters and Removable D.E. Filter Elements::

1. Remove cartridge elements and place in suitable plastic container.
2. Cover elements with **Filter Cleanse** solution (1 lb. per 5 gal. of water).
3. Allow to soak at least 4 hours, but preferably overnight.
4. Remove element from solution, rinse thoroughly and replace in filter.

For Sand Filters and Non-Removeable Elements::

1. Backwash filter then drain. Close drain valve.
2. Prepare **Filter Cleanse** solution (1 lb. per 5 gal. of water).
3. Add sufficient solution to cover sand (see label directions).
4. Allow to stand overnight (12 hours).
5. Backwash until backwash water runs clean.
6. Return filter to normal operation.

Chemicals

GLB Pool Chemicals

Filter Cleaners, Filter Fresh

An acid-based liquid cartridge filter cleaner. Removes scale, rust, cosmetics, oil and other materials from filter cartridges using an overnight soak-and-rinse formula. Refer to filter manufacturer's recommendations regarding maintaining your pool filter at peak efficiency. Refer to actual label for product precautions. It's a good idea to keep an extra filter cartridge to use when the regular filter is soaking overnight.

Features:
Removes debris from cartridge filters
Helps filter operate at maximum efficiency
Concentrated formula
Compatible With:
Chlorine, bromine, ozone and biguanide sanitizers.

The ideal way to maximize your filter's efficiency. Remove debris simply by soaking filter in solution overnight and rinsing the next morning.

Applications:

1. Remove cartridge filter and rinse with clean water.
2. Prepare FILTER FRESH solution by adding 16 oz. of FILTER FRESH in bucket of 2.5 gallons of warm water. DO NOT USE galvanized aluminum or porcelain container for soaking. Always add FILTER FRESH to water, NOT water to FILTER FRESH.
3. Place cartridge filter in solution and allow to soak overnight (12 hours). Remove filter after soaking and rinse thoroughly with clean water. If possible, allow cartridge filter to dry completely.

Filter Cleaners, Filter Rinse®

This One-step formula cleans sand filters fast. Backwashing with plain pool water alone cannot fully remove the caked-on oils and minerals deposits from the sand particles. Filter Rinse® renews the sand particles and keeps the filter operating at maximum efficiency to yield crystal clear pool water with longer periods between backwashings. Keeps filters operating at maximum efficiency.

Features:
Easy-to-use
Keeps filters working at maximum efficiency
Clears sand particles of caked-on oils and mineral deposits
Use every time filter is backwashed to maintain crystal clear water clarity and maximum efficiency of sand filter.
Compatible With:
Chlorine, bromine, ozone and biguanide sanitizers.

Applications:

1. Close main drain if possible to allow maximum intake from skimmer.
2. Start filter backwash as recommended by manufacturer.
3. While filter is backwashing, slowly pour 8 oz. into skimmer so that it goes directly through filter.
4. Continue backwash procedure according to manufacturer's instructions.

GL71014	FILTER RINSE 12QT CASE	249.98

Natural Clear

A natural, biodegradable water cleaner with its new, more concentrated enzyme formula rids pools of organics that cause odors, scum lines, filter clogging and cloudy water faster than ever before! Increases filter life span by eliminating scum and oily buildup. Includes a built-in measuring cap.

Initial Dosage:

Add 16 oz. per 10,000 gallons of pool water each day until scum lines are removed.

Maintenance Dosage (weekly):

To prevent oils, lotions and other organics from accumulating on walls or in the water, add 8 oz. per 10,000 gallons.

Party Blue

Party Blue

Turns dull lifeless swimming pool water into rich, sparkling, Caribbean blue! Just 1 oz. per 10,000 gallons of pool water will last several hours to a couple of days depending on sanitizer levels in the pool.

Use for pool parties or other times when you want your pool water to look tropical blue.

Features:

Great for parties or other poolside events.

Do not shock treat or super chlorinate pool or color will fade.

Compatible With:

Bromine, chlorine, biguanides, ozone, mineral purification systems, and salt water pools

Safe for all pools including vinyl, plaster and fiberglass.

Applications:

1. Turn on pump and have water circulating.
2. In a properly balanced pool (pH 7.2-7.8, sanitizer 1-3ppm), very slowly drip 1 oz. per 10,000 gallons of pool water into the skimmer.
3. If you want a deeper blue color, add another 1/2 oz. of Party Blue per 10,000 gallons of water.
4. Operate pump at least 2 to 4 hours after application.
5. Treatment may be repeated as needed to maintain color.

GL71136-1	PARTY BLUE 8OZ EA	10.86

Chemicals

GLB Pool Chemicals

Stabilizer (Conditioner)

Chlorine Stabilizer

Maximizes available chlorine in pools. Specially designed to reduce chlorine loss from sunlight exposure.

Maximizes chlorine efficiency.

Features:

Stops chlorine loss due to excessive sunlight.

A properly stabilized pool will significantly reduce rapid dissipation and loss of chlorine caused by chemical reaction in intense sunlight. CHLORINE STABILIZER acts as a "shield" against such loss.

Applications:

1. The most effective and economical use of our stabilized chlorine chemicals will be obtained if the pool water is first stabilized by adding an initial 30 ppm of STABILIZER to the pool.
2. To obtain a 30 ppm level, add 1 pound of STABILIZER to the pool for each 4,000 gallons of pool water.
3. Add STABILIZER slowly to surface skimmer. Make sure filter is clean with full pressure drop. Recirculate water for at least 6 hours.
4. Maintain a cyanuric acid level of 30-50 ppm using a suitable test kit. Check the concentration of cyanuric acid periodically at least once a year.

Stain Remover

Stain Magnet

A stain remover for use in all types of pools including gunite, plaster, concrete, vinyl and fiberglass. Remove metallic stains without the inconvenience of draining pool water. Dosage of **Stain Magnet** recommended is 2.5 lbs. per 20,000 gallons of water.

No draining or pre-testing necessary! The fast and easy way to rid your pool of metallic stains.

Features:

Easy to apply granular quickly eliminates metallic stains without draining
No pre-testing required
No clouding of water
Can be applied directly on stubborn stains

Compatible With:

Chlorine, bromine, ozone, biguanide and salt water sanitizing systems.

Applications:

1. Before beginning treatment, lower chlorine or bromine level below 2 ppm and adjust pH between 6.8 - 7.2.
2. Brush affected area, then dissolve recommended amount of **Stain Magnet** with water in bucket before applying to pool.
3. Apply diluted **Stain Magnet** by pouring into pool along stained walls.

71020-1	STAIN MAGNET 2.5LB BOTTLE EACH	26.67

Stain/Scale Control, Sequ-Sol

A fast-acting sequestering agent which holds iron, manganese, copper, and calcium in solution so they don't react with other chemicals in the water. Using Sequa-Sol at pool set-up and as part of a regular maintenance program will protect pool equipment, pipes, and fittings

Compatible With:

Chlorine, bromine, biguanide, ozone and salt water sanitizing systems..

SEQUA-SOL provides fast and effective protection against pool staining and scaling. Its powerful formula holds minerals in solution even in chlorine, bromine, and strong UV sunligh

Features:

Prevents staining and scaling
Fast-acting
Protects pool equipment
Prevention of staining and scaling saves both time and money. Use SEQUA-SOL as part of your weekly maintenance program. To remove existing stains, use GLB STAIN MAGNET.
SEQUA-SOL can be added to your pool water at any time. It is most important to use SEQUA-SOL at pool opening or when filling your pool for the first time.

Applications:

Initial Treatment:

1. For best results, add SEQUA-SOL as you are filling the pool and allow to circulate overnight before adding additional chemicals.
2. Add 16 oz. per 10,000 gallons of water. If the water is extremely hard (over 200 ppm) or has high iron, copper, or manganese content (over .1 ppm), add 32 oz. per 10,000 gallons of water.

Maintenance:

Following initial treatment, add 4 oz. per 10,000 gallons once a week during the pool season.

Item #	Description	Price

GL0200-1	SEQUA-SOL 1 QT EA, GLB	23.43

Chemicals

GLB Pool Chemicals

Stain/Scale Control, Super Sequa-Sol

Super Sequa-Sol

A concentrated, granular sequestering agent that prevents staining, scale and rust on pool equipment, pipes and fittings.

SUPER SEQUA-SOL provides fast and effective protection against pool staining and scaling. Its powerful formula holds minerals in solution even in chlorine, bromine, and strong UV sunlight.

Features:

Granular formula prevents staining and scaling
Highly concentrated, granular formula
Protects pool equipment
Great for use at pool start-up or any time a large amount of make-up water is added to the pool
Compatible With:
Chlorine, bromine, biguanide, ozone and salt water sanitizing systems.

Applications:

Initial Treatment:

1. For best results, add SUPER SEQUA-SOL as you are filling the pool and allow to circulate overnight before adding additional chemicals.
2. Add 10 oz. per 10,000 gallons of water. If the water is extremely hard (over 200 ppm) or has high iron, copper, or manganese content (over .1 ppm), add 20 oz. per 10,000 gallons of water.

Maintenance:

Following initial treatment, add 2 oz. per 10,000 gallons once a week during the pool season.

The best time to use concentrated SUPER SEQUA-SOL is during pool opening. Apply complete dosage directly to the pool near the water source.

GLB Rendezvous for Spas

Starter Kits

Deluxe Spa Care Kit

A complete spa start up system that contains everything needed to open a spa including a spa care guide.

Everything is kept organized in a reusable pail.

Features:

Contains everything needed to start up a spa.
Available in chlorine, bromine or Enhance/Activate varieties.

Contents:

pH Up
pH Down
Activate
Foam Out
Spa Clarifier
Natural Clear for Spas
Protect Plus
Enhance
Rendezvous Brominating Tablets
Chlorinating Concentrate Granular

Sanitizers - Activate

Activate

Fast-dissolving, non-chlorine shock oxidizer quickly destroys contaminants such as perspiration and cosmetics that cause odors and skin and eye irritation. Dual-action product "activates" Enhance into a bromine sanitizer and works as a shock oxidizer.

Use with Enhance to provide a completely chlorine-free spa. Activate can also be used to shock oxidize spas sanitized with chlorine or bromine.

Features:

Shock oxidizes without chlorine
Clears cloudy water and eliminates odors and contaminants
Does not upset water chemistry
Compatible With:
Chlorine, Bromine, ozone and mineral purification systems.

Applications:

Activate® should be added initially when the spa/hot tub is filled and daily as a shock treatment and as an activator for the production of available bromine in water containing Enhance.
See label for complete application instructions.

GLB Rendezvous for Spas

Sanitizers - Enhance

Enhance

A clear solution of premixed liquid bromide salts that remain as a stable bank in the spa/hot tub water until ACTIVATE is added.

Heavy usage, or the length of time the spa/hot tub is in use may result in depletion of bromine and require additional dosages of ENHANCE to maintain the desired bromine residual.

Features:

Completely chlorine-free
Shocks and sanitizes simultaneously

No separate shock treatment needed when ACTIVATE is used

Compatible With:

Ozone, and mineral purification systems.

Applications:

Initial Filling:

1. Should be added when the spa/hot tub is filled.
2. Add 4 oz. directly into spa for every 250 gallons of water. Keep the water circulating when adding ENHANCE.

Maintenance (weekly):

Add 1 oz. to every 250 gallons of spa water weekly to maintain a bank of bromide in the water.

Item #	Description	Price

1Sanitizers - Bromine Start

Broma-Start

Pre-measured sodium bromide creates an initial bromide reserve in spa water. Use with Rendezvous BROMINATING TABLETS.

BROMA-START should be added each time the spa is filled.

Features:

Helps eliminate chlorine odors
Helps eliminate burning eyes
Establishes a bromide bank in spa water.

Compatible With:

Bromine, ozone and mineral purification systems.

Applications:

1. Add 1/2 oz. per 100 gallons of spa/hot tub water to establish a 30 ppm bromide reserve.
2. Circulate the water while adding to assure rapid and thorough distribution.

Item #	Description	Price
GL106270	BROMA START 6/2 OZ	233.86

Sanitizers - Bromine Tabs

Rendezvous Brominating Tablets

These tablets are a concentrated source of active bromine that dissolve slowly and evenly in spa feeders and floaters to provide continuous disinfection. Their new round shape easily fits into most feeders.

Proper sanitary practices require changing spa water every 90 days or as necessary.

Features:

Keeps water clean, clear and odor free
Effective as chlorine
Works over wide range of pH levels

Compatible With:

Ozone, and mineral purification systems.

Applications:

Follow label instructions for proper use.

Gives the effectiveness of chlorine without the chlorine odor.

Item #	Description	Price
GL106262	BROM TABS 6X4#	312.14
GL71646	BROM TABS 12X1.65#	254.02

Sanitizers - Chlorine Granules

Chlorinating

Concentrate Granular

Specially blended chlorine for the more demanding requirements of high-temperature spa and hot tub disinfection.

Heavy usage or the use of oils or lotions may increase the chlorine demand of the spa or hot tub resulting in the need for more frequent checks of chlorine residual.

Features:

Especially designed for use in hot water

Compatible With:

Ozone and mineral purifiers.

Applications:

Chlorinate:

1. Add 1/2 oz. per 500 gallons of water.
2. Wait 5 minutes then check chlorine residual. Residual must be between 2 to 3 ppm to enter spa water. Add more **Chlorinating Concentrate Granular** until the residual is reached.

Maintenance (daily):

1. Chlorinating Concentrate granular should be added daily or as necessary to maintain 2 to 3 ppm residual chlorine.
2. Test frequently.
3. When adding additional Chlorinating Concentrate Granular, broadcast over the surface of the water and allow 5 minutes before testing.

GL106282	CHLOR GRAN 2LB X 12	333.98

Chemicals

GLB Rendezvous for Spas

Balancers, Alkalinity

Alkalinity Up for Spas

Granular additive raises spa water alkalinity helping maintain pH levels.

After adding ALKALINITY UP, wait several hours before rechecking total alkalinity level.

Features:

Effective water balance control

Compatible With:

Chlorine, bromine, ozone and biguanide sanitizers.

Applications:

To Increase Total Alkalinity:

Determine the level of total alkalinity. If the value is below 75 ppm, add sufficient ALKALINITY UP directly to the water - to increase the total alkalinity value to at least 75 ppm.

2-1/2 tbs. will provide approximately 10 ppm increase in total alkalinity for 500 gallons of water.

Wait several hours for ALKALINITY UP to distribute uniformly before rechecking total alkalinity level. Repeat as necessary.

Item #	Description	Price
GL6325	ALKALINITY UP 12X1# JAR	63.50

Balancers, PH Down

pH Down for Spas

Lowers the pH of spa water.

Chlorine, bromine, ozone and biguanide sanitizers.

Features:

Effective water balance control

Easy to use

• Allow 4 to 6 hours for distribution before retesting the pH level.

Applications:

To Lower pH Level:

1. When the pH value of the water is above 7.8, add 1-1/2 tsp. of pH DOWN while the pump is in operation for each 500 gallons of water.

2. Allow 4 to 6 hours for distribution then retest pH.

3. If the pH value remains above 7.8, repeat the above dosage until the pH is brought within the ideal range of 7.2 to 7.8.

Item #	Description	Price
GL6313	PH DOWN 12X1#	63.50

Balancers, PH Up

pH Up for Spas

Granular formula raises the pH of spa water.

If the pH value is continually low, the water should be tested for total alkalinity. If the total alkalinity is low, it should be corrected by adding ALKALINITY UP.

Features:

Effective water balance control

Easy to use

Compatible With:

Chlorine, bromine, ozone, biguanide and mineral sanitizing systems.

Applications:

To Raise pH Level:

When the pH value of the water drops below 7.2, add the following amounts of pH UP while the pump is in operation for each 500 gallons of water.

When the pH is between 6.8 and 7.2, add 2 tbs. of pH UP.

When the pH is below 6.8, add 4 tbs. of pH UP.

Allow 4 to 6 hours for circulation, then retest. Repeat above procedures if pH remains low.

GLB Rendezvous for Spas

Clarifiers

Spa Clarifier

Clears cloudy water and adds sparkle by removing microparticles that dull spa water. Restores sparkle to dull water

Compatible With:

Chlorine, bromine, biguanide, ozone, and mineral purification systems.

Features:

Clears cloudy water
Improves filter efficiency
No adverse effect on pH

Applications:

Initial Filling:

When spa/hot tub is initially filled or returned to normal operation, add 1 oz. per 250 gallons of water.

Maintenance:

Use once a week, or whenever spa water appears unusually cloudy, add 2 oz. per 500 gallons of water.

Most effective when the required dosage is first diluted in a bucket of water and then added to the spa/hot tub.

Filter Cleaners, Filter Fresh

Filter Fresh for Spas

A liquid formulation of grease-cutting compounds and other ingredients designed to remove body oils, grease and other organic material, as well as scale and mineral buildup from filter media.

Deeply cleans and improves the effectiveness of spa filters.

Have another filter cartridge at hand to use in spa while filter soaks overnight.

Features:

Removes oils and mineral scale
For use on all filters
Improves the effectiveness of spa filters

Compatible With:

Chlorine, bromine, biguanide, ozone and mineral purification systems.

Applications:

Cartridge Filters and Removable DE Elements:

1. Remove elements and rinse with clean water.
2. Prepare solution by adding 16 oz. of FILTER FRESH to 2.5 gallons of warm water in a large plastic container.
3. Place the elements in the solution and allow to soak overnight (12 hours).
4. Remove the elements and rinse thoroughly with clean water.
5. If possible, allow cartridges to dry before reinstalling in filter.

Item #	Description	Price
GL71012-1	FILTER FRESH GALLON BOTTLE	58.50

Filter Cleaners, Minute Rinse

Minute Rinse

An instant, concentrated cleaner for cartridge filter elements when overnight soaking is not possible.

Removes grease, mineral and scale from cartridge filter elements in five minutes.

To extend the life of your filter, use MINUTE RINSE in a maintenance program with Rendezvous FILTER FRESH, a deep cleansing overnight soaking solution.

Features:

Removes grease, minerals and scale in minutes
Instant spray-and-rinse formula

Compatible With:

Chlorine, bromine, biguanide, ozone and mineral purification systems.

Applications:

1. Shake well.
2. Remove cartridge filter element from housing and rinse off loose debris.
3. Thoroughly saturate filter with water.
4. Spray MINUTE RINSE over the total surface area for maximum cleaning action.
5. Wait 5 minutes.
6. Rinse element THOROUGHLY and replace.

Foam Out

Foam Out

A defoamer that rids spa of foam caused by a concentration of body oils and other materials

Fast acting, concentrated solution..

Features:

Prevents and eliminates foam and sudsing
Fast-acting formula

Compatible With:

Chlorine, Bromine, ozone and mineral purification systems.

Applications:

To Eliminate Existing Foam:

1. Squirt a small amount directly on the surface of the foam. DO NOT USE more than 1/2 teaspoon at a time.
2. Apply when the spa/hot tub is in operation.
3. Wait 10 minutes.
4. Repeat treatment if foam does not subside.

Use FOAM OUT to prevent and eliminate foaming and sudsing in spas, hot tubs, therapeutic pools, fountains and swimming pools.

PH Magic

pH Magic®

Unique granular formulation which adjusts and locks in the critical pH level of spa water.

Stabilizes pH for 3 months.

Improperly balanced pH levels in spa water can lead to stains, scale, equipment corrosion and skin and eye irritation.

Features:

Keeps water balance adjusted from refill to refill
Locks in correct pH levels
Works even in hard water

Compatible With:

Chlorine, bromine, biguanide, and ozone sanitizers

Applications:

1. Add 1.5 lbs. for up to 250 gallons of spa water. Pour directly into water.
2. Turn on jets and allow water to circulate for 15 minutes.
3. Repeat the application each time you refill your spa with fresh water.

Protect Plus Stain & Scale Control

Protect Plus

A dual-purpose liquid concentrate that acts as a protection against staining and scale formation and as a clarifying agent to keep spa or hot tub water sparkling clear.

Protects spa equipment from stains, scaling and corrosion.

Should be added initially when filling the spa/hot tub and weekly for preventive maintenance.

Features:

Protects against stains, scale and rust
Brightens water while protecting equipment

Compatible With:

Chlorine, bromine, biguanide, ozone and mineral purification systems.

Applications:

Initial Filling:

1. Pour directly into spa/hot tub 2 oz. for every 250 gallons of water.
2. Filter and circulate the water for at least an hour before adding any other chemicals.

Maintenance (weekly):

Add 1 oz. for every 250 gallons of spa/hot tub water.

Spa Cleaner

Spa Cleaner

A superior formula for cleaning and descaling most fiberglass, acrylic and concrete spa surfaces. Just spray and wipe! Powerful cleaner for removal of most stains and soiling.

Test on a small, inconspicuous area of the surface to be cleaned before using.

Features:

Heavy-duty surface cleaner
Removes oil, grime and scale deposits
Cleans with the natural power of citrus

Compatible With:

Chlorine, bromine, biguanide, ozone and mineral purification systems.

Applications:

1. Apply with a sponge, cloth or soft brush.
2. Swab surface to be cleaned and let stand no more than 3 minutes.
3. Scrub briskly if necessary on areas where excessive scale and grime have built up.
4. Wipe surface that was cleaned promptly with a damp cloth and then generously splash water on the cleaned area to remove any excess material.

GLB Rendezvous for Spas

Tub Rinse

Tub Rinse

Keeps spa and jetted bath tub plumbing clear of organics, oils, dirt and minerals. Tub Rinse cleans the dirt you can't see and prevents buildup that could restrict water flow and damage equipment.

Features:

Clears inside plumbing
Use before draining water out of the spa
Low foaming
Compatible With:
Chlorine, bromine and biguanide sanitizing systems.

Applications:

Use every 3 months or when refilling:

1. Remove filter and clean separately using Filter Fresh.
2. Before spa is drained, add 1 bottle of Tub Rinse to warm spa water.
3. Turn on pump and run the jets for 15 minutes.
4. Turn pump and jets off and let sit for 1 hour.
5. Turn pump on and run jets for 15 minutes.
6. Drain the spa, cleaning the inside spa walls while draining.
7. Refill the spa using your spa guide directions.

Use every three months before draining your spa.

Jacks Magic

Jacks Magic Pool Chemicals

The Blue Stuff® METAL SOLUTION is the most recommended start up product in the swimming pool industry for plaster pools. The Blue Stuff is very efficient at controlling plaster dust. The Blue Stuff's proprietary blend removes metals such as copper, iron, and manganese from the water.

The Purple Stuff® (SALT SOLUTION) is the stain preventative of choice, and a must product for salt (chlorine) generator pools. Unlike traditional sequestering agents, The Purple Stuff works extremely well in high salt and high TDS pools.

O2 Safe Shock™ (NON-CHLORINE SHOCK) is a non-chlorine shock (but not a persulfate compound). O2 Safe Shock yields more than 12% active oxygen (3 times more oxygen than persulfate compounds). O2 Safe Shock can be used as an acid wash pretreatment, making tough copper stains much easier to remove.

Stain Identification™ Kit (STAIN ID KIT) is the first step in performing a successful Jack's Magic stain removal. The Stain ID Kit is designed to take the guesswork out of removing swimming pool stains. One of the (4) simple topical tests will identify what best removes a swimming pool stain, saving both time and money.

Professional Test Kit provides for consistent and highly accurate test readings. The Professional Test Kit has been designed to give pool professionals the accurate answers they need to test swimming pool water and solve problems. This kit utilizes tablets, which do not suffer from the same degradation problems as do liquid reagents.

Sequest Test Kit is the only accurate way to measure the level of The Blue Stuff, Pink Stuff, or Purple Stuff actively working in swimming pool water to prevent and remove stains and/or scale. The Sequest Test Kit is a must for the professional doing stain removals or preventative maintenance.

Leisure Time

Sanitizers, Bromine- Granular

Sodium Bromide

Establishes an immediate bromide reserve in your spa.
When used with Leisure Time **Brom Tabs**, the disinfection of the spa will be completely bromine-based and chlorinous odors will not exist.

Features:

For use with brominating tablets in hot tubs
Establishes a bromide reserve
Leisure Time **Sodium Bromide** is NOT a disinfectant. It is used to establish a reserve of bromide in spa or hot tub water. It is necessary to use a sanitizer to disinfect the water.

Applications:

Start-Up:

1. Add 1/2 oz. per 100 gallons of spa water to establish a 30 ppm bromide reserve.
2. Add **Brom Tabs** to establish a bromine level.
3. Repeat steps 1-2 when spa is drained and refilled.

Chemicals

Leisure Time

Sanitizers, Bromine- Tabs 1"

Brom Tabs

Based on Dantabrom chemistry, these tabs provide a concentrated source of active bromine that is ideal for hot tub sanitizing. These tablets dissolve slowly and evenly and fit in most spa feeders and floaters to provide continuous disinfection of your spa.

Features:

Brom Tabs are 2.5 times more soluble than BCDMH which is ideal for floating spa feeders.

Creates a faster bromine residual for spa startup.

Unique chemistry provides the effectiveness of chlorine without the chlorine odor.

Proper sanitary practices require changing spa water every three months. Maintain a sanitizer level of 3-5 ppm.

Applications:

Spa or Hot Tub Start-Up:

Using a suitable feeder adjusted according to the manufacturer's directions, add this product to maintain an active bromine concentration of 2 to 4 ppm in residential spas and 3 - 6 ppm in commercial spas. Use a reliable test kit to monitor bromine regularly. This product's usage will typically vary from 0.015 to 0.10 pound for every 300 gallons of spa water to maintain the recommended bromine concentration range. The presence of organic debris, high bather use and other factors may require a higher dosage.

Sanitizers, Chlorine- Granular

Spa 56 Chlorinating Granules

Specifically formulated for spas, this concentrated granular chlorine effectively sanitizes and disinfects hot water. **Features:**

Maintains clean, clear, sanitized water
EPA approved

Shocking the spa after each use will destroy organic bather waste.

Provides a reliable and easy-to-use source of concentrated chlorine.

Can be used as part of the **Simple Spa Care® Program**.

Applications:

Start-Up:

Add 1/2 oz. of this product per 500 gallons of water prior to entering spa. Wait 5 minutes then check chlorine residual. Residual chlorine must read between 2 and 3 ppm. If it does not, additional dosages of material should be added until it does. Once the chlorine residual is established in the 2 to 3 ppm range, the spa or hot tub may be entered.

Maintain:

This product should be added daily or as necessary to maintain 2 to 3 ppm residual chlorine. Frequent checks should be made of residual chlorine using a reliable test kit. This product should be broadcast over the surface of the water and allowed at least 5 minutes mix time before testing. Note: Heavy bather usage or the use of oils or lotions may increase the chlorine demand resulting in the need for more frequent checks of chlorine residual. pH should be monitored with a reliable test kit and maintained at 7.2 to 7.8 for clean water. pH can be decreased by adding a suitable agent such as sodium bisulfate or increased by adding Aklalinity Up.

Superchlorination:

It is good practice to superchlorinate every 2 to 4 weeks. To superchlorinate, add 1 oz. of this product for each 500 gallons of water. Thoroughly clean spa, vacuum and cycle through filter. Resume program when chlorine residual reads 2 to 3 ppm.

Shocks, Renew

Renew is a non-chlorine shock oxidizer.

This fast-dissolving granular rids spa water of residual soaps, deodorants, natural oils and organic materials that can build up in spa water.

When **Renew** is added to the spa water, it reacts with the bromide and forms a bromine solution to destroy any microorganisms left behind by the bather. Part of the **Reserve & Renew® Chlorine-Free Sanitizing System**.

The time to add **Renew** is after using the spa. Simply add the required dose, put the cover in place, and the water will be fresh, clean and ready for the next bather.

Features:

Quickly dissolves in water to rid spa water of oils and residue.

Eliminates organic materials that cause odors, skin and eye irritation.

Use spa minutes after application.

pH buffered so it does not effect pH level.

Buffer potassium monopersulfate compound

Formulated with DuPont™ Oxone®

Allows for use immediately after application

Compatible With:

Chlorine, bromine, ozone and mineral purifications systems, as well as the

Reserve & Renew® System.

Applications:

After Each Use:

1. Turn on filtration system.
2. For each 250 gallons of water, add 2 ounces directly into spa water.
3. Run filtration system for 15 minutes with cover off.
4. Repeat process once a week to help maintain clear, odor-free water.

By adding **Renew** after spa use, the bather is not exposed to any sanitizer while in the water.

Use after each use as part of the **Simple Spa Care® Program**.

Shocks, Renew Tabs

Renew Tabs

A non-chlorine shock oxidizer that is conveniently packaged in easy-to-use tablets that quickly dissolve in spa water and break down residual soaps, deodorants, natural oils and organic materials before they have a chance to form combined chlorine.

Using **Renew Tabs** to shock oxidize the spa after each use will keep the water clean and clear until the next time the spa is used.

Features:

Fast-dissolving effervescent tablets
Dissolves quickly to eliminate oils and residue
Does not affect pH level
No chlorine-like odors
Chlorine-free
Allows for use immediately after application
Formulated with DuPont™ Oxone®
Easy to use-- no measuring!
Compatible With:
Chlorine, bromine, ozone and mineral purification systems.

Applications:

After Each Use:

1. Turn on filtration system.
2. For each 250 gallons of water, place 3 tablets into spa water.
3. Run filtration system for 15 minutes with cover off.
4. Repeat process once a week to help maintain clear, odor-free water.

Algaecide for Spas

Spa Algaecide

Non-foaming algaecide kills and prevents all types of algae. Regular use will not only destroy existing algae but will also keep new algae from forming.

Features:

Non-foaming
Highly effective
EPA registered
Compatible With:
Chlorine, bromine, ozone and biguanide sanitizers.

Applications:

Initial Treatment:

1. For visible algae growth, add 6-8 oz. per 500 gallon capacity.
2. For heavy algae growth, drain spa and clean prior to treatment.

Maintenance:

Add 1-2 oz. per 500 gallons every 5-7 days.

Item #	Description	Price
.Q	SPA ALGAECIDE (12 QT)	140.78
.Q-1	SPA ALGAECIDE EA QUART	12.57

Balancer - Calcium Increaser

Calcium Booster

Raises water hardness level while preventing foaming and equipment corrosion.

Features:

Increases water hardness
Helps prevent corrosion
By maintaining proper hardness levels, the life of the spa will be extended.

Applications:

As Needed:

- One ounce raises the calcium hardness 7 ppm in 500 gallons of water.
1. Determine amount of product to be added. The ideal hardness level is 150-400 ppm.
 2. Turn jets ON to circulate spa water.
 3. Pour required amount into the water.
 4. Run filter for 1 to 2 hours.
 5. Retest water to ensure proper level.
 6. Repeat steps 1-5 until proper level is obtained.

Compatible With:

Chlorine, bromine, ozone and biguanide sanitizers.

Use Leisure Time **Spa & Hot Tub Test Strips** to determine hardness level. Water low in calcium will etch plaster and corrode equipment.

Item #	Description	Price
CB	CALCIUM BOOSTER 12X1QT	85.68
CB-1	CALCIUM BOOST QT EACH	7.65

Balancer - PH Balance

pH Balance is a unique pH balancer that maintains the ideal pH level between 7.2 and 7.8.

Due to the unique buffering capacity, it is not necessary to adjust the calcium level in the spa.

Add to freshly filled water. **pH Balance** should not be used in hard water areas where calcium reading is above 150 ppm. In these conditions, this formula will soften hard water and release calcium into spa water possibly causing cloudy water, scaling and clogging of spa filter. If you are not in a hard water area, but experience clouding of spa water after applying **pH Balance**, Leisure Time recommends using **Bright & Clear** to return clarity to water.

Features:

Prevents pH drift
Eliminates need to adjust pH on ongoing basis
Use each time water is refilled
One bottle treats up to 500 gallons of water

Compatible With:

Chlorine, bromine, ozone and mineral purification systems.

Applications:

As Needed:

1. Adjust pH and total alkalinity of freshly filled spa to proper levels. (pH level: 7.2 - 7.8 ppm total alkalinity level: 80-120 ppm)
2. Add entire bottle to filled spa while the filter is running.
3. pH will instantly increase or decrease to a reading between the ideal range of 7.2 to 7.8.

Item #	Description	Price
PHB	PH BALANCE 12 QUARTS	221.09

Chemicals

Leisure Time

Balancer - PH Decreaser, Spa Down

Spa Down

Granular product adjusts water pH and alkalinity down. Provides a greater amount of control for large and commercial spas.

For best results, dissolve granular products first by adding to a small, plastic pail filled with water. Then, apply the solution to the spa water.

It is important to maintain the pH between 7.2-7.8. High pH (above 7.8) can cause scaling and/or cloudy or colored water.

Features:

Lowers pH and total alkalinity
Increases effectiveness of sanitizer

Compatible With:

Chlorine, bromine and biguanide sanitizers.

Applications:

As Needed:

1. Make sure all equipment is OFF.
2. Add 1/4 oz. (1-1/2 tsp.) to the spa water.
3. Turn on circulation system for 30 minutes.
4. Retest water. If pH is still above 7.8, repeat steps 1-3.

Item #	Description	Price
22338	SPA DOWN (12/2-1/2# BTLS)	75.94
22338-1	SPA DOWN 2-1/2# BOTTLE EACH	6.78

Balancer - PH Decreaser, Spa Down Liquid

Liquid Spa Down

Lowers critical pH levels easily with no mixing or mess.

Do NOT add more than 1 oz. at a time. Always wait 30 minutes between dosages and test water before each addition of **Liquid Spa Down**. Lock in pH between refills with **pH Balance** or **pH Balance Plus**.

Features:

Lowers pH and total alkalinity
Easier to use than granular balancers
Pre-mixed - just pour into spa

Compatible With:

Bromine, chlorine and biguanide sanitizers.

Applications:

As Needed:

1. Turn ON air blower or filter system.
2. Add 1 oz. directly into spa.
3. Retest water after 30 minutes.
4. Follow steps 1-3 until pH and total alkalinity are in the range of 7.2-7.8 and 80-120 ppm respectively.

Item #	Description	Price
ZIQ	SPA DOWN LIQUID 12QT PER CS	155.23

Balancer - PH Increaser, Spa Up

Spa Up

Granular product gently adjusts water pH and alkalinity upward. Best used in larger spas and in commercial spas.

For best results, dissolve granular products first by adding to a small, plastic pail filled with water. Then, apply the solution to the spa water.

Features:

Raises pH and total alkalinity
Increases effectiveness of sanitizer

Compatible With:

Chlorine, bromine and biguanide sanitizers.

Applications:

As Needed:

1. Determine amount to use according to bottle label.
2. Make sure equipment is OFF.
3. Add applicable amount to the spa water.
4. Turn on circulation system for 1-3 hours.
5. Retest water after 3 hours.
6. If pH is still below 7.2, repeat steps 1-5.

Item #	Description	Price
22339	SPA UP (12/2# BTLS) BALANCER	76.27
22339-1	SPA UP 2# BOTTLE	6.81

Balancer - PH Increaser, Spa Up Liquid

Liquid Spa Up

Gently increases pH with "no mix" liquid. Allows for a more comfortable control of the adjustment of pH.

Add small quantities at a time allowing the water to completely mix and come into equilibrium before retesting. Large dose at once may drive the pH too high.

Features:

Raises pH and total alkalinity
Easier to use than granular balancers
Pre-mixed - just add to spa

Compatible With:

Chlorine, bromine and biguanide sanitizers.

Easier to stay within the pH range when using liquid.
Lock in pH between refills with **pH Balance**

Applications:

As Needed:

1. Turn ON air blower or filter system.
2. Add 1 oz. directly into spa.
3. Retest water after 30 minutes.
4. Follow steps 1-3 until pH and total alkalinity are in the range of 7.2-7.8 and 80-120 ppm respectively.

Bright and Clear

Bright & Clear

Safe for Ozone - Does not cause build-up!

Developed especially for hot water treatment, this clarifier utilizes unique polymer action that neutralizes and removes dirt, soap, oily films and suspended particles for clean, fresh water. Works quickly to turn cloudy water into crystal clear water.

Regular use ensures the filter will remove the maximum amount of particles from the water thus providing the best water clarity.

Features:

Adds sparkle to spa water
Helps spa filter perform at peak efficiency
Reduces sanitizer demand by removing dirt particles

No waiting after treatment

Compatible With:

Chlorine, bromine, ozone and biguanide sanitizers.

Use weekly as a part of the **Simple Spa Care® Program**

Applications:

Weekly:

1. Turn OFF all equipment.
2. Turn ON air blower or spa jets.
3. Add **Bright & Clear** directly to spa. Use 2 oz. for spas up to 800 gallons. Use 4 oz. for spas over 800 gallons.
4. Allow blower or jets to run a few minutes.
5. Turn ON filter system until water is bright and clear.

Citribright

CitriBright

Featuring the natural cleaning power of citrus, this spray-and-wipe formula cleans and degreases almost any surface — from spas and hot tubs to swimming pools, patio furniture and more. It goes to work on the toughest grease and grime quickly and easily, leaving behind nothing but a pleasant citrus scent.

Use for spas, patio furniture and more.

Features:

Spray-and-rinse cleaner is fast and easy to use
Trigger spray bottle
Uses natural cleaning power of citrus

Compatible With:

Chlorine, bromine, ozone and biguanide sanitizers.

Applications:

As Needed:

1. Turn nozzle to spray.
2. Spray **CitriBright** on the surface intended to be cleaned.
3. Wipe clean with a damp sponge or towel.
4. For vinyl or plastic surfaces, rinse with water following cleaning.

Cover Care

Cover Care & Conditioner

Cleans, restores and protects spa covers from weathering, fading and discoloration. Specially formulated with a UV protectant. Can be used on all vinyl surfaces including car interiors, boats, spa covers and patio furniture. Apply twice for initial treatment of spa cover. Repeated applications increase water repellency!

Features:

Cleans and shines spa covers and all vinyl surfaces
Repels water, dust and dirt
Includes a UV protectant to prevent discoloration from sun

Compatible With:

Chlorine, bromine and biguanide products.

Applications:

Monthly:

1. Shake gently before using.
2. Apply liberally to the intended surface.
3. Let stand for 15-20 minutes to allow penetration.
4. Wipe excess product off and buff to a high lustre.

Filter Cleaners

Filter Clean New and Improved

Concentrated formula deep cleans filter to remove dirt, oil, grease and scale.

An overnight soak will assure complete removal of all contaminants including those that may have been deeply set over months of use.

Features:

Use for cartridge, sand or DE filters
Removes oil, grease, dirt and soap
Works overnight

Compatible With:

Chlorine, bromine and biguanide sanitizers.

Applications:

3-Month Cleaning:

1. Remove grids or cartridges from filter.
2. In a clean, plastic pail, bucket or trash can that contains 8 gallons of water, add contents of FILTER CLEAN. (This is enough solution to clean 110 square feet of filter area.)
3. Place cartridge or grids upright in solution.
4. Soak for a minimum of 3 hours. For maximum effectiveness, soak overnight.
5. Remove filter from solution. Hose off filter with high pressure nozzle and replace.

Filters should be cleaned every three months or as needed. For maximum benefit, allow cartridge to dry before reinstalling.

Filter Cleaners, Instant Spray

Instant Cartridge Clean

Fast-acting spray & rinse formula with **NEW** color spray indicator for complete coverage.

Features:

Blue color spray indicator
Great for use when soaking filter overnight is not an option.
Removes oil, grease and calcium from filters in minutes.

Compatible With:

Chlorine, bromine, ozone and biguanide sanitizers.

Applications:

Monthly:

1. Remove cartridge filter element from filter housing and rinse thoroughly with water to remove loose material.
 2. Saturate the filter element with water.
 3. Spray **Instant Cartridge Clean** over entire surface area for maximum effect.
 4. Let set 3-6 minutes.
 5. Rinse filter **COMPLETELY** with water and replace filter back into spa. (NOTE: If filter is not completely rinsed, foaming may occur.)
 6. For heavily soiled filters, repeat steps 1-5.
- It is recommended that cartridge filters be thoroughly cleaned on a monthly basis to maintain clear, clean water.

Foam Down

Foam Down

Concentrated foam suppressant designed for hot water applications.

Keeps foaming from recurring longer than other similar products.

Features:

Non-oily foam suppressant
Specifically designed for hot water application
Effective in any type of sanitized water
Flip-top cap for easy application
Compatible With:
Chlorine, bromine, ozone and biguanide sanitizers.

Applications:

As Needed:

1. Shake well before using.
2. Add directly to the foaming area using approximately 1/2 oz. at a time.
3. Repeat as necessary.

Continual foaming problems can indicate other imbalances in the spa such as low calcium or possibly the need to drain the water. If foaming persists, contact your local Leisure Time dealer for advice.

Jet Clean

Jet Clean

Often, if a spa or jetted tub has problems, the cause is out of sight. **Jet Clean** prevents such problems by keeping spa and jetted tub plumbing clear of organics, oils, dirt and minerals. By using **Jet Clean** as part of the **Simple Spa Care® Program**, spa owners can prevent buildup that could restrict water flow and damage equipment.

Features:

Clears inside plumbing
Use before draining water
Low foaming

***Jet Clean** should be applied each time a spa is drained and refilled so jets continue performing like new.*

Applications:

Use Jet Clean every 3 months or when spa is drained and refilled.:

1. Remove filter and clean separately using Filter Clean. 2. Before spa is drained, add 1 bottle of Jet Clean to warm spa water. 3. Turn pump ON and run the jets for 15 minutes (ensure that filter is not in spa). 4. Turn pump and jets OFF and let sit for 1 hour. 5. Turn pump ON and run jets and blower for 15 minutes. 6. Drain the spa, hosing off the inside spa walls while draining. 7. Refill the spa according to the Simple Spa Care Program.

For Jetted Bath Tubs:

1. Pour 8 oz. (1/2 bottle) in tub with warm water before draining. 2. Turn jets ON for 15 minutes. 3. Drain and rinse tub with clean water.

Compatible With:

Chlorine, bromine and biguanide sanitizing systems

Scum Gone

Enzyme/ScumGon

A blend of natural enzymes that breaks down oil, lotion, and organics that cause unsightly scum lines and odors in spa water. Helps reduce the need for maintenance of filters and spa surfaces. Works with all types of sanitizers.

Features:

Reduces maintenance of filter and spa surfaces
Removes oil, lotion and organics from spa water line
Compatible With:
Chlorine, bromine, ozone and biguanide sanitizers.

Repeat once each week to keep spa free of buildup.

Applications:

Initial Treatment:

1. Add 1 oz. per 250 gallons of spa water.
2. Repeat daily until scum line is gone.

Weekly:

1. Add 1 oz. per 250 gallons of spa water weekly to avoid buildup at water line.

Spa Cover Wipe

Cover Wipes

A whole new level of spa care convenience from Leisure Time, these innovative wipes clean and condition a vinyl spa cover in one simple step. Their unique quilted design deeply cleans away dirt and grime, while specially formulated UV Blockers provide maximum protection from the damaging rays of the sun.

Features:

Convenient, single-use wipes
UV Blockers for added protection
Easy-to-use
Deep cleaning action
Tips:
Works great on simulated wood spa skirts and all vinyl surfaces.

Applications:

Monthly:

1. Remove debris and hose off cover if soiled. For best results start with a dry cover.
2. Remove wipe from container and replace flap.
3. Thoroughly wipe cover with a fresh towelette. Allow to air dry.
4. Dispose of dirty wipe after use.

Spa Fast Gloss

Fast Gloss

A polish and cleaner made from reactive silicones that meets the performance requirements of today: durability, depth of gloss, water repellency, easy application and buffing without streaking or smearing.

Tips:

Do not apply to wet surfaces.

Features:

Cleans and polishes spa shell
Especially designed to protect spa surface from sunlight, temperature and chemicals
No streaking
No smearing
Easy to apply and lasts up to 6 months.

Applications:

3-Month Cleaning:

1. Make sure intended surface is dry.
2. Apply **Fast Gloss** to surface using a dry cloth.
3. Spread evenly to one area at a time with circular overlapping motion.
4. Allow 10-15 minutes to dry.
5. Wipe off residue with clean, dry cloth while turning cloth frequently.
6. Repeat if desired gloss is not achieved.

Item #	Description	Price

Stain/Scale Control, Defender

Defender

Especially designed to prevent scale formation in spas and hot tubs. Control of calcium can be very challenging, especially in spas. Regular use of **Defender** will prevent mineral buildup from occurring and causing the spa's heater or equipment to fail. Use as a follow-up to **Metal Gon**, applied at start-up.

Features:

Prevents scale formation
Aids in the removal of existing scale
Prevents dissolved solids from separating into spa and hot tub water
Compatible With:
Chlorine, bromine, ozone and biguanide sanitizers.

Applications:

Weekly:

1. Add directly to spa. Use 2 oz. for spas up to 800 gallons. Use 4 oz. for spas over 800 gallons.
2. Run filtration system for one hour, or normal filter cycle.

Item #	Description	Price
.B	SPA DEFENDER (12 Q)	234.53
B-1	SPA DEFENDER 1 QT	20.94

Stain/Scale Control, Metal Gone

Metal Gon

Easy to apply, this concentrated formula prevents iron and other metals from building up in your spa. Use with each refill to quickly neutralize metals in your spa and prevent unsightly stains.

*The best time to treat for metals is when you first fill the spa or drain and refill the unit. Using **Defender** each week will control metals after the application of **Metal Gon** at start-up. Reacts with any metal contaminant before it has a chance to form unsightly stains.*

Features:

Prevents iron and other metal buildup from staining spa finish
One time application - good until next refill
Compatible With:
Chlorine, bromine and biguanide sanitizers.

Applications:

Start-Up:

1. Turn off ALL equipment.
2. Pour entire bottle contents evenly around spa edge.
3. Run filter for at least 30 minutes.

Stain/Scale Control, Metal Gone/Defender Pack

Two-Pack Metal Gon/Defender

A powerful stain and scale prevention duo, **Metal Gon** and **Defender**. Used together, these proprietary formulas can prevent and inhibit stains and scale buildup. **Defender** protects spa surfaces, heaters and other equipment from calcium buildup, while **Metal Gon** prevents the iron, copper and other minerals sometimes found in fill water from staining the spa surface.

Features:

Simple to apply
Conveniently packaged
Use **Metal Gon** at start-up and refills and **Defender** weekly as part of the **Simple Spa Care® Program**.

Applications:

Weekly:

See individual product labels for detailed application instructions.

Tips:

The best time to treat for metals is when you first fill the spa or drain and refill the unit.

Compatible With:

Chlorine, bromine, ozone and biguanide sanitizers.

Sea Klear 3-Month Algicide

Provides superior algae control by killing and preventing infestations of common algae such as:

Blue-green Algae: free-floating algae that causes water cloudiness.

Mustard Algae: appears as orange, yellow or mustard-colored spots on pool walls and floor.

Black Algae: a filamentous growth that forms black, slippery spots on rough surfaces.

Sea Klear Pool Zero Phos

Quickly and efficiently removes phosphates from your pool water. Concentrated formula (32 fl.oz.) removes up to 1,000 ppb orthophosphates from 20,000 gallons of water. Does not affect alkalinity or create potential for pool scaling with excess carbonate. Causes no significant increase in turbidity. For best results, use with SEA-KLEAR 4-in-1 Clarifier liquid or tablets (two tablets provided with 32 fl.oz.)

Sea Klear PRS for Cryptosporidium

SeaKlear PRS is a patented, two-stage system proven to enhance filtration in pools, spas and hot tubs. SeaKlear PRS is now EPA approved to effectively trap Cryptosporidium in the filter thereby reducing outbreak risk.

Benefits of SeaKlear PRS

- Reduces water's turbidity and recovery time, especially during peak bather loads:
- Enhances filtration down to 0.5 micron Traps algae, •Cryptosporidium and E. coli in the filter
- Proven to reduce 99.9% of Cryptosporidium from pool water.

Pool Krete

Pool Krete

A vinyl-lined pool — the most affordable choice and **Pool-Krete®** can help bring out its best. A foundation of sand/cement can quickly wear out the liner when every step is like taking sandpaper to the underside of the liner, but **Pool-Krete®**'s non-abrasive formula can add years to the life of a liner.

A **Pool-Krete®** in-ground vinyl-lined pool is more attractive and easier to maintain than other installations. With sand, unsightly heel or footprints appear on the bottom. With either sand or sand/cement, iron in the sand rusts and bleeds through pinholes worn in the liner.

Longer lasting, more attractive and easier to maintain — **Pool-Krete®** brings out the best in any pool.

Solar Blanket

Oval 8 MIL

8 mil oval covers for above-ground pools

Thermo-tex™ - a scientific breakthrough in solar heating!

Thermo-tex technology maximizes the heating blanket's ability to absorb thermal energy and maintain it. Superior light diffusion properties enhance the sun's solar rays. The result is a warmer pool, energy conservation and lower operating costs. By minimizing convective heat loss, the blanket is also effective in keeping indoor pools warmer.

Quaker Deck Drain

QUAKER'S ADVANCED DECK DRAIN-A-WAY® SYSTEM II

Stands on it's own two feet! Continuous bottom feet for easy upright installation.

1. Comes in easily manageable 8' lengths.
2. Heavy wall, bondable, PVC drain system.
3. Deck Drain-A-Way® System II elements are made from rigid PVC, proven in years of outdoor applications with lasting color beauty.
4. Full 3-1/2" High by 1-1/4" Wide.
5. Designed to minimize floating in concrete, and no deep trenches are required.
6. **Adapts to all standard 1-1/2" plastic fittings.**
7. Joints bond together like PVC pipe—with PVC nipples supplied.
8. Clean-outs—adapt to 1-1/2" threaded (purchased locally) or slip nipple (supplied) for end clean-outs with either threaded or slip end cap.

9. Should a surface clean-out hole be desired, simply drill a 1" hole and snap in our clean-out fitting. To clean, remove plug and flush with hose. There are two (2) supplied in every carton.
10. Deck Drain-A-Way® System II is also a full expansion and contraction joint and a screed for the concrete finisher.
11. Deck Drain-A-Way® System II offers heavier walls than existing systems on the market as well as greater rigidity and durability.
12. Greater water volume capacity.
13. Double-taped top for extra strength when peeling off after concrete in place.
14. Smooth concave top surface minimizes collection of dirt and debris.

Deck Drain

Stegmeir Deck Drain

Super Drain is a technically superior Round Drain designed for maximum flow capacity, durability, and ease of installation. Super Drain features a nailing guide, which also acts as a true water seal against moisture transfer to the subsoil. A full range of non-directional fittings, adapters and end clips are available although you may construct your own out of 1-1/2" schedule 40 P.V.C. pipe. Because Super Drain fits flush on both sides, it stakes more securely (no more roll over).

Deck Form

Mortex

Keystone Form™

- Quick to set and even quicker to remove
- Cove strip acts as a water stop and eliminates the need to grout or caulk the joint between the tile and deck
- Form flexibility gives designers and contractors endless options in pool shapes (1 ft radius capability with use of filament tape)
- Technically superior because spear and button locking system holds tight and releases with a twist of the wrist

Stone Edge Form™

Now you can beautify any cantilever edge with our new Stone Edge Form. This new creation is yet another product inspired by an industry need. Contractors are constantly trying to find that unique, special look for pool and backyard hardscaping. After careful thought and fabrication the Stone Edge Form was created. It combines the look of natural rock with the ease and beauty of cantilever edge coping.

- Form flexibility gives designers and contractors endless options in pool shapes. Quick to set and even quicker to remove
- Cove strip acts as a water stop and eliminates the need to grout or caulk the joint between the tile and deck
- Accommodates natural surroundings, rock formations and waterfalls.
- Technically superior because spear and button locking system holds tight and releases with a twist of the wrist

Stegmier

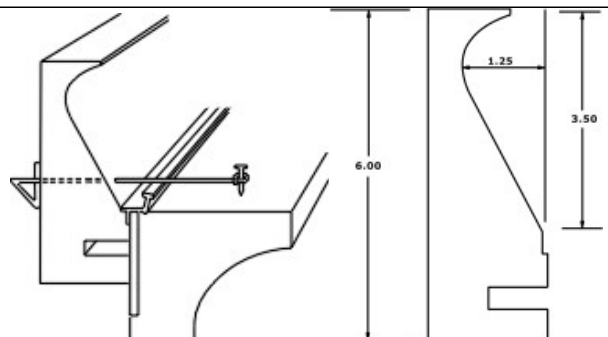

Regular - Poured in Place "Cantilever Form"

One of the most popular forms used by professional concrete people in the U.S. Simple to set, it is also easy to strip and dress the face. The tie wires used every 14", have a break-away 2" back in the concrete. They break with a 1/4 turn and leave only the smallest hole that may be covered with a stroke of a paintbrush.

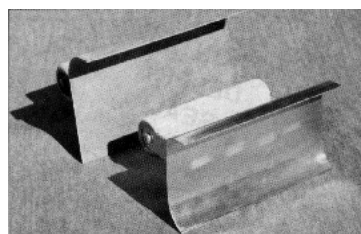

Capstone - Poured in Place "Cantilever Form"

The most popular Cantilever profile in the industry. Versatile and attractive, a very good choice for many applications.

TBL-001

Tile Ledger Board is a reusable system that is used in setting perimeter tile on inground concrete pools. Because this product can be used for an entire season and more, Tile Ledger Board can be considered a "tool" rather than material that has to be continuously reordered like other ledger materials.

Deck Equipment

Deck-O-Foam

Deck-O-Foam

DECK-O-FOAM Expansion Joint Filler is a flexible, lightweight, non-staining, polyethylene, closed-cell expansion joint filler. It is a chemical-resistant, ultraviolet stable, non-absorbent, low-density, economical, compressible foam that offers an extended service life in both interior and exterior applications.

DECK-O-FOAM is supplied with a convenient pre-scored "removable" strip to provide a uniform sealing reservoir in the joint. It also serves as a sealant bond-breaker and provides an economical alternative as an expansion joint in all concrete paving projects. It is compatible with all currently available cold-applied sealants.

Uses

DECK-O-FOAM is ideal for use as an expansion, contraction and/or isolation joint in **swimming pool decks**, curb and gutter work, floor slabs, pavement patch repair, sidewalks, driveways, plazas, parking decks, highways and airport runways.

Item #	Description	Price

Deck-O-Seal

Deck-O-Seal

DECK-O-SEAL Two-Part, Polysulfide-Based Joint Sealant is a premium-grade, pourable, self-leveling sealant. It is a non-staining sealant that cures at an ambient temperature to a firm, flexible, tear-resistant rubber. DECK-O-SEAL is highly resilient and has excellent recovery characteristics after extended periods of compression or elongation. DECK-O-SEAL has outstanding resistance to most chemicals, to all weather conditions, aging and shrinkage.

Deck-O-Seal Commercial

DECK-O-SEAL Gun Grade is a two-component, non-sag, non-flowing polysulfide-base sealing compound. It is a non-staining sealant that cures to a firm, flexible, tear-resistant rubber. DECK-O-SEAL Gun Grade is highly resilient and has excellent recovery characteristics, even after extended periods of compression or elongation. It has outstanding resistance to most chemicals, to all weather conditions, aging and shrinkage. For on-the-job use, DECK-O-SEAL Gun Grade is supplied in pre-measured kits containing the base compound and a separate container of setting agent, with enough room in the base container for blending both components.

DECK-O-SEAL 125 Two-Part, Pourable Joint Sealant is a self-leveling, polysulfide-base sealing compound. It is a non-staining sealant which cures to a firm, flexible, tear-resistant rubber. DECK-O-SEAL 125 is highly resilient and has excellent recovery characteristics even after extended periods of compression or elongation. It has outstanding resistance to most chemicals, to all weather conditions, aging and shrinkage. For on-the-job use, DECK-O-SEAL 125 is supplied in pre-measured 96 oz. (2.84 L) kits consisting of the base compound and a separate container of setting agent. There is enough room in the base container for introduction and mixing of the setting agent. NOTE: DECK-O-SEAL 125 is 25% firmer than regular DECK-O-SEAL.

P/G PRIMER is a solvent-base, two-component primer system for use with GARDOX®, and DECK-O-SEAL®. It aids in the adhesion of joint sealants to the interfaces of expansion joints in masonry, swimming pool decks, concrete or wood.

Deck Equipment

Deck-O-Seal

Deck-O-Seal One Step

DECK-O-SEAL ONE STEP is a single-component, non-sag, elastomeric, polysulfide-based sealing compound used for caulking joints in structures that are subject to movement caused by temperature changes. ONE STEP resists the effects of oil and gasoline when spills are wiped up immediately.

USES

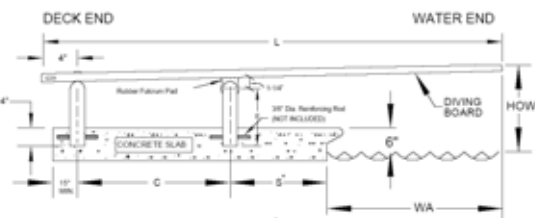

DECK-O-SEAL ONE STEP is ideal for glazing operations and sealing all joints in concrete structures. It bonds well to masonry, glass, metal and wood. It is ideally suited for application wherever a permanent water-tight seal or expansion joint is required on glass enclosures, curtain walls, prefab panels, expansion joints, bridges, highways, roofs, etc. NOTE: Do not apply paint over surfaces sealed with DECK-O-SEAL products.

ONE STEP is frequently used in high sloping and vertical expansion joints where a non-sag, water-tight elastomeric sealant is required. ONE STEP is ideal for use in swimming pools above the waterline, where the tile meets the pool coping. For joints that will be submerged under water, use two part DECK-O-SEAL #125 (Pour-grade) for horizontal applications or two-part DECK-O-SEAL GUN GRADE for high sloped or vertical applications. All joints submerged under water must be primed with P/G PRIMER from W. R. MEADOWS.

Water Level Control

Levelor Electronic Leveler

LEV110SD-2046C 110 volt LEV220SD-2046C 200 volt	Levelor is the alternative choice over mechanical floats because it is trouble free, easy to install and there are no moving parts. Levelor is a computer controlled device that detects a low water condition and automatically replaces the water to a pre-set level. Levelor works on new and existing pools and spas. It can be used in any situation where a consistent liquid level is desired.
K2000C-CK-110V	Levelor II Model K-2000 electronic water level controller is a computer-controlled device that detects low and high water conditions. This Levelor model can be used in any situation where a consistent liquid level is desired and a high level situation can be detected and acted upon. (Vanishing Edge pools)
K2300-CK-110-C	Levelor II Model K-2300 electronic water level controller is a Dual Fill Device which can maintain water level in two separate environments such as pool/spa combo. This Levelor model can be used in any situation where a consistent liquid level is desired.

Deck Equipment

Water Level Control

MP Industries Float Leveler

The Auto-Lev is an accurate, easy to install device that will maintain exact water levels on pools, spas, hot tubs, fountains, ponds or water-holding tanks. It's simple and easy-to-adjust float valve assembly is accurate and maintenance-free. The plumbing port is a standard 1/2" female slip. The equalizer lines are 1" or 1-1/2" female slip.

Item #	Description	Price
1953-J	WATER LEVEL CONTROL	90.30
4059	FLOAT ASSY	22.95
4061W	LID WHITE WATER LEVEL CONTROL	18.05

Pool Sentry Float Leveler

The Pool Sentry™ is used to maintain the water level of a pool, spa or pond automatically and unattended. When The Pool Sentry™ is removed from the box, it is easily assembled by snapping together two parts and threading in the valve assembly. This requires no tools. It comes with a heavy plastic, zip-lock bag that is filled with rocks or pea gravel and used as a weight to hold the unit on the deck. The bag is placed inside the cavity by removing the top cover. It is then attached to a garden hose and the water is turned on. The water stays on at all times when The Pool Sentry™ is in the pool. As the float drops, the water turns on. When the float reaches its highest point, the water shuts off. It works very similarly to the float valve in a toilet tank. The customer can adjust the float to any desired level [usually a point halfway on the tile line or skimmer]

Item #	Description	Price
M-2000	POOL SENTRY LEVEL CONTROL	142.50

Quick Water Leveler

With **Quik Water Leveler** you'll never be caught off guard while leaving your pool unattended. The Quik Water Leveler automatically regulates the water level of your pool to give you the peace of mind you need when you're away from home. There's no need to worry about pump burnout or damage to your home or deck due to irregular water levels.

- Added convenience
- Peace of mind
- Works 24 hours a day
- Inexpensive
- Eliminates unsightly and unsafe hoses
- Eliminates property damage
- No babysitting your pool
- No pump burnout
- No backyard flooding
- No underfilling
- No time wasting fill-ups
- Available in white or tan lids

AquaStar

Channel, 32" Channel Drain Anti-Vortex Anti-Entrapment Suction Outlet Cover and 3-Port Fabricated Sump

The AquaStar line of suction outlet covers compliant with the new Virginia Graeme-Baker Pool and Spa Safety Act (ASME/ANSI A112.19.8-2007)

A Single, Unblockable Suction Outlet that Exceeds the New VGB Mandate and ASME/ANSI A112.19.8-2007 Standard

For Single or Multiple Drain Use (See Installation Instructions for Plumbing, Hydrostatic Valve/Drain Pipe & Single or Multi-Pump Connections)

Single:

Floor: 236 GPM at 3.4 fps / Wall: 136 GPM at 1.9 fps

Dual:

Floor: 472 GPM at 3.4 fps / Wall: 272 GPM at 1.9 fps

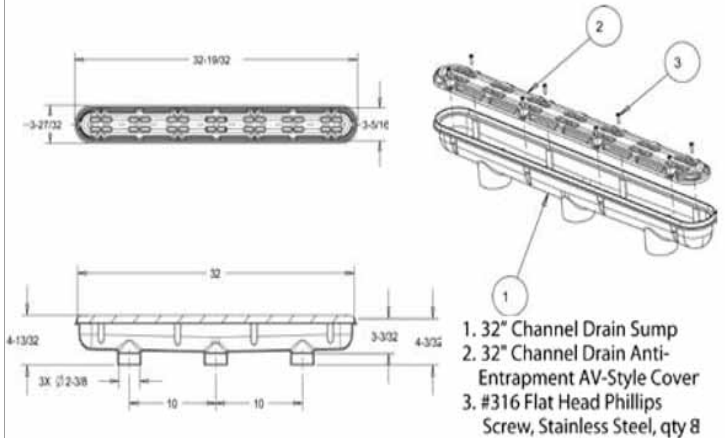

Floor: 211 GPM at 1.5 fps

22.6 sq. in. Opening

#316 Stainless Steel Screws

Manufactured from Super Strong UV Resistant ABS/ASA Material

3 Ports: Bottom 2.5" OD, 2.0" ID S/S; Inside 2.0" Threaded FPT; Two 2" Threaded Plugs Included Meets or Exceeds ASME/ANSI A112.19.8-2007 National Standards and ASTM G154 UV Testing Listed with IAPMO R&T

Item #	Description	Price
32CDAV1-01	32" CHANNEL DRAIN 3 PORT SUMP	217.68

Equalizer Fitting Cover

8" Low Profile Anti-Entrapment Suction Outlet Cover and Skimmer Equalizer Retrofit Kit

The AquaStar line of suction outlet covers, compliant with the new Virginia Graeme-Baker Pool and Spa Safety Act (ASME/ANSI A112.19.8a-2008)

For single or multiple drain use (see installation instructions)

Single

Wall: 70 GPM at 2.9 fps

Dual

Wall: 70 GPM at 1.5 fps

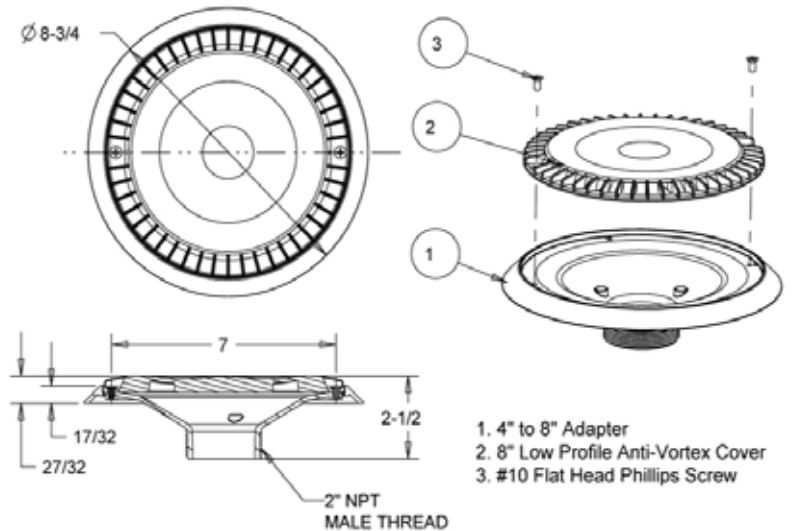

7.7 square inch opening

#316 stainless steel screws

Manufactured from superior UV-resistant engineered polymers Easily and safely retrofits to pre-VGB AquaStar and Sta-Rite skimmer equalizer/suction fittings*

Replaces "hockey puck" four-screw style (up to 70 GPM)

Meets or exceeds NSF 50/ASME/ANSI A112.19.8a-2008 national standards and ASTM G154 UV testing Listed with IAPMO R&T Patent-pending Flow-Max® technology

AquaStar

Wave Retro, 12" x 12" Square Retrofit "Wave" Anti-Entrapment Suction Outlet Cover

The AquaStar line of suction outlet covers, compliant with the new Virginia Graeme-Baker Pool and Spa Safety Act (ASME/ANSI A112.19.8a-2008)

For single or multiple drain use
(see installation instructions)

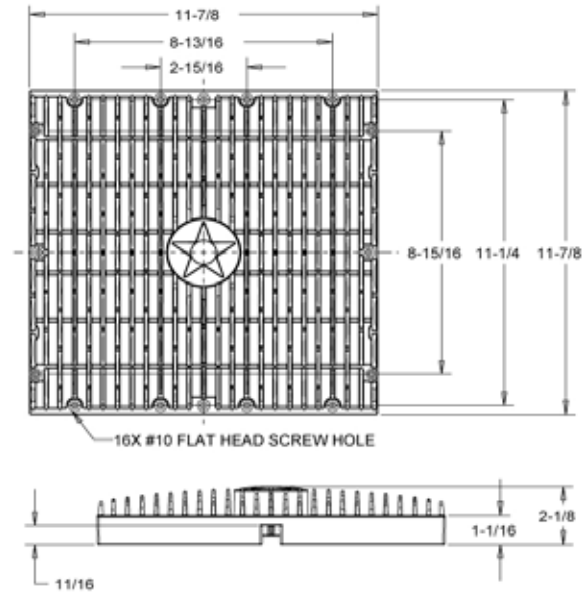

Single

Floor/Wall: 361 GPM at 1.3 fps
Floor/Wall: 400 GPM at 1.5 fps

85.2 square inch opening
#316 stainless steel screws

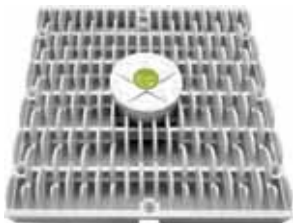

Manufactured from superior
UV-resistant engineered polymers
**Easily and safely retrofits to most
brand's existing frames.**

All components (cover, frame, screws)
meet or exceed NSF 50/ASME/ANSI
A112.19.8a-2008 national standards
and ASTM G154 UV testing exposure

Item #	Description	Price
RWAV12101	12x12 SQUARE RETROFIT WAVE	199.52

Wave Retro, 9" x 9" Square Retrofit "Wave" Anti-Entrapment Suction Outlet Cover

The AquaStar line of suction outlet covers compliant with the new Virginia Graeme-Baker Pool and Spa Safety Act (ASME/ANSI A112.19.8a-2008)

For single or multiple drain use
(see installation instructions)

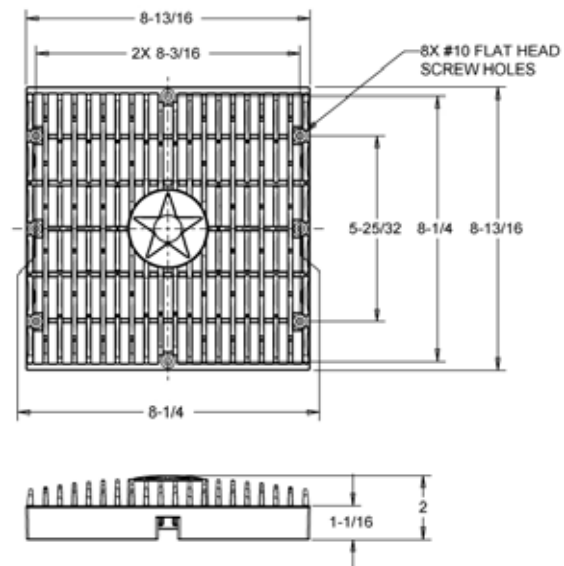

Single:

Floor/Wall: 224 GPM at 1.6 fps
(Floor/Wall: 207 GPM at 1.5 fps)
44.2 square inch opening

Lime green colored "swimming man" plug
easily identifies VGB 2008 compliant cover
from on deck and underwater

#316 stainless steel screws
Manufactured from superior UV-resistant
engineered polymers
Easily and safely retrofits to most brand's
existing frames

All components (cover, frame, screws)
meet or exceed NSF 50/ASME/ANSI
A112.19.8a-2008 national standards

Drain-Safe

Drain-Safe

- Minimize your suction outlet hazards with the DS 360
- Universal fastener kit and security tool included →
- Easy to retrofit
- **The DS 360 is Pool Cleaner Friendly**
- Works on dual drain as well as single suction outlets
- Complies with the ASME/ANSI A112.19.8 Standard
- 27 square inches of open surface area
- Can be installed on a Vertical or Horizontal plane

SVRS Devices

Stingl Switch

The Model SR-500 is a Safety Vacuum Release System (SVRS) works by monitoring the vacuum on the suction side of the pool or spa pump. When a blockage occurs in the main drain or skimmer a sudden rise in vacuum will cause the SR-500 to shut down pump operate and activate an audible alarm. Complies with ASME/ANSI 112.19.17 as required by the International Building Codes (IBC) and the International Residential Codes (IRC) **SEE SAFETY SECTION FOR MORE DETAILS**

Item #	Description	Price
SR-500	STINGL SWITCH SVRS RES OR COM	1105.23

Vac-Alert

The Vac-alertTM Model VA-2000L is a Safety Vacuum Release System (SVRS) designed for suction lift applications. Suction lift in this case applies to all applications where the circulating pump suction is either at or above the level of the pool water surface. This unit incorporates a 0.170" diameter orifice opening installed below the surge tube section. This orifice opening is sized to prevent nuisance tripping of the SVRS unit caused by high vacuum surges typical of many pump start-up conditions.

The Model VA-2000L SVRS unit also utilizes a check valve assembly equipped with a 3.5 pound spring, a poppet disc and a one-way (up only) vented poppet. This check valve assembly permits continued water flow to the circulating pump while the SVRS unit is in the open or vented position. The 3.5 pound spring further compressed by the poppet disc, creates enough sealing force within the check valve to allow partial water flow to the circulating pump for suction lifts up to 3.5 feet. This is critical to the elimination of circulating pump damage that can be caused by a sustained dry-running condition. The one-way vented poppet allows the surge chamber to be internally recharged when the circulating pump is turned off.

For pumps operating 24/7 we recommend installation of the VA-2000S (even if it's a lift application situation).

The Vac-alertTM Model VA-2000S is a Safety Vacuum Release System (SVRS) designed for submerged suction applications. Submerged suction in this case applies to all applications where the circulating pump suction is below the level of the pool water surface. This unit incorporates a 0.375" diameter orifice opening installed below the surge tube section. This orifice opening is sized to provide a limited amount of pump start-up surge protection, while at the same time allowing enough air into the piping system to insure dissipation of the dynamic suction force caused by the circulating pump.

The Model VA-2000S SVRS unit also utilizes a check valve assembly equipped with a 0.25 pound spring and a non-vented poppet (no poppet disc or hole through the poppet). This check valve assembly utilizes a light duty spring to minimize the sealing force of the check valve. The non-vented poppet insures that water from the circulating system, under a positive hydrostatic head condition, does not migrate up into the SVRS.

For pumps operating 24/7 we recommend installation of the VA-2000S (even if it's a lift application situation).

Hydrostatic Relief Valve

The function of this type of valve is to relieve the pressure of exterior groundwater on the pool walls and floor by allowing this water to flow into the pool and be pumped away as the pool is being drained. As a pool is being emptied (and interior water pressure on the pool structure is being removed), exterior groundwater will continue to exert tremendous pressure on the pool structure. Failure to open the pressure relief valve(s) allows this exterior pressure to build, since it is no longer counter-balanced by interior water pressure. This build-up of exterior groundwater pressure can cause serious damage to the pool structure.

Venturi Jet Sets

The Venturi Jet Sets are easy to install and comes completely assembled. Just glue as you normally would any PVC joint. 2" socket or 2-12" spigot (outside) on each side gives you the opportunity to complete a jet loop without difficulty.

- Minimize Plumbing Time
- Plumb a Spa Seat on Bench in the Pool
- Ports on Both Ends To Continue Loop

If you don't have a spa, put one or two in a pool bench, give the homeowner a mini spa by plumbing separately or using an actuator to send return water to JetSet(s).

Pentair AmerQuartz Pool Light

AmerQuartz® halogen lights, the world standard of reliability for underwater lights, features a stainless steel shell, 8-3/8 in. prismatic tempered glass lens, and stainless steel face ring with uni-tension clamp. AmerQuartz® are UL listed to install in all full-sized Pentair Pool Products, American, PacFab and Purex niches.

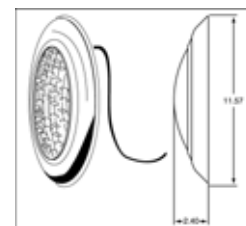

Item #	Description	Price
78354200	AMERQUARTZ 50' 300W 120V	330.96
78356400	AQUAQUARTZ 100' 500W 120V	446.13

Pentair Aqua-Lumin Pool Light

The **AquaLumin® II** nicheless lights provide brilliant, double contact halogen quartz lighting for all vinyl liner pools and spas. This revolutionary, patented design uses a mounting hub and bracket instead of a niche. This light eliminates the need for pre-punched light panels, costly make-up panels and extra braces for vinyl pools.

- Requires only a 3 in. hole in wall panel
- No costly make-up panels
- No extra braces
- Wall hugging fit
- Easy to service

Color Lights

Pentair LED IntelliBrite

The brightest and most efficient underwater LED color light available

IntelliBrite® automated color-changing pool and spa lights feature LED technology is the wave of the future in energy efficiency, lifetime value, quality of light, and controllability. With IntelliBrite, combinations of individual colored LEDs are mixed and matched to achieve a vibrant spectrum of colors. These combinations are power sequenced to illuminate and cycle through colors at varying speeds, and in different sequences of color. Combined with a custom reflector and unique lens design, the IntelliBrite LEDs offers super efficiency while being the brightest underwater LED light available.

An Eco Select™ Choice: LED (Light Emitting Diode) automated color-changing pool and spa lights are the most energy-efficient pool and spa lighting option available. Plus, they can last 30,000 hours or more, minimizing replacement cost and disposal.

Features

- A superior reflector design assures more light is directed toward the pool bottom to further increase intensity and color effects, while minimizing glare
- Superior lens geometry distributes light in an optimum way to avoid "hot spots" on the pool bottom. Light intensity and color are distributed more uniformly throughout your pool
- IntelliBrite® technology makes use of the brightest LEDs available in an underwater pool and spa light.
- IntelliBrite® pool lights allow a greater number of standard light programs and greater ability to create your personal, magic light shows. The result is a virtually endless range of dramatic underwater lighting effects at your command
- Set one of 5 predetermined fixed colors to match or create the mood for the evening – blue, green, magenta, white, and red
- Select from 7 popular "color shows" that come preprogrammed into IntelliBrite®
- IntelliBrite® was designed to work with IntelliTouch®, the leading control system for pool, spa, and poolscape equipment automation. In effect, you transfer control of IntelliBrite to the IntelliTouch® system which controls all your other backyard and pool features

Pentair SAM Pool Light

Patent #6,379,025

The **Spectrum Amerlite (SAM)** is the world's first submersible color light for swimming pools and spas. The Spectrum Amerlite delivers a nearly infinite palette of brilliant water colors. Custom mix a color to match the evening's mood or let SAM slowly waltz your customer's pool from color to dazzling color. With twin 4,000 hour tungsten halogen bulbs, SAM delivers white light comparable to the 300W Amerlite you have relied on for decades. SAM color synchronizes with other SAMs, SALs and with the FIBERworks PG2000. "Auto-color-roll" and swimming colors effects are available when used in combination with Pentair's IntelliTouch systems. (Use Large Pentair niche)

- Swimming colors available when used with IntelliTouch System
- Auto-color-roll w/IntelliTouch Synchronizes with PG2000
- UL Listed in full-size Pentair Pool Products/
- PacFab/American/Purex niches
- Brilliant colors
- Exclusive Spectrum Color Roll
- Hold on custom color
- Controlled by a single switch
- White light equivalent of 300W Amerlite
- 4,000 hour halogen bulb life
- Simple 3-wire connection
- Color synchronization standard
- Great for new installations and for replacement of any Pentair Pool light

Color Lights

Pentair SAL Spa Light

Automated color in a compact package- Now your customers can enjoy the dramatic color lighting effects of SAM in their spa. Spectrum **AquaLight (SAL)** produces the same revolutionary 7-color spectrum as our SAM light, but it comes in a compact package. Especially designed for spas, SAL provides breathtaking color at the flip of a switch - just like SAM. And if your customer has a pool/spa combination, they'll be glad to know that SAL easily synchronizes with SAM and PG 2000 FreedomSync models to provide a uniform display of ever-changing aquatic color.

- Swimming colors available when used with IntelliTouch System
- Produces same dramatic color mix as SAM light
- Synchronizes with SAM and FIBERworks PG2000
- Controlled by a single light switch
- Color roll or hold on a color
- 4,000-hour lamp life reduces relamping frequency
- Fits all SpaBrite and AquaLight niches
- Simple 3-wire connection for quick professional installation

Hayward Color Logic

Forget about lighting, as you know it. Now there's **ColorLogic LED** lighting from Hayward, the global leader in LED technology for the pool industry. ColorLogic's patented Chromacore® technology combined with a microprocessor and the brightest and longest performing LEDs in the industry to deliver high intensity and an unmatched selection of colors.

No other pool light offers so many quality features to deliver long-lasting performance.

- 12 preset programs - 5 fixed colors and 7 color-changing shows
- Sealed unit requires no maintenance
- Ability to synchronize 2 or more lights
- No moving parts
- Offers the industry's only integrated safety feature of 15 seconds of white light at start-up

- Lower operating costs and longer life than halogen, metal halide, or incandescent bulbs
- Patterned thermoplastic or stainless steel face rims available
- UL Listed for fresh water

Zodiac X7 Quattro Suction Pool Cleaner

The **Zodiac X7 Quattro** suction pool cleaner introduces a new era to pool suction cleaning. Utilizing revolutionary technology, the X7 Quattro has the unique ability to get in and out of tight corners and around obstacles to give your pool an extreme clean.

- **Quattro Disc** - The new flexible 4 disc design gives the X7 Quattro the ability to get in and out of tight corners without getting stuck
- **Pulse diaphragm** - The new-patented Pulse diaphragm is super strong yet highly flexible and the robust outer ribbing create a 'snap action pulse' that delivers more efficient suction.
- **Tilt Action Rudder (TAR)** - Provides directional steering to the X7
- Quattro moving it in the opposite direction to the pool hose, enabling it to get in and out of tight corners.
- **Flexi-Hose Joint** - Clever in every way moving in all directions to allow the X7 Quattro to go where other cleaners have problems

- Equipped with 14 lengths of hose- 15% more than what was previously provided
- Patented leader hose bayonet fitting creates a more secure connection between the machine head and pool hose.
- Complies with the strictest international standards and is backed by a 2 year warranty
- Suitable for in ground pools.
- Suitable for concrete, pebblecrete, quartzon, tile, fiberglass, and vinyl surfaces.

Kreepy Krauly Pool Cleaner

More vacuuming power for ultimate cleaning performance

KREEPY KRAULY provides optimum cleaning performance, simplicity, and convenience. It features a turbo-action swivel design and a super-efficient regulator valve for more cleaning power.

KREEPY KRAULY also features an exclusive starfish seal* for use in concrete pools and is also available with a universal seal for all in-ground pools. KREEPY KRAULY is absolutely, positively, the best automatic in-ground pool cleaner you can buy!

Additional features include:

- It's proven. Our patented design and rugged construction have been put to the test in more than 1.5 million pools worldwide.
- Only one moving part for long, dependable service.
- It's automatic. KREEPY KRAULY works when your pool pump works, using your pool's existing filtration system.

Maintenance Equipment

Automatic Pool Cleaners

Legend Pool Cleaner

Better tracking and stability for faster cleaning

The Legend's innovative hydro-dynamic body and treaded tires give it better tracking and stability than any other cleaner on the market, moving it along the pool bottom faster than most other automatic cleaners. With its specially designed debris channel and strong cleaning action, the Legend picks up leaves and large debris with ease. And its heavy-duty, large capacity twist-lock collection bag makes cleaner maintenance easy. The Legend is suitable for concrete, gunite, vinyl-lined and fiberglass pools, and can clean most pools thoroughly in just 1 to 3 hours.

Additional features include:

- Powered by a low cost, energy efficient booster pump.
- Unique Front Wheel Drive/Four Wheel design allows better tracking and cleaning.

- Double Jetted Vortex Venturi action, specially designed debris channel and massive intake throat easily collect large debris.
- Heavy-duty, large capacity twist-lock collection bag is designed for efficiency and easy maintenance.
- One-year limited warranty. See warranty for details.

Pentair Prowler 710

Scrubs, vacuums, and filters your entire pool

The fastest and most effective robotic cleaner in its class, the **Prowler® 710** features true plug and play convenience. It operates totally independently of the pool's circulation system to cover and clean any dimension, form, or shape of inground pool up to 50 feet in length. A Jet Drive propulsion system with a single, powerful motor drives the cleaner and enables total pool cleaning from floor to water line in one hour or less.

Features

- Dual pressure wash jets lift sand, silt and algae off floors and walls – including surface pores where brushes can't reach
- Powerful vacuum action removes fine particles and larger debris
- Internal filtration system removes contaminants and bacteria as small as two microns
- No installation, no booster pump, no hoses, and fully automatic

Item #	Description	Price
P80710	PROWLER 710	1272.83

Maintenance Equipment

Automatic Pool Cleaners

Pentair Prowler 720

Vacuums what you can see, filters what you can't

Prowler® 720 is the computer-controlled, programmed cleaner that scrubs and vacuums pool's bottom, walls and steps and provides supplemental filtration of pool water. Totally independent of the pool circulation system, Prowler provides on-demand cleaning without running pumps. It requires no installation, no booster pump, no hoses. Just plug it in and place it in the pool?it's a totally self-contained cleaning and filtration system.

Features

- Powerful vacuum action removes fine particles and larger debris
- Integrated filtration system captures dirt and debris in handy collection bag
- Integrated filter reduces run time of your primary filtration system by 25% to save on pump energy use and normal wear and tear
- Works fast, thoroughly scrubs and vacuums pools up to 20 x 50 feet in just 60-90 minutes
- Auto-reverse feature prevents hang-ups in corners and by steps and ladders for uninterrupted service
- Cleans all pool surfaces gunite, vinyl, fiberglass and tile

Pentair Prowler 730

Two-way cleaning with remote control convenience

The **Prowler® 730 Remote Control** provides the ultimate in automatic pool cleaning convenience. It's the computer-controlled, programmed cleaner that scrubs and vacuums pool's bottom, walls and steps and provides supplemental filtration of pool water. The wireless radio remote control system provides two automatic cleaning options one for the pool bottom and a second for the bottom and sides. Remote control functions allow for overriding the automatic cleaning modes to perform quick spot clean-ups. Simply guide the cleaner to any area of the pool with the touch of a button. It requires no installation, no booster pump, and no hoses.

Features

- Two-way cleaning performance
- Powerful vacuum action removes fine particles and larger debris and integrated filtration system captures dirt and debris in handy collection bag
- Integrated filter reduces run time of your primary filtration system by 25% to save on pump energy use and normal wear and tear
- Cleans all pool surfaces gunite, vinyl, fiberglass and tile

Motors

48 Frame (Thru-Bolt)

1-Speed

These quality Magnetek Century Lasar and Lasar-XL 48 Frame Thru-Bolt Motors are found on many different models of spa and pool pumps. Some of these pump brands are Hayward, Jacuzzi, Aqua-flo, Starite, Vico, ITT Marlow, Waterway, Premier, Acura, Martec, Waterco, WMC and others.

These motors directly replace the "original" motor that came with your pool pump. No pump manufacturer manufactures their own motors. We sell Magnetek Century motors because we have found them to be long lasting and reliable. Century Electric Motor is now part of A.O. Smith.

Ozone

Balboa

Spa Ozonator

Ozone by Balboa features "Smart Start™" technology, which combines an innovative electronic ballast with a high-output, energy-efficient Plasma Cell™ UV lamp. Balboa's solid-state electronic ballast eliminates the usual start-up flicker, sputter and harmful electronic noise associated with conventional iron ballast ozonators. Balboa Instruments has engineered the unit for both 120v and 240v applications in single package and features convenient optical sensor ports for topside panel monitoring.

Pool Eclipse Ozonator

Corona Discharge ozone generators produce far more ozone than comparably sized UV ozone generators. The **DELZONE ECLIPSE** line of CD ozone generators produce up to 5 times the concentration of ozone produced by a UV generator. These Eclipse units produce ozone concentrations reaching 1,350 ppm, while UV generators typically top at about 550 ppm.

The DELZONE Eclipse 1-2 units are for in-ground pools with water capacities up to 7,000 gallons (Eclipse-1) 15,000 gallons (Eclipse-2)

Ozone Output:

Eclipse-1 0.25 g/hr

Eclipse-2 0.5 g/hr

Electrical:

Eclipse-1 120V, 60Hz, .06A & 240V, 50/60Hz, .03A

Eclipse-2 120V, 60Hz, .12A & 240V, 50/60Hz, .06A

Cabinet: Extruded aluminum with molded plastic end caps **Unit Sizes:** Wall

Mount

Eclipse-1 7.75"W x 8"H x 2.5"D

Eclipse-2 7.75"W x 14"H x 2.5"D

Shipping Weight:

Eclipse-1 11.0 lbs.

Eclipse-2 13.5 lbs.

Warranty: One Year

Ozone Cells: Electrodes are rated for 15,000 hours of operation.

Components: The DELZONE Eclipse units come with a manual. Please note that there is a separate parts bag that contains all/most parts needed for installation.

Item #	Description	Price

Pool Total Eclipse Ozonator

DEL Ozone is now offering a product called the DELZONE **Total Eclipse 4** for residential pools up to **50,000 gallons!** This new product doubles the ozone output and capacity of our Total Eclipse 2 ozone generator.

The Total Eclipse Two and Four have a built-in recirculation pump and injector assembly to recirculate pool water and inject ozone 24 hours a day (independent of your pools main pump).

Ozone Output: 0.5g/hr (ECT-2) / 1.0g/hr (ECT-4) at 5 gpm

Electrical:

110/120V, 50/60Hz, 192W

220/240V, 50/60Hz, 192W

Cabinet: Brushed Aluminum

Unit Size: Wall Mount - 17" tall x 14" wide x 7" deep

Shipping Weight: 25 lbs.

Warranty: One Year

Ozone Cells: Cells are rated for 15,000 hours of operation.

Components: The DELZONE Total Eclipse units come with a manual. Please note that there is a separate parts bag that contains all/most parts needed for installation.

Pool, Above Ground Ozonator - Big Dipper

With DEL Ozone's Big Dipper Corona Discharge Ozone Generator, you'll enjoy minimum maintenance and a reduction in chlorine usage in an affordable, compact system made especially for above-ground pools.

Reduce Harsh Chlorine Use By 60 to 90% Up to 25,000 gallons

Item #	Description	Price
EC-AG1	OZONE BIG DIPPER 110 V	429.30

Spa Eclipse Ozonator

The **SpaEclipse** is DEL Ozone's first Corona Discharge ozone generator for residential spas available through distribution. In addition to the advantages of Corona Discharge ozone technology, the SpaEclipse saves money because the Corona Discharge chip uses less energy (no lamp, ballast, or starter) than an ultraviolet generator and the chip costs less to replace.

Electrical:

120V, 90mA, 11W, 60Hz

240V, 90mA, 22W, 60Hz

Cabinet: Molded Plastic

Unit Size: 5.0"W x 6.0 "H x 2.5"D

Capacity: Up to 750 gallons

Shipping Weight: 2.0 lbs.

Warranty: One Year

Single CD Chip: All CD chips are rated for 9,000 hours of operation.

Components: SpaEclipse ozone generator, ozone supply tubing, ozone supply check valve, mounting screws, hose clamps, and installation manual.

Trio 50

Benefits of the TrioPure™ Automatic

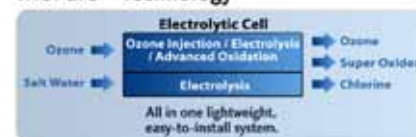

Soft Water Ozone Sanitation System:

- One system, one installation, one low cost
- 24hr, low-cost operation, Self-cleaning, low maintenance salt cell

Advanced Oxidation Process (AOP):

- The combination of ozone with electrolysis creates AOP
- During AOP, Super Oxide compounds, even stronger oxidizers than ozone or chlorine, are continuously being formed
- Super Oxides, in combination with free Ozone and free Chlorine, provide the strongest and safest pool water sanitation

Paramount

Paramount

The patent pending **ClearO3** consists of an extruded aluminum main body with fiber filled PPO resin end caps, so it is engineered to survive in the pool equipment environment. The cylindrical chamber of the Paramount ClearO3 system is optimized for maximum ozone generation and is sealed to minimize ozone leakage making the unit both powerful and safe around swimming pools. Radiant heat ribs dissipate heat to maintain ozone output at peak operating temperatures and the side panel is removable, making maintenance and bulb replacement easy.

Pipe

Clear PVC

Clear PVC

If you need to see what is going on inside your pipes, this clear (slight blue tint) PVC pipe is the answer. It is fully compatible with regular Schedule 40 PVC pipe fittings. Install with regular PVC cement. Use compression couplings, flexible couplings or unions to facilitate cleaning. Sold by the 10' length.

Flexible Electrical Conduit

Flex Conduit

- Snap-in Fittings are UL approved for use with Heyco-Flex™ II tubing. NPT-threaded connectors are UL approved for use with Heyco-Flex™ I conduit.
- Low cost electrical fitting in three sizes (3/8", 1/2", 3/4").
- One piece solution for smooth internal surfaces for easier wire routing, protection, and installation around corner angles.
- Easy, permanent assembly: the installer "twists" the Tubing over the Connector ferrule, until the Tubing "clicks" into place. It's that easy!
- No tools needed for installation. • Unique locking fingers accommodate various chassis thicknesses.

Cement, Hot Glue

WELD-ON 747 "POOL 'R' SPA" BLUE (Fades to CLEAR in sunlight): Medium bodied, extremely fast setting, PVC cement for all classes and schedules with interference fit through 6" diameter, Schedule 80 through 4" diameter. Developed for rigid & flexible applications, wet conditions and/or quick pressurization. Can be used without primer on non-pressure systems if local codes permit.

Note: This product offers faster set & cure times.

WELD-ON 725 "WET 'R' DRY" AQUA BLUE: Medium bodied, extremely fast setting, PVC cement for all classes and schedules with interference fit through 6" diameter, Schedule 80 through 4" diameter. Specially formulated for rigid and flexible applications where conditions are wet and/or when quick pressurization is desired. Can be used without primer on non-pressure systems if local codes permit.

Note: This product offers faster set & cure times.

WELD-ON 727 "HOT 'R' COLD" CLEAR: Medium bodied, very fast setting, PVC cement for all classes and schedules of rigid and flexible pipe and fittings with interference fit through 6" diameter, Schedule 80 through 4" diameter. It is a superb cold weather product with performance to -15°F. Can be used without primer on non-pressure systems if local codes permit.

Note: This product offers faster set & cure times.

Pump Vault

Pump Vaults

As pond-free water features continue to increase in popularity, Atlantic's Pump Vaults, [EcoBlox](#) and [FastFalls](#) fill much needed roles. Whether you are installing a fountain, disappearing waterfall, stream, or other pond-free water feature, our heavy-duty components are engineered for easy installation and maintenance.

The heavy duty one piece design of Atlantic's Pump Vaults can accommodate large pumps and flow rates up to 15,000 gph. Features include large openings for pump access, cut lines for pump discharge and pipe extensions, and flat panels for custom plumbing applications.

Cantar

Molly Brown Pool Float

The secret to our unsinkable pool float is in the 10 layers of thousands of individual entrapped air bubbles. It floats better yet cost far less than those other pricey solid foam floats, or the inconvenient inflatable jobs you have to blow up - and then put patches on when they puncture! And, it's the only float out there with a 100-year "No-sink" warranty! 33" x 72"

Item #	Description	Price

Tube Trainer

Bright colored nylon encases a strong rubber Air Core™ tube that fits comfortably around a child. Buoyancy, comfort and fit can be adjusted by the amount of inflation. The tank-top design with bottom strap instills confidence in both child and parent as it is difficult to be removed without parent's help.

The Air Core™ tube positioned around the child's upper body allows freedom of movement, which permits the child to float in an upright position or in swimming position on, front or back. .
For ages 2 to 6 years.

Pool Paint and Deck Stain

Epoxy Base

Zeron

The **ZERON** system is the longest lasting epoxy pool coating available. You can expect up to eight years of service from one application of this product. Roller or airless spray equipment may apply this coating. ZERON is highly recommended for professional pool builders and pool service companies as an alternative to traditional pool plaster. The finished surface will stay brighter and will be easier to keep clean than a plastered pool.

Coverage: Approximately 125 - 150 square feet per gallon.

Available in these attractive colors: White, Blue Ice and Bikini Blue.

Item #	Description	Price
390G	ZERON WHITE EPOXY BASE	180.77
391G	ZERON ICE BLUE EPOXY BASE	180.77
392G	ZERON BIKINI BLUE EPOXY BASE	180.77

Rubber Base

Paralon

PARALON 2 is our premium grade chlorinated rubber pool enamel. This coating is recommended for refinishing existing chlorinated rubber coatings. It is an attractive, low sheen, rubber-base pool enamel with high water resistance. The soft satin appearance will please the most discriminating pool owner while providing economical protection for the pool surface. Two coats of PARALON 2 are required for best results. On unusually porous, bare surfaces like concrete or plaster, a third coat may be necessary.

Coverage: 250 - 275 square feet average per gallon.

Available in these attractive colors:

White, Blue Ice, Bikini Blue and Black.

Item #	Description	Price
290G	PARALON WHITE RUBBER BASE	115.21
291G	PARALON ICE BLUE RUBBER BASE	115.21
292G	PARALON BIKINI BLUE RUBBER BAS	115.21
297G	PARALON BLACK RUBBER BASE	115.21

Pool Paint Primer

Primer

POXOPRIME II is our epoxy primer for application over uncoated concrete or plaster. Used as an undercoat for POXOLON or ZERON, POXOPRIME II soaks in and seals the surface. POXOPRIME II's compatibility with wet surfaces helps reduce downtime by allowing the pool to be cleaned and primed in one day. Do not apply over any old coating.

Coverage: 200 - 250 square feet per gallon

GUNZITE is a two-part epoxy primer for application over fiberglass or unusually rough plaster or concrete. The heavy viscosity of GUNZITE acts as a fill coat on concrete and plaster and provides a much smoother surface. GUNZITE should only be used as an undercoat for POXOLON or ZERON. Especially effective on sandblasted surfaces.

Coverage: 100 - 150 square feet per gallon

Item #	Description	Price
214G	POXOPRIME II	112.76
216G	GUNZITE GALLON	114.96

Pool Paint Solvent

Solvent

Solvents are very useful for clean up or to determine the type of paint on a previously painted pool.

When the type of the old coating is not known, send a 1" x 1" chip to us for analysis. If time does not permit our analysis, immerse a small chip in denatured alcohol. If it dissolves, it is a water-based acrylic. If not, immerse a small chip of the existing coating into a solvent blend of 75% mineral spirits and 25% Olympic No. 1108 SOLVENT or Xylol. Wait 30 seconds and rub the chip between your thumb and forefinger. If the chip dissolves, it is a synthetic rubber-base coating. If the chip does not dissolve, then immerse the chip in 100% Olympic No. 1108 SOLVENT, or Xylol. If the chip then dissolves, it is a chlorinated rubber coating. If it does not, it is an epoxy.

Pool Paint and Deck Stain

Duck Back

Duck Back Wood Preserver 5 Gallon Size

NO OTHER exterior wood stain offers the beautiful sheen and durable protection of Superdeck. Superdeck's three oil finish contains Linseed and Tung oils that offer superior durability that enhances the natural beauty of real wood, while protecting against harsh elements that can fade and damage exposed wood.

SUPERDECK contains the highest quality transparent oxide pigments to keep your wood looking like new with long lasting color and UV sun protection. Superdeck's high solids oil based formula penetrates deep into the wood's surface to lubricate and strengthen wood and form a superior water barrier.

ONE COAT of Superdeck is all that is needed for new wood-saving you time and money. Superdeck is professional grade with satisfaction guaranteed every time.

TRUST the brand that is the professional choice-Superdeck!

SUPERDECK EXTERIOR TRANSPARENT STAIN offers 10 beautiful wood tones.

WHERE TO USE: Use on decks, siding, fences, shakes, natural wood and log homes, outdoor furniture, gazebos, spa cabinets, pressure treated and other exterior wood surfaces where it is important to enhance and protect the wood's beauty.

Vinyl Non-Skid Stick-On

Vinyl Stickon Pool Markers *INFO-TILE*

INFO-TILE Inlays, Inc., offers a line of Vinyl Stickon depth and safety markers. Vinyl Stickons are made of an industrial grade, skid-resistant vinyl material. They are a professional alternative when doing depth and safety marker renovations.

Vinyl Stickons adhere to most deck surfaces, including existing tile, eliminating stenciling or other costly installations. Vinyl Stickons are for above water use only and should be installed using our installation kit. Stickons are available in 6" x 6" with four-inch numbers and letters. They are centered vertically and horizontally.

1. Elderly persons and those suffering from heart disease, diabetes or high blood pressure should consult a physician before entering pool.
2. Persons suffering from a communicable disease transmissible via water may not use the spa pool. Persons using prescription medications should consult a physician before using the spa.
3. Individuals under the influence of alcohol or other impairing chemical substances should not use the spa pool.
4. Bathers should not use the spa pool alone.
5. Pregnant women should not use the spa pool without consulting their physicians.
6. Persons should not spend more than 15 minutes in the spa at any one session.
7. Children under the age of 14 must be accompanied and supervised by at least one responsible adult over the age of 18 years of age when lifeguards are not on duty.
8. Children under the age of five years are prohibited from bathing in a spa or hot tub.
9. Running or engaging in unsafe activities or horseplay in or around the spa pool is prohibited.

PM40322 18X24

1. All persons using pool do so at their own risk. Owners and management are not responsible for accidents or injuries.
2. Pool is for private use only. Guests must have management permission.
3. No animals allowed.
4. No food or drinks permitted in pool.
5. Running or unnecessary noise is not permitted at any time.
6. After using the pool, footwear and towels must be used when returning to building.
7. Persons with long hair must wear bathing caps.
8. Management reserves the right to deny use of pool to anyone at any time.

PM40368 18X24

1. All persons using the swimming pool must take a shower before entering the pool enclosure.
2. Any person having an infectious or communicable disease is prohibited from using a public pool.
3. Persons having open blisters, cuts, etc., are advised not to use the pool.
4. Spitting, spouting, blowing the nose or discharging bodily wastes in the pool is strictly prohibited.
5. Running, boisterous or rough play or excessive noise is forbidden in the pool area, showers or dressing rooms.
6. Common towels, combs, brushes, and drinking cups are prohibited. Private swim suits and towels should be cleaned and dried after each use.
7. No persons may take food and drink inside the pool enclosure.
8. Dogs and other animals are not allowed in the pool area.
9. All children and non-swimmers must be accompanied by a parent or responsible adult supervisor.

Safety Shut Off

The Model SR-500 is a Safety Vacuum Release System (SVRS) works by monitoring the vacuum on the suction side of the pool or spa pump. When a blockage occurs in the main drain or skimmer a sudden rise in vacuum will cause the SR-500 to shut down pump operate and activate an audible alarm. The pump will remain off with the alarm sounding until manually reset.

Features and Benefits

- Complies with ASME/ANSI 112.19.17 as required by the International Building Codes (IBC) and the International Residential Codes (IRC)
- Meets all current codes and standards for SVRSs on new and existing pools and spas
- Can act as pool controller with programmable timer, or as stand alone SVRS working in conjunction with existing pool controller
- Newest state-of-art NEC microprocessor technology-- guaranteed reliability and performance
- Vacuum monitored 128 times per second -- rapid response and accurate readings
- Power monitored 50/60 times per second -- insures continuous power detection
- Can act as a pool and spa controller - with fully programmable 24 hour timer, or as stand alone SVRS working in conjunction with existing pool and spa controller
- Integrates with existing timer box - (for easy retrofit)
- Low vacuum sensing - (prevents cavitations or running the pump dry, eliminating equipment failure)
- 30 minute maintenance override - (for pool or spa service)
- Accessible extra dry contact -- auxiliary equipment can be add ready added
- Power back-up -- insures settings and reading will be saved (30 minute rapid recharge)
- Display error readout - (prevents guessing during troubleshooting)
- Easy and trouble free installation - (no pipes to cut or glue)
- Turns off pump in milliseconds upon detecting sudden vacuum change
- Multiple audible alarm capabilities -- allows for quicker alert to harmful to harmful situations
- Provides a layer of protection, reducing entrapment risk

SVRS Devices

Vac-Alert

The Vac-alertTM Model VA-2000L is a Safety Vacuum Release System (SVRS) designed for suction lift applications. Suction lift in this case applies to all applications where the circulating pump suction is either at or above the level of the pool water surface. This unit incorporates a 0.170" diameter orifice opening installed below the surge tube section. This orifice opening is sized to prevent nuisance tripping of the SVRS unit caused by high vacuum surges typical of many pump start-up conditions.

The Model VA-2000L SVRS unit also utilizes a check valve assembly equipped with a 3.5 pound spring, a poppet disc and a one-way (up only) vented poppet. This check valve assembly permits continued water flow to the circulating pump while the SVRS unit is in the open or vented position. The 3.5 pound spring further compressed by the poppet disc, creates enough sealing force within the check valve to allow partial water flow to the circulating pump for suction lifts up to 3.5 feet. This is critical to the elimination of circulating pump damage that can be caused by a sustained dry-running condition. The one-way vented poppet allows the surge chamber to be internally recharged when the circulating pump is turned off.

For pumps operating 24/7 we recommend installation of the VA-2000S (even if it's a lift application situation).

The Vac-alertTM Model VA-2000S is a Safety Vacuum Release System (SVRS) designed for submerged suction applications. Submerged suction in this case applies to all applications where the circulating pump suction is below the level of the pool water surface. This unit incorporates a 0.375" diameter orifice opening installed below the surge tube section. This orifice opening is sized to provide a limited amount of pump start-up surge protection, while at the same time allowing enough air into the piping system to insure dissipation of the dynamic suction force caused by the circulating pump.

The Model VA-2000S SVRS unit also utilizes a check valve assembly equipped with a 0.25 pound spring and a non-vented poppet (no poppet disc or hole through the poppet). This check valve assembly utilizes a light duty spring to minimize the sealing force of the check valve. The non-vented poppet insures that water from the circulating system, under a positive hydrostatic head condition, does not migrate up into the SVRS.

For pumps operating 24/7 we recommend installation of the VA-2000S (even if it's a lift application situation).

Chemical Feeder

Floating

171086 Pentair Pool Feeder

Floating chemical feeder for use in pools. Great for above-ground pools. Can be used in any pool. Accommodates the 3" chlorine puck, although it can be loaded with 1" tabs as well. Tethered.

171090 Pentair Spa Feeder

Floating spa chemical feeder from Pentair. Very durable plastic design ensures long life. Uses 1" tablets. Available in tan/whitecolor.

1973-E MP Spa Feeder

Popular floating feeder for spas with easy access for filling at bottom. Opening filler cap will not affect feed setting. Available in blue or gray.

1929 MP Pool Feeder

Uses 3" chlorine tablets and is fully adjustable. It is made of high impact, chemically resistant plastic and sports a built-in hooking device on the side that can be anchored with a 6' rope supplied.

GFCI Breaker

J&J GFCI Load Centers are NEC compliant, while providing critical protection against ground faults for portable spa users. Plus, J&J's GFCI Load Centers feature new, advanced Filtratec™ technology. Filtratec provides additional noise filtration that distinguishes between noise feedback from spa components and genuine ground faults, preventing false tripping.

AquaChek®

Pocket Pal Tester

Specifically developed for pool and spa owners, the AquaChek TruTest Digital test Strip Reader combines the ease and accuracy of AquaChek test strips with advanced digital technology. Now there's no guesswork required to interpret color results – just dip a test strip in your pool or spa, insert in test strip reader and get fast, accurate digital results in seconds!

Features:

- Numerical test results for Free Chlorine/Bromine, pH and Total Alkalinity – "low", "ok" or "high" indicators for each test parameter
- Water-resistant
- Memory function – stores the last 9 test results
- Power source: 2AA alkaline batteries (not included)
- Sixty (60) day limited manufacturer's warranty

Easy to use:

- Fast, accurate results in 15 seconds without color matching
- Large, easy-to-read LCD screen that displays test results

Kit Includes:

- TruTest Digital Test Strip Reader
- User's guide in 15 languages
- Pool Care and Treatment Information
- 25 TruTest Digital Strips

Testing

Test Strips by GLB

Test Strips by GLB

4-Way Test Strips

Use strips for both pools and spas to test pH, Total Alkalinity and Free Chlorine or Total Bromine. A convenient color chart on the side of the bottle makes reading test results easy.

Features:

Easy to use test strips test pH, Total Alkalinity, and Free Chlorine or Total Bromine
Immediate and accurate results
For both pools and spas, Flip top bottle

Application:

1. Dip test strip in water and swirl.
2. Remove strip and compare to chart on back of bottle.

50 strips per bottle

Item #	Description	Price
GL71000	TEST STRIPS 4-WAY 12 PER CS	145.82

Test Strips by Lamotte

Insta-Test 3, Insta-Test 5, Monopersulphate (non-chlor shock), Peroxide, Salt, Copper

Insta-Test 3

Free Chlorine 0-10 ppm (or Bromine 0-20 ppm), pH 6.8-8.4 and Total Alkalinity 0-180 ppm. Available in 50 strip vials and packaged in 12 packs.

Insta-Test 5

Free Chlorine 0-10 ppm (or Bromine 0-20 ppm), Total Chlorine 0-10 ppm, pH 6.8-8.4, Alkalinity 0-180 ppm and Total Hardness 50-800+ ppm.

Insta-Test Monopersulfate

(MPS) strip measures MPS in low, ok and high levels of MPS, Alkalinity 0 to 180 ppm, and pH 6.8 to 8.4, with instant results. The strips are packaged 50 per bottle.

Insta-Test Peroxide

Measures the Peroxide (shock) level from 0 to 90 ppm in Biguanide pools or spas with instant results. The Peroxide strips are packaged 25 strips per bottle with 12 units per case.

Insta-Test Sodium Chloride (Salt)

Sodium Chloride (Salt) strips measure from 1500, 2000, 2500, 3000, 3500, 4000, and 5000 ppm in 20 seconds. The Salt strips are packaged with 10 strips per bottle.

Insta-Test Copper,

pH, & Alkalinity Copper, pH, and Alkalinity strip measures Copper 0 to 3.0 ppm, pH 6.8 to 8.4, and Alkalinity 0 to 180 ppm in 10 seconds. There are 25 strips per bottle.

Test Strips by Leisure Time

4-Way Strips

Spa & Hot Tub Test Strips

Easy-to-read strips test spa water pH, total alkalinity, calcium hardness and bromine or chlorine levels.

Applications:

Dip strip in water one time. Compare test results to chart on back of bottle.

Sizes:

50 strips

Compatible With:

Chlorine, bromine and ozone sanitizers.

Free Test Strips

Check sanitizer level, calcium hardness, alkalinity and pH with one easy-to-read test strip

Applications:

Dip strip in water one time. Compare test results to chart on back of the bottle.

Sizes:

50 strips

Compatible With:

Leisure Time Free sanitizing system, biguanide spas.

Pocket Tester by Hanna

ph/orp Combination

pH and ORP Tester

- Simple to Use
- Highly Accurate
- Floating and Waterproof Body

HI 98121 is supplied complete with protective cap, electrode removal tool, batteries and instructions.

The Combo series of combination waterproof testers with advanced functions now includes the new model HI 98121 for simultaneous pH and ORP measurements. HI 98121 also reads temperature, which is continuously displayed on the dual level LCD. The pH electrode fiber junction can be easily pulled out for replenishment. The pH electrode cartridge can be quickly replaced with the supplied electrode removal tool. The encapsulated external stainless steel temperature sensor provides a fast response due to its close proximity to the pH electrode. The HI 98121 works with common batteries and displays the percentage of battery life remaining when turned on. The stability indicator ensures reliable readings.

Pocket Testers by Lamotte

ph, Salt, ORP, TDS

pH Waterproof PockeTester

The Waterproof pH1 reads pH from 0-14 with an accuracy of ± 0.1 pH and includes automatic temperature compensation. This meter is excellent in harsh applications.

TDS Waterproof PockeTester

The TDS PockeTester High precisely measures Total Dissolved Solids in 100 ppm increments up to 10,000 ppm (10.00 ppt). The unit features push-button calibration and automatic temperature compensation. The TDS PockeTester Low reads Total Dissolved Solids in 10ppm increments up to 1,990ppm.

ORP Waterproof PockeTester

The ORP PockeTester measures oxidation-reduction potential from -99 to +1000mV. Convenient for quick checks of active sanitizers.

Salt Waterproof PockeTester

The Salt PockeTester measures the Sodium Chloride level from 0 to 10,000 ppm (10.00 ppt). It is packaged in a rugged carrying case and a special calibration standard is included.

Item #	Description	Price

Pocket Ph Tester by Hach

Hach

Hach Pocket Pal™ Testers are easy to use, economical and reliable. Now IP67 rated* (dustproof and waterproof), Pocket Pal™ Testers are immune to harsh environments and accidental spills that could harm electronics. If accidentally immersed in water, the circuitry will remain unharmed. Pocket Pal™ Testers clip onto your shirt pocket, produce immediate results, and feature an easy-to-read liquid crystal display (LCD).

Pocket Pal™ Testers offer a cost effective alternative for routine, on-the-spot measurements.

Color Q

ColorQ PRO 7 (Code 2056) No color matching, no look up charts, no guessing! The unique, multi-test ColorQ pool and spa hand-held photometer reads SEVEN test factors (Free Chlorine, Total Chlorine, Bromine, pH, Alkalinity, Calcium Hardness, and Cyanuric Acid) directly on a digital display. Featuring an innovative dual-optic design the ColorQ provides more accuracy and more test factors. The ColorQ eliminates the need to visually determine slight color variations or use look-up tables, thus taking the guesswork out of pool side water analysis.

Light Wedge

Pool Tool brand **Light Wedge** holds pool lights in niche when niche screw adapter is broken or stripped.

Item #	Description	Price
132	LIGHT WEDGE	23.80

Potting Compound

AquaBond

Our popular UL listed compound, formulated for encapsulating and waterproofing electrical connections in swimming pool, fountain and spa lighting fixtures. This product will cut your light niche encapsulation cost by 70%. You can encapsulate 5 to 8 light niches with one easy-to-use, no waste cartridge! This product is preferred by electrical inspectors nationwide! Inspectors look for our aqua blue color for quick and easy identification of properly encapsulated light niches.

Valves

Butterfly Valve Schedule 80

Asahi Pool Pro

Standard Features (Sizes 1-1/2" – 12")

•Submersible

Material of construction allows complete submersion of valve body as all components are compatible with Chlorinated water.

•PVC/PVC/EPDM Construction

Ideal for Chlorinated water applications.

•Blue Handle Design

New blue handle designates the proper valve is in place for Chlorinated water applications.

•316SS Non-wetted Stem

Stem does not come in contact with the media but is still compatible if in direct contact.

•Thermoplastic Material

Lightweight construction allows for easy installation.

•ISO Mounting Pad

Allows for field mounting of accessories including stem extensions, gear operators & automation.

Asahi Schedule 80

Standard Features (Sizes 1-1/2" – 16")

•Standard model (1-1/2" — 14") has PVC Body and PP Disc for better chemical resistance at temperatures higher than can be achieved with PVC. 16" has PP body and PP disc as standard.

•Only solid and abrasion-resistant plastic disc and elastomeric liner are wetted parts.

•Our 316/403 stainless steel shaft has full engagement over the entire length of the disc and is a non-wetted part, totally isolated from the media.

•ISO bolt circle on top flange – no body or stem modifications required for accessories.

Gizzmo Winter Expansion System

Save your skimmer from the freeze this winter with the Gizzmo. **The Gizzmo** is designed to absorb the expansion of the freeze, allowing your skimmer to last throughout the winter undamaged. Just place the Gizzmo into your skimmers to absorb any expansion caused by freezing water. Water will actually compress the Gizzmo instead of expanding outward and cracking your skimmer. The bottom of the unit fits either a 1-1/2" or 2" internal thread.
