Important Monster® performance & safety tips

To avoid damage to hearing, make sure that the volume is turned down before turning on your Beats™.

Once Beats are placed over your ears, gradually raise the volume to a moderate level.

Avoid listening at loud volume levels for prolonged periods as permanent hearing damage or hearing loss may occur.

Be aware of your surroundings and use Beats headphones responsibly.

Do not use Beats headphones when it is unsafe to do so: while operating a vehicle, crossing street crosswalks, or during any activity that requires your full attention and ability to hear.

The safety of your ears is in your hands

Get the most out of your equipment by playing it at a safe level—a level that lets the sound come through clearly without annoying distortion, and most importantly, without affecting your sensitive hearing.

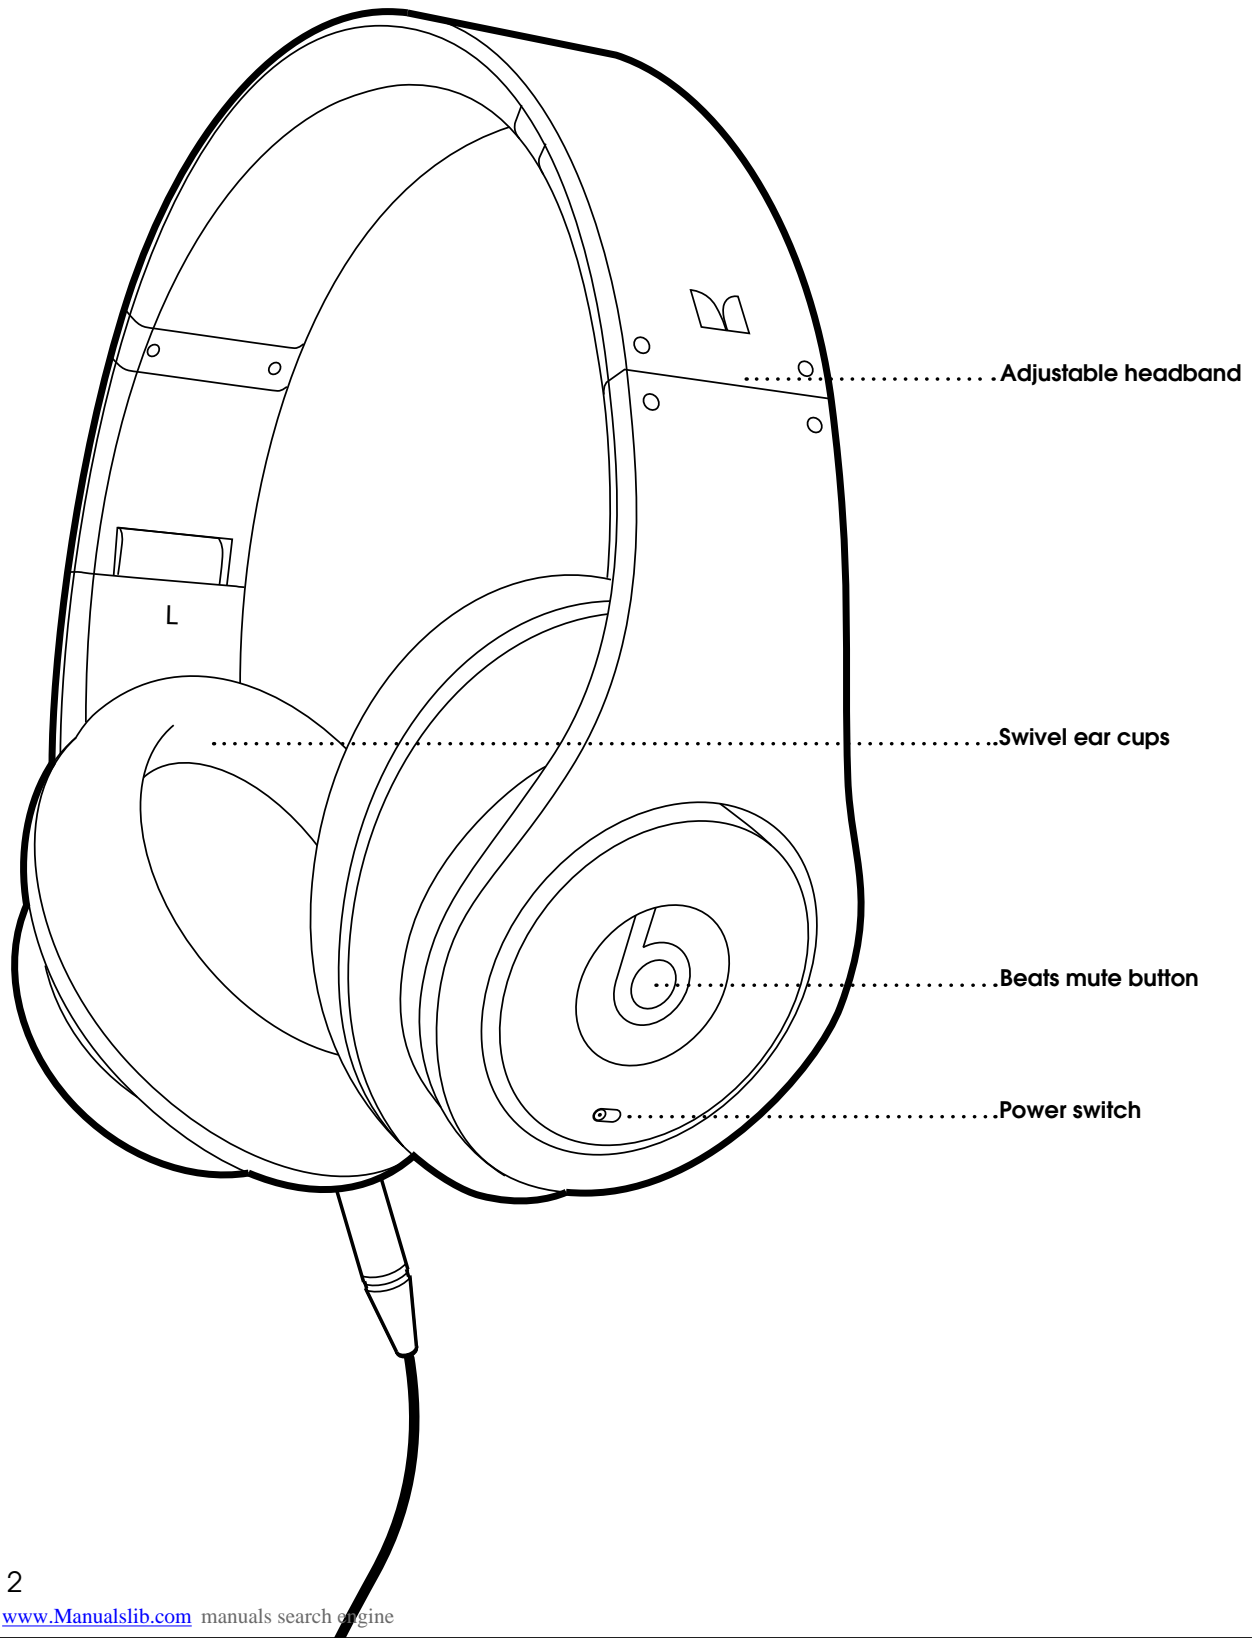

Learn how to establish a safe listening level and review other important safety guidelines from the Consumer Electronics Association and Deafness Research Foundation. Visit website at www.drf.org, www.ce.org.

Note the "L" and "R" markings on the inside of the headband. The "L" earcup goes on the left ear and the "R" goes on the right ear.

Note the power switch on the right ear cup.

To listen, move power switch to ON (far left) position. Red LED will illuminate.

Beats will not work when the power switch is in the OFF (far right) position or without batteries.

In ON position, red LED will turn amber if battery power is low. Replace the batteries as soon as possible with new batteries. Use rechargeable batteries if possible.

The headband is adjustable to fit different head sizes.

Grip the headband with both hands. Pull out equal amounts of headband on the left and right sides for a comfortable fit.

Note the two folding hinges on the Beats headband. Fold one side, then the other. Grip the headband and apply pressure to hinge, *not* ear cup when folding.

Do not fold both sides simultaneously.

sound check

For the best iPod® or iPhone™ listening experience with Beats, activate iTunes® Sound Check. Sound Check standardizes the volume of all the songs in your music library. Beats is specially designed to provide a powerful but safe listening experience with Sound Check activated. Learn more about iTunes Sound Check at <http://docs.info.apple.com/article.html?artnum=61655>

TIP: Beats powered isolation can be used without a music source to simply reduce undesirable sounds, such as airplane engine noise.

disconnect

Gently remove headphone cable by pulling the cable connector. Do not pull directly on the cable. This may cause unnecessary wear and damage to the Beats cable jack.

maintain

Clean ear cups and headband regularly with the supplied Monster Clean Cloth™, specially bonded with Aegis Microbe Shield™ antimicrobial technology.

Avoid exposure to water, temperature extremes, and high humidity.

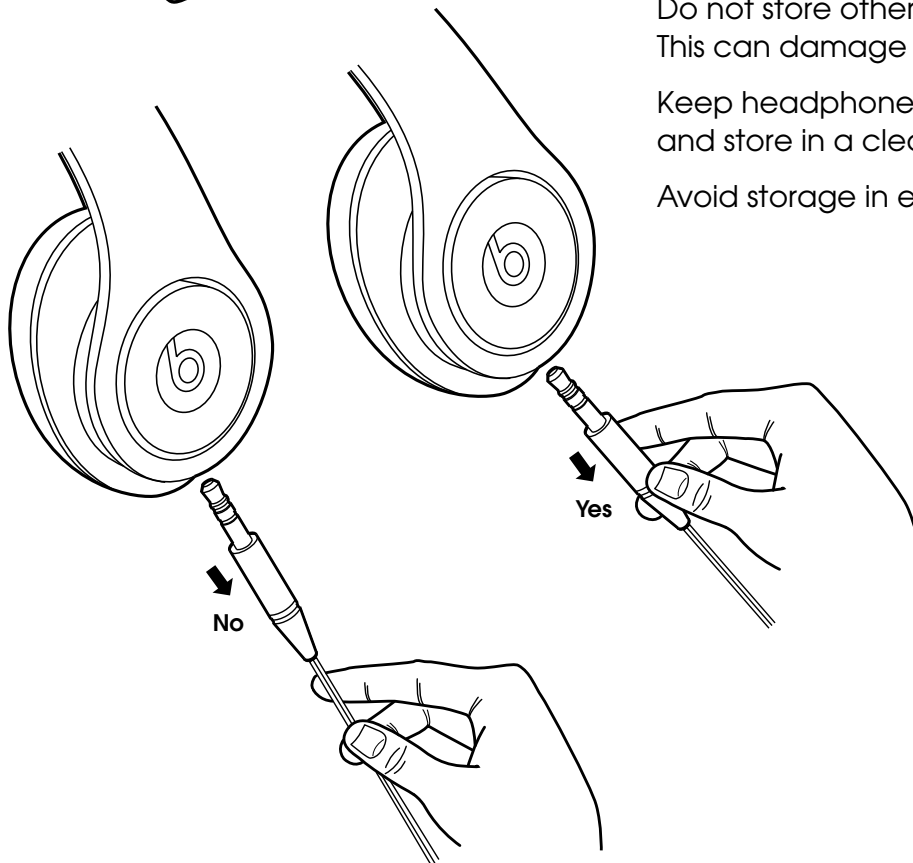

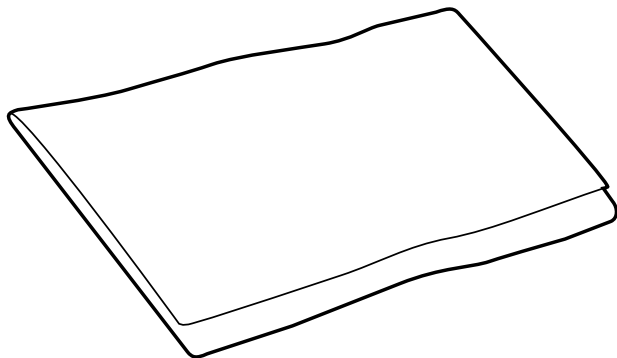

store

When not in use, always store your Beats in the touring case. Use the removable compartment for cables and accessories.

Do not store other items in the case. This can damage your Beats.™

Keep headphone case closed, and store in a clean, dry environment.

Avoid storage in extreme heat or cold.
