EXCLUSIVE FEATURES!

DECT 6.0 PLUS Technology

DECT 6.0 PLUS takes the superb sound quality and outstanding range of DECT 6.0 phones to a whole new level. By increasing the frequency of error correction up to 80x, the transmission quality is improved and the phone's range is extended. Whether you use them in the bedroom, the basement or the backyard, our cordless phones with DECT 6.0 PLUS Technology truly go the distance!

Intelligent Eco Mode

This clever new feature automatically lowers the power consumption when you're using the handset close to the base unit. Not only does it extend the available talk time, it's good for the environment. When less power is used by the handset to communicate with the base unit, battery life is prolonged which results in less frequent charging and can result in fewer batteries in landfills.

Smart Wall-Mount

Several models feature a sleek, low-profile base unit with a reversible pedestal. These models are ideal for kitchen use because they don't take up a lot of room on a desk or countertop, and they can be quickly and easily mounted to a wall by using the reverse side of the pedestal.

Non-Slip Handset Design

Multi-tasking while you're talking on a cordless handset—whether it's jotting down a quick note, pouring a glass of juice or folding a few pieces of laundry—is often difficult due to the tendency of the handset to slip as you cradle it on your shoulder. The rubberized grip helps prevent slipping, making it easier and more comfortable to cradle the phone when you want to work with your hands.
