

LEE

Lee Factory Crimp Die

The Lee Factory Crimp Die crimps the bullet in place more firmly than any other tool. It is impossible to buckle the case as with regular roll crimp dies. Trim length is not critical. Tests demonstrate that even bullets which have no cannelure will shoot more accurately if crimped in place with the Lee Factory Crimp Die. Order from the charts on the next 3 pages. (Shellholder not included - sold separately.)

Lee Carbide Factory Crimp Die

For handgun ammunition. A carbide sizer sizes the cartridge while it is being crimped so every round will positively chamber freely with factory-like dependability. The adjusting screw quickly and easily sets the desired amount of crimp. It is impossible to buckle the case as with a conventional bullet seating die. Trim length is not critical so this extra operation takes less time than it would if cases were

trimmed and chamfered. Revolver dies roll crimp with no limit as to the amount. A perfect taper crimp is applied to auto-loader rounds. The crimper cannot be misadjusted to make a case mouth too small to properly head-space. A firm crimp is essential for dependable and accurate ammunition. It eliminates the problems of poor ignition of slow burning magnum powders. Order from the charts on the next 3 pages. (Shellholder not included - sold separately.)

Lee Taper Crimp Die

The Lee taper crimp die is hardened steel designed to overcome crimp problems caused by poor die design. These dies offer little or no advantage when used with 1986 or newer Lee dies as the crimp angle is already a modified taper crimp. Jacketed bullets must have a crimp groove (cannelure). Order from the charts on the next 3 pages. (Shellholder not included - sold separately.)

Lee Powder Thru Expander Die

Only Lee dies permit charging the case while expanding the case mouth. Every Lee 3-die Set includes this Powder Through Expanding Die at no extra cost. The Powder Funnel adapter can be replaced with a Lee Auto-Disk Powder Measure for fully automatic powder charging while the case mouth is being expanded. Order from the charts on the next 3 pages. (Shellholder not included - sold separately.)

Lee Deluxe Pistol 4-Die Set

The Lee Deluxe Pistol 4-Die Set combines the world's most popular carbide three-die set with the Lee Factory Crimp die at a great price. By separating the seating and crimping operation, you will benefit by greatly simplified adjustment. More importantly, the Carbide Factory Crimp die post sizes your case assuring you that any round that passes through the die will chamber properly in your gun. Order from the charts on the next 3 pages. (Shellholder included)

Lee Carbide 3-Die Set

Lee uses a solid carbide insert, ground to a special contour that does not leave the objectional belt mark on the case, common to ordinary carbide dies. With a carbide sizer, no case lube is needed. Because the Lee Expander flares the minimum amount, consistent with easy bullet insertion, all of the flare is removed with the bullet seating die, thus eliminating the need for a taper crimp die. Order from the charts on the next 3 pages.

Lee Carbide Speed Die

One die replaces three. The first significant pistol die breakthrough since the carbide die. When used in any single station press, the Lee Speed Die reloads faster than three die sets because you don't have to change dies between operations. Lee 3-Die Sets are faster when used in a turret or progressive press. Order from the charts on the next 3 pages. (Shellholder included.)

Lee Deluxe Rifle 3-Die Set

The Lee Deluxe Rifle 3-Die Set is the most flexible and accurate die set available. The Lee Collet neck sizing die is enhanced by the addition of the patented Lee full length resizing die, which allows you to produce ammunition to factory-new specifications using cases fired in other guns. No case lubrication required. Order from the charts on the next 3 pages. (Shellholder included.)

Lee Pacesetter 3-Die Set

Lee PaceSetter Dies include the exclusive Lee Factory Crimp Die to produce factory-like ammunition with improved utility and accuracy. The die set also includes a conventional bullet seater and roll crimper. You can choose the type of crimp you desire. These dies are your best buy. They also include a shell holder, powder dipper, load data and are packed in a nice transparent plastic storage box. Order from the charts on the next 3 pages. (Shellholder included.)

Lee RGB 2-Die Set

The RGB stands for "Really Great Buy". The tolerances of these dies are 50% less than the advertised amount of a popular and expensive brand. A great set of utility dies at a great price. Order from the charts on the next 3 pages. (Shellholder not included - sold separately.)

Lee Collet 2-Die Set

Die sets include: Collet neck sizing die, dead length bullet seating die, shell holder, powder measure, charge table and storage box. Order from the charts on the next 3 pages. (Shellholder included.)
