ARCHERY

2012 PRODUCT CATALOG

Letter from Gregg

I bet you usually skip over the President's Letter as you flip through your favorite catalogs. I don't blame you. They're usually full of ten-dollar words and fancy descriptions detailing how a company's newest products are "must-have", "cutting edge", and "revolutionary". Not this time. I'll spare you from yet another long-winded sales pitch. What I will give you, instead, are the cold, hard facts.

At Horton, we know that 50 years of legendary innovation is no accident. Our rich heritage and history are unique. No other horizontal bow maker can lay claim to such tradition. And despite these tough economic times, our momentum is stronger than ever. Our formula for success is simple: We listen to our loyal customers, we deliver exactly what they want, and we hold ourselves to the highest standards of quality and craftsmanship. In addition, we hold the sport of hunting in the highest regard.

Our technologies and innovations have earned us accolades from hunters everywhere, not to mention the outdoor media and the industry's most experienced professional hunters. Are we over-confident? Absolutely not. We know the competition is fierce, the economy is tough, and that we have to work harder than ever to make a buck. But rather than view this as a negative, we see it as an opportunity ... an opportunity to tell our story in new and exciting ways, and a chance to propel our brand with unbridled enthusiasm, tunnel vision focus and unwavering commitment to put even more distance between ourselves and the competition.

A story that we're proud to tell is that this year we've brought every facet of our manufacturing operations to the U.S. This is a very important and necessary step in our continued evolution and growth. Our decision to move all production to the U.S. not only creates crucial jobs stateside, it demonstrates our commitment to quality. This is simply the right thing to do for our brand, for our dedicated, hard-working staff, and for Horton fans everywhere.

The next time you shoot a Horton, know that you're shooting the very best bow on the market. Know that American muscle and ingenuity designed and manufactured that bow, and that all the talented, dedicated people who had a hand in building it share your passion for the outdoors.

From all of us at Horton, here's to your continued enjoyment of the outdoors and your continued success with our products. We truly value you as a member of the Horton family.

Gregg Ritz
CEO

FURY

HAVOC

New for 2012

We have much to celebrate this year. With 100% of our manufacturing operations stateside, we've created jobs and taken our quality standards to exciting new heights. We've established critical partnerships with a variety of industry experts to enhance our manufacturing processes and our limb and riser designs, as well as our optics, arrows and other accessories and components. To say we've enjoyed a complete overhaul of our manufacturing process - and a radical boost of American pride - would by no means be an understatement.

For 2012, we proudly unveil a number of new products and technologies. First and foremost are the Horton Fury and Horton Havoc, a dynamic duo poised to turn conventional crossbow wisdom upside down. Lean, mean and ready to dispatch whatever game you pursue, Horton Fury, our premiere bow, begs to feed your bowhunting addiction. No other horizontal bow packs such an awesome mix of features and technologies into such a ridiculously cool design. Boasting our futuristic, power-boosting Reverse Draw Technology, Horton Fury is the total package of speed, precision balance, ergonomic feel, stealth, bone crushing knockdown power, and unshakable durability.

The 2012 Horton Havoc represents yet another exciting advancement for us. We've taken everything we learned from the Vision and scrutinized every inch of its radical, hunt-enhancing form and function - and the result was more than enough to get us excited. Horton Havoc is a compact powerhouse that dishes out an enviable mix of innovation and performance sure to continue the compact-bow craze that Vision started. Offering our proven Frontal String and Reverse Draw Technologies and sporting a completely overhauled stock for even greater feel, Horton Havoc unleashes a deadly dose of speed, stealth, perfect balance and a serious list of other technologies sure to boost your success and fill your freezer.

Speed. Balance. Stealth.

The 2012 Fury represents the pinnacle of crossbow technology. Our patented Reverse Draw Technology gives Fury an amazingly compact design, while its CNC-machined riser and lightweight aluminum barrel produce incredible balance and accuracy. Precision CNC-machined cams and advanced laminated limbs optimize speed, integrated stumper arms maximize stealth while our custom Viper X strings deliver ultimate speed and durability. Every inch of this smokin' rig is meticulously designed and assembled in the USA by our dedicated engineers and craftsmen who share your bowhunting passion.

NEW

Package Contents:

- CNC machined riser and light weight barrel for balance and accuracy
- Precision CNC machined cams and advanced limbs optimize speed
- Custom fit over-molded interchangeable recoil pads (+/-1/2")
- Viper X string with integrated stumper arms for added stealth

Compact. Quiet. Balanced.

Meet the 2012 Horton Havoc: a quiet, compact powerhouse that handles like a dream and delivers an incredible mix of innovation and performance. Sporting our radical Reverse Draw design, a CNC-machined riser for optimal balance in any shooting position, and high performance CNC-machined aluminum cams, Havoc is the perfect tool to fill your freezer and your trophy room. Our hand crafted Viper X string gives Havoc enviable speed, and our anti-dry fire mechanism ensures your safety.

Ultra-Lite. Fast. Custom Fit.

At a mere 6.5 lbs., the Team Realtree Ultra-Lite Express (TRT) is the undisputed leader of the ultra-lite, high-performance crossbow category. Gordon Composite asymmetric, three-layer laminated limbs give TRT blazing speed, and its ultra efficient cam design yields an incredible 82% energy storage. Couple those features with a super light 7075-T6 forged aerospace aluminum riser, a repositionable forearm, custom fit over molded recoil pad and integrated stumper arms, and you have a bow designed for maximum speed, comfort, and stealth.

- Ultra-Lite forged 7075-T6 aerospace aluminum riser
- Proprietary Gordon Composite asymmetric laminated limbs
- Custom fit interchangeable over-molded recoil pads (+/- 1/2")
- Aluminum barrel w/over-molded repositionable fore-arm

Package Contents:

- Model - CB517 (Scope); CB514 (Red Dot)
- Horton TRT Crossbow
 - 4x32 Multi-A-Range Scope (Pkg CB517)
 - 3 Dot Red Dot Multi-A-Range Sight (Pkg CB514)
 - Arachnid BLK 5-Arrow Quiver
 - 3 Arrows

SCOUT™

Youth Crossbows. Compact. Safe.

SCOUT 125

Youth hunting bow in a compact easy to handle design. Horton scaled down every critical feature of its adult crossbow to develop the Scout stock to make sure it fits a wide range of youth hunters.

EAGLE

Developed as a kids training bow, the Horton Eagle was specifically designed to be used in school and after-school archery programs. At a draw weight of only 25lbs, it is intended for target shooting and not intended to be a hunting tool.

- Ergonomic stock design specifically built for youths
- Durable string and cable systems for optimal speed
- Energy wheel design for easy and consistent cocking
- Precision 25mm Single Dot Sight with Dial-A-Range (Scout)

Package Contents:

- > Scout 125 (CB721); Eagle (CB831)
- > 25mm Single Dot Red Dot Scope (Scout)
- > Fiber Optic Peep and Pin Sight (Eagle)
- > 3 Arrow Quiver (Scout); Hip Quiver (Eagle)
- > 3 Arrows

Broadheads not included.

Redefining Arrow Technology

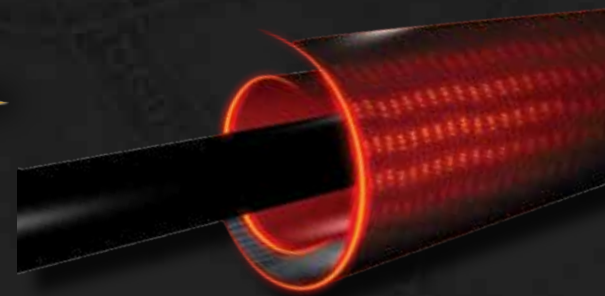

The best-built crossbows deserve the best-shooting arrows. Complement your Horton crossbow with our proven, field-ready arrows – built to the industry's tightest specifications to ensure your success. We are so confident, Horton guarantees that each pack of arrows will shoot 2" groups or tighter at 40 yards! Crafted from the highest-quality components and guaranteed to deliver uncompromising results, our arrows are specifically engineered to maximize your bow's performance.

Offering the industry's tightest tolerances and specifications, Horton has partnered with the leader in arrow technology, Carbon Express, to build arrows that crush the competition with superior design and meticulous attention to every accuracy-boosting detail. Our aluminum and carbon components deliver the tightest groups, unbelievable consistency and incredible down-range energy – a benefit you'll appreciate when you're staring down the buck of lifetime and there's no time to second-guess your setup.

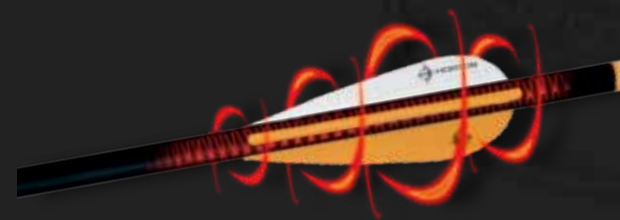

Every Horton bow features innovative design and cutting-edge technologies to maximize your crossbow experience. To make the most of these technologies, it's important to have a solid understanding of the mechanics of your setup – including how your bow and arrow work together for optimized accuracy. A fundamental yet often overlooked principle affecting accuracy and arrow penetration is Front-of-Center (FOC). In technical terms, FOC is the percentage difference between the actual measured midpoint of an arrow when compared to total length and the center of gravity – or balance point – of the arrow.

FOC affects the flight of your arrow and, therefore, is a huge factor affecting downrange kinetic energy, accuracy and arrow penetration. To achieve optimum FOC, Horton engineers design a total arrow system – not just the shaft. Horton uses specific shaft materials, vane lengths and weights, nocks and inserts, all designed as a precision-fit package that together yield superior flight and accuracy.

Premium Grade Carbon

Achieving precision results requires Horton to utilize premium raw materials for their carbon and aluminum arrows. Implementing tight production controls ensures the tightest tolerances in the industry for Horton crossbow arrows.

High Performance Vanes

It doesn't take much to throw your arrow off course. Rotational stability is the key factor in correcting the flight path of an arrow and maintaining kinetic energy for greater accuracy and penetration. Stability of an arrow is driven by the overall profile, weight, material and positioning of a vane on the arrow. This is why Horton engineers utilize premium 3" performance vanes designed to counter these imperfections and achieve optimal rotational stability for greater downrange accuracy.

Lightning Strike™ Carbon & Aluminum

Horton Lightning Strikes offer the perfect mix of premium performance and exceptional value to satisfy shooters of all levels. Built to the highest standards and ultra-tight tolerances, these proven shafts are made to last – and guaranteed to exceed your expectations. Trust Lightning Strikes to deliver value-added performance, rock-solid durability and hunt ready function. (Available in both aluminum and carbon.)

Bonecrusher™ Carbon

Purpose-built for hardcore performance, Horton Bone Crusher arrows are engineered for one very specific purpose: to deliver industry-leading kinetic energy to take down the toughest big game trophies. Delivering a best-in-class strength-to-weight ratio, Bone Crusher arrows live up to their name with unbeatable knockdown power and unrivaled down-range energy. You simply won't find a stronger, straighter, more dependable big game arrow anywhere. When your hunt calls for an arrow that can quickly and efficiently dispatch the toughest big game, shoot Horton Bone Crusher arrows and dispatch your next trophy with unshakable confidence. (Carbon only.)

DC100 De-cocking Arrow

Our de-cocking arrow is the only one of its kind on the market, and it fills a very simple yet necessary niche. Featuring a durable shaft and blunt tip for easy recovery from both targets and the ground, it provides a safe, convenient way to de-cock your bow after your hunt. And its bright orange vanes ensure you'll never lose it in the field. It conveniently fits in any quiver and offers yet another example of safety-focused, value-added, common sense Horton design.

Reinforced steel blunt tip

Precision Optics

Topping off your bow with anything less than premium Horton optics is a risky proposition. Our scopes are specifically engineered for today's modern, high-performance crossbows – and are guaranteed to deliver the utmost in accuracy and field-ready function.

Our pioneering Dial-A-Range and Mult-A-Range reticle technologies propelled crossbow scope technology to new standards of design and performance. Building upon these innovations, extensive research, development and testing have lead to our most advanced scope lineup ever. Featuring generous eye relief, lightweight yet rock solid housings, simple, user-friendly adjustment, bright, crystal clear, multi-coated lenses for optimal light transmission, and precise MOA adjustment, Horton scopes complement any bow in our lineup – as well as any other crossbow that accepts 7/8" Weaver-style bases.

Our premium 2012 optics are shorter, lighter, brighter, and even more user-friendly – everything you need to get dialed in and the job done. Featuring fully coated glass and guaranteed to be shockproof, waterproof and fog proof, our scopes ensure you'll never miss a shot opportunity due to inferior design.

Just like our bows, Horton scopes and sights stack the odds in your favor – and eliminate excuses. See what you've been missing with premium Horton optics.

4x32 Scope Kit (AC213)

Stack the odds in your favor with rock solid performance from Horton's 4x32 Mult-A-Range Scope Kit. Mult-A-Range technology features five crosshairs for varying yardage at approximately 10-12 yard increments depending on crossbow model. The Mult-A-Range can be used on any crossbow allowing for scope mounting. Specifically designed to withstand reverse recoil from crossbows, it is optically engineered with a 2 1/2" eye relief. Fully coated optics are shockproof, waterproof, and fog proof. Includes a 1/4 minute windage and elevation adjustments, duplex reticle and 50-yard parallax. All of this in a compact (10" Length) and lightweight design that offers a FOV of 34ft at 50 yards. Package includes high performance lightweight aerospace aluminum scope rings.

SS120 Mult-A-Range® Scope Mount Kit

- Weaver style scope mounting kit
- Includes two 1" aluminum rings and 7/8" dovetail bracket
- Fits all Horton crossbows and scopes with 1" tubes

SSS094 Cobra® Fiber Optic Sight Pin

- Precision machined all-steel pin
- Brilliant fiber optic green .029" sight pin
- Fits 8/32 thread count

SS099 7/8" Weaver Style Base

- Premium CNC milled aluminum Weaver style base
- Reverse recoil resistance (R3) for crossbows
- Durable matte black finish

SSALM Aluminum Scope Rings

AC253 Camo Scope Rings

Rings and Mounts

Get dialed in for tack driving performance with Horton's premium line of scope rings and mounts. Patented ring design features Reverse Recoil Resistance (R3) specifically designed for crossbows and utilizes an advanced locking system for precision accuracy. All rings feature a durable "no-shine" matte black finish and fit on scopes with 1" diameter and 7/8" Weaver style base.

4x32 Mult-A-Range Scopes

NEW

For 2012, our new diverse lineup of 4X32 scopes packs legendary Horton quality and craftsmanship into a compact, lightweight, precision crafted package. Featuring consistent 4X magnification, proper 4" constant eye relief, our proven Mult-A-Range Reticle System with integrated Windage Marks, and precise 1/4" MOA click adjustment at 25 yards, our 4X32 scopes are built to last and engineered to deliver industry leading results. Our multi-coated, incredibly clear and bright, shockproof, fog proof, waterproof glass further adds to the list of our 4X32s' value-added, performance-boosting features.

- Mult-A-Range Reticle Design
- Multicoated Optical System
- 4" Constant Eye Relief
- Precise, hand-turn 1/4"-MOA Click Adjustments
- 25-yard Parallax Setting
- Quick Focus Eyepiece
- Compact Size - Only 8.6"
- Windage Marks Calibrated for 10mph Crosswinds
- Waterproof, Fogproof, Shockproof

Variable Power Scopes

NEW

Our new line up of Variable Power scopes complement your bow with versatility, proven performance and compact, lightweight design. Featuring the highest quality components and multi-coated, shockproof, fog proof, waterproof glass, our variable Power Scopes get the job done without weighing you down. A great choice for all types of hunting, these precision-engineered optics utilize our renowned, user-friendly Mult-A-Range Reticle System and Vari-Range technology with integrated Power Ring Selector, Windage Marks, and pre-calibrated arrow drop compensator for enhanced accuracy - allowing you to hunt with the utmost confidence in your setup.

Integrated Power Ring Selector with pre-calibrated arrow drop compensator.

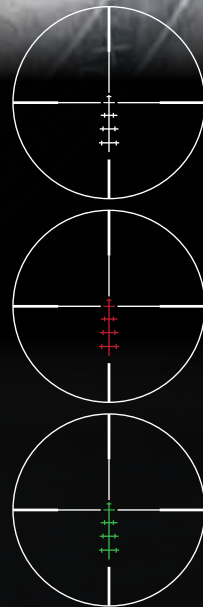

- Mult-A-Range Reticle Design
- Multicoated Optical System
- 4" - 3" Eye Relief

Cocking Devices

Our diverse bow lineup offers custom performance for all types of archers – men and women, youth, beginners and veteran shooters alike. Similarly, we make cocking devices to suit all types of shooters.

Our custom cocking devices are designed for optimal safety, quality, and value-added performance. They offer amazingly simple, user-friendly design to ensure that shooters of all ages and skill levels can load and shoot their bows efficiently, safely and effectively.

They offer a safer, easier alternative to hand cocking your bow, and they boost your bow's performance by creating more uniform weight tension and an equalized limb load – ultimately boosting accuracy and overall bow performance.

EZC1, EZC2, EZC3

EZC5 - Dovetail Crank
(Fury/TRT/BC)
(Havoc/BH - Requires AC230 Dovetail Adapter)

EZC6 Vision

AC230 Dovetail Adapter

EZ Crank Cocking Devices

Horton's EZ Crank™ weighs only ounces. The EZ Crank unit can be removed and stored away in seconds after cocking the crossbow, so it is not in the way while hunting. This durable, lightweight unit is constructed of aircraft grade aluminum with a gear reduction that allows the bow to be cocked consistently with minimal effort. Covered by a one-year warranty and right-hand only crank. Visit the Horton website or call customer service for correct crank model for your bow.

EZCR EZ Loader™ Cocking Rope w/Bridge AC250 Universal Cocking Rope (No Bridge)

- T-Handle design provides solid surface for secure grip
- Lightweight and portable for in-field use
- Fits most Horton crossbow models (excluding Vision)

AC870 RDT Cocking Sled

- Specifically designed for Fury, Havoc and Vision
- Advanced roller system in lightweight design
- Ensures proper limb load for greater accuracy

Accessories

Horton engineers are a unique breed. They live and breathe crossbow technology. Their passion for the hunt is understood only by those like-minded hunting fanatics who shoot Horton bows. When they're not decked out in lab coats with pocket protectors and clipboards in the R&D lab, they're dressed in camo from head to toe, field testing their latest bow and accessory designs.

Sure, they might not know much about world affairs or the latest fashion trends, but make no mistake: Horton engineers know crossbow technologies and crossbow accessories. Fifty years as the industry leader ensures that your bow – and every Horton accessory you complement it with – will perform with unfailing reliability.

Complement your bow with our extensive line of high-quality, performance-boosting accessories. From lightweight quivers, durable cases, rail lubricants and string wax to padded slings, noise dampeners, tune-up kits and more, we offer everything you need to keep your bow shooting and looking great.

AC310 Fitted Soft Crossbow Case

- Rugged design with heavy gauge zipper
- Fits most Horton crossbows with plenty of internal pockets

AC361 RDT Fitted Case

- Custom designed to fit the Fury, Havoc and Vision crossbow
- Heavy gauge zippers ensure added durability
- Internal pocket design to hold accessories

AC025 Deluxe Padded Sling

- Advanced thermoformed design with generous padded foam body
- Tapered profile with non slip rubber back for easy carry
- Fully adjustable 1" webbing w/ swivels included
- Fits most Horton crossbows

Premium Strings

Tap into an entire new level of speed and consistency with Horton's new premium line of strings specifically designed and engineered by Viper X – an industry leader in delivering ultimate high performance strings. Each of the hand crafted strings feature premium 8125 BCY material with a Spectra Halo .030" center serving. The advanced designs are presented in custom crafted candy cane or twist color combinations and pre-stretched to 450lbs of force for ultimate precision.

- T Handle design for easy use in the field with no additional tools
- Fits TRT Ultra-Lite Express, Bone Collector and Brotherhood models

String Wax and Rail Lube

Tack driving performance from Horton crossbows is easily achieved with the right tools. Horton's rail lubricant and string wax ensure long lasting durability by helping to eliminate string friction and lengthening the life of your string serving. Engineered for today's high performance crossbows, each provide a scent free formulation with a no mess applicator tip for increased speed and accuracy.

Lighted Nocks

Horton's lighted nock aids the crossbow hunter in following the flight of an arrow and determining the location of impact on an animal. As most crossbow hunters know, having insight on the location of impact will certainly aid in the recovery process. The added benefit is that it also helps prevent arrow loss in the event of a pass-through shot or even that unfortunate misguided shot.

Utilizing translucent acrylic materials for exceptional brightness, Horton's lighted nock is engineered on the basis of a string activated design and incorporates rugged battery mechanism for superior durability all in a lightweight 32 grain design. This simplistic yet advanced string activated design will ensure activation of the light with each and every shot. Models are available for both carbon and aluminum arrows and have an "activated" battery life span of approximately 6-8 hours.

NEW

- AC215 Red Lighted Nock for Aluminum - 1pk
- AC217 Red Lighted Nock for Carbon - 1pk

(Required for Havoc and Brotherhood)

Interchangeable Recoil Pads

Eliminate all excuses with Horton's selection of recoil pads that allow serious shooters complete customization for unbeatable comfort and superior results. Horton's recoil pads allow shooters of all ages to custom fit their proper Length of Pull (LOP) for the maximum control of butt stock placement. Built for all weather conditions, Horton's recoil pads feature over molded "soft-touch" comb design that also ensure maximum control of butt stock placement against the shoulder while also protecting the stock during handling and storage. The "tool-free" assembly makes it even easier for you to get the job done and fill the freezer quicker this fall.

- Custom fit Length of Pull (LOP) from 13"-14"
- Over molded "soft-touch" comb design
- Maximum control of butt stock placement

- Protects stock during handling and storage
- Built for all weather conditions
- Easy "tool-free" installation

At Horton, we pride ourselves on not just our industry-leading bows and technologies, but also on our commitment to ensuring our customers' safety and satisfaction. Every bow that leaves our plant is proudly engineered with the utmost precision at our Ohio factory, and that same pride and attention to detail is found in the way we treat our customers. Each customer is a valued member of the Horton family, and we work hard to deliver professional, courteous, prompt customer service.

Ensuring your safety and enjoyment with your Horton bow is our number one goal as it has been for the last 50 years, and it always will be. Whether you have a warranty, bow setup or tuning question, or need help with any other issue, our dedicated customer service team is ready to help.

Thank you for choosing Horton. Please don't hesitate to contact us or visit us on the Web if you have any questions or comments. We look forward to hearing from you.
