collection  
2009

# hello.

**Dear BODUM® friends,**

**Welcome to a whole new year of BODUM®. For 2009, we've developed a colorful range of new products in a variety of new shades just for you. Best of all, the original philosophy that has made us successful since 1944 remains unchanged: Design follows function at BODUM® – that's the simple beauty all our products embody.**

**For over fifty years we've never stopped finding new ways to improve our coffee presses even further – browse through the following pages and see that tradition continues today. You'll find novelties like the first transparent double wall ice bucket which keeps your ice icy for a lot longer. Then there is the first double wall cooler jug to keep your favorite wines, juices and ice teas as cold as you like. To spice things up, we've added a whole new range of salt and pepper grinders – you turn them over and they start their magic on their own. How's that for easy to use? Speaking of easy to use, wait until you see our first kettle that lets you choose between five different temperatures; the perfect one for each of your favorite teas.**

**You will find many more novelties on the following pages – all of them in a rainbow of fresh colors to brighten your day. We at BODUM® love being part of making your house a home, where family and friends gather for the nice little ceremonies that show you care.**

**Yours,**

waste.**

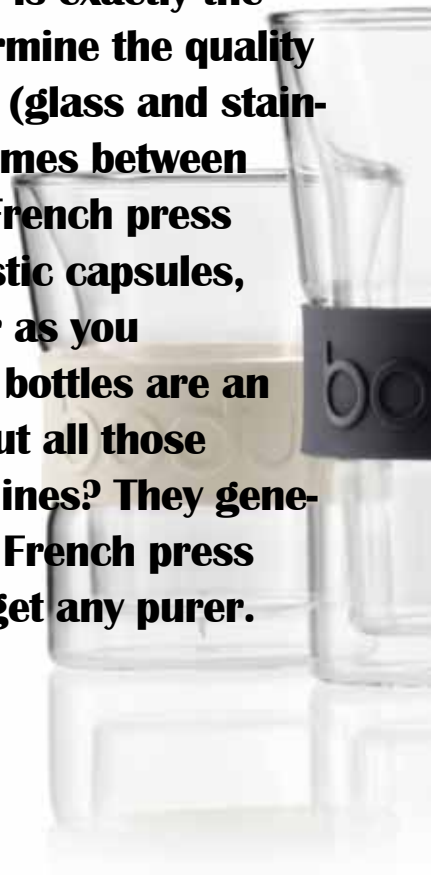

**the  
BODUM®  
way to  
brew coffee.**

# coffee.

Now more than ever the BODUM<sup>®</sup> French press system is THE way of brewing coffee. In fact, it's official: Slate magazine and bon appétit say the French press is the **greenest** way to an excellent cup of coffee. It's pure and simple- which is exactly the reason why coffee tasters use this method to determine the quality of coffee beans. The materials of the French press (glass and stainless steel) are completely taste -free so nothing comes between your ground coffee beans and the hot water. The French press literally generates no waste at all: no metal or plastic capsules, no paper, no nothing. You only boil as much water as you need – and there you go. We all know plastic water bottles are an environmental problem, but have you thought about all those metal or plastic capsules left by other coffee machines? They generate more waste than espresso. With the BODUM<sup>®</sup> French press it's just glass, water and coffee – brewing doesn't get any purer.

**coffee,  
water,  
press,  
enjoy.**

# tea.

**Tea brewing doesn't get any purer than with the BODUM® tea presses. This unique system makes sure your tea is brewed precisely to your desired strength and aroma. We developed the tea press with the English Tea Council over 30 years ago and we've been perfecting it ever since. Most of the BODUM® tea presses are made of borosilicate glass which doesn't stain and doesn't give off any taste. The glass allows you to watch the brewing process, bringing all the beautiful tea colors to life. Whether you love green tea, black tea or fruit teas, the BODUM® tea presses are as much a pleasure for the eye as they are for the taste buds.**

**tea,

# bottle your own

**Tap water is a whole lot better than its reputation in fact most of our tap water is better than what we carry home from the store in plastic bottles. And then there is the question of aesthetics; isn't a jug of ice cold lemon water a pleasure for both eyes and taste buds? You can infuse your water with a variety of fruit and herbs. Tap water infusion is pure simplicity – an idea we stand for at BODUM®.**

...

# table top

**When we introduced the BODUM® double wall glasses five years ago, they became an instant sensation. In the years since, and many international design awards later, we haven't stopped taking the double wall concept to a new level. Unfortunately there are many copy cats who, sensing the huge potential of our double wall glasses, have tried the same – without meeting our quality standards of course. For 2009 we've expanded our double wall glass line quite a bit for you. We're pleased to introduce tea pots, water carafes, ice buckets, cooler jugs and many more.**

A stack of four double-walled glass mugs, each containing a different shade of tea. The top mug is filled with a light yellow tea, the second with a golden yellow, the third with a darker amber, and the bottom with a deep red. The mugs are stacked on top of each other, with the top mug being the smallest and the bottom being the largest. The text 'thermos glasses.' is overlaid in a large, bold, black font across the middle of the stack.

# Kitchen

**The kitchen is the heart of any home. It's where the paths of all family members cross, even when everybody is too busy for a sit-down dinner. With friends over, it's the place for chatter and confessions alike—before and after dinner. There is nothing like watching the chef of the house add his or her finishing touches to the delights to come while you work up an appetite. This year's BODUM® kitchenware collection is all about fun and ease-of-use. Many of our new designs are available in all shades of the rainbow. Does it get any easier than just tilting our new salt and pepper grinders to get them to do their job?**

**At the very top of most of our to -do lists: Get organized. We at BODUM® want to help you cross that off your list and have some fun while you're at it. Our new neoprene boxes work all over the house – from the kitchen where they store bread and fruit and snacks, to the bathroom where they hold manicure sets and makeup utensils, to the bedroom where they keep straying socks, belt buckles and cufflinks in their place, to the kid's room where they hold crayons or serve as a garage for toy cars. Whatever you need to get organized, we've got the right box for you. Something else you might want to box: your old excuses for not getting organized.**
