

B-Mobile™

Adding a strutting tom decoy to your set up, can really help you bring those birds in closer. The one to have is B-Mobil, made by [Primos](#) Hunting Calls. Its super realistic look fools 'em. The ability to add your own real tail feathers is great!

PRIMOS
HUNTING CALLS™

SPEAK THE LANGUAGE®

Dark Horse™

Second on the list, is a Double Bull Blind from [Primos](#) once again. Its quick to set up and totally conceals you inside. A ground blind is perfect set up over a food source in the afternoons, when the toms have stopped gobbling.

Ol' Tom Dura-Lite™ Essentials Vest

I like this vest I found at [Cabela's](#) most because of its low profile. I do a lot of hiking on my hunts so a vest that doesn't slow me down is a must! Also the position of the pockets make it easy to grab the right call when trying to stay stealth.

Nikon Introduces New TurkeyPro with BTR

This is the new turkey specific scope featuring a removable ARD (anti-reflective device). You might not even know how many times you've been busted by your own scope.

Hoot Enhancer Owl Call

Owl calls are great shock gobble calls. They work on every species and are just fun to use. They sound beautiful compared to a crow call.

Longbeard Madness 15

I love The style of the Drury videos. This dvd is packed with 40 hunts across 11 states. I even learn stuff.

GEAR UP

For Turkeys

Favorite gear for Turkey Season 2010
