# OUR FLASHLIGHTS WORK.

## Hey, buddy. Check out these flashlights!

TerraLUX LED flashlights and work lights are durable, reliable and bright. Really bright. We design every product to handle the abuse of professional duty and with features that definitely enhance their “cool factor”. From aircraft grade aluminum casings, a lifetime warranty, and lightweight ergonomic flashlight designs, to the anti-roll handles, rechargeable power packs and even car chargers for our work lights, you won’t be able to resist showing off your new TerraLUX light.

**TerraLUX portable LED  
lights aren't just cool,  
they're built to get the job  
done. Just like you,  
our lights work.**

## The Last Flashlight You'll Ever Need.

The TerraLUX InfiniStar LED flashlight is the latest innovation from TerraLUX Portable. It doesn't come with useless "bells and whistles". It's jam packed with practical features that make it a powerhouse unit for any professional or hard core do-it-yourselfer. Plus, its completely modular design means it will be upgradeable with future technology, so you're not buying a new flashlight every year.

Long battery life will keep you going on a long shift without the worry of a dead flashlight. Our DR Model features an Li-Ion Battery, and our CR is equipped with a 3.6V Ni-MH. Both models are rechargeable.

Rubberized non-slip grip is perfect when you're wearing gloves or if you need to hold the light under your arm while using both hands.

Charge port for the long-life battery is protected from the elements when not in use.

High lumen modular LED head is fully upgradeable so you can keep your flashlight when new technologies and head options are available.

# TerraLUX LED Flashlight Features

## Demand the Best, and You Shall Receive

Our flashlights and work lights are stuffed with state-of-the-art LED technology. Technology like smart circuitry, high output LEDs and aircraft grade aluminum are all standard on our lights to do the only thing that matters: work every time you push the button.

### Aircraft Grade Aluminum

Our aircraft grade aluminum housings are built to last - standing up to the abuse and everyday wear and tear that comes from your working environment.

### Smart Battery Choices

TerraLUX knows when you're in the field, you can't always get to a specialty shop when your batteries run low. So, our flashlights work with AA and AAA alkaline batteries you can find at any corner store\*.

### Weather Resistance

Dust, dirt and moisture won't keep these flashlights from providing a bright, white light when you need it. These flashlights are designed to weather any storm.

### Lifelong LEDs

Because TerraLUX uses top-shelf LED chips, they don't break and burn out like incandescent or halogen bulbs. In fact, you'll NEVER have to replace one.

## Specialty Features

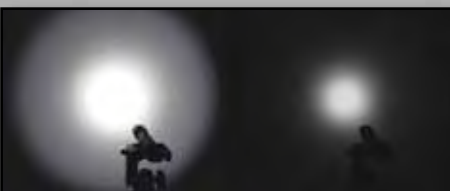

### High CRI

TerraLUX uses the best LED light sources. That means when you need true color representation, there's a high CRI (color rendering index) light available from TerraLUX. Available in LightStar 80 and LightStar TruColor.

### Bite Grip

Sometimes you just need both hands to finish the job. Choose a TerraLUX LED flashlight with a bite grip so you can operate "hands-free" without chipping a tooth. Available in LightStar 80.

### Multi Mode

Certain TerraLUX models come with three operating modes: high intensity, low intensity and strobe.

\* non-rechargeable models

# TerraLUX LED Conversion Kit Features

## Even if You Didn't Buy a TerraLUX Flashlight, Convert Your Existing One

TerraLUX has conversion kits and upgrades for popular flashlight brands. We also have a universal upgrade for many battery powered lights and appliances. Turn your incandescent or halogen lamp into a searchlight-bright LED flashlight. Get longer run-time and never replace another bulb.

### More Durable

LED bulbs won't burn out and break like incandescent bulbs. Our LED conversion kits are inherently shock resistant.

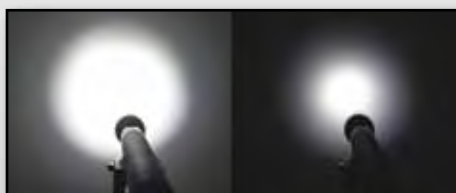

### Higher Output

TerraLUX conversion kits are really bright. LED technology provides a brighter, more uniform, white light beam compared to the dull and yellow light from other bulbs.

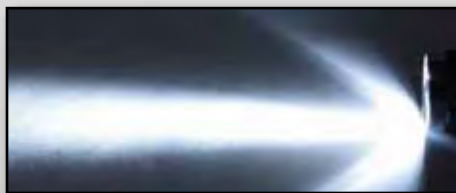

### Longer Runtime

LEDs don't need as much power as incandescent or halogen bulbs. So your TerraLUX flashlight will last noticeably longer before needing fresh batteries.

### Multi-Mode Upgrades

Get more from your industrial strength incandescent flashlight. Convert your single mode incandescent flashlight to a dual mode LED light and enjoy the benefits of LED technology without purchasing a new flashlight.

### Precision Optics

Beam intensity and spread can be important for your situation. Whether you need a flashlight with an intense center beam or softer, wider spread, TerraLUX has the flashlight or LED conversion kit to suit your needs.

### Magnetic Mount

For those times you wish your work light was within arm's reach instead of buried at the bottom of your toolbox, TerraLUX created this simple magnetic work light mount so you can reach your light when you need it.

# WHO RELIES ON TERRALUX?

## Those Who Protect

Officers need to make quick decisions based upon what they can see, and with one quick click on the back of a TerraLUX flashlight, there is plenty of illumination to assess any situation. A flashlight that gets used every shift always needs to work. Every time officers power up one of our flashlights, they see the entire scene clearly, so they can leave the scene safely.

## Those Who Work

Working in the shop or on the road is unpredictable, and technicians shouldn't need to wrestle with a work light to get a job done. Whether it's a rat's nest of cabling, following a refrigeration line, peering down a ventilation shaft, retiming an engine ignition, or simply hunting for the right tool in your van, you need a reliable flashlight or work light to light the way.

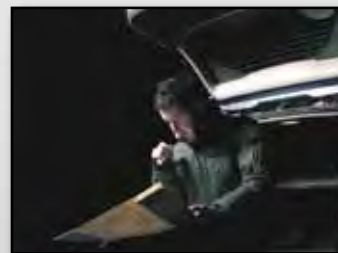

## Those Who Sacrifice

TerraLUX puts searchlight power in the palm of your hand. These flashlights are engineered to be bright and tough enough to handle any tactical situation. When you need a light bright enough to disorient a target on the receiving end, strobe for building sweeps, or simply light your way through hostile territory, a TerraLUX flashlight is a perfect addition to any weapon.

## Those Like You

This isn't some cheap plastic kitchen junk drawer flashlight. TerraLUX LED flashlights are made from aircraft grade aluminum and shine a bright white beam, even if the weather is cold and the batteries are running low. TerraLUX makes the flashlights that everyone wants to own.

## TerraLUX Green Statement

TerraLUX is committed to green technology. LEDs use less power and will not need replacement during their lifetime. That keeps our bulbs out of landfills while operating at a higher energy efficiency. We also don't use any harmful plastics in our flashlight shells. TerraLUX flashlights are greener, cleaner and considerate of the environment.
