## Pure Acoustics Noble II-F Tower Speaker Pair

- 3-way speakers designed for home theater and music
- Oil-cooled 1" silk dome tweeter w/ neodymium magnet delivers pin-drop clarity
- 5-1/4" carbon fiber midrange is accurate yet musical
- Dual 5-1/4" poly-injected woofers engineered for high bass output

Featuring soft dome tweeter technology unique to Pure Acoustics, a 5-1/4" carbon-fiberglass midrange, and dual 5-1/4" poly cone woofers, the Noble II-F front speakers deliver exceptional fidelity despite their relatively small overall size. Sound quality is enhanced by the speaker's sleek form factor, expertly engineered passive crossover, stylish yet practical metal spikes, and bass-enhancing front bass reflex ports. Sold in pairs.

**Specifications:** • Power handling: 185 watts RMS, 300 watts peak • Frequency response: 48-20,000 Hz • Sensitivity: 92 dB @ 1W/1m (±3 dB) • Impedance: 4/8 ohms • Dimensions: 43" H x 9.5" W x 8.3" D.

#303-512 ..... \$1,499.00<sub>LIST</sub> **\$649<sup>87</sup>** PAIR

## Pure Acoustics Noble II-S Surround Speaker Pair

The Noble II-S is loaded with a 4" poly-injected woofer that delivers a surprising amount of low frequency punch, considering its relatively small enclosure. An oil-cooled 1" silk dome neodymium tweeter reproduces high frequencies with pin-drop clarity, for a sublime listening experience. With its cutting-edge design, inside and out, the Noble II-S will please the most discriminating listeners' eyes and ears. Flush wall mounts are included. Sold in pairs.

**Specifications:** • Power handling: 150 watts RMS, 225 watts peak • Frequency response: 60-20,000 Hz • Sensitivity: 87 dB @ 1W/1m (±3 dB) • Impedance: 4/8 ohms • Dimensions: 9.85" H x 5.7" W x 5.5" D.

#303-508 ..... \$449.00<sub>LIST</sub> **\$229<sup>87</sup>** PAIR

## Pure Acoustics Noble II-C Center Channel Speaker

This magnetically shielded speaker is a 2-way design with dual 4" poly-injected cone drivers and an oil-cooled 1" silk dome neodymium tweeter. Gold-plated terminals ensure uncompromised conductivity. The Noble II-C features a curved, high-gloss piano finish that makes it an attractive companion to all plasma television sets. Sold individually.

**Specifications:** • Power handling: 150 watts RMS, 225 watts peak • Frequency response: 60-20,000 Hz • Sensitivity: 87 dB @ 1W/1m (±3 dB) • Impedance: 4/8 ohms • Dimensions: 5.5" H x 15.75" W x 5.5" D.

#303-510 ..... \$379.00<sub>LIST</sub> **\$179<sup>87</sup>** EACH

## Dayton Audio In-Wall Subwoofers

- 8" mica cone driver
- Popular "dog-ear" mounting system
- Great low-end frequency response

**Specifications:** • Power handling: 80 watts RMS/150 watts max • Impedance: 8 ohms • Frequency response: 70-200 Hz • SPL: 88 dB 1W/1m • Dimensions: 10" H x 10" W x 4-3/8" D • Cutout size: 8-1/2" H x 8-1/2" W.

## Pure Acoustics Supernova 5-F Mini Tower Speaker

The Pure Acoustics Supernova 5-F mini-tower speaker system offers critically accurate audio reproduction combined with furniture-quality state-of-the-art cabinetry. A high technology crossover, superbly engineered drivers, and gold-plated terminals are brought together expertly to deliver impressive value and performance.

High-efficiency 6.5" woofers provide deep, strong bass, low distortion, strength, and flexibility while delivering striking audio accuracy. An oil-cooled 1" silk dome neo magnet tweeter complements the bass with smooth yet present high frequency response. The Supernova5-F's ultramodern design, internally and externally, will impress even the most discriminating listener. Sold individually.

**Specifications:** • Power handling: 220 watts RMS, 325 watts peak • Frequency response: 42-20,000 Hz • Sensitivity: 92 dB @ 1W/1m (±3 dB) • Impedance: 4/8 ohms • Dimensions: 32.75" H x 8.46" W x 12.5" D.

#303-502 ..... \$299.00<sub>LIST</sub> **\$199<sup>87</sup>** EACH

## Pure Acoustics Supernova-S Surround Speaker Pair

The Supernova-S bookshelf speakers are a perfect choice for both front and surround channels in a 5.1 home theater system. They incorporate a two-way crossover design with an oil-cooled 1" silk dome tweeter and a high efficiency 5-1/4" woofer, installed in an eye-catching black high-gloss front cabinet with modern, stylish black wood laminate sides. Sold in pairs.

**Specifications:** • Power handling: 150 watts RMS, 250 watts peak • Frequency response: 65-20,000 Hz • Sensitivity: 89 dB @ 1W/1m (±3 dB) • Impedance: 4/8 ohms • Dimensions: 12.25" H x 7" W x 8" D.

#303-504 ..... \$349.00<sub>LIST</sub> **\$169<sup>87</sup>** PAIR

## Pure Acoustics Supernova-C Center Channel Speaker

Two 5" midrange speakers flank an oil-cooled 1" silk dome tweeter, the combination of which provides superior dialogue reproduction—clearly and energetically. The Supernova-C is magnetically shielded to prevent interference when it is placed near a sensitive TV monitor. Sold individually.

**Specifications:** • Power handling: 150 watts RMS, 250 watts peak • Frequency response: 60-20,000 Hz • Sensitivity: 89 dB @ 1W/1m (±3 dB) • Impedance: 4/8 ohms • Dimensions: 6.3" H x 18.1" W x 7.9" D.

#303-506 ..... \$259.00<sub>LIST</sub> **\$129<sup>87</sup>** EACH

## Dayton Audio 5-1/4" Indoor/Outdoor Speaker Pairs

**BIC Venturi DV64 6-1/2" Tower Speaker**

- Dual shielded 6-1/2" poly/graphite woofers
- Two 6-1/2" passive radiators for bass augmentation
- 3/4" soft dome tweeter
- Gold plated speaker push terminals
- Slim tower design with a small footprint

Special

BIC DV64 towers use the same components as the DV62CLR-S center speaker, which Home Theater Magazine described as "...hands down the best-sounding center channel I've ever heard". Dual 6-1/2" poly/graphite woofers handle bass and midrange performance; a 3/4" soft dome tweeter is used to deliver silky, airy high frequencies. Dual 6-1/2" passive radiators are also included to extend bass performance to a lower level than one would expect from 6-1/2" drivers, which keep this tower speaker slim. Sold individually.

**Specifications:** • Recommended power: 10-200 watts • Frequency response: 29-21,000 Hz (±3 dB) • Sensitivity: 90 dB @ 1W/1m • Impedance: 8 ohms • Dimensions: 38" H x 8-1/2" W x 9-1/4" D.

**BIC Formula F-12 12" Subwoofer 475 Watts**

- Patented BIC "Venturi" vent eliminates port noise
- 12" injection-molded woofer with heavy duty surround
- 475 watt peak amplifier designed using BASH Technology
- Utilizes both Dolby Pro Logic & Dolby Digital/DTS inputs

Special

The BIC Formula F-12 powered subwoofer incorporates a high current 475 watts peak amplifier designed by BASH Technology in combination with a 12" injection molded long-throw woofer. A patented BIC "Venturi" vent eliminates port noise that is often heard from other subwoofers, especially when playing demanding music and videos. The F-12 also features an adjustable crossover, adjustable volume control, automatic signal sensing, high level inputs, and both Dolby Pro Logic & Dolby Digital/DTS inputs. Black laminate finish.

**Specifications:** • Power handling: 150 watts RMS/475 watts peak • Impedance: 8 ohms • Frequency response: 25-200 Hz • Sensitivity: 90 dB • Dimensions: 17" H x 14-3/4" W x 17-1/4" D.

**BIC Formula FH-6T 6-1/2" 2-Way Tower Speaker 400 Watts**

- Perfect choice for a front channel in a home theater
- 6-1/2" injection-molded woofer with heavy duty surround
- Horn loaded tweeter offers superb dynamic range
- Five year manufacturer's warranty on parts and labor

Special

For more than 50 years, midrange and high frequency horns have been the hands-down choice for movie theater sound engineers. From the softest whispers to the highest impact sound effects, horn drivers have no equal when it comes to clarity and dynamic range.

The state-of-the-art Formula FH-6T horn towers carry on the legacy of the first BIC/Formula Series introduced in 1973. They offer output capability of up to 116 dB (live rock band levels), while offering refinements that surpass all predecessors. Each speaker includes an exclusively designed mid/high frequency horn driver which delivers highs beyond audible range, and extremely accurate mid frequencies. High power 6-1/2" injection molded woofers enable powerful bass output down to 36 Hz. A superb performer at a value price!

**Specifications:** • Power handling: 175 watts RMS/400 watts peak • Impedance: 8 ohms • Frequency response: 36-23,000 Hz • Sensitivity: 96 dB • Dimensions: 39" H x 9" W x 8" D.

**BIC Formula FH6-LCR 6-1/2" 2-Way MTM Center Channel Speaker**

- Perfect choice for a highly efficient center channel
- 6-1/2" injection-molded woofer with heavy duty surround
- Horn loaded tweeter offers superb dynamic range
- Wall mounts for both vertical and horizontal mounting

Special

The BIC/Formula FH6-LCR all-channel speaker is a perfect choice for those looking for a highly efficient speaker (plays up to 116 dB - live rock band levels) at an affordable price. This speaker can be used for center, front main, rear, and surround channels of any system. The FH6-LCR includes two 6-1/2" woofers to extend bass output capability. The 6-1/4" mid/high frequency horn offers superb dynamic range, reproducing everything from whisper-soft vocals in a jazz song to the loudest explosions in an action movie. FH6-LCR includes wall mounts for both vertical and horizontal mounting.

**Specifications:** • Power handling: 175 watts • Impedance: 8 ohms • Frequency response: 40-23,000 Hz • Sensitivity: 95 dB • Dimensions: 8" H x 21-7/8" W x 6-1/8" D.

**ScreenDeck TV Accessory Shelves**

New

*A Shelf for Your TV Things!*

- An elegant and stylish storage solution for your flat screen accessories
- Easy to install—mounts on the existing VESA screw holes on most TVs
- Comes with two cable management clips to clean up wire clutter
- All mounting hardware included
- Available in versions to fit three different ranges of TV sizes

ScreenDeck™  
A shelf for your TV things.

The ScreenDeck is an easily installed top shelf for flat screen TV accessories. A ScreenDeck is handy for conveniently storing remote controls, video game sensors, smaller media players, Webcams, HT center channel speakers (5 lbs. or less), HD antennas, digital picture frames, and other small accessories that need to be kept close to your TV. The shelf attaches to most 37" or larger flat screen televisions, or any flat screen TV with VESA standard screw hole patterns and M6 or M8 threading.

**Specifications:** • Bracket length: 599.5 mm • M6 screw length: 12 mm • M8 screw length: 25 mm • Maximum recommended weight: 5 lbs. • Maximum recommended dimensions on top: not to exceed 450 mm x 128 mm • Compatible VESA hole patterns (in mm): 150 x 150, 200 x 200, 250 x 250, 300 x 300, 350 x 350, 400 x 400.

## RapidRun 42223 Digital Voltage Inserter

At times, a source device (cable box, DVD player, video game system) will not have enough power dedicated to the HDMI output. This will cause a voltage drop and the video quality is affected, or worse, there is no video at all. This voltage inserter solves the problem by isolating the power from the source device, and provides 5 VDC, 1000 mA dedicated power to assure the crisp, clean signal that is expected from high definition equipment.

## HDMI Super Slim 4x2 True Matrix with IR Extender

New

- 4 HDMI inputs, 2 HDMI outputs
- Full matrix switching; any input to either output
- IR extender and reverse path IR capability
- Slim profile only 1" H x 10-7/8" W x 6-1/8" D
- Table top or wall mountable

This super slim HDMI matrix has five inputs and two outputs. Built-in signal compensation allows the matrix to be up to 20 meters from the source and 15 meters from the display (using 24 AWG cables). Use the IR extender capability and control your source devices from the viewing location. The unique Backward-IR Channel allows you to control devices at the viewing location from the source equipment location.

**Talos 2-Camera System with 500GB Hard Drive**

- Includes cameras, power supplies and DVR
- DVR includes a ready to install 500GB hard drive
- Ethernet connection for home or Internet access
- View your cameras on your Android™ phone
- Indoor/outdoor IR cameras can see in the dark

Special

The heart of these surveillance systems is a DVR with features found previously only on high-end, high-priced professional equipment. H.264 video compression provides the maximum recording time on the hard drive while preserving the quality of the recorded video. Ethernet connection enables full system access to the DVR from any computer on your home network, and remote access over the Internet.

The intuitive on-screen user interface makes system set-up and exporting recorded video easy. Save hard disc space and make retrieving video much easier using external alarm trigger or the built-in motion detection. Record to the DVR 24/7 for up to three weeks or set the DVR to overwrite earlier video so it never needs to stop recording. Choose between two or four weatherproof IR cameras that can see in the dark up to 50 ft., camera power supplies, and a 4-channel networkable DVR. *Note: Camera cables not included.*

**Stahl Tools Variable Temperature Soldering Station**

- On/off switch with "power-on" indicator light
- Variable heat setting
- Cushioned rubber grip
- Replaceable heating element
- Quality performance at a discount price

**Special**

**Customer Favorite**

**Stahl Tools**

The Stahl Tools variable temperature soldering station is designed to exceed the expectations of a veteran technician—at a price that's appealing to the electronics hobbyist. Many different soldering tasks are accomplished using the adjustable 5 to 40 watt temperature adjustment. The lightweight pencil iron features a rubber grip that reduces fatigue and a Bakelite ringed iron holder keeps it at the ready. A field replaceable, precision ground, iron-plated solid copper tip provides maximum heat transfer—minimizing cold solder joints. Includes tip cleaning sponge.

The Cabrini Speaker Project by: Johnny Richards

## 1 Design Goals

I am known on the Parts Express Tech Talk forum as something of a miser, and when I saw that PE had started carrying a brand of drivers with an ultra-low price, my interest was piqued. I normally build designs using "buy out" drivers, due to the high "bang for the buck" ratio they represent. However, several of my designs had stirred some interest but the drivers were no longer available. Additionally, at least weekly on the Tech Talk forum there will be someone posting a question about using this or that driver and no truly cheap designs are floating around out there.

So, I proposed an "ultra budget" project using the most affordable drivers PE offers to meet the needs not only of builders looking for an established yet affordable design but to offer a way for someone to get their feet wet in the DIY world with minimal cash outlay and cabinet building skills.

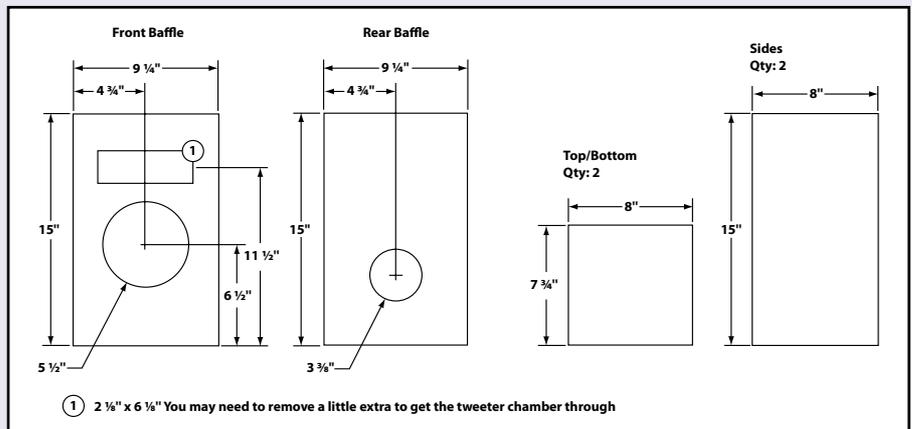

## 2 Driver Selection

With all that being said, I selected the new GRS poly cone 6.5" woofer and the Goldwood 3" x 7" piezo tweeter. Both drivers are priced at or near the bottom of their respective categories. I chose the GRS poly cone based on two criteria: Past experience with poly cone drivers, and physical appearance. The GRS drivers are really very nice looking units. The tweeter was chosen purely on cost and popularity.

## 3 Enclosure Design

The GRS woofers are a high "Q" design, which indicates that vented enclosures are pretty much out of the question. These days, vented enclosures are very common but for this project, the sealed approach is more fitting. Sealed enclosures are simpler to build, and far more tolerant of driver variation. In addition, I decided to do a basic "six sides and three holes" construction with it. There are no bevels and no chamfers; in fact the entire enclosure can be built with a Skil-saw and a jig-saw. One of my goals was to create a project targeted squarely at newcomers and the simplicity of the enclosure is a very large part of that.

The GRS woofer will work reasonably well in sealed enclosures from 0.3 to 1.5 cubic feet, making it a very versatile driver. I elected to go towards the smaller end and chose 0.4 cubic feet. This results in an F3 in the low 70's with a mild hump at 120 Hz. With approximately 1/2 pound of poly-fill, the alignment yields a Qtc of ~1.0. This is a common bass alignment in the commercial world, and is not uncommon in DIY either. I personally prefer a bass alignment with a bit of a high "Q" bump, whether it is vented or sealed.

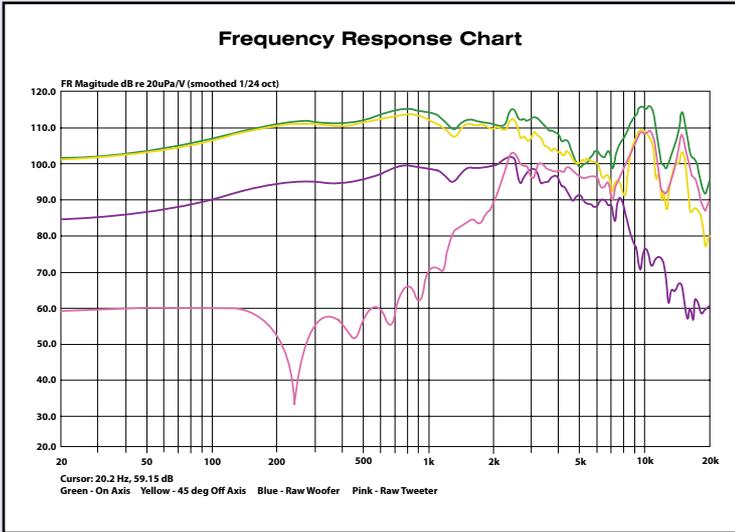

## 4 Enclosure Construction

After cutting the six panels, glue and clamp (or screw) them together following the included drawing. The prints include the correct cutout dimensions for the woofer, tweeter and terminal cup. Before installing the woofer, stuff the enclosure with the 1/2 pound of poly-fill and it is done. This is really an easy build.

# CABRINI

One of the most affordable speaker projects ever!

## 6 Conclusion

The GRS woofer is really not bad, with some limitations. For many builders, the lack of an extended bass response can be a deal breaker. I operated under the assumption that most people dipping their feet into the DIY pool have already built a powered subwoofer (or have plans to do so). Powered subwoofers are a very common first build and this design requires assistance on the bottom end. With the addition of a subwoofer, Cabrini becomes an acceptable listening experience for a very minimal cash outlay. Easy to build, versatility in bass alignment, and plenty of room for several in-situ upgrades – adding round-overs on the baffle, flush mounting the drivers and bracing the cabinet will all make noticeable improvements in sound quality (especially in the midrange), all for little to no added cost in terms of dollars. If the builder chooses to go on the smaller end of things (the 0.3 cubic feet area), this project can also be adapted to sit on top of a “bass bin”, using the GRS 12” poly cone woofers. In the future, I will provide plans for that integration.

## 5 Crossover Design

This is where I started paying close attention to a lot of things in order to decide which compromises to make. Given the goal of creating a cost effective and easy to build project I decided to attempt a minimalist crossover. My in-box measurements show the GRS woofer to live up to its advertising of having a minimal breakup while the Goldwood piezo has a very ragged response that is challenging to work with. The first step I took was to throw an 8 ohm resistor across the terminals of the piezo tweeter to try and normalize the impedance. I played with several iterations of the crossover and finally settled on a version with very little baffle step. These are not stand mounted speakers by any means – they are meant to be placed near a boundary such as sitting on a bookshelf. The crossover consists of five components, three of them resistors. The piezo has an L-pad, and the woofer has a series inductor with zobel. Crossover point is approximately 2800 Hz using 3rd order Butterworth slopes. I used the cheapest components available – 5% sandcast resistors, 20 AWG coil and an NPE capacitor.

Response is not exactly smooth, but peaks are more or less balanced out with dips, and it is relatively smooth throughout the midrange and into the lower treble. This is an 8 ohm speaker, and most amps will not have a problem with it.

### Parts List

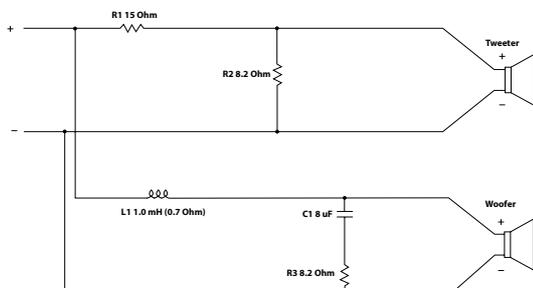

Goldwood 3" x 7" Wide Dispersion Piezo Horn

GRS 6-1/2" Poly Cone Rubber Surround Woofer

Part #	Description	Qty
280-062	Goldwood 3" x 7" Wide Dispersion Piezo Horn	2
292-426	GRS 6-1/2" Poly Cone Rubber Surround Woofer	2
269-960	Speaker Input Terminal Round Spring-Type	2
255-048	Jantzen 1.0mH 20 AWG Air Core Inductor	2
016-15	15 Ohm 10W Resistor Wire Wound 5% Tolerance	2
016-8.2	8.2 Ohm 10W Resistor Wire Wound 5% Tolerance	2
027-338	8.0uF 100V Non-Polarized Capacitor	2

### Crossover Schematic

R1 10 Watt Sand Cast  
R2 10 Watt Sand Cast  
R3 10 Watt Sand Cast

L1 Jantzen 20 AWG Air Core  
C1 Bencic 100V NPE

### About the Designer

Johnny Richards is an avid supporter of DIY for the sake of DIY and is an active member of the PE Tech Talk forum. He has been designing and building speakers for over a decade. Johnny lives and works in Sioux Falls, SD, as an engineering tech at a large electronics manufacturing firm. He is married with one child, two dogs, a turtle and a guinea pig. When he isn't tinkering with speakers, he can be found writing, reading, running, listening to music and watching movies.

## Goldwood 3" x 7" Wide Dispersion Piezo Horn Mid/Tweeter

Special

**Specifications:** • Power handling: 60 watts RMS/75 watts max • Frequency response: 1,800-30,000 Hz • SPL: 90 dB • Mfg. #GT-1025 • Dimensions: A: 7-1/4", B: 3-1/10", C: 4".

Regularly \$2<sup>59</sup> **\$2<sup>00</sup>** EACH

#280-062

## GRS Poly 6-1/2" Woofer with Butyl Rubber Surround

Special

• Polypropylene cone for perfect balance of stiffness, mass, and self-damping  
• Butyl rubber surround ensures high excursion and long term durability  
• Stamped steel frame keeps components in perfect alignment  
• Optimized motor features high-energy ceramic ferrite magnet, vented pole piece

**Specifications:** • Power handling: 60 watts RMS/85 watts max • VC<sub>DIA</sub>: 1-1/2" • L<sub>e</sub>: 1.11 mH • Impedance: 8 ohms • Re: 7.55 • Frequency range: 60-8,000 Hz • Fs: 75 Hz • SPL: 85 dB 1W/1m • Vas: 0.24 cu. ft. • Q<sub>ms</sub>: 4.32 • Q<sub>es</sub>: 1.34 • Q<sub>ts</sub>: 1.02 • X<sub>max</sub>: 3 mm • Dimensions: A: 6-1/2", B: 5-5/8", C: 3-1/16".

Regularly \$7<sup>77</sup> **\$8<sup>63</sup>** EACH

#292-426

## Dayton Audio SA1000 Subwoofer Amplifier

• High-power mono subwoofer amplifier  
• Low frequency parametric EQ allows boosting or cutting to custom-tailor response  
• Switchable subsonic and bass boost filters  
• High-pass output for looping signal back into distributed audio systems  
• Adjustable phase, gain, and crossover

**Specifications:** • Rated power output: (0.92% THD) 497 watts into 8 ohms, 950 watts into 4 ohms • Signal to noise ratio: 98 dB A-weighted • Subsonic filter: -3 dB @ 18 Hz, Q=0.8 • Bass boost: +3 dB @ 25 Hz, Q=1.4 • High pass output: -3 dB @ 80 Hz, 12 dB per octave • Low pass adjustment: 30 Hz-200 Hz • Dimensions: 17-1/2" W x 4" H x 13" D (rack ears uninstalled) • Power requirements: 120/230 VAC (switchable), 50/60 Hz • Power output rating based on one-third power duty cycle.

Special

## Dayton Audio SA25 Subwoofer Amplifier

• Line-level and speaker-level inputs  
• Auto-on circuit  
• Variable 2nd order low-pass crossover  
• 25 watts RMS  
• Class AB output

Special

**Specifications:** • 25 watts RMS into 4 ohms @ 0.2% THD • Signal to noise ratio: 90 dB (A-weighted) • Dimensions: 6-1/4" W x 6-1/4" H x 2-1/2" D • Enclosure cutout: 5-1/4" W x 5-1/4" H.

Regularly \$41<sup>87</sup> **\$34<sup>00</sup>** EACH

#300-782

## BASH® Go Ahead, BASH Your Subwoofer!

Special

• High power output in a compact, lightweight design  
• Speaker and line level inputs for connection to any stereo  
• Limiting circuit prevents audible clipping and protects woofers  
• Auto On/Off and phase reversal

**Common features:** • 50 to 150 Hz low-pass crossover • 0° or 180° phase • Line level inputs • Speaker level inputs • Master on/off switch • Auto on.

**300S specifications:** • 300 watts RMS @ 0.5% THD into 4 ohm load • LFE input • Signal to noise ratio: 105 dB A-weighted • Dimensions: 11" W x 7" H x 3-1/2" D.

**500S specifications:** • 500 watts RMS @ 0.5% THD into 4 ohm load • Line outputs • Signal to noise ratio: 105 dB A-weighted • Dimensions: 12" W x 8" H x 3-1/2" D.

## Dayton Audio RS1200 Reference Series 12" Subwoofer System Kit

Special

*Do-it-yourself and get more bass for less money!*

• One-hour kit—easy to assemble  
• High quality subwoofer system for music or home theater  
• Dayton Audio Reference Series legendary ultra-low-distortion subwoofer  
• Adjustable volume, crossover frequency, bandwidth and more  
• Clean, detailed bass down to 25 Hz  
• Performance that rivals popular systems costing much, much more

This system is built around the popular and powerful 12" RSS315HF-4 subwoofer, combined with the Dayton Audio HPSA500 subwoofer amplifier—one of the most technologically advanced sub amps available.

**Specifications:** • 12" subwoofer • 500 watt amplifier • Frequency range: 25 - 180 Hz • Adjustable 40 - 180 Hz low-pass filter • LFE and line-level inputs • Auto-on • Dimensions: 17" H x 17" W x 17-1/4" D.

Get assembled crossovers for less than the price of components!

**Special**

**100 Watt High Pass Filters**

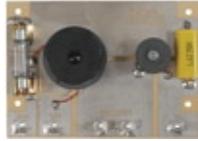

This crossover is ideal for use in small 2-way surround sound speakers. There is no low pass filter section, so the woofer will reproduce its full bandwidth. A 12 dB per octave high pass filter with your choice of either a 3,000 Hz or 5,000 Hz crossover point. Dimensions: 3-1/2" W x 2-3/4" D x 1" H.

#260-174 (3,000 Hz) Regularly \$7<sup>00</sup>  
 #260-175 (5,000 Hz) ..... \$12.99 LIST \$9<sup>69</sup> EACH

**2-Way 150 Watt Crossover**

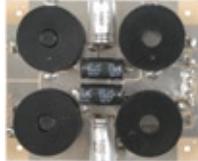

This crossover is ideally suited for satellite applications. The low pass section rolls off 6 dB at 5,000 Hz. The high pass section has a 12 dB per octave slope to prevent potentially damaging low frequencies below 4,500 Hz from reaching the tweeter. All crossover frequencies are rated into an 8 ohm load. Dimensions: 4-7/8" W x 3-1/2" D x 1-1/2" H. Replacement tweeter protector #260-231.

#260-198 ..... \$19.99 LIST Regularly \$15<sup>25</sup> \$10<sup>00</sup> EACH

**3-Way 100 Watt Crossover**

3-way crossover for speaker designed to handle 100 watts RMS program power. Crossover frequencies of 800 Hz and 5,000 Hz with 12 dB per octave roll-off into an 8 ohm load. Dimensions: 4-3/4" W x 4" D x 1-1/8" H.

#260-210 ..... \$24.99 LIST Regularly \$18<sup>50</sup> \$12<sup>00</sup> EACH

**3-Way 200 Watt Crossover**

This network is an excellent choice for high power 3-way systems. The woofer section rolls off 6 dB at 800 Hz while the tweeter section uses a 12 dB per octave roll off at 4,500 Hz. The midrange section uses a true band pass filter with a response of 750-5,000 Hz. 12 dB per octave roll off. All crossover frequencies are rated into an 8 ohm load. Dimensions: 7" W x 4" D x 1-1/2" H. Replacement tweeter protector #260-231.

#260-230 ..... \$49.99 LIST Regularly \$36<sup>70</sup> \$26<sup>00</sup> EACH

**Flared Port Tubes**

These high-quality port tubes feature a large external flare for reduced port turbulence and enhanced aesthetic appeal. The extra-long lengths are perfect for tuning small high-performance bookshelf or standmount speakers. Ports are a press-fit style and can be trimmed to length if needed.

## Dayton Audio WT3 Woofer Tester

*No other loudspeaker impedance tester is as fast, versatile, or as easy to use!*

### New Advanced Features:

- Exclusive Patent Pending technique for detecting "Rub and Buzz"
- Adjustable Z<sub>max</sub> and resonance (Fs) tolerance for screening incoming drivers
- Production test mode tests drivers quickly in continuous sequence
- Straightforward, easy-to-read "Pass or Fail" indication
- Overlay, compare, and save up to 20 impedance measurements at a time
- Create custom inspection reports—complete with notes
- Measures inductors, resistors and capacitors
- Hardware includes compact USB interface, attached USB cable, and alligator clip leads

Dayton Audio's WT3 just got better—the same great features as before, but now perfect for incoming or end-of-line QC inspections! DIY speaker builders will also find the new capabilities useful when comparing multiple drivers for line array type systems. Try a WT3 and build better speaker systems!

**Dayton Audio IB385-8 15" Infinite Baffle Subwoofer**

- Long excursion design
- Heavy gauge stamped steel frame
- Rigid Kevlar impregnated paper cone
- Treated foam surround
- Bumped back plate

An IB subwoofer uses the wall between a listening room and an attic, basement, or garage to separate the front and rear sound waves (instead of using a traditional "box".)

**Specifications:** • Power handling: 350 watts RMS/600 watts max • VC<sub>DIA</sub>: 2" • Le: 3.08 mH • Impedance: 8 ohms • Re: 5.2 ohms • Frequency range: 20-500 Hz • Magnet weight: 90 oz. • Fs: 20.8 Hz • SPL: 88.2 dB 1W/1m • V<sub>AS</sub>: 8.79 cu. ft. • Q<sub>MS</sub>: 8.92 • Q<sub>ES</sub>: 0.63 • Q<sub>TS</sub>: 0.59 • X<sub>MAX</sub>: 14.3 mm • Dimensions: A: 15-1/8", B: 13-7/8", C: 7-3/8".

**HiVi SP10 10" Subwoofer**

- 10" flat cone
- 15.5 mm Xmax
- A true heavyweight at 28 lbs.
- Aluminum cast frame
- Full-roll neoprene surround
- Great car audio subwoofer

The SP10 is one of the most massive 10" subwoofers available today. Weighing in at over 28 lbs., it is a true heavyweight. The SP10 has been optimized for accurate low frequency reproduction in a small sealed enclosure of only 0.8 cu. ft. producing an f3 around 45 Hz.

**Specifications:** • Power handling: 500 watts RMS/700 watts max • VC<sub>DIA</sub>: 3" • Le: 1.35 mH • Impedance: 4 ohms • Re: 3.4 ohms • Frequency range: 35-150 Hz • Fs: 34 Hz • SPL: 84 dB 2.83V/1m • V<sub>AS</sub>: 0.60 cu. ft. • Q<sub>MS</sub>: 4.83 • Q<sub>ES</sub>: 0.65 • Q<sub>TS</sub>: 0.57 • X<sub>MAX</sub>: 15.5 mm • Dimensions: A: 10-1/4", B: 9-1/4", C: 5-11/16".

**Pyramid 100 Watt Rackmount PA Amplifier**

With quality features such as a frequency response up to 60-25,000 Hz, less than 0.05% THD, and adjustable feedback notch filter, this amp really competes with higher-priced models. Four microphone inputs (1/4"/XLR) with separate level controls (Mic 4 can be switched for a Phono input), separate CD/Aux input and a unique Mix Bus connection for stacking 2 of these units in line to expand your system as needed. Spring loaded speaker terminals are provided with 4, 8, and 16 ohm outputs, plus a 70 volt line output. Dimensions: 4-1/4" H x 19" W x 12" D.

**Pro-Wire ISF-147 Insu-Flate Ceiling Speaker Protector**

- Protect your ceiling speakers from blown-in insulation
- Universal size
- Quick and easy to install

**Pro-WIRE**

Most ceiling speakers feature open-back construction and are installed before the insulation is blown in. Pro-Wire's Insu-Flate solves that problem. This low cost speaker protector will prevent insulation from entering into the ceiling speaker's voice coil and causing destruction or very poor performance. With an overall diameter of 15", the Insu-Flate will fit almost every ceiling speaker on the market. Sold individually.
