ò Made in Italy

### My Personal Review:

As far as I know, this is the best and most durable hair dryer made. It is simply wonderful and most definitely professional quality. My daughter is a stylist in West Hollywood and wouldn't use anything else. The cord is very long which is a great bonus. It also comes with various styling attachments. It is very powerful, quiet and makes your hair much

smoother than other dryers. It doesn't over heat or burn out and my last one lasted at least 5 years (until one final drop on a tile floor). I'm so glad I could find the same one. It needs no improvement. The Super Solano is simply the best. You won't be disappointed.
