

Why choose Walkman

LONGER BATTERY LIFE

Sony's continual pursuit of power efficiency results in amazing battery stamina. Some models achieve up to 50 hrs battery life which is over two days of continuous listening, enough to fly around the world without recharging.

GREAT SOUND QUALITY

Sony has a music heritage with decades of experience in creating great sounding music, from artist recording right through to playback. Music just sounds better on a Walkman thanks to technologies such as Clear Bass, Clear Stereo and Dynamic Sound Enhancement Engine. Some models even come supplied with renowned Sony EX headphones making your music sound even better.

OFFLINE PLAYBACK OF MUSIC UNLIMITED

The most exciting thing to happen in the last year has been the arrival of Music Unlimited on Walkman. Access millions of songs from Music Unlimited through your computer and download playlists to compatible Walkman models for later offline playback.

Why choose XBA headphones

NOISE ISOLATION

The sealed structure of Sony Balanced Armature Headphones is designed to isolate noise and prevent sound leakage to and from your environment. So you'll be able to immerse yourself in your favourite music without disturbance.

SUPERB SOUND QUALITY

eXperience Balanced Armature (XBA) headphones to hear your music like never before. The Balanced Armature drivers can deliver the full frequency range or act as dedicated tweeters and woofers and their micro-size allows models to include 1 to 4 drivers for you to match your music taste.

MONEY BACK GUARANTEE

We are so confident that you will love your new XBA headphones that they come with a 14 day satisfaction money back guarantee.
