INCLUDES

- 1 Scooba Model 390.04
- 1 Grey Scooba Virtual Wall
- 1 Scooba power supply
- 1 Scooba APS Battery
- 4 Packets of Scooba Hard Floor Cleaner

The New iRobot® Scooba® 390 Floor Washing Robot. Simplified design. Longer battery life. Proven cleaning performance.

With a simplified design and longer battery life, the new iRobot® Scooba® 390, our premium floor washing robot, builds on the best of the Scooba product line - with not even sweeping required.

CLEANING

Using a powerful four stage cleaning process, Scooba washes your sealed hardwood, tile and linoleum floors clean, so you don't have to, removing up to 98% of common household bacteria.* No sweeping required. First, Scooba preps your floor, vacuuming up loose crumbs, sand and dirt. Next, unlike a mop, Scooba puts down only fresh solution to clean your floors. Scrubbing brushes then go to work to remove dirt, grime and spills. And finally, the squeegee vacuum picks up the dirty solution, leaving only clean behind.

COVERAGE

Scooba 390 features iAdapt™ Responsive Cleaning Technology, iRobot's advanced system of software and sensors that allows Scooba to adapt to your home and maximize cleaning performance. With iAdapt Technology, Scooba cleans every section of your room multiple times getting under and around furniture and cabinets, automatically avoiding stairs and other drop offs and following wall edges to ensure the most thorough floor coverage possible. And Scooba will clean up to 80 sq m (860 sq ft) on every battery charge, to clean more of your floor at a time.

EASY TO USE

With a more intuitive design and longer battery life, Scooba 390 is easier than ever to use and maintain. Scooba 390 uses tap water and optional Scooba Hard Floor Cleaner to wash your floors. Just fill and then at the push of a button Scooba is off and running. For ease, all parts that need to be cleaned or maintained are now coloured grey and orange. The new Scooba 390 also features Extended Life Power Management for a longer lasting battery and with Virtual Wall® Technology, Scooba will stay in the areas you want to clean and out of the ones you don't.

* When used as directed, laboratory testing results indicate removal of Escherichia coli and Staphylococcus aureus bacteria after two passes of the Scooba floor washing robot. Individual results may vary.

SCOوبا 390.04 FEATURES	
	Cleans on its own using iAdapt™ Responsive Cleaning Technology.
	Works on tile, linoleum and sealed hardwood.
	Unlike a mop, Scooba never uses dirty water to wash your floors.
	Automatically avoids stairs and other drop-offs.
	Stays in the rooms you want to clean and out of the ones you don't.
	Extended life power management leads to longer battery life.
