

# Weber 3611 Stainless-Steel Burner Tube Set

## [Perfect Rehab Of My Grill](#)

The burner tubes on any gas grill are exposed to extremely-high temperatures, spider webs, corrosion, plus salt, grease, and basting solutions. Even on a grill as rugged as a Weber, burner tubes eventually need replacement. When that happens, these genuine Weber replacement parts make the problem easy to fix. The package includes three stainless steel burner tubes, one crossover tube, and all necessary hardware for assembly. Installation is simple with the accompanying instruction sheet. The tubes fit all Genesis Silver B and C, Spirit 700 and Genesis Gold gas grills from model year 2002 to 2004.

### Features:

- \* Replacement burner tubes for Weber Genesis Silver B and C, Spirit 700 and Genesis Gold gas grills (2002 and newer models)
- \* Includes 3 stainless-steel burner tubes, 1 crossover tube, hardware, and instruction sheet
- \* Genuine Weber replacement part

I have owned a Silver Genesis B grill for 7 years now, and due to heavy use - it was getting a bit worse for wear.

This summer rather than buy a new grill - since the shell and frame of the old grill were still perfectly good - I replaced the flavorizer bars, cooking grate, the starter, and the gas tubes.

The directions are very good, and I managed to get the old, decaying gas tubes out. The older tubes came with plastic insect catchers that have been replaced by built in screens - where the tubes connect to the propane gas manifold. This is clearly pointed out in the directions.

I should be ready to cook for another 7 years on this refurbished grill.
