

WD Scorpio[®] Blue[™] SATA/PATA Hard Drives

**Load it up and
take it with you**

Massive capacity

Low power consumption

Ultra cool and quiet

With capacities up to an amazing 1 TB,
WD Scorpio Blue SATA and PATA 2.5-inch
hard drives offer high-performance and
low power use for portable digital devices
of all kinds.

PUT YOUR LIFE ON IT[®]

WD Scorpio Blue

SATA/PATA Hard Drives

Product Features

Massive capacity

Storage capacity for 2.5-inch form factor drives has arrived at a realm once thought to be impossible - up to 1 TB* - giving you all the capacity you need to keep your photos, music and files right there on your notebook.

*TPVT models are 12.5 mm high and may not be compatible with many notebook systems. Consult system specifications for maximum allowable drive height before attempting to install.

Low power consumption

State-of-the-art seeking algorithms optimize the way the drive seeks for data, which significantly improves power consumption.

Ultra cool and quiet

In a notebook drive, silence is golden. WD's exclusive WhisperDrive™ technology delivers one of the quietest 2.5-inch hard drives on the market.

Reliable

WD's SecurePark™ parks the recording heads off the disk surface during spin up, spin down, and when the drive is off. This ensures the recording head never touches the disk surface resulting in improved long term reliability due to less head wear, and improved non-operational shock tolerance.

Rugged

WD's ShockGuard™ technology protects the drive mechanics and platter surfaces from shocks.

Tested for compatibility

We perform tests on hundreds of systems and a multitude of platforms in our FIT Lab™ and Mobile Compatibility Lab to give our customers confidence that our drives will work in their systems.

Advanced Format (AF)

Technology being adopted by WD and other drive manufacturers to continue growing hard drive capacities. New drives featuring AF are optimized for operation with Windows® 7, Windows Vista® and Mac OS® X Tiger®, Leopard®, Snow Leopard®. (PVT models only)

As used for storage capacity, one megabyte (MB) = one million bytes, one gigabyte (GB) = one billion bytes, and one terabyte (TB) = one trillion bytes. Total accessible capacity varies depending on operating environment. As used for transfer rate or interface, megabyte per second (MB/s) = one million bytes per second, and gigabit per second (Gb/s) = one billion bits per second.
