

The **Samson Green Power Kempo KPE-1304 Juicer** is an impressive multi-use, **twin-gear** juicer. Since it uses 2 gears, it has a very high extraction rate. Juice pulp is always nice and dry to ensure that you are getting every drop of

"living juice"

you could ever want from your fruits and veggies. Since it runs at 160 RPMs, it can be considered a

cold-press masticating juicer

, which is the type of juicer that makes the healthiest juice possible.

Mastication

is better for you because it uses a natural process that is similar to the way that we chew food, and

cold-press

is ideal because it means juice doesn't get heated up, and therefore does not allow nutrients and enzymes to escape from your fruit. Additionally, the

Samson Green Power Kempo

is equipped with special bio-magnets in their gears that create positive ions to further preserve these essential vitamins and enzymes. So, not only do you get the benefits of a

cold-press masticating juicer

, you can rest assured that your juice shelf-life will be prolonged by the special magnetized

positive ions! The jug they provide also has the same special bio-magnet system and it

preserves juice freshness for up to 72 hours! Therefore, if you are juicing for health reasons, this is the right type of juicer for you!

Advantages of a Samson Green Power Kempo KPE-1304

The **Samson Green Power Kempo** has some particularly convenient aspects that other **masticating juicers**

do not. To begin, it is smaller and lighter than most other juicers of its kind. It measures 7.5" wide x 16" long x 11" high - a very reasonable size for a kitchen counter. Also, it is only 14 lbs (as compared with the usual 20 lbs or higher), which makes it easier to move around and store if you don't have enough counter space to leave it out. Next, it is one of the easiest juicers on

the market to clean- definitely an added bonus! Finally, it is possibly the quietest juicer on the market! with the

Samson Green Power Kempo

you don't have to worry about waking anyone up if you are juicing at night or as a wonderful morning surprise for breakfast in bed. Trust me, there's nothing worse than an appliance that wakes people up or annoys family/friends because of how loud it is when it runs! The accessories that come with this product are also very convenient. Special gears for juicing **wheatgrass**

are included with the purchase. As you can imagine, they work extremely well on wheatgrass. So, if you plan to do some

wheatgrass juicing

this is an excellent juicer for you! Another great accessory to mention are the 3 separate screens that help ensure you can juice anything without having to deal with clogging, and also have the option of controlling your pulp amount. The

Samson Green Power Kempo KPE-1304

comes with a fine screen, a coarse screen and a blank screen (for homogenizing). These 3 options truly ensure that you can juice anything you'd like. As a testament to that statement, I'd like to point out that this juicer works particularly well with soft or pulpy fruits (like citrus, kiwi or tomatoes). Several

masticating juicers

have problems with these types of fruits and can clog up but not the Kempo! Clearly, this is an excellent juicer, all around!

Summary of Reason Why You Should Choose a Samson Green Power Kempo KPE-1304

1. smaller and lighter than other masticating juicers
2. extremely quiet
3. special bio-magnets in gears and juice jug to preserve freshness for up to 72 hours
4. comes with special wheatgrass gears
5. convenience of 3 screen options means you can juice anything!
6. works particularly well with soft fruits
7. very easy to clean and set up
