

Bosch Dishwasher Model Lineup

The quietest, most efficient dishwasher line in the U.S.

BOSCH

Invented for life

What's special about German engineering is special about Bosch.

Bosch takes pride in our ability to overcome technological obstacles. We face these daunting challenges so we can produce world-class, intuitive machines that use fewer resources. And that's why we'll never be afraid of the work it takes to engineer the world's best machines.

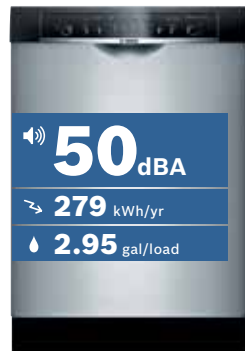

Our vision comes directly from the words of Robert Bosch, whose vision is still being lived by employees everywhere. This spirit is also embedded in all our appliances, which help our customer's lives day after day.

Bosch Dishwasher Model Lineup

From the 800 Plus series, also known as the quietest dishwasher in North America at 39 dBA, to the feature-laden Ascenta, Bosch delivers best-in-class quiet alongside advanced German engineering in its 2012 dishwasher lineup.

Quietest brand*

As the quietest line of dishwashers in the U.S.,* we've dedicated ourselves toward creating a consistently quiet washing environment for all our customers.

What's a decibel? Noise is measured in decibels (dBA). A whisper is about 30 dBA, and a normal conversation is about 60 dBA. A three-decibel increase is the noise equivalent of running two dishwashers at once**

*Bosch offers the quietest dishwashers in North America, and no major brand offers a quieter model at any Bosch price point. Price point defined by similarly priced and designed models of major brands, obtained from competitors' websites, January, 2012. **Based on noise measured as acoustic power per IEC-standards.

Anatomy of a quiet dishwasher.

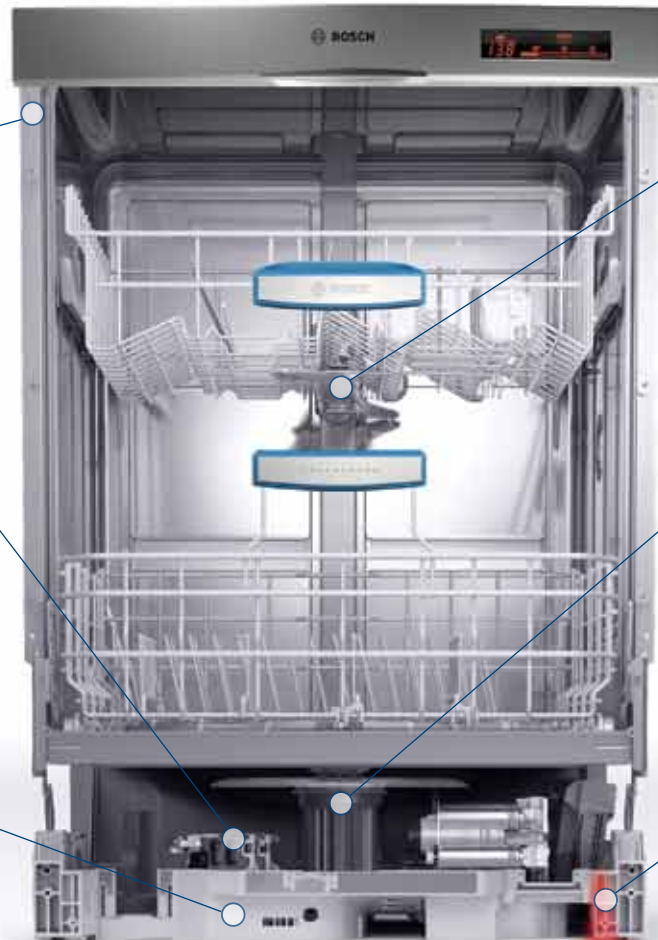

**Three level of
sound-absorbing
insulation**

**Two brushless
motors are practically
frictionless**

**Solid moulded base
absorbs sound while
minimizing vibration**

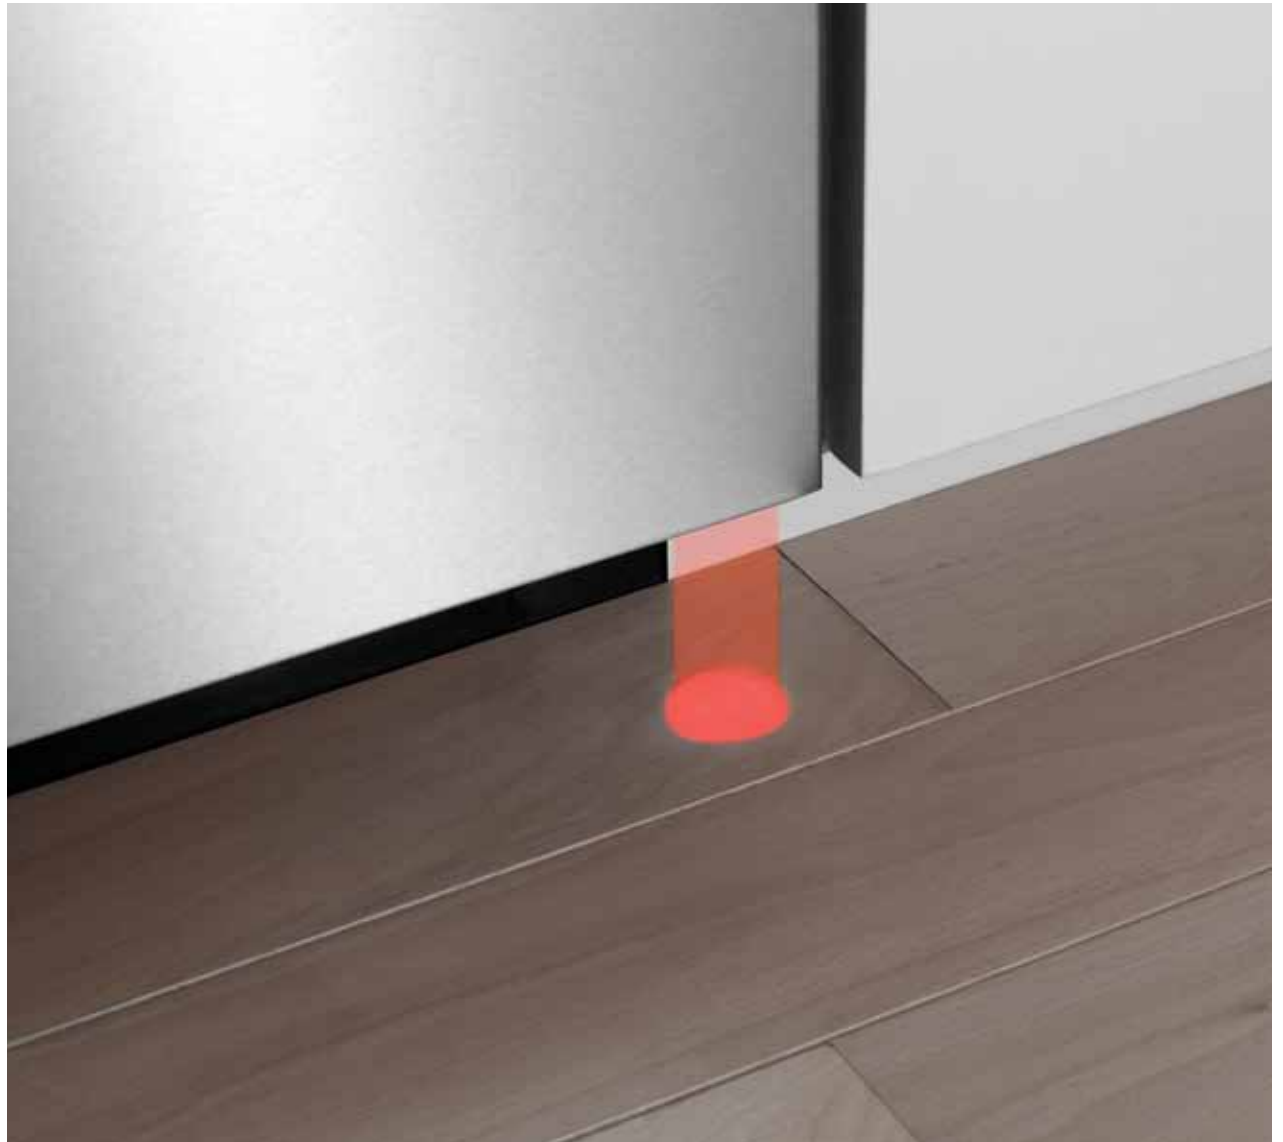

**Spray arms conduct water
towards your dishes,
not the tub, reducing noise**

InfoLight®

Your dishwasher will be so quiet, you won't know it's on. That's why there's InfoLight, a small red light projected onto the floor to indicate that your dishwasher is running.

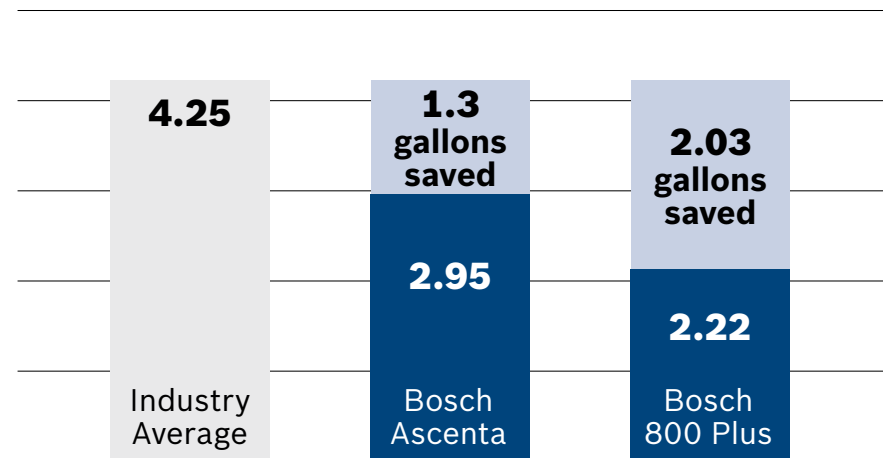

InfoLight®

Most water-efficient line of dishwashers in the U.S.*

Most water-efficient

Bosch makes water work better by using less of it, as little as 2.22 gallons per cycle. Advanced systems combine for water efficiency that can save over 2 gallons per cycle compared to the industry average,** without sacrificing cleaning performance. And we offer the most energy- and water-efficient line of dishwashers in the U.S.*

Bosch water usage vs. industry average usage, in gallons per regular wash cycle (2010, AHAM shipments).

Winning the 2011 ENERGY STAR® Award for Sustained Excellence was just the latest feather in Bosch's cap—after all, we've won two straight ENERGY STAR® Partner of the Year Awards.

*Based on the average energy and water usage of leading brands, as calculated by ENERGY STAR®, January 2012. **Class defined by similarly priced models and designs of major brands. Gallons saved figure is based on 2010 Association of Home Appliance Manufacturers (AHAM) Shipment Weighted Averages and minimum water usage of the normal cycle of the Bosch dishwasher.

Most energy-efficient line of dishwashers in the U.S.*

Most energy-efficient in the U.S.*

Bosch dishwashers exceed ENERGY STAR® requirements by 14%. And Bosch's entire lineup is certified CEE Tier 2, which makes us eligible for all rebates.

ActiveWater™

Circulate two gallons of water into the cleaning power of more than 1,300.

Flow-through water heater

Bosch dishwashers channel 100% of the water through tight coils in a confined heating chamber, which heats the water

Half Load

Perfect for washing small, lightly soiled loads, this new cycle combines the Auto Wash cycle and sensor decisions to dramatically reduce energy and water consumption.

*Based on the average energy and water usage of leading brands, as calculated by ENERGY STAR®, January 2012.

German-engineered quality

Self-latching door

The door holds at any position, and if your door is open less than 20°, the door will automatically close and latch shut.

Quality testing

All dishwashers go through 485 individual quality control tests before being shipped. Using water, the only brand to do so, we test our dishwashers through their traditional lifespan, up to 4,000 wash cycles, the equivalent of 10 years' use

Stainless steel tub

Bosch dishwashers' high-quality stainless steel construction retains heat better than plastic tubs, which helps dry dishes faster and more efficiently. They also come with a lifetime warranty against rust-through, because not all stainless steel tubs have the same quality.

Warranty

All Bosch dishwashers are backed by Good Housekeeping's two-year limited warranty for parts and labor, five years on all electronic components (parts only), five years on racks (parts only), and a lifetime warranty against rust-through on tub.*

*Certain limitations apply. See manufacturer's limited warranty for details.

Custom Panel Ready

Custom panel

Pairing a custom cabinet panel with your dishwasher amplifies your kitchen's look by giving it a minimalist, avant-garde feel. Its fully flush installation disappears into your cabinetry to make it the quietest show-off around.

Awards

#1

Ranked #1

Ranked #1 by a leading consumer publication 12 times over.

Consumers Digest Best Buy

The Ascenta SH_3AR5_UC has been selected for outstanding value based on performance, features and durability.

Good Housekeeping Seal

For more than 100 years, the Good Housekeeping Seal of Approval has been reassuring consumers that they've made the smart choice. Which is why we're proud that all Bosch dishwashers are backed by the Good Housekeeping Seal of Approval.

Energy Star Partner of the Year

Winning the 2011 ENERGY STAR® Award for Sustained Excellence was just the latest feather in Bosch's cap—after all, we've won two straight ENERGY STAR® Partner of the Year Awards.

Performance

Triple-filtration system

The triple-filtration system uses a three-step process to remove even the finest dirt particles from the washing cycle, for sparkling-clean dishes and glasses every time. And all three filter elements are self-cleaning for worry-free operation.

Variable spray pressure

Higher and lower spray pressure allows for better load customization and enhanced cleaning performance, based on the cycle that is selected.

Extra-tall item sprinkler

Hand-washing large items becomes a thing of the past, thanks to this handy innovation. Simply remove the top rack and place your serving platters, cookie sheets, hood filters and refrigerator shelves that are up to 22" high in the bottom rack.

Auto Wash

By detecting the amount of water and debris that is drained from the dishwasher each cycle, Auto Wash is able to optimize the amount of new water for following cycles, helping to maximize water and energy efficiency while maintaining top performance.

ActiveTab® system

Innovatively designed and integrated into the middle of the dishwasher, ActiveTab helps dissolve detergent tablets more efficiently and effectively.

Helpful use tips

For best drying results

With 3 simple steps Bosch dishwashers can improve drying results by up to 45%.

1. Always use liquid rinse aid
2. Use Auto Cycle
3. Press Sanitize button

Auto Wash

–Bosch's recommended cycle customizes the wash cycle in 48 different cycle paths.

Alternating washing between upper and lower racks lets Bosch use half as much water.

Convenience

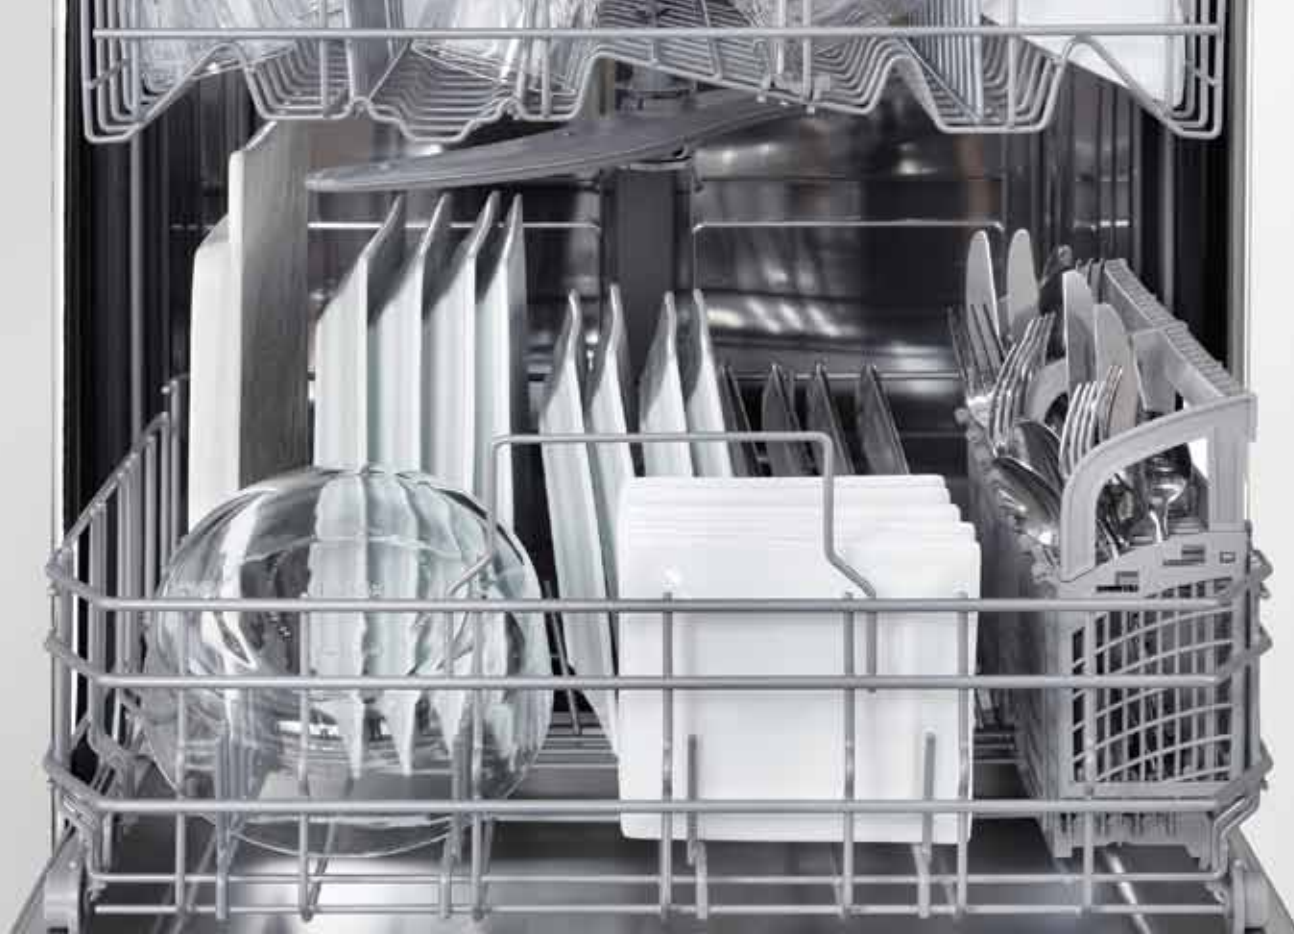

RackMatic®

The RackMatic® upper-rack height adjustment allows for easy and comfortable adjustment of racks when loaded. It has two positions to enhance loading flexibility in regard to plate sizes and height of glasses and can be adjusted even when the racks are full.

Silverware basket

The removable silverware basket can be placed anywhere in the dishwasher, adding space for other items. Plus, the Duo-Flex basket can be split into two pieces, placed side by side or back to back, for the ultimate flexibility in loading.

Capacity

Each Bosch dishwasher is designed to maximize space and flexibility. With all models able to hold up to **14-Place-Settings** in one load, you get the space you need to organize your dishes and clean them more efficiently.

Leak protection

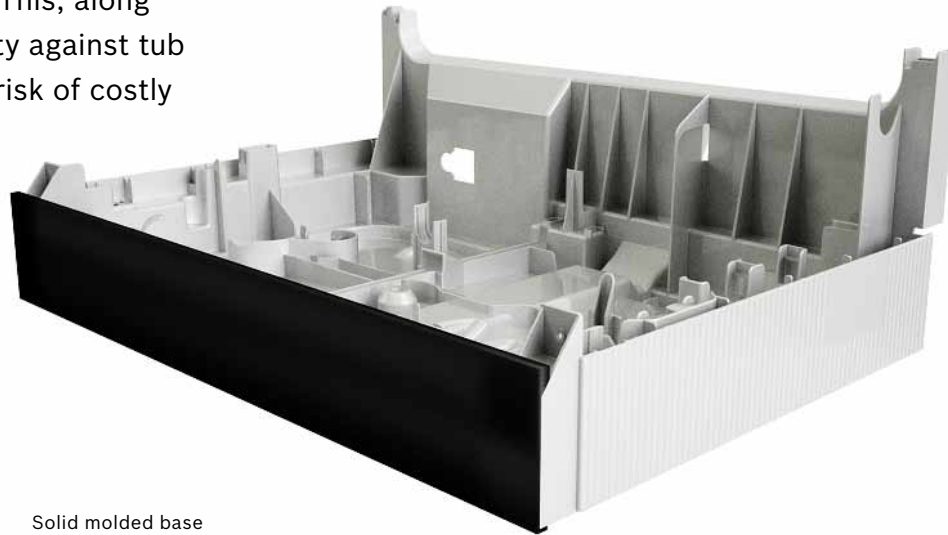

AquaStop®

Bosch is the only U.S. manufacturer to offer a high-tech leak-protection system in their dishwashers. AquaStop is a precisely engineered tub and sensor system that detects leaks in the solid molded base of the dishwasher, shuts down operation and automatically pumps out water so it cannot make contact with the floor. This, along with Bosch's lifetime warranty against tub rust through, eliminates the risk of costly water damage.

24/7 overflow protection

This Bosch Ascenta® exclusive senses leaks even when the dishwasher is turned off. In case the water level gets too high, the dishwasher pumps out the water in the tub and closes the water outlet valve.

Solid molded base

Safety

Concealed heating element

Our concealed flow-through water heater prevents plastic items on the bottom rack from melting and protects you from accidental burns during unloading.

SaniDry™ condensation drying system

There's also SaniDry condensation drying that makes drying more efficient and your dishes germ-free. By taking the air and heating it, Bosch dishwashers use superior technology to truly clean your dishes.

Sanitize option

By operating at a higher temperature, the sanitize option meets National Sanitation Foundation (NSF) standards of cleanliness, eliminating 99.9% of bacteria, and enhances your drying results as well.

Warranty

How long the warranty lasts

Bosch warrants its products are free from defects in materials and workmanship for a period of three hundred sixty five (365) days (i.e., 1 year) from the date of purchase. The foregoing timeline begins on the date of purchase, and shall not be stalled, tolled, extended, or suspended, for any reason whatsoever. Labor and shipping costs are included in this basic coverage.

Extended Limited Warranties

Bosch also provides these additional limited warranties:

Good Housekeeping 2-year Limited Warranty

For more than 100 years, the Good Housekeeping Seal of Approval has been reassuring consumers that they've made the smart choice. Which is why we're proud that all Bosch dishwashers are backed by the Good Housekeeping Seal of Approval covering parts and labor required during the second year of ownership. www.ghseal.com

5-year Limited Warranty on Electronics

Bosch will repair or replace any Bosch microprocessor or printed circuit board if it proves to be defective in materials or workmanship (excludes labor charges).

5-year Limited Warranty on Dishwasher Racks

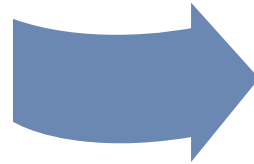

Bosch will replace the upper or lower dishwasher rack (excluding rack components), if the rack proves defective in materials or workmanship (excludes labor charges).

Lifetime Warranty against Stainless Steel Rust Through

Bosch will replace your dishwasher with the same model or a current model that is substantially equivalent or better in functionality, if the inner liner should rust through (excludes labor charges). Bosch will replace the stainless steel door if the door should rust through (excludes labor charges).

You won't hear it or see it.

Fully flush custom panel dishwashers can be used to seamlessly integrate your dishwasher into your kitchen.

Custom cabinet-ready

Match your kitchen's custom cabinetry to our dishwasher for a new level of sophistication.

Fully flush look

Bosch custom panel dishwashers are the only U.S. made dishwashers available that install fully flush for a seamless, integrated look.

Easy installation

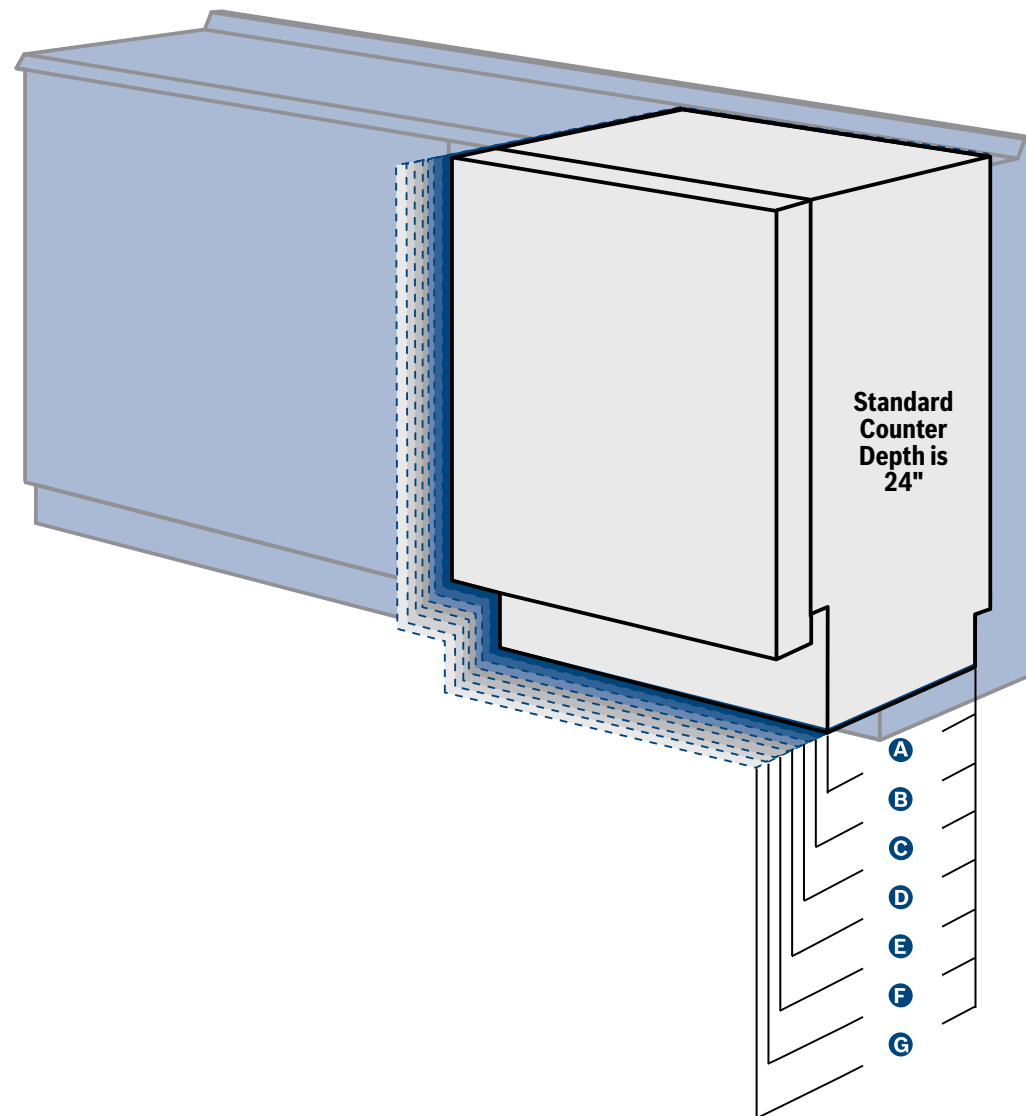

Everything needed to install your custom panel comes in the box with your dishwasher.

Damage-proof

Bosch's unique SaniDry™ condensation drying eliminates the risk of steam damage over time to custom panel wood cabinetry and countertops. The closed system heats dishes with hot water from the final rinse.

Bosch — the premier choice for custom panel.

Clean dishes. Clean lines.
A flush Bosch look.

E	24 ³ / ₄ "	KitchenAid			

*Installation dimensions considering ³/₄" custom door panel. Information from retailers website as of December 2011.

Planning for your Custom Panel Dishwasher

Before installing a Bosch dishwasher, be sure to verify the cabinet dimensions, electrical connections and water connections. Always consult the installation manual included with the product for complete details before installing.

What to consider when installing a custom panel dishwasher

The diagram shows a side view of a kitchen cabinet with a Bosch Custom Panel Dishwasher installed. Dimension A is the height of the custom panel. Dimension B is the height from the bottom edge of the countertop to the floor. Dimension C is the height of the toe-kick. The dishwasher is labeled 'Bosch Custom Panel Dishwasher' and the toe-kick is labeled 'toekick'.

A Custom panel height = **B** Height from bottom edge of countertop to floor — **C** Height of the toe-kick

Suggested dimensions for 34 ½" countertop height and 4 ½" toekick:

- Suggested panel thickness: ¾"
- Suggested panel width: 23 ¼"
- Suggested panel height: 30"
- Suggested panel weight: 9–18 lbs

Note: As all installations are different, please verify dimensions for your specific project.

Bosch dishwashers are designed to be surrounded by standard residential kitchen cabinetry. If the dishwasher is to be installed in a corner, make sure that there is adequate clearance of 27" to open the door.

For SHV43R53UC, SHV55R53UC, and SHV68R53UC

- Minimum opening height: 34" (860 mm)
- Minimum opening width: 24" (610 mm) or 23 ⅝" (600 mm) wide with decor strips removed

Planning for your Custom Panel Dishwasher

Installation options

Custom panel models allow you to have a door panel made to match your cabinetry. The door panel can be a two-piece design (model ❶) to look like a drawer at the top and a cabinet door at the bottom or a single full-length door (model ❷). A template is included with the custom panel models to explain the mounting procedure. Additional templates can be ordered by calling customer service at 1-800-944-2904.

NOTE: The door springs that are included with the custom panel units will provide proper function for custom door panels weighing between 9 and 18 pounds. SHV43R53UC, SHV55R53UC, and SHV68R53UC allow you to adjust the screw tension to accommodate for the weight of the door panel.

18" Dishwashers—a convenient, slim design.

18" dishwashers offer powerful dish cleaning convenience in spite of space constraints. Perfect for bars, butler pantries or even as a second dishwasher in the kitchen.

Large capacity in a small space

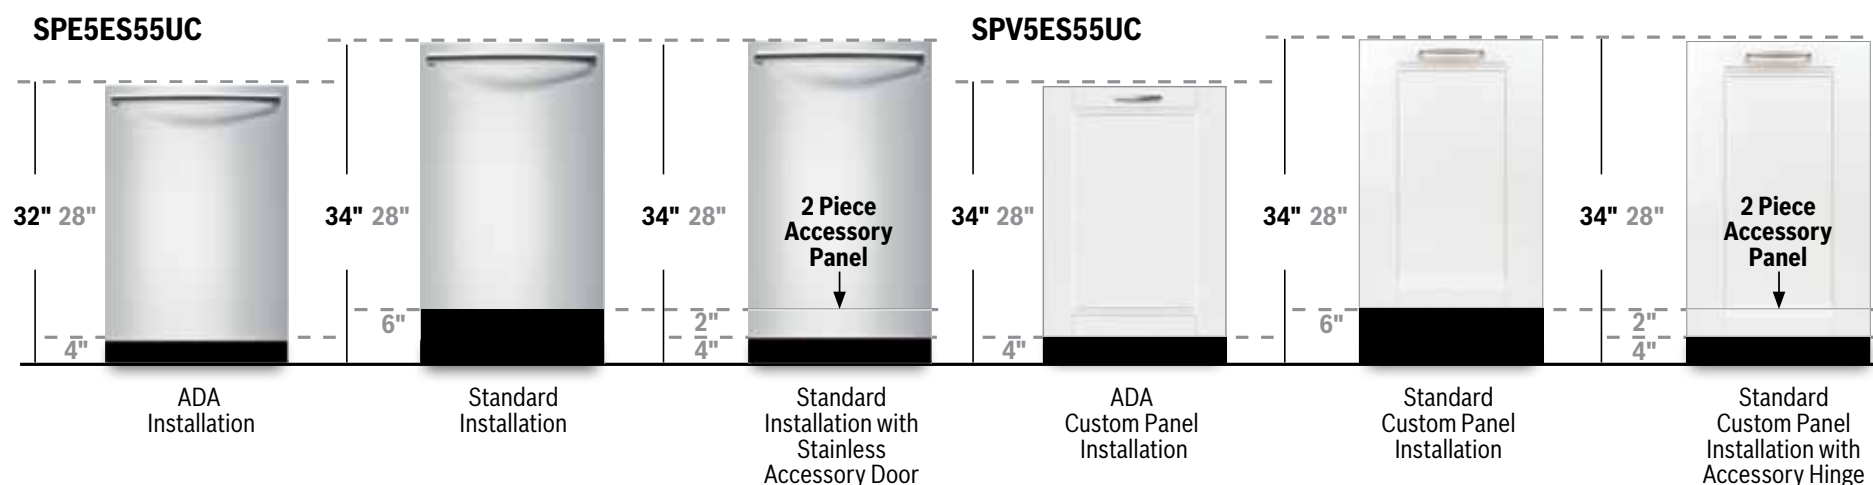

Our 18" dishwashers offer large cleaning capacity in a small space. They hold nine place settings. Dishwashers can be ordered stainless or custom panel ready, and fit both U.S. and E.U. countertop and toekick heights. In addition, all of our 18" dishwashers meet ADA requirements.

Planning for your 18" Dishwasher

Before installing a Bosch dishwasher, be sure to verify the cabinet dimensions, electrical connections and water connections. Always consult the installation manual included with the product for complete details before installing.

18" Dishwasher Options

ADA Dishwashers

Bosch's ADA dishwashers are uniquely designed for customers with special height requirements.

Bosch's ADA dishwashers are among the most flexible we have to offer. These dishwashers offer a large load capacity while featuring shorter tub dimensions that allow for easy installation. Install for traditional ADA use or at a higher position for a 6½" toekick that allows for a polished European look. This easily integrates into residential and commercial kitchens.
