

# The best Bose® one-piece music system

## Surprising sound is just the beginning

At the first glance, you might wonder how much sound could possibly come from a music system about the size of a briefcase. And then you turn it on...

The Acoustic Wave™ Music System will thrill you with sound equal to that of a large stereo system. The only differences are its compact size, sleek design, versatility, portability and the innovative Bose® technologies that have made this system a popular audio solution for many music lovers. Equipped with a CD player and high-performance stereo tuner the Acoustic Wave™ Music System gives you an opportunity to hear your favorite music again for the first time

## What's in a name? Bose technology.

All this is made possible by our patented acoustic waveguide speaker technology, featuring a 2 mts. waveguide chamber wrapped inside the enclosure. The chamber amplifies sound just as a flute amplifies a small breath of air, resulting in a stunning audio experience. And whether you choose to raise the volume to window rattling levels or leave it low for peaceful ambience, the fine-tuning is done for you. The system's integrated signal processing automatically adjusts tonal balance so you hear natural sound and full bass at any volume.

## The features you need. And then some.

Controlling your Acoustic Wave™ Music System is a snap. The credit card size remote operates most functions of the system so you barely have to lift a finger. And if you would like to take that sound to the park, the beach or most anywhere music is enjoyed, you can convert the system to a portable unit and even expand its capabilities with a complete line of optional accessories.

## KEY FEATURES:

### Waveguide speaker technology

Just as a flute strengthens a breath of air to fill an entire concert hall, this Bose® breakthrough produces rich, clear stereo sound from a small enclosure.

### Full-function CD player

Enjoy your audio CDs & MP3 CD's with skip, scan, repeat and continuous-play music modes.

### Credit card-sized remote control

Control the system from across the room. Change the volume, CD track or radio station at the press of a button. You can even mute the sound when the phone rings.

### High-performance, digital AM/FM stereo tuner

Enjoy clear radio reception and six AM and six FM presets for easy access to your favorite stations.

### Headphone input jacks

Connect your headphone to do some personal listening on your headphones.

### Compact and portable, with moulded inset handles

Take your music with you wherever you go.

### Bose link enabled

## SPECIFICATIONS:

**Dimensions:** 27cm H x 45.7cm W x 18.7cm D

**Weight:** 6.5 kg

**Colour:** Graphite grey

## Enjoy crisper, more accurate sound

The Bose® Wave® Music System reproduces one-half octave lower musical notes and delivers even greater clarity and definition than the original Wave® Radio/CD. With its deeper tones and even more lifelike sound, you might just feel like you're sitting in the front row of a live performance.

Inside, our new proprietary waveguide speaker technology combines with other Bose® technologies to deliver enhanced performance at all listening levels. You'll hear the same clear musical nuances whether you turn the volume up or keep it soft.

You'll also enjoy the full depth and range of every vocal or instrument on newer MP3s, CD-R/RWs, and conventional CDs. Listen to CDs created on your computer and take advantage of the new digital Mp3 format to enjoy hours of uninterrupted Wave® Music System quality sound.

## Designed with simplicity in mind

The Wave® Music System was engineered to be delightfully easy to use. The entire system is completely and conveniently controlled by a credit card-sized remote control.

And setup couldn't be easier. The CD player, digital AM/FM tuner, amplifiers and speakers are all built-in so you can enjoy quality sound right out of the box.

The large, bright display panel is easy to read and understand, prominently displaying the artist, title and album names of your suitably encoded MP3 Cds. It's also easy to enjoy the system's full rich sound with your TV, VCR, DVD player, or computer, thanks to an auxiliary input jack. And if you enjoy some personal listening plug the headphones into the headphone jack.

## Elegance in a distinctive design

## KEY FEATURES:

### Waveguide speaker technology

Just as a flute strengthens a breath of air to fill an entire concert hall, this Bose® breakthrough produces rich, clear stereo sound from a small enclosure

### Large visual display with extra text information

Easy to see and understand with adjustable brightness and automatic night time display dimming. Can display track title and artist on suitably encoded MP3 CDs.

### Digital AM/FM tuner with seek function

Easy access to your favorite radio music and programs with built-in AM/FM antennas. And easily recall your favorites with memory settings for six AM and six FM stations.

### Automatic ramping

To deliver a more pleasant listening experience, volume starts low and gently increases when the unit is turned on or when an alarm is activated.

### Shielded speakers

Prevents TV and computer picture interference so you have more flexibility to place your system where you want.

### Auxiliary input jack

Connect another component to enjoy the rich, full sound of the Wave® Music System with your TV, computer or other audio source.

### Bose® link

Allows seamless hookup to a Lifestyle® system so your Wave Music System becomes part of a multi-room expansion solution that lets you enjoy sound throughout your home.

## SPECIFICATIONS:

Dimensions: 10.7cm "H x 36.8 cm W x 21.9 cm D

Weight: 3.9 kg (8.7 lbs)

Colours: Platinum White, Graphite Gray, Titanium Silver

Redefine the enjoyment of listening to Radio

Presenting the Bose® Wave™ Radio II

Bose® Wave Radio II

The Wave™ Radio II is our latest version of the radio that changed people's idea of a time-honored medium. Digital electronics and updated speaker technology allow this innovative table top radio to deliver more accurate audio with deeper lows. And its uncluttered design makes it welcome in almost any room.

The heart of this Wave™ System is its proprietary waveguide speaker technology exclusively from Bose. Two folded tubes strengthen low frequencies from the speakers, giving bass instruments from guitars to tubas and timpani a full, more natural presence.

Bose® digital electronics help reproduce more lifelike-sounding instruments and vocals. And talk radio fans will appreciate a feature that allows announcers to sound more natural by automatically compensating for the artificially boosted low frequencies found in some programs.

### Engineered for simplicity

Setup is easy, with digital FM/AM tuner, amplifiers and speakers built right in. Just plug the radio in and enjoy Bose quality sound. Instead of buttons on the unit, everything's conveniently controlled with a well organized remote control.

The large, bright clock radio display panel is easy to read from across the room. Radio station, current time and alarm setting are all shown simultaneously. An auxiliary jack lets you connect an MP3 player, computer, TV or DVD player for use as a bookshelf stereo or home entertainment system. Or plug your headphones into the convenient headphone jack for private listening.

### Key Features

**Proprietary waveguide speaker technology** enables full-bodied sound, especially in lower registers, for more natural-sounding bass and percussion instruments.

**Slim infrared remote control** lets you conveniently control system functions from just about anywhere in the room.

**Large visual display** with adjustable brightness and automatic nighttime dimming enhances viewing of clock radio information.

**Digital FM/AM tuner with seek function** provides easy access to your favorite radio programs with built-in FM/AM antennas. Includes memory settings for six FM and six AM stations.

**Automatic ramping** for a more pleasant listening experience. Volume starts low and gently increases when the unit is turned on or alarm clock is activated.

**Shielded speakers** prevent TV and computer picture interference for more placement flexibility.

**Headphone jack** for private listening.

**Auxiliary input jack** to enjoy your TV, computer or another audio source through your Wave™ system.

**Bose® digital signal processing circuitry** enables finer control over the sound for more consistent, lifelike music reproduction even at low volume levels.

**Bose® link** easily connects your Wave™ system to a compatible Lifestyle™ system for an expanded home entertainment network.
