Uncle Buds Bulls Bags

BULLS BAGS holds your firearms like a vice. It's unique patented design increases stability while reducing felt recoil. Unlike other clamping systems, the Bulls Bag will not affect your point of impact.

Self-tightening, four-chamber butterfly design protects the finish of your gun. This one bag system eliminates the need for a toe and heel bag. Two bag systems creates 2 points of upward pressure, and one point of downward pressure on the gun, creating a flex in the shooting pattern.

SkyBird™ 3/4 Cock Foot Release Trap - Designed for use as a balanced foot release ground trap. The foot release trap is excellent for shooting alone, just step and release. This balanced trap throws all types of targets up to 70 yards. Shoot standard, mini, midi, & doubles.

Order no. 097-40903 \$97.27

THE BENEFITS OF A 3/4 COCK TRAP - A 3/4 Cock Trap has a one-way clutch that allows throwing arm travel in only one direction. When the throwing arm is tripped and a clay target thrown, the inertia of the arm carries it to about an 8 o'clock position. The one-way clutch does not allow the spring to pull the arm back to the twelve o'clock position, but instead stops it at the furthest distance traveled, which is closer to the setter. This feature requires less force and a much shorter distance to fully cock the trap for the next throw.

High Fly™ String Release Manual Trap -

Target is thrown with a simple pull of the string. Features a target clip for secure placement and a consistent flight path. Stake in the ground or mount to a tire.

A CHRONY chronograph completes your reloading needs at an affordable price. It can go with you anywhere. Just unfold (like a book), mount onto a tripod or place on a table, insert diffusers (sky-screens) and shoot in less than 2 minutes. Every CHRONY is made of 20 gauge steel but weighs less than 2 1/2 lbs.: It is powered by one 9 volt alkaline battery (not included) and equipped with an extra large LCD-readout: 0.5" high- when folded, it is 7 1/2" long, 4 1/2" wide and 2.75" high.

ALPHA CHRONY All the features of the Delta plus:

- 1) 1-string, from 2 to 32 shot memory (numbered)
- 2) Measures high, low and average velocities, extreme spread and standard deviations
- 3) Stereo jack for optional remote control.
- 4) Retrieval of individual shot velocity measurements.

BETA CHRONY All the features of the Alpha plus:

- 1) 60-shot memory (divided into 6 numbered strings from up to 10 shots each)
- 2) Can be switched off, taken home and switched on for reviewing information retrieval or downloading onto your computer.
- 3) Moves instantly from string to string, interrupts shooting on any string, returns to any string without memory loss, each string delivers its own statistics, etc.

MASTER GAMMA CHRONY All of the features of the Beta plus:

- 1) 1000-shot memory (divided into 100 numbered strings of up to 10 shots each.)
- 2) Change string size capability
- 3) Rapid-fire mode measures velocity of 1800 rounds per minute.
- 4) Ballistic Chrony Printer(14 foot interface cable)and LCD Remote.
- 5) In the timer mode, the velocity is measured as well as the time elapsed between shots; the timer is shot activated, not sound activated.

*Download Ballistic Programs for IBM computers in DOS, Windows '95, and IBM ballistic Interface (All sold separately)

THE MASTER CHRONY comes with the following models:

the **Master Delta**, the **Master Alpha**, the **Master Beta** and the **Master Gamma** chrony. The Master Chronys have the same capabilities as their counter parts. However, the Master Chronys have a remote which brings the LCD readout and most electronic components as well as other controls right up to your bench and away from the bullets path.

RCBS Ammomaster Chronographs

AmmoMaster® Chronograph - Whether you are checking the velocity of your arrows, paintball gun, favorite hunting rifle or seeing if your pistol load makes major Power Factor, this is the unit for you. Forgetting to bring your diffusers and supports is a thing of the past as all the parts store neatly into the AmmoMaster housing. The detachable keypad display has a 20' cord that allows you to edit the string and not have to use binoculars to see the velocity. The display shows you the last velocities recorded. The AmmoMaster Chronograph has a velocity range of 50-7000 feet per second and will also measure in meters per second. The memory is capable of storing 100 velocities in 10 strings of 10 shots each. The edit function allows you to delete a shot(s) and display the following functions: average velocity, high, low, extreme spread and standard deviation.

Features

- 100 shot memory
- Self contained carry case
- Velocity range 50-7000 feet/meters per second
- Operates on one 9 VDC battery (not included)
- Detachable keypad display
- Standard camera tripod mounting
- RCBS one year warranty

The SpitFire features a rugged ABS injection molded housing for superior strength and durability. A single high quality horn speaker is built in for great volume and a crisp sound. An auxiliary jack is present to plug in an approved auxiliary device, such as the FOXPRO Jack-in-the-Box Decoy. The external speaker jack allows you to plug in an additional speaker to increase your volume if desired. You can disable your internal speaker via the speaker "on/off" slide switch. The low battery/pilot light allows you to see when your SpitFire is turned on and also blinks when your batteries are getting low. The tripod mount located on the bottom of the SpitFire allows you to elevate your caller off of the ground when hooking it up to a tripod.

The SpitFire runs off of 4AA batteries. Alkaline batteries are recommended for use with this unit. You will see run times of 20-24 hours off of a fresh set of alkaline batteries. It comes with 24 high quality FOXPRO sounds. The SpitFire is user reprogrammable from home. The sounds are stored on a micro-SD card. A compatible reader/writer (not included) is necessary for reprogramming. It is capable of playing FOXPRO's own FXP audio files as well as MP3 and WAV files
