

Approved Space Heaters

The following space heaters are approved for University of Oregon buildings. For occupants of leased buildings (not owned by the UO), please consult with your supervisor concerning the building policy for space heaters, which is determined by the property management of the leased spaces.

1. Dayton Oil-Filled Flat Panel Heater. Grainger Order #1VNX3

400 watts 3.3 amps

2. Dayton Radiant Flat Panel Heater. Grainger Order #1VNY1

650 watts 5.5 amps

These heaters work best under a desk to heat individual users. These are some of the most sustainable heaters available and also meet requirements set forth by the Oregon Fire Code and are approved by Environmental Health and Safety (EHS).

3. Dayton oil filled radiator style heater. Grainger Order #1VNX2

1500/900/600 watts 12.5 amps

This heater draws a large amount of power. You will need a dedicated electrical circuit for this heater which may not be available in all office areas around campus. Contact Facilities Services for assistance with power-related issues.

Please keep in mind:

- Extension cords are not allowed for use on portable space heaters per the Oregon Fire Code. You may use a multi-plug power strip with a built in circuit breaker plugged directly into a wall outlet.
- Portable space heaters may not be operated within 3 feet of any combustible material.
- Portable space heaters must be used as per the manufactures instructions.
- If you have the desire to use a portable space heater that is not listed above, it must be approved by EHS fire safety. Please contact EHS at 541-346-3192 for assistance.
