HOW TO CHOOSE A CHAIRMAT

Easy as 1-2-3

Choosing a chairmat to fit your needs can sometimes be confusing. By following these 3 easy steps, you'll be on your way to choosing the perfect mat for your home or office application.

1. Determine the type of floor surface your mat will be placed on. For example, plush carpet, low-, medium- or high-pile carpet, wood or tile flooring.
2. The general rule of thumb here is the higher the carpet pile, the thicker your chairmat needs to be. When in doubt, choose the next chairmat thickness up.

- RollaMat™
- SuperMat™
- DuraMat™

THICKNESS

3. How far does your chair roll? Determine the farthest points you roll – that will be the amount of space you will need when ordering your chairmat.

There may be more than one chairmat that fits your needs. Determine if there are other features and benefits that you require, for example, lipped or rectangular mat, studded or no-studded, anti-static for computer use or glass clear to show off your designer rugs.

Chairmats and casters

VISION® BAMBOO CHAIRMATS

Bamboo chairmats are coated with six coats of Treffert, a German scuff resistant UV coating used on quality hardwood floors. They have beveled edges, are 4 mm thick, are naturally anti static and have a smooth non-skid backing which is ideal for hard floors or carpeting. They lay perfectly flat right out of the box and can fold back up for easy storage or transport.
