

SAFETY DATA SHEET

Revision: 5.2 Date: 21.03.2024

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2020/878

Diatomaceous Earth Flux-Calcined, Kieselguhr Flux-Calcined
Celatom® FW-6, FW-12, FW-14, FW-18, FW-20, FW-40, FW-50, FW-60, FW-70, FW-80, SP, AW-12, AW-14, AW-18, AW-20

SECTION 1: IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

1.1 Product identifier

Product Name Celatom® FW-6, FW-12, FW-14, FW-18, FW-20, FW-40, FW-50, FW-60, FW-70, FW-80, SP, AW-12, AW-14, AW-18, AW-20

Trade names Celatom® FW-6, FW-12, FW-14, FW-18, FW-20, FW-40, FW-50, FW-60, FW-70, FW-80, SP, AW-12, AW-14, AW-18, AW-20

Chemical Name Diatomaceous Earth Flux-Calcined, Kieselguhr Flux-Calcined

CAS No. 68855-54-9

EINECS No. 14464-46-1

Nanoform 272-489-0

REACH Registration No. 238-455-4

The product does not contain nanoparticles

1.2 Recommended use of the chemical and restrictions on use

Identified Use(s) Used as a carrier, a silica source or as a functional additive for paint, cosmetics, plastics, rubber or other applications. Use as filter aid in industrial settings.

Exposure Scenario

No.		Page:
1	Manufacture of kieselguhr soda ash flux calcined	10
2	Use as filter aid in industrial settings	13
3	Industrial, professional and private use of substance or mixtures containing the substance	16
4	Consumer use; Cosmetics, personal care products	20

1.3 Details of the supplier of the safety data sheet

Uses Advised Against Anything other than the above.

Manufacturer EP Minerals, LLC
9785 Gateway Drive
Reno,
Nevada 89521
USA
Telephone +1-775-824-7600
Fax +1-775-824-7601
E-Mail (competent person) inquiry.minerals@epminerals.com

Importer EP Minerals Europe GmbH & Co,
KG Rehrhofer Weg 115 D-29633,
Munster,
Germany
Telephone +49 51 92 98970
Fax +49-51 92 989715
E-Mail (competent person) EPME@epminerals.com

1.4 Emergency Phone No.

Europe: +49 51 92 98970 (08:00– 17:00 CET)
Languages spoken: English, French and German
USA: +1-775-824-7600 (08:00– 17:00 PST)

SECTION 2: HAZARDS IDENTIFICATION

2.1 Classification of the substance or mixture

This product contains cristobalite (fine fraction) at: < 1%
Depending on the type of handling and use (e.g. grinding, drying), airborne fine fraction crystalline silica may be generated. Prolonged and/or massive inhalation of fine fraction crystalline silica dust may cause lung fibrosis, commonly referred to as silicosis. Principal symptoms of silicosis are cough and breathlessness. Occupational exposure to fine fraction crystalline silica dust should be monitored and controlled.

SAFETY DATA SHEET

Revision: 5.2 Date: 21.03.2024

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2020/878

Diatomaceous Earth Flux-Calcined, Kieselguhr Flux-Calcined
Celatom® FW-6, FW-12, FW-14, FW-18, FW-20, FW-40, FW-50, FW-60, FW-70, FW-80, SP, AW-12, AW-14, AW-18, AW-20

2.1.1	Regulation (EC) No. 1272/2008 (CLP)	Not classified as hazardous for supply/use.
2.2	Label elements	According to Regulation (EC) No. 1272/2008 (CLP)
	Product Name	Celatom® FW-6, FW-12, FW-14, FW-18, FW-20, FW-40, FW-50, FW-60, FW-70, FW-80, SP, AW-12, AW-14, AW-18, AW-20
	Contains:	Diatomaceous Earth , Flux-Calcined (Kieselguhr) (< 1% Crystalline Silica– Cristobalite (Respirable Dust))
	Hazard Pictogram(s)	None assigned.
	Signal Word(s)	None assigned.
	Hazard Statement(s)	None assigned.
	Precautionary Statement(s)	None assigned.
2.3	Other hazards	None

SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS

3.1 Substances

EC Classification Regulation (EC) No. 1272/2008 (CLP)

Chemical identity of the substance	%W/W	CAS No.	EC No.
Diatomaceous Earth , Flux-Calcined (Kieselguhr)	circa.100	68855-54-9	272-489-0
Contains: Cristobalite (Respirable Dust), <1 Fine Fraction Crystalline silica per SWeRF calculation	< 1	14464-46-1	238-455-4

3.2 Mixtures - Not applicable.

SECTION 4: FIRST AID MEASURES

4.1 Description of first aid measures

Inhalation	If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing. If irritation develops and persists, get medical attention. Blow nose to evacuate dust.
Skin Contact	Remove clothing and wash thoroughly before use. Wash affected skin with soap and water. If skin irritation or rash occurs: Get medical advice/attention.
Eye Contact	Flush eyes with water for at least 15 minutes while holding eyelids open. Get medical attention if eye irritation develops or persists.
Ingestion	Rinse mouth. Give plenty of water to drink. Get medical attention.

4.2 Most important symptoms and effects, both acute and delayed

Prolonged and/or massive exposure to fine fraction crystalline silica-containing dust may cause silicosis, a nodular pulmonary fibrosis caused by deposition in the lungs of fine respirable particles of crystalline silica. Acute inhalation can cause dryness of the nasal passage and lung congestion, coughing and general throat irritation. Chronic inhalation of dust should be avoided. May cause irritation to the respiratory system.

4.3 Indication of any immediate medical attention and special treatment needed

Unlikely to be required but if necessary treat symptomatically. There is no specific antidote. Remove person to fresh air and keep comfortable for breathing.

SAFETY DATA SHEET

Revision: 5.2 Date: 21.03.2024

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2020/878

Diatomaceous Earth Flux-Calcined, Kieselguhr Flux-Calcined
Celatom® FW-6, FW-12, FW-14, FW-18, FW-20, FW-40, FW-50, FW-60, FW-70, FW-80, SP, AW-12, AW-14, AW-18, AW-20

SECTION 5: FIREFIGHTING MEASURES

- 5.1 Extinguishing media**
Suitable Extinguishing media Non-flammable. Extinguish with carbon dioxide, dry chemical, foam or waterspray. As appropriate for surrounding fire.
Unsuitable extinguishing media None.
- 5.2 Special hazards arising from the substance or mixture** Non-flammable, Non-combustible, Not explosive.
- 5.3 Advice for fire-fighters** Fight fire with normal precautions from a reasonable distance. Fire fighters should wear complete protective clothing including self-contained breathing apparatus.

SECTION 6: ACCIDENTAL RELEASE MEASURES

- 6.1 Personal precautions, protective equipment and emergency procedures** Ensure adequate ventilation. Avoid generation of dust. Do not breathe dust. Wear appropriate personal protective equipment, avoid direct contact. Where engineering controls are not fitted or inadequate wear suitable respiratory protective equipment.
- 6.2 Environmental precautions** No special requirements.
- 6.3 Methods and material for containment and cleaning up** Sweep spilled substances into containers if appropriate moisten first to prevent dusting. Use vacuum equipment for collecting spilt materials, where practicable. Transfer to a container for disposal.
- 6.4 Reference to other sections** See Section: 8, 13

SECTION 7: HANDLING AND STORAGE

- 7.1 Precautions for safe handling** Handle packaged products carefully to prevent accidental bursting. If you require advice on safe handling techniques, please contact your supplier or check the Good Practice Guide referred to in section 16. Avoid generation of dust. In case of inadequate ventilation wear respiratory protection. Do not breathe dust. Wear protective gloves/protective clothing/eye protection/face protection. Avoid contact with skin, eyes or clothing. Do not eat, drink or smoke when using this product. Wash hands before breaks and after work.
- 7.2 Conditions for safe storage, including any incompatibilities** Atmospheric concentrations should be minimised and kept as low as reasonably practicable below the occupational exposure limit.
Storage life Stable under normal conditions. Store in a dry place.
Incompatible materials Keep away from: Hydrofluoric Acid
- 7.3 Specific end use(s)** See Section: 1.2

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

- 8.1 Control parameters**
8.1.1 Occupational Exposure Limits

SUBSTANCE	CAS No.	LTEL (8 hr TWA ppm)	LTEL (8 hr TWA mg/m ³)	STEL (ppm)	STEL (mg/m ³)	Note
Silica, Respirable Crystalline	-	-	0.1	-	-	WEL: Workplace Exposure Limit (UK HSE EH40)
Nuisance Dust	-	-	10	-	-	Inhalable Dust. WEL: Workplace Exposure Limit (UK HSE EH40)
Nuisance Dust	-	-	4	-	-	Respirable Dust. WEL: Workplace Exposure Limit (UK HSE EH40)

Source: WEL: Workplace Exposure Limit (UK HSE EH40)

Note: For the equivalent limits in other countries, please consult a competent occupational hygienist or the local regulatory authority.

- 8.1.2 Biological limit value** Not established.
- 8.1.3 PNECs and DNELs** Diatomaceous Earth (Kieselguhr): Not harmful to aquatic organisms. Insoluble in water. On this basis the PNECs for the aquatic compartment have not been derived.

SAFETY DATA SHEET

Revision: 5.2 Date: 21.03.2024

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2020/878

Diatomaceous Earth Flux-Calcined, Kieselguhr Flux-Calcined
Celatom® FW-6, FW-12, FW-14, FW-18, FW-20, FW-40, FW-50, FW-60, FW-70, FW-80, SP, AW-12, AW-14, AW-18, AW-20

Diatomaceous Earth (Kieselguhr) DNELs	Oral	Inhalation	Dermal
Industry - Long Term - Systemic effects	-	0.05 mg/m ³	-
Consumer - Long Term - Systemic effects	18.7 mg/kg bw/day	0.05 mg/m ³	-

8.2 Exposure controls

8.2.1 Appropriate engineering controls

Ensure adequate ventilation. Atmospheric levels should be controlled in compliance with the occupational exposure limit. Avoid dust generation.

8.2.2 Individual protection measures, such as personal protective equipment (PPE)

Use personal protective equipment as required. Wash contaminated clothing before reuse. Avoid contact with skin and eyes. Do not breathe dust.

Eye/ face protection

Wear eye protection with side protection (EN166).

Skin protection

Use skin barrier cream before handling the product. Wear suitable gloves if prolonged skin contact is likely - Wear impervious gloves (EN374). Unsuitable gloves materials

Respiratory protection

Atmospheric levels should be controlled in compliance with the occupational exposure limit. In case of inadequate ventilation wear respiratory protection. Recommended: Half-face mask (DIN EN 140), Filter type P2/P3 - efficiency of at least 90%

Thermal hazards

Not applicable.

8.2.3 Environmental Exposure Controls

Avoid wind dispersal.

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

9.1 Information on basic physical and chemical properties

Appearance	Light pink to white powder
Odour	Odourless
Odour threshold	Not available.
pH (10% Suspension)	10
Melting point/freezing point	Not applicable.
Initial boiling point and boiling range	Decomposes below boiling point at (°C): >1300°C
Flash point	Non-flammable.
Evaporation rate	Not applicable.
Flammability (solid, gas)	Non-flammable.
Upper/lower flammability or explosive limits	Non-flammable.
Vapour pressure	Not applicable.
Vapour density	Not applicable.
Relative density	2.3 g/cm ³ (H ₂ O = 1)
Solubility(ies)	<1% Water Soluble in: Hydrofluoric Acid
Partition coefficient: n-octanol/water	Not available.
Auto-ignition temperature	Not applicable
Decomposition Temperature	Not available.
Viscosity	Not applicable, Solid.
Explosive properties	Not explosive.
Oxidising properties	Not oxidising.
Particle Characteristics	Not available.

9.2 Other information

None.

SAFETY DATA SHEET

Revision: 5.2 Date: 21.03.2024

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2020/878

Diatomaceous Earth Flux-Calcined, Kieselguhr Flux-Calcined
Celatom® FW-6, FW-12, FW-14, FW-18, FW-20, FW-40, FW-50, FW-60, FW-70, FW-80, SP, AW-12, AW-14, AW-18, AW-20

SECTION 10: STABILITY AND REACTIVITY

10.1	Reactivity	Stable under normal conditions.
10.2	Chemical stability	Stable under normal conditions.
10.3	Possibility of hazardous reactions	Stable under normal conditions.
10.4	Conditions to avoid	Avoid contact with: Hydrofluoric Acid. Do not leave in enclosed spaces when mixed with highly flammable material, as heat can build up over long periods of time and flammable material may eventually ignite.
10.5	Incompatible materials	Reacts violently with - Hydrofluoric Acid
10.6	Hazardous decomposition product(s)	No hazardous decomposition products known.

SECTION 11: TOXICOLOGICAL INFORMATION

11.1	Information on hazard classes as defined in Regulation (EC) No 1272/2008 Acute toxicity Ingestion Inhalation Skin Contact Eye Contact Skin corrosion/irritation Serious eye damage/irritation Respiratory or skin sensitization Germ cell mutagenicity Carcinogenicity Reproductive toxicity STOT - single exposure STOT - repeated exposure Aspiration hazard	Based upon the available data, the classification criteria are not met. Based upon the available data, the classification criteria are not met.
11.2	Information on other hazards	
11.2.1	Endocrine disrupting properties	This product does not contain a substance that has endocrine disrupting properties with respect to humans as no components meets the criteria.
11.2.2	Other information	Prolonged and/or massive exposure to fine fraction crystalline silica-containing dust may cause silicosis, a nodular pulmonary fibrosis caused by deposition in the lungs of fine respirable particles of crystalline silica. In 1997, IARC (the International Agency for Research on Cancer) concluded that crystalline silica inhaled from occupational sources can cause lung cancer in humans (human carcinogen category 1). However it pointed out that not all industrial circumstances, nor all crystalline silica types, were to be incriminated. (IARC Monographs on the evaluation of the carcinogenic risks of chemicals to humans, Silica, silicates dust and organic fibres, 1997, Vol. 68, IARC, Lyon, France.) In 2009, in the Monographs 100 series, IARC confirmed its classification of Silica Dust, Crystalline, in the form of Quartz and Cristobalite (IARC Monographs, Volume 100C, 2012). In June 2003, SCOEL (the EU Scientific Committee on Occupational Exposure Limits) concluded that the main effect in humans of the inhalation of fine fraction crystalline silica dust is silicosis. "There is sufficient information to conclude that the relative risk of lung cancer is increased in persons with silicosis (and, apparently, not in employees without silicosis exposed to silica dust in quarries and in the ceramic industry). Therefore preventing the onset of silicosis will also reduce the cancer risk..." (SCOEL SUM Doc 94-final, June 2003). So there is a body of evidence supporting the fact that increased cancer risk would be limited to people already suffering from silicosis. Worker protection against silicosis should be assured by respecting the existing regulatory occupational exposure limits and implementing additional risk management measures where required (see section 16 below).

SAFETY DATA SHEET

Revision: 5.2 Date: 21.03.2024

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2020/878

Diatomaceous Earth Flux-Calcined, Kieselguhr Flux-Calcined
Celatom® FW-6, FW-12, FW-14, FW-18, FW-20, FW-40, FW-50, FW-60, FW-70, FW-80, SP, AW-12, AW-14, AW-18, AW-20

SECTION 12: ECOLOGICAL INFORMATION

12.1	Toxicity	Not classified as a Marine Pollutant.
12.2	Persistence and degradability	Not applicable.
12.3	Bioaccumulative potential	The product has no potential for bioaccumulation. Some organisms accumulate Si(OH) ₄ .
12.4	Mobility in soil	The product is predicted to have low mobility in soil.
12.5	Results of PBT and vPvB assessment	This product is an inorganic substance and does not meet the criteria for PBT or vPvB in accordance with Annex XIII of REACH.
12.6	Endocrine disrupting properties	This product does not contain a substance that has endocrine disrupting properties with respect to humans as no components meets the criteria
12.7	Other adverse effects	None known.

SECTION 13: DISPOSAL CONSIDERATIONS

13.1	Waste treatment methods	Dispose of empty containers and wastes safely. Dispose of contents in accordance with local, state or national legislation. Ensure all waste water is collected and treated via a waste water treatment plant.
13.2	Additional Information	Packaging waste: Remove all packaging for recovery or disposal. Make sure that packaging is completely empty before recycling. Inform consumer about possible hazards of unclean empty packaging for recycling or disposal.

SECTION 14: TRANSPORT INFORMATION

Not classified according to the United Nations 'Recommendations on the Transport of Dangerous Goods'.

		ADR/RID / IMDG / ICAO/IATA
14.1	UN number or ID number	Not applicable.
14.2	UN proper shipping name	Not applicable.
14.3	Transport hazard class(es)	Not applicable.
14.4	Packing group	Not applicable.
14.5	Environmental hazards	Not classified as a Marine Pollutant.
14.6	Special precautions for user	Not applicable.
14.7	Maritime transport in bulk according to IMO instruments	Diatomaceous Earth , No special measures are required.
14.8	Additional Information	None.

SECTION 15: REGULATORY INFORMATION

15.1	Safety, health and environmental regulations/legislation specific for the substance or mixture	
15.1.1	EU regulations	
	Authorisations and/or Restrictions On Use	None.
15.1.2	National regulations	
	Germany	Water hazard class: nwg
15.2	Chemical Safety Assessment	Subject to REACH Registration, A REACH chemical safety assessment has been carried out.

SECTION 16: OTHER INFORMATION

The following sections contain revisions or new statements: 14, 15

References: Existing Safety Data Sheet (SDS), Existing ECHA registration(s) for Diatomaceous Earth (Kieselguhr), Soda Flux-Calcined (CAS No. 68855-54-9).

Training advice: Workers must be informed of the presence of crystalline silica and trained in the proper use and handling of this product as required under applicable regulations. A multi-sectoral social dialogue agreement on Workers Health Protection through the Good Handling and Use of Crystalline Silica and Products Containing it was signed on 25 April 2006. This autonomous agreement, which receives the European

Annex to the extended Safety Data Sheet (eSDS)

The following scenarios were addressed in the chemical safety report (CSR) for Kieselguhr, Soda Ash Flux-Calcined Fine Cristobalite Fraction as prepared as part of the registration dossier required by the EU REACH Regulation:

Exposure scenario 1	Manufacture of kieselguhr soda ash flux calcined
Exposure scenario 2	Use as filter aid in industrial settings
Exposure scenario 3	Industrial, professional and private use of substance or mixtures containing the substance
Exposure scenario 4	Consumer use; Cosmetics, personal care products

SAFETY DATA SHEET

2.0 Operational conditions and risk management measures

2.1 Control of worker exposure

Product characteristics

Physical form of product	White/Beige Powder
Concentration of substance in product	Covers concentrations up to 100%

Human factors not influenced by risk management

Potential exposure area	Not defined
-------------------------	-------------

Frequency and duration of use

Exposure duration per day	Covers daily exposures up to 8 hours (unless stated differently).
Exposure time per week	Covers frequency up to: 5 days per week.

Other operational conditions affecting worker exposure

Area of use	All contributing scenarios	Indoor
Characteristics of the surroundings	Not defined	

General measures applicable to all activities

Assumes a good basic standard of occupational hygiene is implemented. Assumes use at not more than 20°C above ambient temperature, unless stated differently. Do not breathe dust. Avoid dust generation. Clear spills immediately. After contact with skin, wash immediately with plenty of: Water. Provide basic employee training to prevent / minimize exposures.

Organisational measures

All contributing scenarios	Control any potential exposure using measures such as contained or enclosed systems, properly designed and maintained facilities and a good standard of general ventilation. Drain down systems and clear transfer lines prior to breaking containment. Drain down and flush equipment where possible prior to maintenance. Where there is potential for exposure: Ensure relevant staff are informed of the nature of exposure and aware of basic actions to minimise exposures; Ensure suitable personal protective equipment is available; Clear up spills and dispose of waste in accordance with regulatory requirements; monitor effectiveness of control measures; consider the need for health surveillance; identify and implement corrective actions.	
----------------------------	---	--

Technical conditions of use

PROC4, PROC5, PROC8a, PROC8b, PROC9, PROC15, PROC19	Local exhaust ventilation is required.	
PROC1, PROC2, PROC3	Use in closed systems. Local exhaust ventilation is required.	

Risk management measures related to human health

Respiratory protection	PROC4, PROC8b, PROC9	Half-face mask (DIN EN 140), Filter type P2/P3 - efficiency of at least 90%
	PROC2, PROC3	No special measures are required.
Hand and/or Skin protection	All contributing scenarios	Wear impervious gloves (EN374). Wear suitable coveralls to prevent exposure to the skin.
Eye Protection	All contributing scenarios	Wear eye protection with side protection (EN166).

Other operational conditions affecting worker exposure

Assumes a good basic standard of occupational hygiene is implemented.

2.2 Control of environmental exposure

Amounts used

Fraction of EU tonnage used in region:	Not considered to influence the exposure as such for this scenario
Regional use tonnage (tons/year):	

SAFETY DATA SHEET

Revision: 5.2 Date: 21.03.2024

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2020/878

Diatomaceous Earth Flux-Calcined, Kieselguhr Flux-Calcined
Celatom® FW-6, FW-12, FW-14, FW-18, FW-20, FW-40, FW-50, FW-60, FW-70, FW-80, SP, AW-12, AW-14, AW-18, AW-20

Fraction of Regional tonnage used locally: tons/year	
Annual site tonnage (tons/year):	
Maximum daily site tonnage (kg/day):	
Environment factors not influenced by risk management	
Flow rate of receiving surface water (m ³ /d):	Not defined (default = 18,000)
Local freshwater dilution factor:	10
Local marine water dilution factor:	100
Operational conditions	
Emission days (days/year):	Not defined
Release fraction to air from process (initial release prior to RMM):	No risk is anticipated: Atmospheric concentrations are expected to be low.
Release fraction to wastewater from process (initial release prior to RMM):	100 mg/l
Release fraction to soil from process (initial release prior to RMM):	No risk is anticipated: Deposition is expected to be low.
Technical onsite conditions and measures to reduce or limit discharges, air emissions and releases to soil	
Treat air emission to provide a typical removal efficiency of (%):	Not defined. It is recommended to pass waste gas from manufacturing processes through bag filters, scrubbers or cyclones.
Treat onsite wastewater (prior to receiving water discharge) to provide the required removal efficiency of (%):	The wastewater resulting from manufacturing of the substance can be treated by sedimentation to remove the solid parts of the substance. The sedimentation is very efficient with a reduction efficacy of 99% or more.
If discharging to domestic sewage treatment plant, provide the required onsite wastewater removal efficiency of (%):	The wastewater resulting from manufacturing of the substance can be treated by sedimentation to remove the solid parts of the substance. The sedimentation is very efficient with a reduction efficacy of 99% or more.
Treat soil emission to provide a typical removal efficiency of (%):	Not defined
Note: Common practices vary across sites thus conservative process release estimates used.	
Organisational measures to prevent/limit release from site	
Prevent discharge of undissolved substance to or recover from onsite wastewater. Do not apply industrial sludge to natural soils. Sludge should be incinerated, contained or reclaimed.	
Conditions and measures related to municipal sewage treatment plant	
Size of municipal sewage system/treatment plant (m ³ /d)	Not defined
Degradation effectiveness (%)	Not defined
Conditions and measures related to external treatment of waste for disposal	
Type of waste	Solid and Liquid and Gas
Disposal technique	Bury on an authorised landfill site or incinerate under approved controlled conditions. It is recommended to pass waste gas from manufacturing processes through bag filters, scrubbers or cyclones.
Substance release quantities after risk management measures	
Release to waste water from process (mg/l)	< 3.87 mg/l
Maximum allowable site tonnage (MSafe) (kg/d):	Not defined

3. Exposure estimation and reference to its source

3.1 Human exposure prediction

Exposure assessment (method/calculation model) | ECETOC TRA 2010

Process category [PROC]	Duration	Local Exhaust Ventilation	Inhalation	
			inhalation exposure (mg/m ³)	Risk characterisation ratio (RCR)
PROC1	4 – 8	None	0.01	0.028
PROC2	4 – 8	90%	0.1	0.278
PROC3	4 – 8	90%	0.1	0.278
PROC4	≤ 1	95%	0.25	0.694
PROC5	≤ 1	95%	0.25	0.694
PROC8a	≤ 1	95%	0.25	0.694
PROC8b	≤ 1	95%	0.25	0.694
PROC9	≤ 1	95%	0.2	0.556
PROC15	4 – 8	95%	0.25	0.694
PROC19	≤ 1	95%	0.25	0.694

Dermal exposure is considered to be not relevant.

Oral exposure is not expected to occur.

2.0 Operational conditions and risk management measures

2.1 Control of worker exposure

Product characteristics

Physical form of product	Light pink to white powder
Concentration of substance in product	White/Beige Powder Covers concentrations up to 100%

Human factors not influenced by risk management

Potential exposure area	Not defined
-------------------------	-------------

Frequency and duration of use

Exposure duration per day	Covers daily exposures up to 8 hours (unless stated differently).
Exposure time per week	Covers frequency up to: 5 days per week.

Other operational conditions affecting worker exposure

Area of use	All contributing scenarios	Indoor
Characteristics of the surroundings	Room volume	50 m ³
	Ventilation rate	0.6 / 1 hour(s)

General measures applicable to all activities

Assumes a good basic standard of occupational hygiene is implemented. Assumes use at not more than 20°C above ambient temperature, unless stated differently. Do not breathe dust. Avoid dust generation. Clear spills immediately. After contact with skin, wash immediately with plenty of: Water. Provide basic employee training to prevent / minimize exposures.

Organisational measures

All contributing scenarios	Control any potential exposure using measures such as contained or enclosed systems, properly designed and maintained facilities and a good standard of general ventilation. Drain down systems and clear transfer lines prior to breaking containment. Drain down and flush equipment where possible prior to maintenance. Where there is potential for exposure: Ensure relevant staff are informed of the nature of exposure and aware of basic actions to minimise exposures; Ensure

Exposure Scenario 4 – Consumer use; Cosmetics, personal care products

1.0 Contributing Scenarios

Sector of uses SU	SU21 Consumer uses: Private households (= general public = consumers)
Process category [PROC]	Not applicable
Chemical product category [PC]	PC39 Cosmetics, personal care products
Article Categories [AC]	Not applicable
Environmental release categories [ERC]	ERC8a Wide dispersive indoor use of processing aids in open systems
Specific Environmental Release Categories SPERC	Not applicable

2.0 Operational conditions and risk management measures

2.1 Control of worker exposure

Product characteristics

Physical form of product	Not defined
Concentration of substance in product	Not defined

Conditions of use affecting exposure

In accordance to the Article 14 (5b) of the REACH Regulation (EC) No 1907/2006, exposure estimation and risk characterisation for human health does not need to be performed for end uses in cosmetic products within the scope of Directive 76/768/EEC.

Risk management measures

Respiratory protection	No specific measures identified.
Hand/Skin protection	No specific measures identified.
Eye Protection	No specific measures identified.

2.2 Control of environmental exposure

Conditions of use affecting exposure

Daily local widespread use amount	≤ 300 g/Day
-----------------------------------	-------------

Dispose of waste product or used containers according to local regulations. Waste water of facility is assumed to be treated in municipal waste water treatment.

3. Exposure estimation and reference to its source

3.1 Human exposure prediction

In accordance to the Article 14 (5b) of the REACH Regulation (EC) No 1907/2006, exposure estimation and risk characterisation for human health does not need to be performed for end uses in cosmetic products within the scope of Directive 76/768/EEC.

3.2 Environmental exposure prediction

Exposure assessment (method/calculation model)	EUSES
--	-------

Environmental Release

Water	0.302 kg/day (ERC)
Air	0.302 kg/day (ERC)
Soil	0 kg/day (ERC)

Risk characterisation ratio

Protection target	Exposure estimation	Risk characterisation ratio
Sewage Treatment Plant	0.151 mg/l (EUSES 2.1.2)	< 0.01
Man via environment - Inhalation	2.06E-6 mg/m ³ (EUSES 2.1.2)	< 0.01
Man via environment - Oral	5.67E-4 mg/kg bw/day (EUSES 2.1.2)	< 0.01
Man via environment - Combined	-	< 0.01

4. Evaluation guidance to downstream user

If safe use conditions stated in the exposure scenario cannot be enforced, alternatives measures must be equivalent or better than those stated in this exposure scenario.

For scaling see	EUSES v. 2.1.2 Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures.
