

NESPRESSO BRACELET

NESPRESSO BRACELET INSTRUCTIONS

Create a TerraCycle bracelet from Nespresso capsules!

MATERIALS

- 10-12 Nespresso capsules
- Elastic cord

Call out: This project used 1mm.

Any size will do as long as it fits through your push pin hole

TOOLS

- Butter knife
- Hammer
- Marker: Approximately 1/2" consistent diameter
- Pushpin

START!

STEP 1 Save Nespresso capsules and let air dry completely before storing. Coffee grounds inside will mold if moisture is trapped inside. Peel back tin covering, be sure to completely remove from rim.

STEP 2

Scoop out coffee, with your butter knife, scrape edges to remove all coffee grounds. Rinse out capsules, be sure to remove all coffee grounds and let air dry. Use a small amount of dish soap to minimize the coffee smell.

STEP 3

Place capsule open side down and hold down by rim with pointer and index fingers. Hammer gently and evenly working in a circle until capsule is completely flattened.

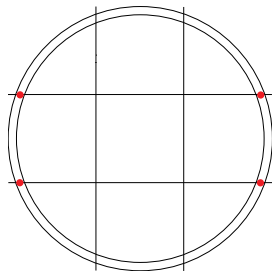

DESIGN TIP:

Use all the same color Nespresso capsules or have fun, and mix colors together. Don't forget to use a colored elastic that goes with your palette! Take it one step further and add beads!

STEP 4

Make four dots with your marker on the edge of the silver side of your capsule. Refer to template for dot placement

STEP 5

Press pushpin through each mark to create a hole.

STEP 6

Bend capsule against marker. With the color side up, place the side of the marker in the center of the capsule with holes evenly placed on top and bottom. Using the marker as support, push up capsule and roll around the marker

STEP 7

Line up capsules vertically and thread elastic cord through top row and then the bottom row.
