

SHAMPOO BOTTLE CHANDELIER

SHAMPOO BOTTLE CHANDELIER INSTRUCTIONS

Create a TerraCycle chandelier from shampoo and conditioner bottles!

MATERIALS

- 12-40 Shampoo bottles (depending on desired size)
- Christmas lights (preferably an old working strand)
- 12-40 small zip ties (depending on the amount of bottles used)
- 3 large zip ties

TOOLS

- Electric drill
- 1/8" drill bit
- Permanent marker
- Extension cord

START!

STEP 1 Collect 25-40 shampoo bottles depending on desired size. Clean them with water by rinsing away any remaining residue inside the bottle.

STEP 2

Mark two holes with your permanent marker on the neck of each bottle. The markings should be on opposite sides of each other.

STEP 3

With the drill and the 1/8" drill bit, drill where you've marked your holes.

DESIGN TIP:

Translucent bottles work best for letting light through, but any bottles will do. Try mixing colors to coordinate with your decor!

STEP 4

Start at one end of the Christmas light strand, and feed lights through the neck of the bottle.

Each bottle fits 5-6 bulbs and have two light strand cords coming out of the bottle opening.

STEP 5

Secure the lights in place by looping a zip tie through the two drilled holes. The two light strand ends will fall on either side of the zip tie. Cut off the access zip tie.

STEP 6

When you've used all of your bottles and lights, take the cording in between each bottle and wrap into a bundle. Zip tie the bundle together. The more you tighten the zip tie, the more the bottle will take shape into a light fixture. Depending on the amount of bulk, you may need to separate the fixture into two sides and then combine them.
