Mon 31 Dec 18	NONE

### Notes:

Firing on Chickerell Range restricts access to the danger area over Chesil B Coastal Path on Tidmoor Point where the public are safely diverted around. Also note that the safety area extends out to sea and is marked on all charts.

Every effort is made to provide correct usage dates at time of publication but to short notice changes/additions due to unforeseen circumstances or operational changes. Confirmation of this programme can be made by calling the number below 5 days in advance.

A normal firing day on Chickerell range is from 08:00 hrs up to an hour before sunset.

There will be no firing on this range during the hours of darkness.

Red flag warning signals indicate that live firing is taking place within the range marked by red and white poles. When warning signals are displayed do not cross the boundary. Flags are lowered and access gates are opened as soon as the live area is made safe.

For further information on the Armed Forces' interests in this area contact:  
Commandant Wyke Regis Training Area, Camp Road, Wyke Regis, Weymouth  
Telephone: (01305) 831930
