---

**Note:** Mp3 titles are compatible with Ipod as well as select .wma titles. Please check in Digital Rights Information or featured collections for confirmation.

### Can I transfer OverDrive Music titles to Apple® devices?

Many OverDrive Music titles can be transferred to Apple devices (where permitted by the record label) using the OverDrive Media Console. During the transfer process the file is converted to a DRM-protected AAC format, which is compatible with Apple devices.

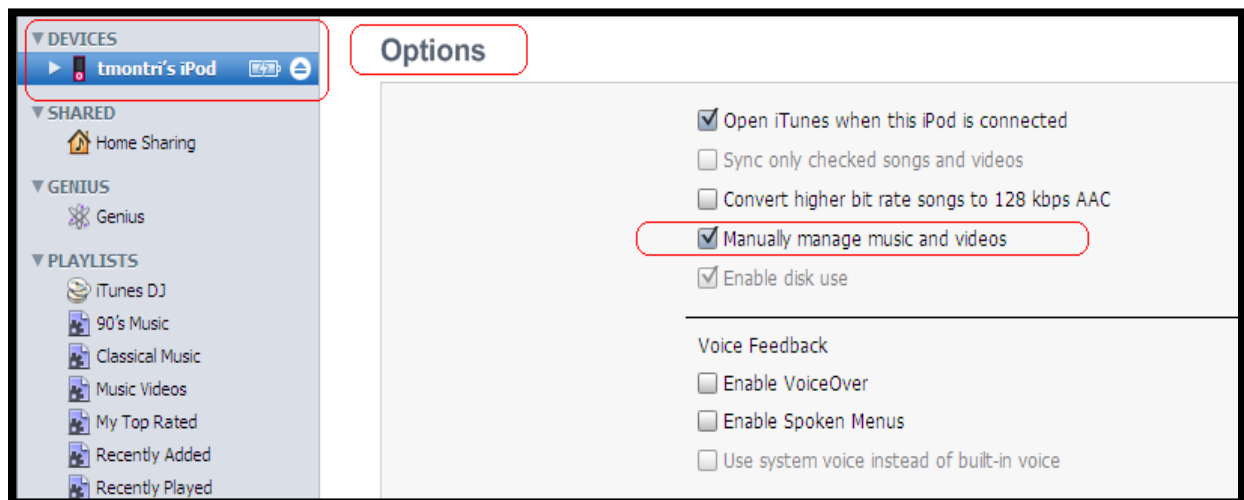

### Downloading OverDrive Audio titles to the iPod:

- Go to → [digitalbooks.toledolibrary.org](http://digitalbooks.toledolibrary.org)
- Download Software: OverDrive Media Console
- Download required iPod updates (if prompted)
- Browse or search for a title.
- Borrow, Confirm and Download.

### Transferring OverDrive Audio titles to the iPod:

1. Plug in your iPod ... iTunes should open automatically... select **devices**.

Under the **Summary** Tab ... Select **Manually Manage Music** - click **Apply** (lower right hand corner).

---

2. You are now ready to Transfer an OverDrive title to your iPod.

Select **Transfer** (see Image Below):

**Note:** If you select transfer and receive the message listed below – “no player found” – wait and try again. It may take a few moments for your computer to recognize the player.

3. Follow the prompts to transfer the OverDrive title to your iPod. When the transfer is complete – select Finish. You are now ready to eject your iPod and enjoy listening to your OverDrive Audio titles on the go.

**Note:** OverDrive MP3 Audiobooks are added to your music folder by default.

---

*The iPod Touch, iPad and iPhone are compatible with the OverDrive Media Console App, which allows the direct download of EPUB eBooks and MP3 Audiobooks.*
