GOVERNMENT AGENCIES

ALICE Receptionist Kiosk

Wall Mounted ALICE Receptionist

ALICE ENABLES GOVERNMENT AGENCIES TO HEIGHTEN SECURITY TO BUILDINGS BY ENABLING LIVE, VISUAL VERIFICATION BEFORE GRANTING ENTRY.

ALICE ALSO HELPS IMPROVE PRODUCTIVITY OF RESOURCES BY ENABLING EMPLOYEES TO MANAGE MULTIPLE LOCATIONS.

ALICE HELPS AGENCIES MEET PUBLIC NEEDS WITH FEWER RESOURCES.

KEY BENEFITS FOR GOVERNMENT AGENCIES

ALICE enables security to communicate via live video stream with visitors in secured waiting areas before granting building access.

ALICE helps government agencies stretch their budget dollars by providing a system where a small number of employees can manage many different locations.

ALICE works 24 hours a day, 365 days a week.

ALICE works with all major SIP enabled VoIP phone systems and can call employees at their office desk or even on their mobile phones.

ALICE is constantly under development and new features are added regularly.

ALICE™ Receptionist

ALICE – A NEW WAY TO INTERACT

There are many kiosk solutions for government agencies on the market today. Most of these provide self-service information for visitors. While some of these succeed to a limited degree, the idea of putting “Government in a Box” often fails to live up to expectations.

ALICE is a different kind of kiosk. Unlike most kiosk solutions, ALICE is designed to extend human interactions not eliminate them. ALICE enables your employees to be more productive by giving them the tools to interact with more people in more locations from the convenience of their desk. Using the ALICE client software on their PC, employees are able to connect with any number of ALICE kiosk located throughout a building or buildings to interact with visitors.

EXAMPLES OF ALICE IN GOVERNMENT AGENCIES

PUBLIC INFORMATION DESK

Providing information and help to the public, is a staff intensive and costly service most agencies are required to provide in their buildings. Utilizing ALICE kiosk placed at strategic locations throughout a building, a small number of information desk clerks can serve many people across a broader number of locations at a fraction of the cost of staffing each location.

SECURED LOCATIONS / BUILDINGS

ALICE provides government agencies a high-tech device that allows security to visually verify a visitor’s credentials prior to granting the visitor access to the building. The government employee can stay in a secured part of the building and communicate with the visitor in the holding area via 2-way video to validate credentials. This provides the highest level of security as no employee is ever exposed to individuals who have not been cleared.
