

## Rescue 2

Rescue 2 is a 2015 Ford F550 with a 6.7 diesel, with a 4 man cab and service body with tools for vehicle extrication as a secondary response. This truck also houses a 300 Imp. Gal tank with foam capability running a 18hp Vanguard powering a Darley pump. This combination makes the truck ideal as a second response to MVCs as it has the tools, water & foam not requiring a separate pump to respond in most cases.

Also this unit is used as the tow unit for UTV 1 and a transport for personnel and equipment.
