

For metal containers

# NYLON PLUGS

When packaging flammable liquids, safety becomes your main concern – and ours. Tri-Sure® Nylon Plugs is the choice for offering strong, reliable protection for your product while providing pressure relief during a fire incident.

**Tri-Sure®**  
MORE THAN CLOSURES

# Nylon Plugs

## How does it protect?

Tri-Sure® produces a range of fusible plastic closures for use with steel drums. The plugs are designed to melt and relieve the container pressure in a fire incident. Designed without compromising the structural integrity, they are available with various washers to meet specific properties.

## Ensuring maximum security

Manufactured from a highly resistant modified Nylon blend, the plugs are certified Factory Mutual for the National Fire Code NFPA-30. Also our Polypropylene and Polyethylene plugs are FM certified and therefore carry the <FM> logo. The plugs meet DOT/UN Performance Standards Groups I II III with EPDM, Black Nitrile (BUNA) and irradiated PE gaskets.

## Design

The plugs are designed with an ISO thread to meet global standards and can be used with Tri-Sure® standard/ pre-set torque plug wrenches. Long pilots guard against cross threading and aids insertion on automatic lines. For tamper evidence the plastic Tab-Seal® only must be used with the Nylon Plug to ensure maximum safety.

## Truly Global

Combined with Tri-Sure® More Than Closures' global network of sales and service centers, technical support and tooling, the Tri-Sure® closure system really is the first choice for customers who demand the highest quality, especially those dealing with hazardous or expensive contents.

## Advantages

- ✓ FM Approved.
- ✓ ISO thread specified.
- ✓ Tamper evident when used with PlasticTab-Seal® caps.
- ✓ High level of securing due to availability of black nitrile, EPDM and PE gaskets.
- ✓ Relieves over-pressure (mushroom vent option).
