For metal containers

**G3/4 SNAP-IN FLANGE**

The G3/4 Snap-In Flange is an all plastic, press-insertion closure with a removable membrane.

Designed for side openings on metal drums and pails, it is an ideal solution for the convenient dispensing of liquid products.
Advantages

✓ Light and Reliable one piece closure for a cost-effective sealing solution.
✓ Conveniently supports a multitude of end-user applications.
✓ Simplified insertion procedure with universal orientation.
✓ All plastic, single component solution improves recycling process.

What does it protect?
The G3/4 Snap-In Flange is designed for reliable and versatile convenience. The product is push inserted into the side dispense opening of metal drums and pails. The removable diaphragm membrane forms a tamper evident seal, and delivers a truly convenient means of dispensing liquid contents.

Ensuring maximum security worldwide
Combined with Tri-Sure® More Than Closures’ global network of sales and service centres, technical support and Snap-In Flange tooling, the proven Snap-In Closure system really is the first choice for companies that value high quality protection and end-user satisfaction.

Thoughtful design
With a simple and secure insertion procedure, the Snap-In Flange maximizes filling line efficiency. Designed with versatility and convenience in mind, this single product facilitates a great variety of rituals-of-use depending on individual customer needs. The Snap-In Flange is also an economical platform for the application of liquid dispensing taps.

The internal thread is ideally suited for the installation of either Tri-Sure®’s G3/4 Poly-Flow or the Plastirob® Tap for even, controlled dispensing. The Snap-In Flange will also fit a range of Tri-Sure® G3/4 plastic plugs for the safe and secure resealing of contents, minimizing waste and protecting the environment.

Full customer support
As a world leader in closure systems, we provide a complete system to support the Snap-In Flange. Product specific tooling is available to ensure proper fitting of the Snap-In Flange. Our technical staff can also offer practical advice on upgrading your current container with the Snap-In Flange closure system.
