For plastic containers

PLASTICAP 60™ MPV3 SCREWCAP

MPV3 Plasticap 60™ is the optimal solution for high-performance and cost-effective two-way venting of small and medium-sized plastic containers.

Tri-Sure®
MORE THAN CLOSURES

PLASTICAP-60™

The new Plasticap 60™ “MPV3” is the new “Micro-Porous Venting” screwcap that is Surely safe, Surely secure, and Surely economic.

How does it protect?

The tamper-evident Plasticap 60™ MPV3 screwcap is made from HDPE with an expanded PE sealing wad with integrated venting membrane. This combination provides a light yet robust and two-way venting solution for your customers.

Ensuring maximum security worldwide

Combined with Tri-Sure® More Than Closures' global network of sales and service centers, technical support and Plasticap 60™ tooling, the robust Plasticap 60™ closure system really is the first choice for companies that value the highest protection levels for hazardous or expensive contents.

Thoughtful design

Optimal two-way venting

The MPV3's unique design (patent pending) provides optimal and reliable two-way venting. The ribbed profile inside the cap and the membrane welded on the wad provide a secure venting pathway from the container via the thread. This system ensures that venting always occurs, even with over-torqueing. The tamper-evident “thumb pull tab” can be consistently positioned opposite the drum handle when using our recommended neck configuration.

That makes it consistently easy to find and open, even when wearing gloves.

Highest performance

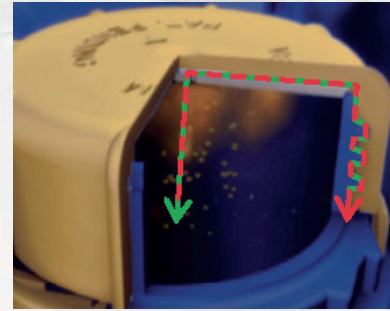

The MPV3's unique design and construction ensures secure venting performance and safety under the most extreme conditions.

Options

- Original Plasticap 60™ with expanded PE washer.
- Various colors are available (yellow is recommended for all vented solutions).
- Standard with thumb pull.
- Embossed with standard “Vent System”.

Full customer support

As a world leader in closure systems, we provide a complete system to support Plasticap 60™. Plastic apply and remove tools and special aluminum torque adaptors are available to ensure proper fitting of the Plasticap 60™. Our technical staff can also offer practical advice on upgrading your current container with the Plasticap 60™ closure system.

Venting Principal

Advantages

- ✓ Proven and simple design cost-competitive with existing, less effective solutions on the market.
- ✓ Specially treated (oleophobic) PTFE membrane provides high levels of chemical resistance with consistent venting flow rate with no blocking (crystallization).
- ✓ Consistent design for automatic filling line application.
- ✓ High quality wad and robust design enables container to meet UN performance requirements.
- ✓ Tamper-evident.
- ✓ No loose parts to fall into the container.
- ✓ Venting (via thread) means no vent-hole blocking even with outside storage.

All Tri-Sure® Plasticap 60™ closures are designed for maximum performance in combination with the Tri-Sure® More Than Closures neck design (DIN 60).
