

DATA VISIBILITY & STRATEGIC INSIGHTS

Utility costs rank in the top three operational expenses for business. This fact translates to significant savings opportunities as well as significant challenges. Ecova provides exceptional value to multi-site clients from our unique bill process cycle – a single solution combines data insight and energy expertise to deliver complete visibility, cost savings and efficient resource management.

The average time for enterprises to internally process a single invoice is **17.4 days to 29.8 days***.

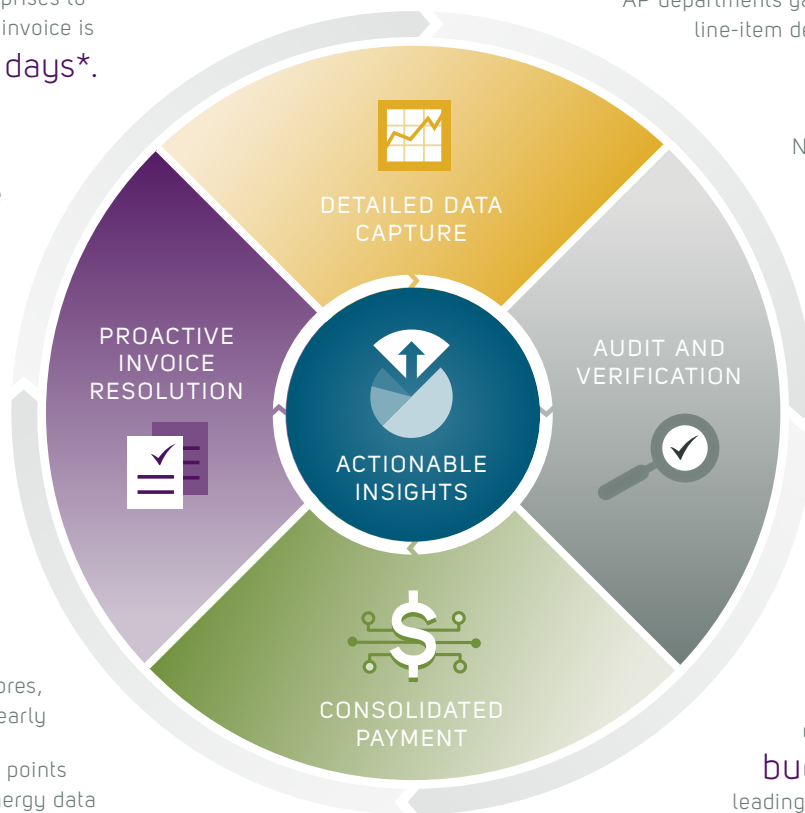

*Aberdeen Group, Oct 2010

Clients achieve an average return on investment of

285% on top of the eliminated costs associated with bill validation, reconciliation and processing, which can cost a company an average of **\$14.89 per payment***.

Energy Data Warehouse stores, processes, and analyzes nearly **2.2 BILLION** points of current and historical energy data for many of the nation's top enterprises.

AP departments gain **24/7** online access to line-item details and full bill images of all invoices processed by Ecova.

Nearly **30%** of companies' energy use is wasted through controllable inefficiencies; energy and facility teams gain data insights to target and improve these inefficiencies.

Purchasing and facility teams can leverage **site, regional, & portfolio wide** cost and consumption data to support informed energy sourcing.

Finance departments have reliable data for **improved budget management**, leading to more accurate forecasting, reporting and fiscal planning.
