LETTER TOWERS & STAND-UP CENTERPIECES

Letter Towers & Stand-Up Centerpieces are a unique and specialized way to make a Statement! Choose one of our stock designs or let our art department make a custom design for you. The standard size for the towers is 72" tall x 4" or 6" thick. The standard size for the Stand-Up centerpieces is 20" tall x 8". Stock or custom designs can be cut any size to meet your needs. Letter Towers can be coated with polyurethane coating to make your props last for years. Foam is sold unfinished. Finishing is available.

VALENTINE! UNFINISHED CUT FOAM

All foam is cut "in house." We can cut almost any 2-D design you can think of. No job is too big. Call for more information.

Foam pieces are sold unfinished. Finishing is available upon request. Pieces are available in several sizes. Some finished pieces shown have been enhanced with foam cutting tools and carved basic blocks & pieces of foam.

Be careful when finishing with spray paint or spray glitter, as many colors can damage the foam. Hold the

can at least 12-18 inches away from the foam and spray very lightly. Allow time to dry before applying additional coats. You can also paint foam with a latex base paint from your local hardware store. To add sparkle, glitter can be applied to the wet paint, which acts like glue. We suggest testing paint on a scrap piece of foam, as different colors have different effects. Use extreme caution when using metallic colors, as they can cause the most damage to foam. Always use spray paint in a well ventilated area, and a mask is recommended.

Foam Finishing Tips & Tricks

- Cool glue guns work best with foam. NEVER use hot glue.
- Always try new finishing and gluing techniques on a scrap piece of foam to avoid damaging your piece
- Add weight to foam centerpiece bases by cool gluing a tile to the bottom of your piece
- Cover the sides of your foam with solid or themed ribbon. Ribbon is an EASY & FAST way to cover the sides of Foam Rounds in Centerpieces. **See Picture A**
- Most Design Master spray paint colors work with foam. Always hold can 12" to 18" away from foam. Lightly spray on one coat at a time. Allow to dry before applying additional coats. If you spray too heavily in one spot, it can eat away at the foam
- You can also paint foam with a latex-based paint from your local hardware store. To add sparkle, glitter can be applied to the wet paint, which acts like glue.
- Make your finished pieces POP: Paint the sides in a contrasting color. This will give your finished piece a dimensional look. We don't recommend glittering the sides, it makes the foam harder to handle, especially on larger pieces. We normally spray paint the sides with Design Master spray paint before we finish the front & back.

Picture A

Fix Your Broken Pieces

Foam will break, it's a good thing it is easy to fix.

A list of things that should be in every foam finishers toolkit:

- Wooden Skewers: Can be used to attach or repair two pieces of foam. **See Pictures B-1 & B-2**
- Toothpicks: These work just like wooden skewers for smaller pieces and breaks.
- Cool Glue Gun & Glue Sticks: A hot glue gun may work if it has a temperature control, on the coolest setting. Some people who only have a hot glue gun will wipe the hot glue on a wooden stick, give it a second or two to cool, then apply it to the foam. Always try this on a scrap piece of foam to make sure it does not melt the foam. Be careful when using glue guns, they get hot!

Picture B-1

Picture B-2

TO GLITTER OR NOT TO GLITTER

- 1) Finish Your Foam With Glitter: Use the same color paint and glitter. We suggest Latex based paint from your local hardware store. Apply the paint with a brush or roller, then spill the glitter onto the wet paint. Place a piece of paper on top of the glitter and lightly press the glitter into the wet paint. The paint will act as a glue. After the Paint Dries, Shake off the excess glitter for re-use. We dump the excess glitter into an aluminum baking pan, that makes it easy to pour back into the glitter bottles. Paint and glitter one section at a time, and allow the paint to dry before doing another section. You can finish one or both sides of the foam depending on how it will be displayed.

- 2) Finish Your Foam With Iridescent Glitter: You can follow the step above for a heavy glittered look. Or, if you want a lighter more elegant look, You can spray your piece with design master paint and lightly sprinkle your piece with Iridescent Glitter on the wet paint. The spray paint dries quickly, so sprinkle your glitter shortly after applying spray paint. Make sure you do it lightly and evenly. This only works with Iridescent Glitter, regular Glitter is too heavy.
- 3) Custom Glitter Colors: You can combine glitter colors to make custom colors. You can also mix iridescent glitter with regular glitter to add some additional Sparkle to your finished piece.
