VENUE CHANGE POLICY

All Matches Must Be Played As Scheduled

It is expected that teams make all efforts to play their matches as published in the original league schedule. Any request by one captain to another to reschedule is just that – a request.

In the event of a delay or postponement, the scheduled match must be completed or played before the end of the local league season. The home captain must contact the local league coordinator within 48 hours of the postponed match and notify the coordinator in order to prevent a forfeit being recorded.

Matches must be played at the originally-scheduled site unless the host facility determines that it cannot accommodate the rescheduling. A change of venue will only be approved if the host facility informs CITA of its approval of the change. Every attempt must be made to honor the commitment made by and to the host facility. Without the cooperation of facilities our league won't operate efficiently and effectively.

In the case of summer matches moved due to rain, the home captain must inform the facility of a venue change with 24 hours if an alternate indoor site is available on the same day. Rescheduling to a different date must be attempted at the original site, following the above procedure.
