Safety Precautions for Playing in Warm Weather

You may be playing your matches in conditions to which you are not accustomed. The temperature and/or humidity can get quite high. If you follow the suggestions below, there is no reason why you cannot have good matches and a good time.

YOU MAY WANT TO CONSIDER AN EARLY ARRIVAL IN ORDER TO ALLOW YOUR BODY TO BECOME SOMEWHAT ACCLIMATED TO NEW CONDITIONS.

You will lose fluid from your body through perspiration. Along with water you lose sodium, potassium and other electrolytes. It is necessary to replenish your body with BOTH water and these electrolytes.

All athletes should drink plenty of fluids (water, sport drinks, juice, milk, etc.) throughout the day. If you wait until you are thirsty, you have waited too long. Note: your body can lose a lot of fluid, via evaporation, while you are flying since the air in the passenger compartment is very dry. You should drink 1 cup of non-caffeine or non-alcoholic drink per hour.

Drink another cup of fluid just prior to play. In fact, also drinking 16 to 20 ounces of water, juices, or sports drink 60-90 minutes before your match can further help in avoiding heat disorders.

Bring a large thermos with you on court and drink frequently (i.e., at every changeover). There will also be water available on the courts. Water and/or sport drinks are effective.

After your match, drink plenty of fluids. It could be water, Gatorade, lemonade, juice, etc. If you prefer, dilute any of these to your own taste. Water by itself does not replace necessary electrolytes. Don't forget to eat! Fresh fruit and fruit juices are excellent source of some electrolytes and carbohydrates, but you may have to make a special effort to replace some salt as well.

Wearing white really can help in hot weather. Use cotton/polyester blends rather than 100% cotton or tightly woven nylon. Have an extra dry shirt available for change. Perspiration can block ventilation when the shirt is soaked and on humid days, the cooling of evaporation is of little significance.

Use sunscreen. Use waterproof/sweat proof sunscreen that blocks both UVA and UVB rays. Have an SPF of at least 15, but an SPF 30 or above is preferred. Wear a wide-brimmed hat that is well ventilated and shades the neck as well.

Remember, you are allowed 25 seconds between points and 90 seconds at the changeover. Use this time to recover. Take advantage of shade during changeover as much as possible. Change the shirt frequently (and shorts if necessary), and use a cool towel on the face and upper back.

SIGNS AND SYMPTOMS OF HEAT DISORDER

Heat cramps: muscle spasms, usually due to extensive and repeated sweat losses, fatigue, normal body temperature.

Heat exhaustion: extreme weakness, exhaustion, headache, dizziness, nausea, profuse sweating, chills and cool skin, normal body temperature, rapid pulse, sometimes unconscious.

Heat stroke: hot, dry skin, headache, nausea, confusion, staggering gait, extremely high body temperature, collapse, unconsciousness, sometimes death.

IF ANY OF THESE CONDITIONS (#2 OR #3) SHOULD OCCUR:

- Call a doctor or emergency vehicle. (Keep applying ice water continuously and generously until medical assistance arrives).
- Loosen the player's clothing at once.
- Place player in a prone position in the shade.
- Apply ice to head and body (or whatever means are available to providing cooling).

FLUID PLAY

HYDRATION TIPS FOR TENNIS PLAYERS

Drink cool water or sport drinks during play. Sports drinks are especially helpful during long matches, in hot weather and for recovery after play.

Use a similar hydration routine before, during and after practice.

BEFORE PLAY

Drink 12-16 ounces about 1 hour before play begins.

Drink fluids often throughout the day.

Prepare at least 2 quarts (64 ounces) to drink during play.

Sports drinks are preferable for long matches or during play in hot weather.

DURING PLAY

Drink 4 to 8 ounces (4 to 8 normal swallows) after the warm-up and during every changeover.

Many players like to drink a sport drink and water, with an emphasis (e.g., 2:1) on the sport drink.

For some players, fluid requirements may even be higher in very hot or humid environments.

AFTER PLAY

Weigh yourself before and after play and drink about 20-24 ounces of fluid for every pound of post-play body weight deficit.

Immediately begin to replace fluid, electrolytes and carbohydrates with water, other fluids (e.g., juice, sport drinks, etc.) and food. Sport drinks are very effective if you are going to play again soon.

Consider adding salt to your food and/or drinks if sweat losses were extensive.
