Cu is a major factor for the formation of hydrogen, and the reduction of NOx in a diesel engine may be performed by using the generated hydrogen. For the hydrogen generation, a Cu-containing catalyst for reducing NOx (Cu-based catalyst) such as that disclosed in, for example, Japanese Unexamined Patent Application Publication No. 7-188739 is used. The Cu-based catalyst is produced by supplying a slurry solution in which CuO is dispersed in a solution of sulfuric acid, a solution of nitric acid or an ammonia solution, and hydrolyzing the solution with a reducing agent such as hydrazine.Methodological issues in the evaluation of second-line anti-tuberculosis drug efficacy. The methods used to evaluate the in vitro anti-tuberculosis drug susceptibility of Mycobacterium tuberculosis isolates have been developed over the past 30 years. The slow clinical development of new drugs and the increasing incidence of multi-drug resistant tuberculosis have prompted renewed interest in the in vitro testing of new drugs. In this review, we discuss the methodology, limitations and potential of various antimicrobial testing techniques including time-kill curve, population analysis profile, rate of kill and ratio-of-kill methodologies. We present the key results obtained in recent studies and their clinical relevance and implications. to shut down or otherwise affect the performance of the fans before they experience any significant vibration from the fans. The present invention thus does not have the disadvantages associated with prior fans. It is an advantage of the present invention to provide an easily portable, space-saving, silent and vibration-free fan. It is an advantage of the present invention to provide a cooling apparatus having a fan assembly that is easily stored and removed from a housing. It is an advantage of the present invention to provide a cooling apparatus that has a fan assembly that is easily installed, re-installed and removed. It is an advantage of the present invention to provide a cooling apparatus that has a fan assembly that does not need a central hub for mounting the fan assembly. It is an advantage of the present invention to provide a fan assembly that has a simple, easy-to-make, low-cost construction. It is an advantage of the present invention to provide a cooling apparatus having a fan assembly that does not have moving parts that can break or otherwise fail. It is an advantage of the present invention to provide a cooling apparatus having a fan assembly that has no moving parts that can be exposed to 54b84cb42d
