Cash And The City Publisher: Mashable License:Freeware Platform: iOS, Android It allows you to register all your expenses, incomes and financial transactions, then analyze them and create graphs and statistics based on the information received. At the end of the day, it is all about managing and tracking your expenses. That is, what's more? It is about saving money and doing a plan for your next monthly expenditures. That's why an application that allows you to do all this is a must-have in your pocket. Cash And The City is an app that can help you do all this. It can help you register all your expenses, incomes and financial transactions, then analyze them and create graphs and statistics based on the information received. Furthermore, you can create areas of interest for each expense, such as groceries, rent, car expenses, bank or many others. This allows you to categorize each expense, so you will know when and specifically on what you have spent your money. In addition, periodical expenses and incomes can be scheduled, so that you do not have to register them every time. For example, recurrent payments, such as rent or salary can be set only once, as they will automatically update your balance after each time period. Fast graph builder Cash And The City can help you analyze your financial status by creating detailed graphs with your expenses and incomes. You can check your monthly expenses, thus analyzing any remaining savings for instance. This way, you can plan your next actions, whether it is a vacation or a simple family road trip. A seamlessly powerful finance manager Cash And The City gives you the possibility to analyze you finances by allowing you to store any data about expenses and incomes, then build detailed graphs and statistics about it. This helps you visualize your current status, then plan your
