AutoLISP and VBA have been mostly deprecated due to security concerns and lack of development. AutoCAD Architecture and many other AutoCAD products now uses .NET languages instead. The current version of AutoCAD is R2018, released in July 2016. AutoCAD 2018 is a complete upgrade of AutoCAD 2017; .NET (for architecture and engineering), and SQL (for database-driven apps) support are the main new features of the new release. The program's software version number, however, is "16.2." AutoCAD 2018 is also the first release that is built for 64-bit Windows, with a 64-bit build of the Windows operating system to match. Multi-platform AutoCAD is available for various platforms: Windows: AutoCAD 2018 for Windows is available for 64-bit Windows operating systems only. Mac OS: The first version of AutoCAD was available on the Macintosh in 1986. It was a commercial program until 1989. Linux: There are a number of open-source clones that are forked from AutoCAD's source code. Many of these are not feature-complete and rely on features that were deprecated long ago. Others use the commercial version of the source code, because this is the only source of licensing that will let them work on closed platforms. There is no official release for Linux. Connectivity AutoCAD is a stand-alone program which connects to a number of CAD systems. History Autodesk started to develop AutoCAD in 1982 as an offshoot of AutoLISP, which was written by David Kennedy. Kennedy and Steve Lucchesi became the original developers of AutoCAD. In 1985, Dave Jones, a former co-worker of Lucchesi, joined AutoCAD and became an important developer of AutoCAD. The first version of AutoCAD was written for the Macintosh in 1986. The original name was "TopoCAD", but was changed to AutoCAD in 1987. AutoCAD first came to the Windows desktop in 1989, for personal use. Initially, the drawing engine and the user interface were not capable of working on the Windows platform. After some delays, the software was released for the Windows platform. By the year 2000, AutoCAD had begun to dominate the CAD market. Development, production and distribution AutoCAD started with a team of about ten developers a1d647c40b
