

### 3D Slide Projector Crack +

3D slide show includes several kinds of items and their descriptions are as follows; \*Anaglyphs: Anaglyphs is the 3D image for stereo projection. You have to use special red-blue or red-yellow glasses for watching 3D effect and you can see black and white color objects clearly, but red and green colors are mixed. Anaglyphs can be made through the same process as 3D stereo projection. Each of Red and Blue images in Red-Blue anaglyphs are showed from the left and the right camera images of 3D stereo projector, of course Red and Blue images are the same images, but they have been recorded in a different area of the image plane by the left and the right camera. Red-Blue anaglyphs can be projected from special 3D projection lenses called red-blue anaglyph projection lenses which have two lenses for red and blue images. Be careful for the quality of your projector, If your projector has 3D glasses or interleaved images that are crosstain, you don't need special anaglyphs. You can order '3D Stereo Projector' \*Parallax 3D: Parallax 3D is an another way to show 3D image, they're made by using the stereo images from the camera, after being taken, you have to edit the images and arrange the images of the Slides, and make Parallax 3D images, of course you can use your 3D slide projector for it. \*Interleaved 3D: For the interleave 3D slide project, which has only one set of stereo images for two projectors. To watch 3D effect, you have to wear red-green glasses. Also it has no any stereo 3D anaglyphs, but the red and green images in the glasses are projected from two projectors synchronized with each other. \*Dual Projector 3D: For interleaved 3D slide, which has only one set of stereo images for two projectors, and you can watch 3D effect without any special glasses. In this case, it's the same 2 sets of stereo images for each projector, and you have to wear red-blue glasses. Also, if you use 'dual projectors' in your 3D slide project, you can watch 3D effect, without any special glasses and with

### 3D Slide Projector Crack+

1. It provides next to 0.5/0.35/0.3/0.2/0.15/0.1 -inches 3D stereoscopic slides show function, for you to enjoy the 3D movie wearing glasses.
