Pregame Skippers Welcome In FIFA Ultimate Team—the all-new game mode within FIFA—you can bring your own coach into the field to help guide your players, and create your own custom pregame playlist to dictate who your players will play in the match. With over 1,000 pre-designed build-your-own-ultimate-team match scenarios, you can find the challenge that's right for you. In addition to your own pregame coach, we've also heard fans' feedback and included a new "Goalkeeper Trainer" mechanic that will help elite goalkeepers improve their accuracy through various drills. The pregame interface is more than just a little more focused, including a new camera that takes a closer look at players and their offensive and defensive actions. It also makes it a whole lot easier to find the perfect player build in Ultimate Team. A lot of the game's visual improvements are thanks to EA SPORTS IGNITE engine, which features tessellation, skeletal animation, and real-time water. This is the first FIFA game to utilize the IGNITE engine. It

Features Key:

- The World's First Motion Capture Football- The industry-first addition to real-world player movements brings in a new level of realism to soccer gaming, allowing Pro to beautifully control both dribbling and shooting.
- Natural Player Feedback - New animations allow fans to experience special moments with more intuitive controls in the touchline.

FIFA (Fédération Internationale de Football Association) is the official videogame of the world's favourite sport - football. EA SPORTS brings you FIFA, the real game, broadcast in over 200 countries and played all over the world. FIFA gives players the opportunity to control every aspect of the game - from the way players tackle and pass, to the control and feel of the game. Year of football and celebration The year is 2004 and you are Lionel Messi. Now a pro in the Spanish team, you are used to getting the very best on the pitch. Your start to the 04/05 season is a bit of a let down as your club is not doing well. Although your team manager has promised you a new contract, all is not what it seems. Your star is not in the best shape - the rumours are flying around that he is on the verge of retiring, which if true will cause huge problems. As you go through your day, you do your best to forget the depressing news. It is just a formality really. You go about your job and all seems fine. As the season progresses, you slowly begin to realise that you are no longer a boy anymore. You are starting to grow into a man, and the game is no longer just a hobby. You have some new followers on your social network, people who have begun to notice that you are serious about your football. Some people even want to team up and try to make money from what they see as a lucrative business opportunity. With people willing to invest in you, things could start to get very interesting. Focus on the fans In this world that is where you get to live. You have made enough money now to buy yourself a nice summer residence. The personal trainer does wonders, and you feel as good as you did when you were a player. From the comfort of your own home you can jet off wherever and whenever to play football and build up your own empire. A true footballing machine. You plan to sell tickets for one of the most prestigious clubs in the world, just the clubs you love to play for, as you have grown to not like the thought of playing for a team you don't care for. Your first stadium is about to open, but you have bigger and better plans. There are some players in your team who are just as famous as you. You can't help but feel just a little jealous of their popularity and fame. They have attracted some bc9d6d6daa

In FIFA Ultimate Team, you are the manager of your dream team, customizing each one of your 27's kits in your unique style. The new game plays and feels like real football, with the tactics and skills that only games like FIFA can deliver. Discover your own style by creating a personal avatar, take a tour of the stadiums, and work your way up from League 2 to the Champions League. And with the all-new "MyClub" mode, you will get your own competitive league and be able to connect with millions of other FIFA Ultimate Team players around the world. Gameplay New Player Physics - A faster and more responsive player collision model. Players have the ability to control and steer their body once contacted by the ball. A key component of 'physics' in every game. Matchday - Players have the ability to run and run freely until they are tackled or get in the way of play. Line-breaking plays are much easier to carry out. Goalkeepers - Players can make more pre-shot saves and better decisions for landing the ball with a keeper's feet. Defenders take a longer, more accurate punch at the ball to maintain their position. Game Modes Career - Manage your career as a footballer, either as a manager or a player. Make decisions on your playing staff, recruit from the transfer market or boot up a new club from the seed of a small village, then build a team that is true to your style, against all the odds. This is the best football simulation ever created. One of the main problems with previous games is the fact that you cannot control the player in career mode. In this mode, you control the player. It's no longer about transferring the player. You can do it from the start of the game. There is the introduction of a new 'in game-leader' system which is good. This will make it very easy to manage your team. You can now control your team even when the player is in possession of the ball. The player now naturally flows towards open spaces. In previous games, you can't control the player unless you have a licence for the player. You can now control the player through the whole game. The player now has a forward dash or a circular run. The backward dash is somewhat different. It is no longer be used. It is meant to be used as a way of giving the goalkeeper a huge

What's new:
