

We Improve How Any Organization Makes, Manages, and Controls Work Assignments to External Service Partners

Easy-to-Access

Offered in a SaaS environment, VenCore™ requires no hardware or software purchase.. Pay-as-you go subscription plans maximize opportunity and minimize risk.

Simple-to-Use

An intuitive interface means that front line users are up and running in minutes. Only minimal training is needed to make users more efficient right away, freeing up valuable time and resources.

Quick ROI

Metrics, performance data, streamlined processes: VenCore™ helps organizations reduce operating expenditures and improve operating excellence.

Seamless

VenCore™ can integrate or interface with existing technology platforms to create a seamless, smooth flow of data from existing core technology systems.

VenCore™ is a Web-based, flexible and robust vendor and partner management application

The substantial financial and strategic benefits of automating interactions with partners and vendors are well documented. They drive operational, strategic and financial improvement.

VenCore™ harnesses this potential for any company that frequently assigns work outside the enterprise.

VenCore™ benefits purchasers and service providers alike

Organizations can use VenCore™ to address key operations questions:

Efficiency: Is my current assignment process as streamlined as it could be?

Partnership: How can I make sure that only approved partners are being used?

Speed: How can I make sure that turn-around time is as fast as it could be?

Quality: How can I make sure that my partners' quality is being measured and reported on?

Best Practices: How can I make sure that my service guidelines are being followed?

Metrics: I need more helpful and insightful metrics and reports for my management team.

Use VenCore™ with any type of service assignment

Complete flexibility with data forms and task rules means that VenCore™ can be used for any type of assignment and any kind of service provider. **Insurance** - Independent adjusters, appraisers, engineers, consultants, contractors, investigators, medical reviewers **Legal** - law firms, court reporters, consultants, deposition services **Property Managers** - contractors, landscapers, painters, cleaners, more

Compliance Solutions

Organizations can use VenCore™ to obtain key compliance documents from their service partners, or to improve the efficiency of all transactions they make to them.

VenCore™ Features

VenCore™ is rich with features that improve organizational performance, including:

- **Network Management** – create and manage dynamic networks of your approved service providers at a single click
- **Compliance Support** – supports hundreds of categories of vendors; capture preferred rates, license, insurance, and W9 information
- **Rating System** – capture user generated ratings of the work performed
- **Advanced Search** – find the best, approved service partner for each assignment across your approved partners or search for others
- **Service Guideline Enforcement** – automate the individual steps in your service guidelines for each type of work assignment
- **Alerts and Notifications** – receive system generated alerts for deadlines, new changes, and overdue tasks
- **Document Management** – upload documents, estimates, pictures, movies, and all types of work product on each work assignment
- **Centralized Communication** – attach notes, send messages, stay on top of overdue assignments
- **Flexible Integration** – become even more efficient by integrating VenCore™ with existing core technology platforms
