CODE OF CONDUCT FOR PARENTS OF INTERSCHOLASTIC STUDENT-ATHLETES

STUDENT CONDUCT AT ATHLETIC AND OTHER EXTRACURRICULAR SCHOOL ACTIVITIES

Students participating in school sports and extracurricular programs are expected to be positive role models for their student body. The various sports and extracurricular programs in the district are intended to promote growth, development, citizenship and social skills beyond the activity itself.

A student's eligibility for participation in various extracurricular school activities may be affected by the student's conduct. Students/athletes who violate school behavior expectations are subject to various disciplinary measures by their coach, the site athletic director and the principal. The site athletic director and/or the principal make the final determination whether a student is dismissed from a team for inappropriate conduct.

Athletes and all extracurricular participants have the following conduct requirements to remain eligible:

- ◆ Conduct by the student during competitions is regulated by the rules and regulations of the Arizona Interscholastic Association and the Bylaws of the Region Conference.
- ◆ A referral by itself may not be sufficient cause to suspend a student's participation in extracurricular activities/sports. However, depending on the nature of the infraction (severity, repetition, etc.), the coach/activity sponsor is expected to take appropriate action once they are advised of the incident(s).
- ◆ If a student has established a pattern of misconduct, regardless of whether or not suspensions were involved, the student is subject to being suspended by the athletic director, and/or principal, from all teams of which the student is a member.
- ◆ Any out-of-school suspension results in an automatic suspension from all teams/clubs/groups the student is a member of for the duration of the suspension. Not only is the student suspended from playing/participating, the student is also suspended from practices and organized activities (team workouts, meetings, matches, etc.) During an in-school suspension, the student may practice at the discretion of the coach.
- ◆ A student athlete who is suspended out of school and play during the season may be suspended from the team for that season.
- ◆ Conduct by the student after school hours which reflects negatively on the school can have a bearing on the student's ability to participate in sports and other extracurricular activities. Any after school incident that involve areas such as drugs, alcohol, theft, assault, gang activity, etc., brought to the attention of the school (coach, athletic director, principal, assistant principal, etc.) may be disciplined by the school. This discipline could involve suspension from the extracurricular activity.

PARENT PROTOCOL

If a parent has a concern with his/her student athlete, a set protocol should be followed in hopes of resolving the concern/issue. It should be noted that the selection of students to be a member of a school team is the prerogative of the school (mainly the coach). The protocol which parents should follow in regards to resolving a concern/issue is as follows:

- ◆ Contact the coach
- ◆ If not satisfied, contact the school athletic director
- ◆ If not satisfied, contact the school principal
- ◆ If not satisfied, contact the assistant superintendent
- ◆ If not satisfied, contact the superintendent who renders the final decision.

AIA POSITION STATEMENT

SUPPLEMENTS, DRUGS AND PERFORMANCE ENHANCING SUBSTANCES

PURPOSE OF FORM: All AIA Member schools are required to **ANNUALLY** communicate this AIA Position Statement on the use of supplements, drugs and performance enhancing substances to every participant in interscholastic activities. (See Article 14, Section 14.13.2)

The Arizona Interscholastic Association (AIA) views sport, and the participation of student-athletes in sport, as an activity that enhances the student-athlete's well-being by providing an environment and stimulus that promotes growth and development along a healthy and ethically based path.

- It is the position of the AIA that a balanced diet, providing sufficient calories, is optimal for meeting the nutritional needs of the growing student-athlete.
- It is the position of the AIA that nutritional supplements are rarely, if ever, needed to replace a healthy diet.
- Nutritional supplement use for specific medical conditions may be given individual consideration.
- The AIA is strongly opposed to "doping", defined as those substances and procedures listed on the World Anti Doping Agency's Prohibited List (www.wada-ama.org).
- It is the position of the AIA that there is no place for the use of recreational drugs, alcohol or tobacco in the lifestyle of the student-athlete. The legal consequences for the use of these products by a student-athlete are supported by the AIA.

In pursuit of **Victory with Honor**, the AIA promotes the use of exercise and sport as a mechanism to establish current fitness and long-term healthy lifestyle behaviors. It is the position of the AIA that the student-athlete, who consumes a balanced diet, practices sport frequently and consistently, and perseveres in the face of challenges, can meet these goals.

CONCUSSION IN HIGH SCHOOL SPORTS

A FACT SHEET FOR **ATHLETES**

Concussion facts:

- A concussion is a brain injury that affects how your brain works.
- A concussion is caused by a bump, blow, or jolt to the head or body.
- A concussion can happen even if you haven't been knocked out.
- If you think you have a concussion, you should not return to play on the day of the injury and not until a health care professional says you are OK to return to play.

What are the symptoms of a concussion?

Concussion symptoms differ with each person and with each injury, and they may not be noticeable for hours or days. Common symptoms include:

- Headache
- Confusion
- Difficulty remembering or paying attention
- Balance problems or dizziness
- Feeling sluggish, hazy, foggy, or groggy
- Feeling irritable, more emotional, or "down"
- Nausea or vomiting
- Bothered by light or noise
- Double or blurry vision
- Slowed reaction time
- Sleep problems
- Loss of consciousness

During recovery, exercising or activities that involve a lot of concentration (such as studying, working on the computer, or playing video games) may cause concussion symptoms to reappear or get worse.

What should I do if I think I have a concussion?

DON'T HIDE IT. REPORT IT. Ignoring your symptoms and trying to "tough it out" often makes symptoms worse. Tell your coach, parent, and athletic trainer if you think you or one of your teammates may have a concussion. Don't let anyone pressure you into continuing to practice or play with a concussion.

GET CHECKED OUT. Only a health care professional can tell if you have a concussion and when it's OK to return to play. Sports have injury timeouts and player substitutions so that you can get checked out and the team can perform at its best. The sooner you get checked out, the sooner you may be able to safely return to play.

TAKE CARE OF YOUR BRAIN. A concussion can affect your ability to do schoolwork and other activities. Most athletes with a concussion get better and return to sports, but it is important to rest and give your brain time to heal. A repeat concussion that occurs while your brain is still healing can cause long-term problems that may change your life forever.

How can I help prevent a concussion?

Every sport is different, but there are steps you can take to protect yourself.

- Follow your coach's rules for safety and the rules of the sport.
- Practice good sportsmanship at all times.

If you think you have a concussion:

Don't hide it. Report it. Take time to recover.

It's better to miss one game than the whole season.

CONCUSSION IN HIGH SCHOOL SPORTS

A FACT SHEET FOR PARENTS

What is a concussion?

A concussion is a type of traumatic brain injury. Concussions are caused by a bump or blow to the head. Even a “ding,” “getting your bell rung,” or what seems to be a mild bump or blow to the head can be serious.

You can’t see a concussion. Signs and symptoms of concussion can show up right after the injury or may not appear or be noticed until days or weeks after the injury. If your child reports any symptoms of concussion, or if you notice the symptoms yourself, seek medical attention right away.

What are the signs and symptoms of a concussion?

If your child has experienced a bump or blow to the head during a game or practice, look for any of the following signs of a concussion:

SYMPTOMS REPORTED BY ATHLETE	SIGNS OBSERVED BY PARENTS/GUARDIANS
<ul style="list-style-type: none"> • Headache or “pressure” in head • Nausea or vomiting • Balance problems or dizziness • Double or blurry vision • Sensitivity to light • Sensitivity to noise • Feeling sluggish, hazy, foggy, or groggy • Concentration or memory problems • Confusion • Just “not feeling right” or “feeling down” 	<ul style="list-style-type: none"> • Appears dazed or stunned • Is confused about assignment or position • Forgets an instruction • Is unsure of game, score, or opponent • Moves clumsily • Answers questions slowly • Loses consciousness (even briefly) • Shows mood, behavior, or personality changes

How can you help your child prevent a concussion or other serious brain injury?

- Ensure that they follow their coach’s rules for safety and the rules of the sport.
- Encourage them to practice good sportsmanship at all times.
- Make sure they wear the right protective equipment for their activity. Protective equipment should fit properly and be well maintained.
- Wearing a helmet is a must to reduce the risk of a serious brain injury or skull fracture.
 - However, helmets are not designed to prevent concussions. There is no “concussion-proof” helmet. So, even with a helmet, it is important for kids and teens to avoid hits to the head.

What should you do if you think your child has a concussion?

SEEK MEDICAL ATTENTION RIGHT AWAY. A health care professional will be able to decide how serious the concussion is and when it is safe for your child to return to regular activities, including sports.

KEEP YOUR CHILD OUT OF PLAY. Concussions take time to heal. Don’t let your child return to play the day of the injury and until a health care professional says it’s OK. Children who return to play too soon—while the brain is still healing—risk a greater chance of having a repeat concussion. Repeat or later concussions can be very serious. They can cause permanent brain damage, affecting your child for a lifetime.

TELL YOUR CHILD’S COACH ABOUT ANY PREVIOUS CONCUSSION. Coaches should know if your child had a previous concussion. Your child’s coach may not know about a concussion your child received in another sport or activity unless you tell the coach.

If you think your teen has a concussion:
Don’t assess it yourself. Take him/her out of play.
Seek the advice of a health care professional.

It’s better to miss one game than the whole season.
