

24 Hour Drainage Totals: Empty drains individually every 8 hours (around 7 a.m., 3 p.m., 11 p.m.). Record output for each drain individually on the output sheet. Total outputs individually at the end of 24 hours. If drains need to be emptied before scheduled times, empty and record then continue on schedule. Strip drains as directed. Call the office if any drain is less than 30 cc in a 24-hour period. If the drains tapered to this quantity over the weekend call during normal office hours to schedule drain removal.

	Drain #1	Drain #2	Drain #3	Drain #4	Drain #5	Drain # 6
