

Friday January 9th 2009 [Dental Implants and Bone Grafting: A Comprehensive Review for General Dentists.](#) Location: Holiday Inn Express, Latham NY. As a general dentist, it is imperative to understand the principles of implant dentistry and bone grafting so you can treatment plan it for your patients. Implant dentistry is here to stay and is the ideal way to replace missing teeth. Almost 20% of all US adults are missing all their teeth according to the NIH. This course is an extensive over view of these disciplines allowing you to include these modalities into your practice. This course is applicable to all implant systems and not just one product. The in depth detail given in this course and many cases presented will show you what is possible and allow you to speak to your patients with confidence. If you are looking to perform these modalities yourself this is also a great step towards that. If you already perform these modalities then this course will only further your studies. If you would like to be able to speak to your patients with more confidence about dental implants and work better with a surgical doctor, this course will allow that. Contact: Third District Dental Society 518-782-1428 for registration.

Friday February 6th 2009 Computerized Tomography Based Implant Dentistry and Bone Grafting: Prosthetic oriented treatment for the implant team. Sponsor: NYS AGD Location: Tischler Dental Woodstock, NY. Limited Attendance! Through utilizing cone beam computerized tomography (CBCT) scans, the dental practitioner can offer the most predictable, safest, and most efficient implant dental and bone grafting treatment for their patients. With the current availability of in-office CBCT, general practitioners can find local access to this technology and utilize a true team approach with their surgeon. The information offered through an interactive CBCT is unparalleled in the abundance of information offered. This course will tie together the fundamentals of CBCT with treatment planning to the end result with a team approach. The latest in third party CBCT interactive assistance will be shared. Contact NYS AGD at 914-683-1139 or <http://www.nysagd.org> to register. [Click here for course brochure](#)
