

## Hang

Claudio Caramel · 2008

Lightness is the Hang shelf distinguishing style trait. A modular system creates endless combinations. It is equipped with an in-built adjustment system in order to obtain a correct 90° angulation with the wall.

## Available models

Shelving system of extruded aluminium, provided with two characteristic slots (one on the upper and one on the under side) allowing the free positioning of the accessories. A regulation mechanism allows to obtain an exact 90° angle to the wall. Different configurations can be obtained without limits of length, by joining more pieces together.

Hang

depth 30 cm  
shelves height 7 cm  
width 80 - 120 - 160 - 200 cm
