

## MORE IN OUR RANGE

ALL OF OUR SLABS ARE MADE FROM THE SAME 100% RECYCLED MATERIAL, CARRY THE SAME 20 YEAR MANUFACTURER'S WARRANTY & LOAD RATING OF 60 TONNES. THERE IS NO MINIMUM ORDER.

### ECO HEX SLAB

Mudcontrol Eco Hex Slabs have many uses, including bases of structures, ground protection inside marquees or outside for events, exhibitions and trade shows, and are a fast way to create pathways, driveways, parking areas, and patios.

Strong, durable and lightweight, they securely interlock and are easy to install or remove. Slotted with drainage holes or closed, in grey or brown, they weigh 1.7kg each, are 4cms thick and measure 40cm on the inside and 46cms on the outside. There are 7 units per square metre, with a maximum of 235 units per pallet, covering 33.5 square metres. They require a level base.

### BLOCK PAVING SLAB

Mudcontrol Block Paving Slabs are quickly laid, free-draining and highly durable, used to create driveways, parking areas, patio areas and more in no time. Laying is much faster and easier than with individual paving stones. The only requirement is the use of in-fill material such as sand and a level base.

Each slab measures 50cm by 50cm, has a 6cm thickness and weighs 8.4kg. They connect with integrated interlocking hooks making them easy to install. There are 4 slabs per per square metre, with a maximum of 60 per pallet, covering 15 square metres.
