La Storia

L'azienda sela cars da 40 anni produce baby cars a batteria ed è leader del settore nel made in Italy.

La storia inizia nel 1972 per volontà dei due soci fondatori Gerardo e Donato De Carlo. I due giovani cugini lucani spinti da grande tenacia e spirito d'avventura decidono di lanciarsi nel campo innovativo ed inesplorato delle baby cars e creano una **piccola bottega artigianale** nell'amata città di Forlì.

La passione per le auto e lo spirito giocoso sono il motore per realizzare piccoli gioielli di manifattura in grado di regalare grandi emozioni ai bambini. I primi anni sono un susseguirsi di idee, progetti e grandi sforzi per realizzare sempre nuovi articoli e promuovere la loro attività in tutto il territorio nazionale.

I due proprietari gestiscono ogni aspetto che va dalla progettazione alla realizzazione fino alla commercializzazione.

Ogni prodotto è frutto di una raffinata ricerca e di grande passione.

Negli anni l'azienda cresce, acquisisce dipendenti e collaboratori, consolida la rete distributiva e potenzia la rete commerciale, adotta quindi tecnologie sempre più avanzate e si apre al mercato estero. In breve tempo la Sela Cars conquista la leadership del mercato italiano ed internazionale. La totale dedizione al lavoro e all'impresa dei due titolari conquista tutti i componenti della famiglia e negli anni '90 le porte dell'azienda si aprono alla seconda generazione dei De Carlo. L'ingresso dei quattro giovani figli è caratterizzato dall'ampliamento del catalogo prodotti con la creazione di modelli sempre più diversificati e moderni in linea con le tendenze del periodo e si affianca alla consulenza di designer specializzati con l'obiettivo di ricercare le soluzioni ottimali ed offrire i migliori servizi.

Da attività artigianale si trasforma quindi in una realtà industriale, particolarmente impegnata dal punto di vista del controllo della qualità e della sicurezza dei "piccoli piloti".

History

Sela Cars has been producing battery operated cars for 40 years and is the leader in the 'Made in Italy' field.

The story starts in 1972 with an idea of Gerardo and Donato De Carlo , who quickly became partners .

The two young cousins driven by great tenacity and spirit of adventure decide to launch themselves into an innovative and unexplored field. They create a small original company with the scope of hand making little battery cars in the 'beloved city of Forlì. The passion for cars and playful spirit are the driving forces behind the small manufacturing gem, able to give great excitement to children. The early years are a succession of ideas, projects, and great efforts to produce new products and promote their business throughout the country. The two owners manage all aspects of the company ranging from design and marketing to manufacturing. Each product is the result of a sophisticated research with a lot of passion. Over the years Sela Cars grows, acquires employees and associates, consolidates its distribution network and enhances the commercial one, then adopts the most advanced technology and enters into the export market. Before long, Sela Cars has become the leader of the Italian and international market. The total dedication to the job and the company of the owners conquer all family members and in the early 90's the company opens it's doors to the second generation of the De Carlo family. The entrance of four young children is characterised by expanding the catalogue and product range with the creation of models more and more diversified and in line with modern trends of the period and is accompanied by the advice of specialized designers with the aim of finding optimal solutions, offering the best services. The original work shop is thus transformed into an industrial reality, particularly involved in the point of view of the quality and safety of "little riders".

La città dei più piccoli City for youngsters!

Un parco giochi è una piccola città a misura di bambino, nella quale socializzare, divertirsi e crescere imparando a conoscere il mondo degli adulti. La nostra idea è quella di eliminare tutti i pericoli che i bambini da soli non riescono a prevedere: imparare ad affrontare i rischi in un ambiente sotto controllo li aiuta a sviluppare quelle risorse indispensabili per superare le difficoltà del mondo che li attende oltre il parco.

SELA CARS assiste il cliente nella realizzazione del proprio parco, perché solo con una corretta progettazione si possono realizzare strutture altamente sicure ed educative.

Le diverse attrazioni devono essere collocate in base alle specifiche caratteristiche del Parco ed alle esigenze del cliente.

Oltre alle vasche Aquabumper e alle classiche piste da gara, è oggi possibile realizzare percorsi a tema con segnaletica stradale, con lo scopo di educare i più piccoli alla cultura della sicurezza sulle strade: è nella nostra filosofia a credere che l'esperienza di gioco vada presa con grande serietà, questo perché il gioco lascia un'impronta decisiva per tutta la vita.

Per SELA CARS prevenire è meglio che curare!

An amusement park is a small child's city, where they can enjoy learning to grow up. Our concept is to eliminate the dangers that children face on their own and to allow them the freedom to develop the ability to overcome problems that lurk in the world beyond the park.

SELA CARS will help the client to plan a park. Expert advice is required for a project to be safe and still attractive to children.

SELA CARS can now offer an alternative to the Aquabumper pool and classic car track. SELA CARS have introduced themed driving school tracks with traffic lights, the aim is to teach youngsters to be street safe. It is SELA CARS philosophy that play must be taken seriously.

Lessons taken seriously are with you for life. For SELA CARS prevention is better than cure!!

***Prima gattonano, poi camminano,
e subito dopo....vogliono guidare
Children love to copy adults and driving gives
them so much satisfaction.***

Diventare grandi! O meglio sentirsi grandi.

I bambini crescono e imparano a conoscere il mondo che li circonda attraverso il gioco, sviluppando la propria fantasia ed esercitando le proprie capacità fisiche e di comunicazione. I prodotti **Sela Cars**, da oltre quarant'anni, assecondano questa importante esigenza con prodotti di elevata qualità che garantiscono i massimi standard di sicurezza.

La progettazione a misura di bambino unita alla consolidata esperienza, nonché il contenuto tecnologico della produzione, sono una valida garanzia per la realizzazione di parchi giochi di elevato livello educativo e di facile amministrazione da parte dei gestori.

**Children love to copy adults and driving gives
them so much satisfaction.**

The development of children through role play and exercising their physical and communication skills is very important for growing up. **Sela Cars** have been supporting child development for 40 years. Our quality products have been designed to the highest safety product specification and yet enable the development of hand and eye co-ordination.

Sela Cars produces technology that enables educational amusement parks that children enjoy but with easy management for operators.

Mini cars ...per un grande divertimento ...for great fun

Queste baby car sono state progettate per bambini di una fascia di età compresa tra i 3 e i 6 anni, rispettano i più elevati standard di sicurezza e grazie ai loro ridotti ingombri, la pista che le accoglie può avere dimensioni minime ed essere collocata anche in strutture indoor.

The baby cars are designed for children between 3 to 6 years. They have high safety standards and because of their size can operate on a small track. Small tracks can be accommodated inside.

La prima moto non si scorda mai *The first bike ride will never be forgotten*

Questi articoli sono dedicati alla stessa fascia di età delle baby cars medie, e possono essere utilizzate all'interno delle stesse piste, perché hanno analoghe dimensioni e prestazioni. Come tutti i nostri prodotti anche le moto sono costruite per durare a lungo, perché i bambini quando giocano mettono a dura prova anche i materiali più robusti.

The Moto range is suitable for the same age group as the medium baby car. The rides have the same dimensions and performance as the medium baby car and can be used on the same track. All Sela Car products have been designed and built with strong materials for reliability.

Automobili medie/medium cars

Semaforo verde, pronti... via!

Green light, ready....go!!!

Queste automobiline, che sono adatte a una fascia di età che può spaziare dai 5 ai 12 anni, assecondano al meglio questa fascia d'età nella quale i bambini passano dall'esplorazione di aree vicine a quelle più lontane, sviluppano le proprie capacità fisiche e amano le sfide e i giochi di ruolo con regole. Per questi motivi la nostra produzione è così articolata e varia dalla classica Formula 1 alla S-Mart a due posti adatta alla realizzazione di parchi a tema.

The medium cars are suitable for ages between 5 and 12 years. This age group love the challenge of developing hand and eye co-ordination and driving roleplay. For this reason our production ranges between our classic Formula 1 car to the 2 seater S-Mart suitable for theme parks.

Automobili grandi/large cars *Lasciati trasportare dalle emozioni* *Let your emotions go!*

Questi veicoli sono caratterizzati da dimensioni e prestazioni superiori, sono quindi adatti non solo ai bambini, da 10 anni in su, ma anche agli adulti e necessitano di piste di dimensioni adeguate. Con la Formula Senior e i go-kart si possono realizzare tracciati per la simulazione dei Gran Premi, mentre i fuoristrada a due posti possono essere utilizzati anche come mezzi di trasporto all'interno di aree private o grandi parchi.

The vehicles are big in structure and performance. They are suitable not only for children from 10 years of age but also for adults. The tracks require design planning for suitable sizing. Tracks in the Grand Prix theme are a possibility for the Formula Senior and Go-Kart models. The 2 seat all-terrain vehicle can be used as a means of transport in large parks.

LA PRIMA REGOLA DI UN BAMBINO E' QUELLA DI TRASGREDIRE LE REGOLE:

il progetto della vostra pista deve considerare l'imprevedibilità e l'incoscienza dei più piccoli. Per garantire sicurezza e una facile gestione della struttura, è necessario seguire semplici regole dettate dall'esperienza.

IL TRACCIATO

E' buona norma evitare percorsi troppo piccoli e tortuosi, un circuito più grande con curve "dolci" ridurrà gli impatti e di conseguenza i danni alle vetture, oltre a permettere l'aggiunta di altri veicoli in futuro.

Sono assolutamente da evitare i tracciati a 8 che possono causare impatti frontali. L'accesso dei bambini alla pista deve essere unico ed è consigliabile adottare il SISTEMA DI FINE CORSA per evitare che essa venga attraversata terminata la corsa. La dimensione del circuito e la larghezza della corsia devono essere proporzionati al tipo di baby cars per la quale la pista è destinata, in genere la regola è quella di realizzare una corsia larga il più possibile, che però non permetta l'inversione ad U.

Suggerimenti:

Baby Cars e Moto a 12V = Larghezza corsia 3 metri

Go Kart 24V = Larghezza corsia 4 metri

Dimensioni piste

per Baby Cars 12V (Utilizzate più spazio per i Go Kart 24V)

4-6 mini cars = 12 x 6 metri

6-10 mini cars = 16 x 8 metri

10 - 15 mini cars = 20 x 10 metri

Le piste per i Go Kart devono avere almeno 15/20 metri di rettilineo per non surriscaldare eccessivamente l'impianto elettrico e di conseguenza danneggiare la scheda elettronica. Il circuito deve essere facilmente accessibile alla zona di rimessa/carica batterie.

I MATERIALI

La PISTA deve essere realizzata utilizzando una superficie liscia e dura per ridurre l'usura delle gomme e facilitare la guida: asfalto, cemento liscio, legno. E' importante garantire lo scolo dell'acqua piovana, dando una leggera pendenza al tracciato. La BARRIERA DI PROTEZIONE (alta circa 15 cm) deve essere capace di assorbire gli urti e allo stesso tempo deve permettere al veicolo di scivolare via e non incastrarsi. Un'ottima soluzione è data dai pneumatici (legati inseriti per metà nel terreno). La BARRIERA CENTRALE, che può avere le stesse caratteristiche della barriera di protezione, può essere dotata di un perno-ruota che aiuti il veicolo a sterzare nelle curve più strette.

SELA CARS può fornire a richiesta diverse tipologie di PISTE PREFABBRICATE, dalle forme e dimensioni più appropriate, realizzate con i migliori materiali.

Mini car track project

IT IS A CHILD'S INSTINCT TO BREAK RULES:

The design of the track must anticipate the irresponsible and unpredictable behaviour of children. To guarantee safety and easy management of the track, it is necessary to follow some simple rules.

THE TRACK

Avoid small tracks with tight bends. A larger smooth track with gentle bends will reduce impact damage and allow for extra car expansion in the future. Avoid track design that could cause head on collision.

Definitely avoid a figure 8 track. Ensure there is a single entry onto the track. It is advisable to fit the AUTOSTOP SYSTEM to avoid children crossing the circuit. Circuit dimensions and lane width must be tailored to the model of car to be operated. The track width should not allow the cars to U-turn.

Our recommendations:-

12V Minicars/bikes 3 metre lane width

24V Go Kart 4 metre lane width

External track dimensions:

For 12V cars/bikes (allow more space for 24V karts)

4 – 6 Minicars/bikes 12m x 6m

6 – 10 Minicars/bikes 16m x 8m

10 – 15 Minicars/bikes 20m x 10m

Go Kart tracks must have at least 15/20 meters in a straight line before the bend to avoid excessive load on the electrical equipment which would result in electronic card damage. Ensure the storage/battery charging area is easily accessible from the track.

MATERIALS

The track must have a smooth and hard surface, for example compacted asphalt, smooth concrete or timber. This will reduce tyre wear and make driving easier. Allow a slight fall for drainage.

PERIMETER FENDERING

(15 cm high) must be able to absorb impacts and allow vehicle bumpers to slide along the fendering.

A suitable system using tyres is a popular option (linked or inserted in the ground)

The CENTRAL RESERVATION can be similar to the perimeter fendering. The ends can be fitted with a rotating wheel island that helps the vehicles round the corner if the driver takes it too sharply.

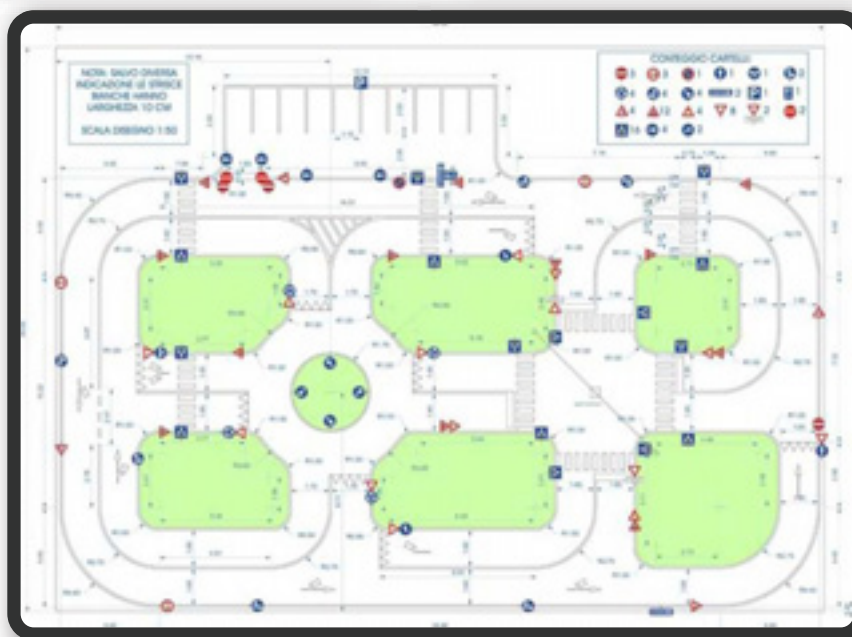

SELA CARS

can supply on request PORTABLE TRACKS, of various shapes and dimensions.

Our tracks are built with best materials.

Perché complicarsi la vita, quando la baby car può fermarsi dove vuoi tu? *Why complicate life, when you can decide to stop baby cars where you want ?*

La gestione di un parco giochi richiede un grande impegno, ed il momento in cui termina la corsa delle macchinine è sempre tra i più delicati. Tutti i veicoli SELA CARS possono essere equipaggiati di un SISTEMA DI FINE CORSA, così il veicolo si fermerà sempre nella stessa posizione: la più comoda e sicura. Alla fine del tempo la spia, di cui è dotata ogni baby-car, inizia a lampeggiare ed il motore si fermerà solo quando il veicolo passerà sopra la striscia magnetica inserita nel circuito, che si trova in genere in prossimità della zona di parcheggio. Si evita così di dover recuperare le automobili ferme lungo la pista e di fare attraversare la stessa dai bambini, una volta scesi dalla vettura.

Striscia magnetica
magnetic strip

Safety can be a problem on a mini car track when the car ride time's out. All Sela vehicles can be fitted with an auto-stop system. This enables the vehicles to stop at a predetermined position. When the ride has its time out, the warning light will flash. The ride will only stop when it passes over a magnetic strip, which is embedded in the track at the point where the ride is required to stop, generally near the entry point. This will save the children from risk in crossing the track to access the rides.

l'alta tecnologia al servizio dei più piccoli

*Questo dispositivo, mette l'elettronica
al servizio dei gestori dei parchi giochi, semplificando
la vita e offrendo un servizio fino a ieri impensabile*

high technology to serve youngsters

*This electronic device simplifies the
minicar track operation for the amusement
park operator, which would have been
unthinkable till recently.*

*Esclusivo di SELA CARS, questo ausilio è facilmente programmabile e personalizzabile.
Permette di gestire a distanza tutte le attrazioni del parco (sia i battelli che le baby cars), dando
la possibilità di intervenire in tempo reale sulle più svariate funzioni: dalla regolazione delle
caratteristiche dinamiche del gioco alla gestione dei crediti, migliorando considerevolmente
la sicurezza dei bambini e richiedendo un minor numero di personale nel parco.*

- Controllo in tempo reale di: accelerazione, decelerazione, frenata, velocità.
- Controllo in tempo reale del tempo di durata della corsa.
- Regolazione del volume del suono dell'attrazione

- Gestione in tempo reale dello start e dello stop
- Controllo in tempo reale dell'autonomia delle batterie
- Gestione dei crediti (incremento e decremento)

The high technology controller, exclusive to SELA CARS, is easily programmable and customizable. It allows for the remote control, from a distance, of all Sela boats and cars. This gives the possibility of varying functions from dynamic characteristics, adjustments of the ride and credit management. Therefore considerably enhancing safety and lowering staff requirement in the park.

- Immediate control of: acceleration, deceleration, braking and speed.
- Immediate control of ride time.
- Volume adjustment of the ride

- Immediate control of start and stop.
- Immediate monitoring of battery level
- Credit management (increase and decrease)

Con l'esperienza maturata negli anni e con la continua ricerca SELA CARS ha portato miglioramenti importanti nella produzione di baby cars dotando, di serie, tutte le vetture con questi accessori:

RIDUTTORE A PIGNONI

Con questo accessorio si riduce drasticamente la manutenzione ordinaria, senza doversi preoccupare di regolare periodicamente cinghie o catene utilizzate in passato.

REGOLATORE DIGITALE

Grazie alla tecnologia di questo accessorio, l'operatore ora può regolare velocità, tempo, suono, parametri di accelerazione e decelerazione della vettura, attivare o disattivare il sistema fine corsa, utilizzare la vettura con o senza gettoni, stabilire la quantità di crediti per una corsa o controllare quanti gettoni ha incassato una vettura.

SPIA CARICA BATTERIA

Ogni vettura è equipaggiata con questa spia che indica lo stato di carica della batteria, avvertendo l'operatore quando è giunto il momento di ricaricare la batteria, evitando di scaricarla eccessivamente. Questo piccolo accessorio può quindi aumentare significativamente la vita media di una batteria.

PARAURTI POSTERIORE IN PVC

Per diminuire e facilitare la manutenzione sulle nostre vetture, il paraurti e le protezioni laterali delle ruote posteriori sono stati sostituiti da un paraurti in PVC più resistente, che consente facilmente la sostituzione dei pneumatici

With the experience gained over the years and with continuous research SELA CARS has brought major improvements to the production of baby car equipment as standard, all cars now have these accessories:

PINION TRANSMISSION GEAR

With this accessory, routine maintenance is dramatically reduced. Operators don't have to worry about adjusting transmission belts or chains as regularly carried out in the past.

DIGITAL SPEED CONTROLLER

Thanks to this item, the operator can now adjust speed, time, sound, acceleration and deceleration parameters of the car, enable or disable the end switch system, use the car with or without tokens, set the amount of credits per drive or check how many tokens a car has taken.

INDICATOR BATTERY CHARGE

Each car is equipped with this warning light that indicates battery charge status, alerting the operator when it is time to recharge the battery, avoiding excessive discharge. This small accessory can thus significantly increase the lifespan of a battery.

REAR PVC BUMPER

To reduce and facilitate maintenance on our cars, rear bumper and rear wheel side guards have been replaced by a more resistant PVC bumper, which allows easy replacement of back tires.

Art.D

Battelli e vasca/Boats and pool idea rivoluzionaria revolutionary idea

Installa la tua vasca per bumper boats

I bumper boat per fare divertire i più piccoli richiedono una vasca o una piscina per il loro utilizzo. Potete realizzare questa attrazione utilizzando un laghetto, una piscina interrata o in muratura. Sela Cars, realizza anche piscine componibili che non richiedono alcuna opera muraria.

LA VASCA

L'altezza dell'acqua necessaria per un corretto utilizzo dei bumper boats è di 50/60 cm. I pannelli delle piscine sono facilmente adattabili per qualsiasi dimensione richiesta. Consigliamo di realizzare le vasche a forma rettangolare per facilitare il recupero dei battelli al termine della corsa.

Le dimensioni standard consigliate per le piscine sono:

Misura piscina 12 X 6 mt. Per 6/7 Bumper Boat

Misura piscina 16 X 8 mt. Per 8/10 Bumper Boat

Misura piscina 20 X 10 mt. Per 10/14 Bumper Boat

Su richiesta possono essere fornite piscine di altre misure

I MATERIALI

La VASCA è realizzata utilizzando pannelli zincati alti 70 cm e lunghi 200 cm. Il montaggio è alquanto semplice, basta collegare tutti i pannelli nella dimensione richiesta e agganciare all'interno un telone in PVC. Per permettere un facile accesso ai battelli da parte dei vostri piccoli clienti, vengono montate pedane in alluminio attorno alla vasca.

La nostra gamma è completata da depuratori, skimmer, scope aspiranti e prodotti chimici per mantenere l'acqua sempre in ottime condizioni igieniche.

Install our pool for bumper boats

***For children to enjoy themselves you need a pool or a pond in order to use the bumper boats.
You can build this attraction using a small lake or an embedded or walled swimming pool.
Sela Cars also produce portable swimming pools that don't need any construction work.***

THE POOL

The correct water level for a bumper boat is 50/60 cm. The panels for the pools can be easily adapted to any required dimension. We advise you build rectangular shaped pools to allow easy boat retrieval at the end of the ride.

Standard dimension advised for the pool are:

Pool size 12 x 6 mt. for 6/7 Bumper Boat

Pool size 16 x 8 mt. for 8/10 Bumper Boat

Pool size 20 x 10 mt. for 10/14 Bumper Boat

On request we can supply different sized pools.

MATERIALS

The POOL it's built using galvanized panels 70 cm high and 200 cm wide. Assembling the pool is easy, just connect all the panels of the required size and fasten a PVC tarpaulin inside.

***Aluminium footboards are assembled around the pool to allow easy access to the boats for children.
Our accessories includes filters, skimmers, water broom and chemical products to keep water always in good hygienic conditions.***

Giochi Statici-Stazioni di Ricarica **Amusement Equipment-Battery Charging stations**

Nonsolo parchi.

Equipment for amusement parks and amusement arcades.

La ditta SELA CARS produce articoli di supporto alle attrezzature presenti nel parco, come le efficienti stazioni di ricarica che in breve tempo rimettono in movimento più baby cars contemporaneamente, ma anche attrazioni per Sale Giochi, le quali possono essere collocate sia all'esterno che all'interno e garantiscono temperature calde anche quando fuori è freddo.

SELA CARS also produce a multi-station battery charger that can simultaneously charge a number of mini cars. SELA CARS also produce equipment for amusement arcades that can be installed indoors or out.
