

Kiowa

Industrial Hose | Hose Assemblies | Fluid Power | Site Services

Hose

Our wide range of rubber and composite hoses are suitable for applications in industries such as industrial maintenance, agriculture & food, chemical & petrochemical and construction & environment.

Hose Assemblies

Selection of the correct hose and fittings for the assembly are important so we use the STAMPED process to ensure that all aspects of the application have been considered. We can pressure test the assemblies in house to NAHAD, BFPDA recommendations with a test certificate being kept on file for your records. Our swaging capabilities go up to 10".

If required we can also mark and label your assemblies or etching can be used where stainless steel fittings are used.

Ducting

Flexible ductings are available for any industrial application in PVC, polyurethane, rubber, canvas or silicone.

Bespoke Hose

Custom, hand built straight and shaped hoses built to your specification and design.

Couplings & Quick Release Couplings

A comprehensive range of industrial hose fittings, clips & clamps, threaded and flanged quick connect couplings, steam couplings, dry disconnect couplings, Bauer and fire hose couplings.

Hose Reels

We supply standard off the shelf reels, reels fitted and ready for use and bespoke reels designed and built to your requirements. We have a range of polypropylene, stainless steel, high visibility, large frame, adblue and ATEX approved reels.

Hydraulics

We offer a full range of hydraulic hose, fittings and couplings as well as a full range of supplementary products such as sleeving technology, RFID systems, hose diagnostics and monitoring systems, self-assembly systems and we also offer safe hydraulics training either on your site or at one of our branches.

Pneumatics

Our range of pneumatic products ensures high performance and provides the most efficient production processes for your business. The full range of Festo products is available on our website.

Stores

- Pipe & Pipe Fittings
- Valves • Gauges • Pumps
- Cleaning & Washdown • Refuelling & Lubrication
- Castors • Spill Control • Rubber & Sponge

Plastics

As well as supplying full and part sheets, we operate a bespoke plastic fabrication department which allows us to fabricate to your drawings in a range of different materials such as polycarbonate, acrylic, PETG, PVC, polypropylene and polyethylene.

Belting

We work together with our customers to provide technical advice and guidance with your belt selection. We supply fabric based/coated conveyor and processing belts, accessories, modular belts and positive drive belts such as Cleandrive™ and HyClean™.

Kiowa SITE SERVICES

Hose Management - onsite service and testing. Our online hose management portal **Lonan** allows access to results, test certificates and details of failed hoses.

BAUER/FAN - Annual onsite servicing by trained Kiowa Site Service Engineers.

Fire Extinguishers - Annual onsite servicing by trained Kiowa Site Service Engineers.

Stores Management - Let us manage your bin stocks, establishing your stock profile and maintaining your agreed stock levels.

TODO - We have two UK TODO service centres for dry break couplings. Repairing and replacing the internal seals and parts as required and re-pressure testing them ready for use.

Why we are different...

- Custom made products & services
- Leading by example
- Site surveys
- Training courses
- Online accounts
- Delivery when you need it
