

## VIDEO WALL - KIOSK SERIES

### DESCRIPTION

The WTD video wall solutions are created and designed for vertical market applications, such as shopping center, financial, educational, terminals information.

They can employ also with high quality interactive touch screen, with excellent response time and until 32 points touch, with a nice truly flat front surface and narrow border.

The high grade LCD panels deliver high-resolution and high clarity images.

Their LED backlights not only prolong the work life, but also decrease power consumption and module weight.

The single panels are created with a special narrow border to get the possibility to install them so near between them that it will seems to watch an only single interactive wall.

They employ special panels design with high technical performances to support a front impact for the outdoor employ and a nice look such as narrow border realized also to prevent the entry of the dust and water resistant for the outdoor versions.

These video wall solutions can be installed with multiple mounting options configurations.

The single panels are everyone with CE / FCC / CCC approvals.

### APPLICATIONS

- Public Area
- Financial
- Shopping center
- Information terminal

### KEY FEATURES

#### Design

The appearance of the panels employed by WTD company meets the needs of any player in the world for these special interactive wall configurations solutions.

#### Visual Impact

They have an sleek design, offering wide viewing angles and clear, crisp images, which not only brings customers a stronger visual impact, thanks also to the narrow border panels.
