

## QUICK START

Origin is ready to start playing music right out of the box. This section will show you how to use Origin to begin enjoying your music quickly. For more in-depth directions please refer to the Enjoying Your Origin section.

- 1 Remove the Origin desktop and portable speakers from the box.
- 2 Dock the portable speaker to the desktop speaker using the magnetic prongs on the back of the desktop speaker.
- 3 Remove the power adapter and connect it to the desktop speaker using the DC 16V jack. Plug the power adapter into a wall outlet.
- 4 Turn the Origin on using the ON/OFF switch. You will hear a welcome tone to indicate the power is on.
- 5 Make sure your Bluetooth® connection is enabled on your music device.
- 6 Press the Bluetooth® button found on the back of the portable speaker. When Origin has connected to your device, you will hear a tone (this may take several seconds). You can check your device's Bluetooth® manager to verify the Origin is connected.

**NOTE:** : It is recommended that you pair your device to the portable speaker before docking it onto the desktop speaker.

- 7 Press the Play button on the portable speaker and begin enjoying rich, room-filling sound. Adjust the volume using the + and – buttons found on the top of the desktop speaker.

**WARNING –** Overexposure to loud sounds may cause permanent damage to your hearing. Use sound judgment when increasing the volume of your music.
