

KINDLE CHAMPION

Thank you for purchasing Kindle Champion:
My Secret and Super Cheap Writing Source to “knock
out” your competition!

*Have you struggled to write content, or have content written,
in good quality, cheaply?*

**All of the “gurus” have probably told you... quality over
quantity... But what they didn’t tell you is that you can have
both!**

I have paid as much as \$500 for a book that has FAILED me... and I wish I could get that money back and use it here.

What I am sharing with you here is a website that I’ve used and isn’t very well known. It can be used to write books for as cheap as \$10 to \$50, without compromising quality.

I’m not going to spit you BS in this report, I’m going to give you exactly what you need to know and tell you why you need to use the site.

The website is called www.EpicWrite.com.

Though this report and the videos accompanying it will be relatively short, this is one of the most powerful assets I've added to my publishing in recent years.

I've spent time using Guru.com, Elance, ODesk, etc to have my books written. You CANNOT depend on these freelancers..

Let me tell you why:

I once had scheduled out 5 book launches and I had one book that it was going to revolve around.

I had five separate writers, all very high ratings on all of them. I was paying about \$250 or so per book, so it turned out to be over \$1250 for all five.

The other four books were written with no problem, I got them back, some needed editing, etc which took another week. Not a big deal, I scheduled that in. I kept in touch with one of the writers but I hadn't gotten a sample from him. "He" kept messaging me telling me that everything was all good, and he will send the draft to me soon.

.... Turns out that it was his wife messaging me from ELance and she had been lying. Unfortunately, her husband (the writer) had been in the hospital for 3 weeks and hadn't written a single word of the book.

I felt bad that he was in the hospital, but couldn't bounce back from having to go through the refund process, wait another 3 weeks for the book to be written, etc.

Bottom line, my entire plan for the 5 book launches was ruined. I had to launch them later on when my marketing wasn't scheduled and it didn't turn out as well as I had hoped....

And then... I found www.EpicWrite.com.

EpicWrite was founded in 2010 and was created mainly for article creation.

They have worked with big name startups and help many internet marketers and web developers by creating content for them.

You might be thinking...

These are writers that speak different languages that will not be able to write well in English.

That is NOT the case here.

While EpicWrite does employ some foreign writers to write their lower quality content, we are not going to use them, so don't even worry about it.

We are going to have a great English writer write our content and an Editor look over and edit it... for CHEAP!

That leads me to talk about EpicWrite's different levels of writing that they have.

EPICWRITE'S WRITING OPTIONS

BASIC	PREMIUM	PROFESSIONAL
\$0.6 / 100 Words	\$0.8 / 100 Words	\$1 / 100 Words
3 Stars Quality	4 Stars Quality	5 Stars Quality
7 Days Delivery	5-7 Days Delivery	3-5 Days Delivery
One-Time Revision	One-Time Revision Editor Review (Proofreading)	Unlimited Revision Editor Review (Proofreading) Native English Writer

Above, find a photo from EpicWrite's website that describes the different payment options that they have.

Just as a preface, I am not connected to, or an affiliate of, EpicWrite at all...

I am a firm believer of "Practicing what you preach" ... so I actually use EpicWrite myself for all of my books.. That is why I am recommending it here for you.

I'll be real with you... the Basic option above is probably crap, don't use it, I never have. I once used the "Premium" option for a lower quality book and I was actually happy with it after I had it revised.

I highly suggest the Professional Option:

- It costs \$1 for 100 words
- It is 5 stars quality
- I usually got my content back in 3 days.
- You can have it revised by a top notch editor as MANY times as you want
- Best of all..... It is written by a native English writer... a good one at that.

Let's think this through... if we want a 1000 word, small children's book written, it would cost us.....

$\$1 \times 100 \text{ words} \times 10 \text{ sets of } 100 = \text{\$10.}$

TEN DOLLARS!!

Many of you might be thinking... I'll never publish a 1000 word book. You're right and wrong. The trend in self-publishing is moving towards also having smaller books with illustrations and pictures that still amount to over 30 pages! Fiction stories and romance books are moving toward this trend!

Think... if you had one page with 50 words or so on it, and one picture each, you would, immediately have 20 pages of content.... For \$10.

I personally don't do just \$10... I actually pay about \$25-\$30 for each book, so about 3000 words roughly. EpicWrite may be raising their prices by ten cents for each option, which is what I've been told by their manager, but that is STILL a great deal you won't get anywhere else.

What's awesome about this is that 99% of the time, the writer is trying to completely cover the subject you've told them to write about, so they end up writing more content for you (more words) at NO EXTRA CHARGE!

I've even had them write a children's book for me and asked them nicely, for no extra charge, to add in royalty free images. They added over 40 images, and I uploaded my book to Amazon and am seeing immediate royalties on it.

Ok, so now we know to use the Professional writing option on www.EpicWrite.com. You can write a 5000 word book for \$50 if you'd like, which is an awesome DEAL.

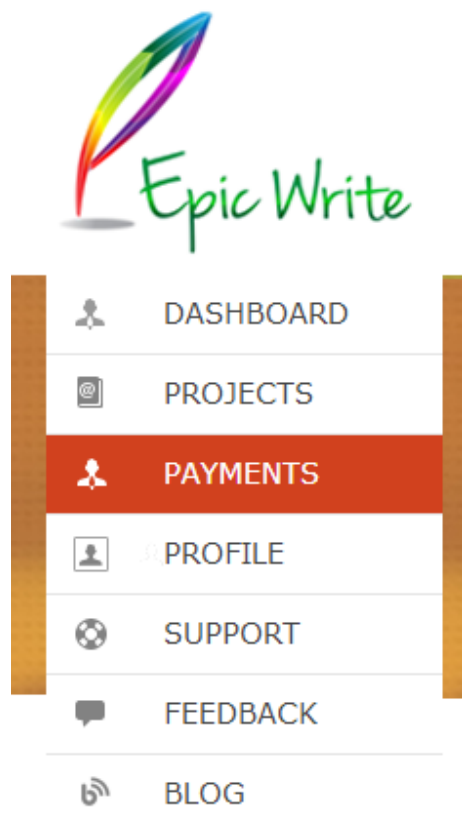

So.. how do we start?

EPICWRITE.COM AND ADDING CREDITS

Make an account on www.EpicWrite.com.

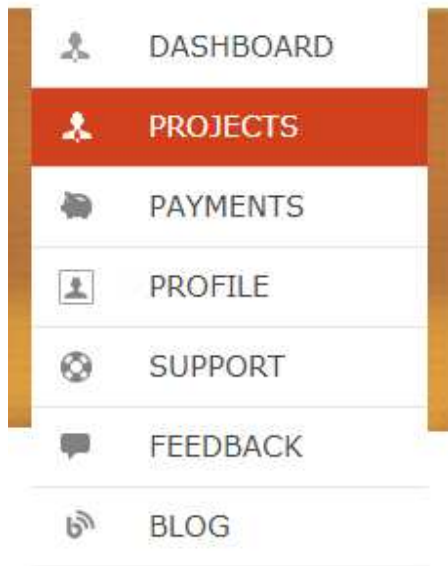

Once you've done that, login to your account by Clicking "Sign In" at the top right of the page.

Before we start having our content written, let's add some money to our account. Do that by navigating to the "Payments" section in www.EpicWrite.com.

Now click on "Buy Credits" and add however much money you'd like to your account. If you'd like a 1000 word book, you'll need \$10 for the Professional option. Which means... you'll need 10 credits. 1 credit = \$1.

BUY CREDITS

**Now that that is done, go to “Projects”,
then click on “New Project”.**

NEW PROJECT

Now we will be creating our project so that a writer will write our content for us! But first comes the great content of this guide...

Barely ANYONE knows this, which is what makes this content unique.

EpicWrite can write a LOT more than you think.

I've had TONS AND TONS of books written with them and I've spoken to their support on numerous occasions.

I've noted down everything that they can write and do for you and your publishing company.

I've used almost every option, if not all, for my publishing ventures.

HERE IS WHAT EPICWRITE CAN DO/WRITE FOR YOU:

- Biographies
- Guides on any subject
- Self-Help Books
- Non-Fiction Books – Practically on ANY subject
- Fiction – from Children to Adult Fiction!
- Erotica
- And they can even Ghostwrite for you!

Guess what else?

EpicWrite's writers can also Make up a story for you if you have NO idea what you're doing!

You can give them somewhere to start and they can write it for you.. OR, you can leave the book completely in their hands and they will make it up for you.

Ok, now we know that EpicWrite can practically write whatever you want. I know a lot of people that think that EpicWrite can only write non-fiction. WRONG. The owners actually have more fiction requests than non-fiction for books a lot of the time.

If you don't already know, fiction tend to sell more than non-fiction, and generally it seems to be more expensive to have written. NOT on EpicWrite! All the same price here for a LOT more value!

Let's get back to getting our content written.

You should be in Projects > Add Project.

Here is what you'll see... let's go over each of these fields.

EPICWRITE PROJECT FIELDS

Project Name: The name you want to show up in your projects dashboard so you know what the project is about.

General Topic: Write what your book is about here. If it is a book about a certain animal, or if it a romance fiction novel, etc. write that here. Just write the overall topic.

Project Details: Here is where you explain what your book is about. You'll tell them in this section that you want them to write the book in your template, so you can copy and paste!

File Included: Go into the Extras > Project Details CopyPaste template for the exact template to use here for best results! In this document, you will see that I portion off a part of the words for them to write the description for me! I suggest using the template and doing this as well.

Keyword Density: This is NOT for an article, so make sure to choose N/A!

Attach File: Attach your book template here for them to write directly into!

File Included: Go into the Extras > Book Template for the exact book template I use for all of my books! Feel free to add notes here for them to change certain chapter headings, etc. Note down anything else you'd like in this document.

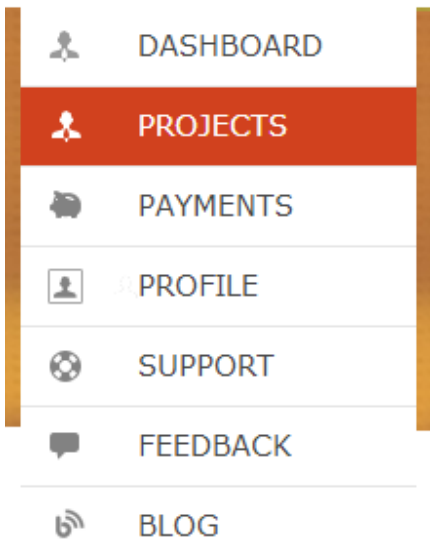

Quantity: 1 (we are only having one book written on this topic)

Word Count: This is where you put the word count that you'd like to have written. This could be 1000 words or 5000+ words. Keep in mind that the longer the book the longer it will take (obviously).

Once that is done, choose the Professional option and submit your project!

MANAGING YOUR PROJECTS

You can manage all of your projects in the Projects section. You'll be sent an email when your project has started and writers are assigned to the project. You'll also get an email when the project is finished and ready to review.

STILL NEED MORE SUPPORT?

Have any other problems or want more support?

Use the Live support chat button on their site.

At certain random times in the day, if you look at this Contact Us box at the bottom right of your screen, there is sometimes a live agent on the other end that will handle your revision or problem immediately.

A screenshot of a 'Contact us!' widget. The widget has a blue header with the text 'Contact us!' and a downward arrow. Below the header, it says 'We love to hear from you! Leave your message below.' There are three input fields: the first is labeled '<click here> and type your Name', the second is labeled '<click here> and type your Email', and the third is a larger text area labeled 'Type your concern.'. At the bottom right of the form is a red 'Send' button. At the very bottom, it says 'POWERED BY OLARK'.

Also, if you go into “My Account” you’ll see that your account Manager’s Skype username is up there for you to contact him.

The one above is my manager’s skype and is an example of what you should see on that screen. “Account Manager’s Skype”.

This has just been implemented and is great.

Great support and great writing, I highly recommend this site.
